## **SPECIAL ANNOUNCEMENTS**

### **NIE PRICES FOR MICROFICHE (MF) AND PAPER COPY (HC)**

Please consult next page of this Index, **HOW TO ORDER ERIC DOCUMENTS**, for the latest prices and ordering information from the:

ERIC Document Reproduction Service  
P.O. Box 190, Arlington, Virginia 22210

Prices are subject to change. Please refer to the most recent issue of RIE for current ordering information.

---

### **How to Submit Documents to ERIC**

If you have documents or reports which you would like to have considered for announcement in **Resources in Education (RIE)**, you should send clear, legible copies (in duplicate, if possible) to the following location:

Educational Resources Information Center (ERIC), National Institute of Education, Washington, D.C. 20208.

Should the documents be copyrighted, it would be helpful if you could include a letter giving ERIC permission to reproduce in Hard Copy or Microfiche, or Microfiche only. If the latter is selected, and there is a source of obtaining the original publication, please provide ordering and price information.

# HOW TO ORDER ERIC DOCUMENTS

Mail orders to: ERIC Document Reproduction Service  
P.O. Box 190, Arlington, Virginia 22210

## INDIVIDUAL DOCUMENTS:

- Order by accession number (ED Number)
- Specify microfiche (MF) or paper copy (HC)
- Use the price schedule below
- Enclose check or money order PAYABLE TO EDRS
- Official institution, State, Federal government purchase orders accepted

## PRICE LIST

## Introduction

**Resources in Education** is prepared monthly by the Educational Resources Information Center (ERIC) to make possible the early identification and acquisition of reports of interest to the educational community. ERIC is a nationwide information network for acquiring, selecting, abstracting, indexing, storing, retrieving, and disseminating the most significant and timely education-related reports. It consists of a coordinating staff in Washington, D.C. and 16 clearinghouses located at universities or with professional organizations across the country. These clearinghouses, each responsible for a particular educational area, are an integral part of the ERIC system. The clearinghouses are listed on the inside back cover.

All the documents cited in the Document Résumé Section of the journal, except as noted, are available from the ERIC Document Reproduction Service. Availability and prices of document collections are to be found on the How To Order ERIC Document Reproductions page.

Identifiers—additional identifying terms not found in the Thesaurus of ERIC Descriptors.

Women's opportunities for employment will be directly related to their level of skill and experience but also to the labor market demands through the remainder of the decade. The number of workers needed for all major occupational categories is expected to increase by about one-fifth between 1970 and 1980, but the growth rate will vary by occupational group. Professional and technical workers are expected to have the highest predicted rate (39 percent), followed by service workers (35 percent), clerical workers (26 percent), sales workers (24 percent), craftsmen and foremen (20 percent), managers and administrators (15 percent), and operatives (11 percent). This publication contains a brief discussion and employment information concerning occupations for professional and technical workers, managers and administrators, skilled trades, sales workers, clerical workers, and service workers. In order for women to take advantage of increased labor market demands, employer attitudes toward working women need to change and women must: (1) receive better career planning and counseling, (2) change their career aspirations, and (3) fully utilize the sources of legal protection and assistance which are available to them. (SB)

Laboratory Animal Care Training Manual for Instructors and Students.

California Univ., San Francisco. Animal Care Facility.

Spons Agency—National Institutes of Health (DHEW), Bethesda, Md.

Pub Date 73

Note—456p.; Not available in hard copy due to marginal legibility of original document

EDRS Price MF-\$0.76 Plus Postage. HC Not Available from EDRS.

Descriptors—\*Animal Caretakers, Job Training, Laboratory Procedures, \*Laboratory Training, \*Manuals, Study Guides, Teaching Guides

This manual presents item-by-item, step-by-step procedures for the student being trained as a technician in laboratory animal care. Statements are preceded by a box for the student to check when he has read each statement. The first 16 lessons cover: orientation; identifying, handling, and determining the sex of rodents and rabbits, cats and dogs, non-human primates, and farm animals; animal feeds and bedding; caging; special caging; and identifying tools, supplies, special clothing, and machinery. The other lessons pertain to recognizing and reporting disease in laboratory animals; inspecting the environment; cleaning, feeding, and watering animals in direct and indirect bedding cages; caring for animals in pens and special cages; restraint of the animal groups mentioned; blood collection and injection; surgery and euthanasia; vital signs; receiving and shipping rodents and rabbits; receiving large animals; and gnotobiology and breeding colonies. Notes to the instructor are interspersed among the 30 lessons. Most of them serve as suggestions for demonstration, practice, and mastery exercises. The exercises and an audio-visual component are meant to accompany the material presented in the manual. (AG)

Career Education: The USOE Perspective. Occasional Paper No. 4.

Ohio State Univ., Columbus. Center for Vocational and Technical Education.

Pub Date 74

Note—25p.

Available from—The Center for Vocational Education, The Ohio State University, Columbus, Ohio 43210 (\$1.50)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*Career Education, Concept Formation, Data Analysis, Data Collection, Definitions, Educational Legislation, Educational Objectives, Educational Philosophy, \*Educational Policy, \*Federal Government, Government Role, Personal Growth, \*Policy Formation, \*Program Development, Relevance (Education), Speeches, Success Factors

The Center for Vocational and Technical Education initiated the Occasional Paper Series to provide educators and other interested individuals with information dealing with critical issues and problems surrounding the education of human beings. The interest of the center in the entire career education concept stimulated it to include in this series recent views on career education of Dr. T. H. Bell, U. S. Commissioner of Education, and the newly derived career education policy of the United States Office of Education as explained by Dr. Kenneth B. Hoyt, Associate Commissioner, Office of Career Education, Office of Education. Dr. Bell's paper cites examples of the unanticipated success of career education; expresses hopes that career education will be primarily a State and local matter; and points to the need for work to be done in the areas of improved quality, evaluation, and implementation, particularly at the high school level and among special groups. Dr. Hoyt's paper proposes career education as the response to criticisms of the present educational system, through the use of the concept of work. Basic concept assumptions are offered which will represent a philosophic base for career education, programmatic assumptions, suggestions for implementation, and specific learner outcomes which will involve basic educational policy changes. Distribution and Marketing Syllabus.

New York State Education Dept., Albany. Bureau of Secondary Curriculum Development.

Pub Date 74

Note—377p.; Photographs are of marginal reproducibility

EDRS Price MF-\$0.76 HC-\$19.67 Plus Postage

Descriptors—Behavioral Objectives, Business Education, Career Awareness, Course Content, \*Curriculum Guides, \*Distributive Education, \*Grade 11, Instructional Materials, Learning Activities, \*Marketing, Occupational Clusters, Resource Materials, Secondary Education, Student Evaluation, Unit Plan

The distributive education program for grades 7 to 12 is organized around three career education phases: the career education phase (grades 7-10), the distributive phase (grade 11), and the competency cluster phase (grade 12). The grade

11 syllabus provides a six-page introduction which covers scheduling, cooperative work experience, the school store, student clubs, facilities and equipment, teacher certification, and the philosophy of the course. Each of the approximately 150 modules presents behavioral objectives, topics, content and instructional areas, teaching suggestions and student activities correlated with occupational clusters, and evaluation criteria correlated with behavioral objectives. The modules are organized according to the following headings: function, scope and trends of marketing; career opportunities; product information; buying merchandise; merchandise mathematics; marketing research; sales promotion; communications; personal selling; credit and collections; human relations; recordkeeping, manual and automatic data processing; business and government relations, and marketing management. An 18-page multimedia bibliography lists books, periodicals, films, and filmstrips covering the various facets of distributive education. (JR)

Howlett, F. G.

Telemethods.

Ontario Educational Communications Authority, Toronto. Utilization and Project Materials Section.

Note—17p.

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—Audio Video Laboratories, Class Activities, \*Conversational Language Courses, Educational Television, Elementary Secondary Education, \*Film Production, Individualized Instruction, Methods, Modern Languages, Production Techniques, Second Language Learning, Student Motivation, Student Projects, \*Teaching Guides, \*Teaching Methods, Teaching Procedures, \*Television, Video Equipment, Video Tape Recordings

The booklet is a guide to the use of television for teachers of modern languages; it deals with prerecorded programs and with classroom productions. A general methodology which will allow the teacher to use either simplified programs for anglophones or unsimplified programs for native speakers is set out. The suggested method may be adapted to fit particular classes and course objectives, but the teacher must have the desired program on video-tape and operate the videorecorder personally. An outline of basic methodology includes previewing, viewing, and followup activities. Directions are given for accomplishing individualization by setting up a viewing center. Guidelines are offered for classroom TV production; the dialogues and short plays used intensively in the new structural and

audiolingual courses can serve as a basis for student productions which provide motivation for learning and an opportunity to use the skills of listening and speaking which the students have been rehearsing. Some kinds of productions that have proven successful in French classes are outlined, and a four-page plan for a short production of about 15 minutes which involves most of the class is presented, illustrating the various techniques suggested in the booklet. (Author/AJ)

Ziegler, Warren L.  
On Civil Literacy: Working Draft No. 7408.  
Syracuse Univ. Research Corp., N.Y. Educational Policy Research Center.  
Report No.—SURC-TR74-550  
Pub Date Jul 74  
Note—71p.

**EDRS Price MF-\$0.76 HC-\$3.32 Plus Postage**

Descriptors—\*Adult Education, Citizen Participation, \*Citizenship, Citizenship Responsibility, Civic Belief, Community, Educational Philosophy, Political Science, \*Political Socialization, Public Affairs Education, \*Social Action, Social Responsibility

Identifiers—\*Civic Literacy

The paper discusses civic literacy as it bears on adult education. Civic literacy addresses the domain of intentional actions about political community, in a process of discovery and invention, the result of a dynamic interaction between practice and theory. The action-inquiry model of civic literacy consists of two theses and five competencies. The first thesis, the Social Justice thesis, holds that each person acts in concert with other persons to devise social conditions for realization of a good life. The second thesis, the Political Community thesis, holds that the civic literacy of each person depends upon the civic literacy of every person. The five competencies which permit the translation of the theses into a process of learning and doing are: engaging in intentional action; maintaining or creating conditions for others to engage in intentional action; maintaining or inventing collective institutions which can adjudicate among different intentions, consequences, and strategies; discovering through civic action matters of common concern; and testing, extending, or redefining limits and boundaries to civic action through social invention. The competency of inventive action comes full circle: it is the end which illuminates the means of civic literacy, and it is the means to the pedagogy of discovery and invention. (JR)

Donald, James J.  
Industrial Arts in the Open Education Setting; An Analysis of the Rationale of Open Education and its Implications for Industrial Arts.  
Pub Date 74

Note—251p.; Research paper, State University College, Oswego, New York; Some pages in the appendixes may reproduce poorly

**EDRS Price MF-\$0.76 HC-\$13.32 Plus Postage**

Descriptors—\*Child Development, \*Educational Research, Educational Theories, \*Industrial Arts, Learning Characteristics, \*Learning Processes, Literature Reviews, \*Open Education

The study's purpose is to identify the origin and theoretical aspects of open education. In addition, the study applies the theoretical basis to the practices used by the facilitator and the learner in the industrial arts laboratory. Chapter 1 introduces the topic of open education and its implications for industrial arts. It presents the background statement, the statement of the problem, need for the study, the scope and limits, methods and procedures, and definition of terms. In chapter 2 a brief historical background of the open education movement is presented, followed by an overview of the child development theory of Jean Piaget and a discussion of the rationale of open education as it applies to the facilitator, the learner, and the environment. The purpose of chapter 3 is to analyze in detail the material presented in chapter 2. Chapter 4 synthesizes the material of chapters 2 and 3, from which characteristics for industrial arts programs are formulated. Numerous broad conclusions concerning the central theme and recommendations for the learner, facilitator, and environment are given. The document concludes with a four-page bibliography and 44 pages of supplemental materials, including a statement of guiding principles, a survey instrument, criteria for open classrooms, correspondence, and a summarizing statement by the author. (Author/BB)

Simeral, Kenneth D.

The Rapid Adjustment Farm Program's Influence on Other Farms in the Community.

Pub Date 74

Note—129p.; M.S. Thesis, The Ohio State University; Not available in hard copy due to marginal reproducibility of original document

**EDRS Price MF-\$0.76 Plus Postage. HC Not Available from EDRS.**

Descriptors—Adoption (Ideas), \*Adult Farmer Education, Agricultural Education, \*Agricultural Research Projects, \*Dairymen, \*Diffusion, Extension Education, \*Farm Management, Information Dissemination, Innovation

Identifiers—Rapid Adjustment Farm Program

The study investigated the diffusion of innovative farming practices from Rapid Adjustment Farms (RAF) to other farms in southeast Ohio. The RAF program, begun in 1968, introduced new technology and management practices to its participant farmers. After reviewing literature of farming programs' information diffusion, a descriptive survey was made of Rapid Adjustment farmers, county extension agents, and other farmers in the RAF area. Three dairy farms of similar tenure in the program were selected from more than 20 RAFs. A stratified random sample was drawn of 30 dairy farmers in each of three counties, with alternative farms also selected by random number. The 90 respondent farmers were asked whether they: (1) viewed the Rapid Adjustment farmer as an opinion leader; (2) adopted RAF practices, and for how long; and (3) knew the Rapid Adjustment farmer, and in what way. The respondent farmers also gave information about themselves and their farming operations. The interview schedule was pretested in June 1974 and administered in August 1974. Major findings and conclusions of the study are presented, along with recommendations for future RAF administrative decisions. Fifty-three tables give respondents' answers to questions on the interview schedule, often with county breakdowns and statistical analysis of the data. Appendixes contain some of the tables and the interview schedule. A bibliography of materials on diffusion research is included. (SD)

Hall, Budd L.

Non-Formal Education, Redistribution of Wealth and Production.

African Adult Education Association, Lusaka (Zambia).

Pub Date Sep 75

Note—19p.; Prepared for the African Adult Education Association Conference (Kinshasa, Zaire, September, 1975)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

Descriptors—\*Adult Education, Decision Making, \*Developing Nations, Economically Disadvantaged, \*Economic Change, Economic Development, Economic Factors, \*Educational Strategies, \*Nonformal Education, Participation, Political Influences, Social Change

Concepts of development and non-formal education that are needed for the Third World must be broader than a development based on economic growth; they must include not only distribution, but redistribution of existing wealth. Consequently, most new developmental strategies are concerned with placing priority on those groups which are the poorest. Non-formal and adult education is more likely to have a direct impact on the urban and rural poor than formal education. An instrument of political and economic change, non-formal education plays an important role in stimulating participation in decision-making. Another area of concern for adult education is the educating of educators and policymakers which allows both the masses and the leaders to change along the same lines. Further surveys of adult education provision are needed in order to extend coverage to the large portion of the population which is presently not being reached. There is an immediate need for establishment or expansion of research, training, and resource centers in adult education. An integrated approach to planning, which relates adult education to other inputs, and the need for increased involvement of the population in development planning continue to be challenges for planners and educators. (EA)

CE 004 370

Report on Urban Vocational Education.

National Advisory Council on Vocational Education, Washington, D.C.

Pub Date Nov 74

Note—17p.

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

Descriptors—Counseling, Disadvantaged Groups, Educational Demand, Educational Finance, \*Educational Problems, Handicapped Students, Placement, Private Schools, Racial Discrimination, Relevance (Education), School Industry Relationship, Sex Discrimination, \*Urban Education, \*Vocational Education

The National Advisory Council on Vocational Education conducted hearings in Washington, D.C., Pittsburgh, Atlanta, Los Angeles, and Houston, to gather information on the status of vocational education in urban areas. The report summarizes the testimony of the hearings and identifies several common urban problems: demand for vocational education training exceeds current faculty and facilities; expansion and improvement and center-city vocational education programs require increased funding; too many students are trained in fields where there are few jobs; cooperative efforts between educators and the business, industry, and labor communities need to be increased; there is a general need for more and better counseling and the development of effective placement programs; parents, teachers, and administrators continue to assume that all students should be pushed to go to academically-oriented four-year postsecondary institutions; opportunities to maximize the efficiency of the city-wide system are missed due to a reluctance to utilize the resources of the private schools; schools could do more to address the problems of sex and race discrimination in career counseling, training and placement; and there is a lack of adequate programs to provide vocational training for handicapped students. The report lists 17 recommendations for improvements. (Author/PR)

**EDRS Price MF-\$0.76 HC-\$3.32 Plus Postage**

Descriptors—Feedback, \*Flight Training, \*Instruction, Learning Motivation, Nonverbal Tests, \*Performance Tests, \*Task Performance, \*Teaching Methods, Testing, Timed Tests

Incentive, practice, instruction, and feedback were manipulated in a series of four 2 x 2 factorial studies, with Air Force Reserve Officer Training Corps cadets and graduate students in education, to determine the individual and combined effects of these variables on learner performance (both speed and accuracy) of an aircraft comprehension task. For each of the experiments, the report provides details on: methods, subjects, materials, procedures, criterion measures, design and data analyses, results, and discussion of results. Although cadets who either practiced the task or were offered an incentive performed significantly faster on the post-test than learners who did not receive these treatments, the experiments generally indicated that instruction, when it is well-designed, appears to be a variable of such impact that it leaves little room for improvement in learner performance that might be attributable to such refinement as practice, incentive, and feedback. Sample instructional, practice, and post-test materials and tables of results are included. (Author/PR)

LeMaster, W. Dean Gray, Thomas H.

Ground Training Devices in Job Sample Approach to UPT [Undergraduate Pilot Training] Selection and Screening. Final Report, September 1972-August 1974.

Air Force Human Resources Lab., Williams AFB,

Ariz. Flying Training Div.

Report No.—AFHRL-TR-74-86

Pub Date Dec 74

Note—59p.

**EDRS Price MF-\$0.76 HC-\$3.32 Plus Postage**  
**Descriptors—**\*Flight Training, Personnel Selection, \*Predictive Ability (Testing), \*Predictive Measurement, Predictive Validity, \*Predictor Variables, Screening Tests, Simulators, Student Testing, \*Task Performance

The purpose of this study was to develop a screening procedure for undergraduate pilot training (UPT). This procedure was based upon the use of ground-based instrument trainers in which UPT candidates, naive to flying, were evaluated in their performance of job sample tasks; i.e., basic instrument flying. Training and testing sessions were conducted in a highly standardized and tightly controlled environment. Student performance was scored using only objective measures of aircraft control and systems management. The job sample approach proved highly successful in predicting student performance in the T-37 phase of UPT. Attrition, due to causes other than a lack of flying skill, was not satisfactorily predicted by this approach. Two-thirds of the document consists of eight appendices: T-40 program guide excerpts, T-40 instrument procedures excerpts, test forms and scoring excerpts, T-37 phase summary data, forward selection prediction equations for T-37 phase, pass-fail summary data, forward selection prediction equations for pass-fail, and proposed T-40 screening program guide. **Tryout of a General Purpose Simulator in an Air National Guard Training Environment. Interim Report, June 1974-August 1974.**

Air Force Human Resources Lab., Lowry AFB, Colo. Technical Training Div.  
 Report No.—AFHRL-TR-74-92  
 Pub Date Dec 74

Note—16p.  
**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**  
**Descriptors—**\*Job Training, Military Training, Program Effectiveness, \*Simulated Environment, \*Simulators, Teaching Methods

An evaluation of the usability, effectiveness, and acceptance in a job environment was performed on a general purpose simulator using a simulation of a radar system. General purpose simulators permit sharing of a programmable capacity among simulations, thus providing economical hands-on training and training not usually economically available by other means. Training and exercises in malfunction isolation were given Air National Guard personnel. Data obtained using questionnaires, a performance test, and interviews indicated that the simulation was usable, effective, and acceptable. Detailed information concerning: (1) the experience of the personnel receiving training, (2) learning and learning potential, (3) an evaluation of training potential by qualified personnel, and (4) attitudes and acceptance by field personnel was obtained and is reported. The goals of the training program were achieved to a satisfactory level. Actual performance scores also indicated training goal achievement. The pre- and posttest questionnaires are appended. **Descriptors—**\*Adult Basic Education, Adult Development, \*Adult Education, Continuous Learning, \*Educationally Disadvantaged, \*Educational Needs, \*Educational Responsibility, Post Secondary Education, Speeches

In 1969 the Census Bureau carried out a study that found that nearly 85 percent of the participants in all kinds of adult education had successfully completed high school or a higher level of education. The study further showed that the more schooling an adult had completed, the more likely he or she would be to pursue some kind of further education. A study, in progress for more than three years, has been examining the question of what is a minimally effective core education for adults. The study has established adult proficiency levels based on real life situations, and has shown that one out of five American adults, an estimated 15 to 20 million, today lack the basic

skills required to sustain themselves and their families. To find ways of reaching these adults and convincing them that they can take hold of their own destinies, and then delivering on that promise, is a mission of the highest order in education. A plan for life-long learning should help adults find meaning and fulfillment in their living, provide them with the skills to be productive and independent, and increase their capacity to function as parents with love, hope, and guidance for their children. An important goal of vocational education is to accept the responsibility of social and economic change for the benefit of the individual as well as the broader society and to provide a meaningful curriculum for all youth. The humanizing of vocational education is to recognize that preparation for employment is the price tag of the technological age. A student must learn to "know thyself", to "give thyself", and to "support thyself." The career development continuum within the State of Ohio consists of: (1) education for career choice, (2) education for work, and (3) continuing education for upgrading and retraining. Education for work is concerned with helping people prepare for productive employment and includes a broad vocational program at the high school level and post-high school technical/vocational education or professional education. Area vocational education centers in Ohio are full-day centers with three-fourths of the day allotted to instruction in trades and one-fourth to required academics. Other humanizing aspects are: the Occupational Work Adjustment program for dropout-prone 14- and 15-year-old students, the Occupational Work Experience program for mentally handicapped youth 16 and above, the home/family living/consumer education program, and additional programs for the handicapped and the disadvantaged. The document comprises a collection of speeches and seminar reports arising from the 25th anniversary celebration of the Institute of Adult Education at the University of Ghana. The theme of the celebration, introduced in the first chapter, was Adult Education and Man's Environment—the Next Quarter-Century. The second chapter comprises the following speeches: A Quarter of a Century: Past and Future, A. A. Kwapong; The Nation and the Institute, I. K. Acheampong; The Role and Objectives of the Environmental Protection Council of Ghana, E. A. Boateng; The Human Environment; Letitia Obeng; and The Relevance of Adult Education, R. K. A. Gardiner. The third chapter contains reports from seminars on: utilization of wildlife, forestry and agriculture, water resources, ur-

banization, industrial development, rural development, tradition and modernization, and the population explosion. A paper is included reporting a study which grew out of a symposium: Adult Education and Man's Environment: The Uganda Case, by D. N. Okunga. The final contribution is The Ghana Institute of Adult Education: 1948-1973, by K. A. B. Jones-Quarte. (PR)

**Descriptors—**\*Career Education, \*Disadvantaged Groups, Employment Experience, \*Followup Studies, Income, Job Satisfaction, Motivation, Program Effectiveness, Work Attitudes Identifiers—\*Mountain Plains Program

The followup study assessed employment variables among persons who had experienced the Comprehensive Residential Family Career Education Model IV of the Mountain-Plains program. The assessment was accomplished by focusing on the current status of former Mountain-Plains students with regard to work variables: income, satisfaction derived from work, quality of work as perceived by employer, motivation to work, and alienation from work. Twenty-four disadvantaged families were sampled stratified random fashion by completion of status and area of enrollment. For comparative purposes three additional reference groups were identified and tested. The measurement techniques used for testing the variables for each group were: the Job Descriptive Index (JDI), Minnesota Satisfaction Scales (MSS), Job Motivation Index (JMI), Work Alienation Scale (WAS), and the Obsecance Scale (OS). The testing procedures and design, and the results for each of the variables tested are briefly discussed. Higher scores were made after the program than on entry on all variables except alienation and obsecance. The document concludes with a general discussion of the findings and a brief explanation of the study's weaknesses. A two-page bibliography is appended. (Author/BP)

**Current Perspectives in Distributive Education.**

Pub Date 74  
 Note—363p.  
 Available from—Kendall/Hunt Publishing Company, 2460 Kerper Boulevard, Dubuque, Iowa 52001

**Document Not Available from EDRS**

**Descriptors—**Adult Programs, Advisory Committees, Career Education, \*Curriculum, Disadvantaged Youth, \*Distributive Education, Educational Research, Instructional Materials, Marketing, Merchandising, Post Secondary Education, \*Program Development, Program Evaluation, Program Planning, Secondary Education, Special Programs, Student Placement, Student Teaching, Tourism, Urban Education Identifiers—\*Readings (Collections)

The volume on current perspectives in distributive education contains 29 individually authored articles organized into three sections. The first section on program conceptualization deals with the following subjects: the evolution of distributive education, program planning, advisory committees, placement services, postsecondary distributive education, adult programs, distributive education and the disadvantaged, and training agreements. Section two on curriculum and instruction deals with these subjects: curriculum options, curriculum uniformity, postsecondary career education, specialized urban programs, incremental learning materials, store/laboratories, adult distributive education for the entrepreneur, learning activity packages, distributive education in the middle grades, marketing, tourism, and model store plans. Section three on facilitating functions and services deals with the following subjects: curriculum laboratories, research, statewide evaluation systems, distributive education supervision in urban school systems, and student teaching in distributive education. **Descriptors**—Academic Achievement, \*Correctional Education, Correctional Rehabilitation, Corrective Institutions, Criminals, Delinquent Rehabilitation, Educational History, Educational Improvement, Educational Needs, Educational Objectives, \*Educational Programs, Educational Psychology, Institutionalized (Persons), Intelligence, Intelligence Tests, \*Program Descriptions, Teachers, Teaching Methods, \*Youth, \*Youth Programs

The introduction to the survey of educational programs for juvenile offenders in correctional institutions briefly outlines the educational problems and priorities in the prison setting. Chapter one discusses the history of such programs over the last 150 years, especially considering the use and biases of intelligence tests during the last 50 years and the recent development of a holistic approach to intelligence. Chapter two surveys the educational programs in 29 juvenile correctional institutions in the Western U. S. which responded to mailed questionnaires regarding types of programs offered, kinds of teaching methods used, training and background of teachers and their opportunities for continuing education, and students' present achievement levels and current learning difficulties. Chapter three discusses current issues in education for juvenile offenders, dealing at length with issues within institutional classrooms, and less extensively with the problem of linking institutional programs with the community. Chapter four discusses new objectives for integrating the school and the community into correction and presents an agenda of priorities consisting of children's rights to learn, to earn, and to live and develop. Chapter five surveys ten innovative programs in juvenile correctional institutions around the country, providing the name of a contact person for each program. (JR)

**Descriptors**—\*Correlation, \*Educational Research, \*Effective Teaching, Prediction, Predictor Variables, Questionnaires, Student Attitudes, Student Behavior, Suburban Schools, Tables (Data), Teacher Attitudes, Teacher Behavior, \*Teacher Characteristics, Teacher Evaluation, Urban Schools, Vocational Education Teachers

The document reports the second phase in a project to determine the relevant and important characteristics of effective teachers and deals with the identification of predictor constructs in the evaluation of vocational teachers. The objectives involved: (1) obtaining predictor constructs in the areas of biographic-demographic information about the teachers and schools, teachers' perceptions of their instructional and non-instructional tasks, their perceptions of their students' behavior, and students' perceptions of their teachers' behaviors; (2) obtaining a subjective judgment criterion of teacher effectiveness (principals' rating) in the inner-city urban and outer-city suburban areas; and (3) determining the relationships between the predictor constructs and the criterion. Six questionnaires were used to establish both predictor constructs and criteria. The respondents were 337 high school vocational teachers in all areas selected nationwide from lists submitted by State supervisors and teacher

educators, and the principals of the listed teachers. Ninety-five tables present the findings and data analysis. A discussion of the findings is followed by three conclusions and by recommendations relating to further study in search of performance-based criteria of teacher effectiveness and of dimensions of teacher behavior relating to teacher effectiveness. **Descriptors**—\*Association Tests, \*Computer Programs, Psycholinguistics, \*Verbal Stimuli Identifiers—\*RCMAT, Relatedness Coefficient Matrix Program

The report describes the characteristics and usage of a computer program, the Relatedness Coefficient Matrix Program (RCMAT), designed to summarize associative responses given to verbal stimuli by individual respondents and by groups of respondents. The computer program uses the response distributions for individuals, and the pooled response distributions for groups, to compute measures of associative relatedness between pairs of verbal stimuli. The program was written for an exploratory investigation of the use of word association procedures to assess the affective and descriptive meanings workers associate with their work environments. The RCMAT program is written in Fortran IV, level G. It calculates relatedness coefficients between all pairs of up to 100 stimulus words. Output is in the form of an S x S pair-wise matrix, where S is the number of stimulus words. Input consists of a problem card, a list of stimulus words, and each subject's response distribution for each stimulus word. Either individual or pooled relatedness coefficients may be calculated. Program listing, sample output data, and a bibliography are appended. (Author/JB)

**Descriptors**—\*Adult Basic Education, Adult Education, \*Adult Educators, Knowledge Level, \*Performance Criteria, \*Surveys, Teacher Attitudes, Teacher Behavior, Teacher Evaluation, Teacher Response, \*Teaching Skills Identifiers—Adult Basic Education Teacher Competency Inventory, Idaho

The report is based on a survey of the Adult Basic Education (ABE) teachers in Idaho. A total of 72 usable returns were received, representing a 70 percent response rate. Demographic data for the Idaho respondents and their ranking of the competencies both in terms of their perception of their own competencies and in terms of their opinions as to competencies needed by ABE teachers are presented and discussed. Responses from the survey are discussed in terms of a profile of Idaho ABE teachers and their training priorities and degree of competency. Recommendations are made in four general categories: preservice training and teacher preparation, inservice training, teacher certification in ABE, and ongoing and periodic assessment of training needs. The revised Adult Basic Education Teacher Competency Inventory and a table show-

ing a comparison of mean scores on terms in the ABE learner category are appended. (BP)

*Byfield, Hal And Others***Career Education: In-Service Teacher Training Guide for Teachers, Administrators, and Counselors.**

Northern Arizona Univ., Flagstaff.

Pub Date 15 May 75

Note—170p.

**EDRS Price MF-\$0.76 HC-\$8.24 Plus Postage**

**Descriptors**—\*Career Education, Course Content, \*Curriculum Guides, Educational Objectives, \*Inservice Teacher Education, Instructional Materials, \*Teacher Education

The guide was developed to establish a structural approach to training teachers, administrators, and counselors in the philosophy and techniques needed to integrate career education into instructional programs at all levels. It comprises a one-semester course to be taught in extension courses or seminars, and is divided into 12 sessions: background and rationale, developmental level outcomes for career education, constructing objectives to meet outcomes, developing content consistent with objectives, evaluating and assessing student behavior, implementing varied instructional strategies, developing mini-units, focus on affective career education/preparation for field experience, availability of materials in county media centers, follow-up of field experience/utilizing community resources, guest speaker presentation/identifying interest through testing, and a commitment to career education. Content of each session is presented under the headings of: goal statement, instructional objectives, lesson time, prerequisite sessions, resources required, instructor preparation tasks, instructional procedures (presented in detail), and debriefing. Each session is followed by a bibliography, exercise sheets or tests, and transparency masters and other teacher aids. (PR)

Pub Date 2 May 75

Note—21p.; Paper presented at the New Hampshire Vocational Association Conference (Manchester, May 2, 1975); Best copy available

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

**Descriptors**—\*Educational Planning, \*Futures (of Society), Speeches, \*Vocational Education

Several general areas of concern exist for those involved in the future of vocational education. In-

dustrial needs and manpower projections should be examined more critically; perhaps the work should be designed for the worker, and perhaps more attention should be directed to national and international job trends, and less to local trends. Changes in student population and Federal legislative policies must also be considered by planners. Vocational education directors have a responsibility to keep current inventories of job opportunities at local, State, national, and international levels. Consideration must also be given to the numbers of students who enter and remain in college and to the selection of vocational education teachers. More efficient use must be made of present school facilities. Teacher in-service and pre-service programs need to be made more effective and industrial arts education and educators need to become more closely involved with vocational education. Vocational education programs must determine carefully their objectives and philosophy. Student needs must be given high priority, and more refined methods of student selection must be developed. **Identifiers**—AFDC, Aid To Families With Dependent Children, Jobs and Income, JOIN, Work Bonus Tax Credit

The report describes the construction, application, and theoretical implications of an econometric model depicting the effects of labor subsidies on the supply of workers in the U.S. Three papers deal with the following aspects of constructing the econometric model: (1) examination of equilibrium wages, employment, and earnings of primary and secondary workers in eight family types according to the age, sex, and education of the family head; (2) aggregation of primary individuals into reasonably homogeneous wage rate groups not too disparate in size; and (3) development of a dynamic disequilibrium model of the labor market which integrates search-turnover theory with the theory of supply and demand. Three papers deal with the results of simulations of the following programs: (1) the Work Bonus Tax Credit for all families with dependent children; (2) the Jobs and Income (JOIN) Program for low wage individuals; and (3) the Aid to Families with Dependent Children Program. Finally, three papers deal with theoretical analysis: (1) the effects of a progressive income tax on a multi-worker family; (2) the effects of changes in personal income tax parameters on the individual's decision of how to allocate time between labor and leisure; and (3) the effects of increasing payroll taxes on the labor supply. **Descriptors**—\*Adult Education, \*Adult Students, \*Educational Needs, \*Participant Characteristics, Post Secondary Education, Questionnaires, \*Surveys, Tables (Data)

**Identifiers**—\*Needs Assessment, New York

The report describes a survey of postsecondary continuing education needs in the 16 county Northeastern region of New York State. The sur-

vey gathered information from a random sample of the general population, a representative sample of continuing education students, and 200 major employers in the region. Comparing leisure time activities and demographic data between users and non-users, the study found some characteristics comparable and others contrasting. Occupationally there were more white collar workers among the users than among the non-users, and the percentage of homemakers was nearly equal to both groups. Regarding class time and format, both users and non-users preferred evening hours and the college campus setting. Regarding financing of postsecondary continuing education, both users and non-users favor public support for continuing education to supplement current subsidy plans. The report recommends that off-campus learning centers be established in localities more than 20 miles from an existing institution, and that financial support be offered to non-users. The report reproduces the current student survey with percentage responses, and presents the results of the employer survey in tabular form. Appendixes providing the three survey questionnaires, survey background data, and regional characteristics cover 77 pages. (JR)

**Descriptors**—\*Behavioral Science Research, Correlation, \*Decision Making, Educational Background, Experience, Officer Personnel, Problem Solving, Qualifications, Role Perception

The importance of decision making to organizational existence has provided ample justification for many forms of research into the complex decision making process. The decision making process in modern, large organizations draws inputs from and provides outputs to many smaller internal decision units. Incompatible or conflicting inputs and outputs may result in wasteful sub-optimizations. The research report of an investigation conducted among commissioned officers in the U.S. armed forces examines one possible underlying course of such conflicting inputs and outputs: the existence of differences in decision makers' formal education and work experience backgrounds. A decision making experiment was conducted to obtain information bearing on relationships between choice of alternatives and education background, work experience background, and the decision maker's prescribed role. It was found that there were tendencies toward differences in homogeneity of choice and in adaptability to a change in role among individuals categorized into several educational and experience background categories. Appendixes, which provide the test instruments, education and experience background categories, and test data specifying hypotheses of common choice and change in alternative when role changed, comprise half the document. **Identifiers**—\*Highlander Folk School Tennessee, Problem Centered Curriculum

The book recounts the history and explains the philosophy of Highlander Folk School in the Cumberland Mountains of Tennessee. Devoted to

social reform, the school has functioned in an unconventional way to develop leadership and participation in three social movements in the South: the labor organizing drives of the thirties, the civil rights movement of the fifties, and the Appalachian movement of the sixties. Subject to constant criticism and harassment, the school has continued to operate, without planned curriculum or courses, at its defined task: to make class-conscious workers who envision their roles in society, and to furnish motivation as well as technicians for the achievement of this goal. Myles Horton, founder of Highlander, found that an effective way to help students to understand the present social order is to throw them into conflict situations where the real nature of society is projected. The Highlander education does not include reading or work skills; its center is problems defined by the people. The teachers' job is to get the people talking about problems, to raise and sharpen questions, and to trust people to come up with the answers. Students share knowledge and experience and call on community resource people. (Author/AJ)

Descriptors—Adult Education, \*Adult Educators, Audiovisual Aids, Audiovisual Instruction, Cross Cultural Training, \*Cultural Awareness, Culture Conflict, Curriculum Planning, Guidelines, Program Design, \*Program Planning, Stereotypes, Teacher Education, \*Teacher Workshops, Training Objectives, \*Training Techniques

The handbook provides a framework for planning and conducting a cultural awareness training program for adult education personnel. There is consideration of the problems of training goals and objectives; design of the instructional program; determination of physical requirements; coordination with administration, personnel, and budget; preparation, coordination, and approval of a training memorandum; and planning, supervision, evaluation, and follow-up of the training effort. There is a detailed outline of a three-day program in cultural awareness; the outline includes short lectures and audiovisual materials that deal with the topics: cultural awareness in America, stereotyping, implications of culture for adult education, culture conflict and curriculum, spaces between people, cross-cultural communication, and getting in touch with feelings. The outline also includes instructional suggestions, lists of materials needed, and recommended readings. Approximately two-thirds of the handbook is devoted to the following appendixes: suggested material for a training notebook, suggested material to be distributed at an adult educators' workshop, an annotated bibliography of both printed and audiovisual materials related to cultural awareness, and a guide to the effective use of audiovisual materials. Toward an Adult Learner Profile: An Administrative Report.

State Univ. of New York, Buffalo. Div. of Continuing Education.

Pub Date Jun 75

Note—23p.

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*Adult Education, Adult Programs, \*Adult Students, College Programs, Demography, Educational Background, Evening Students, \*Noncredit Courses, Participant Characteristics, Post Secondary Education, Racial Composition, \*School Surveys, \*Student Characteristics, Tables (Data)

Identifiers—Buffalo, State University of New York

The report describes a statistical study of persons in credit-free programs at the State University of New York at Buffalo. Designed to develop a survey instrument for determining an adult learner profile, the study was conducted among the 1,486 persons registered in such programs in the fall of 1974 (of whom 676 responded to the written questionnaire), a group analyzed to be highly representative of the sample universe. The study determined that in the sample: most students were white, most were affiliated with either the Catholic, Protestant, or Jewish religious denominations, most were 30-39 years old, most were married, the median family income was \$12,001-\$15,000, a plurality were employed in professional and technical occupations, and the median highest level of education was three to four years of college. Regarding student involvement with the credit-free programs, the study determined that: most students obtained information through brochures mailed to their homes; most students considered course topic as their prime consideration in course selection; although time of class meeting was of secondary importance, most students preferred weekday evenings; and of much less significance were location, transportation, and baby-sitter availability. Seven pages of the document present supporting tables. (JR)

Descriptors—Community Colleges, Cosmetology, Economic Climate, Educational Demand, \*Educational Economics, Educational Research, \*Enrollment Influences, Government Role, Labor Market, \*Program Evaluation, \*Proprietary Schools, Tables (Data), Technical Education, \*Urban Schools, Vocational Education, Vocational Schools

The objective of the research is to examine how vocational proprietary schools in the Chicago area function by analyzing the schools as an industry and by treating the proprietary school as an economic entity. Several aspects of proprietary schools are analyzed: the stability, profitability, and general fiscal characteristics of the industry; the mechanics of market structure and operation within a subsector; the effect of labor market conditions on the demand for proprietary school training; the responsiveness of a proprietary school to changing market conditions and changing technology; and the influence on a school of the recent and rapid expansion of a community college offering similar courses. One chapter of the study is devoted to a time and area analysis of the cosmetology industry, and a final chapter summarizes the major findings of the research. The study is supported by a large number of statistical tables, charts, and appendixes. (Author/PR)

Pub Date 27 May 75

Note—40p.; For related document, see CE 004 415

EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage

Descriptors—Career Awareness, \*Career Education, \*Curriculum Development, Curriculum Planning, Individualized Curriculum, \*Individualized Instruction, \*Teacher Education, Teacher Motivation, Teaching Methods, Training Techniques, \*Transparencies

The publication is designed for use in teacher education and directed towards curriculum development in career education. The collection of 24 transparencies provides illustrations of the advantages of module building for a career paths course that involves specific objectives, diagnostic pretesting, alternative learning environments, and mastery post-testing in order to provide learners with packages of self-instruction. A pretest enables the students in teacher education to classify themselves as either "module builders" or "course choppers" in developing instructional materials. The "module builder" prespecifies objectives, diagnostic pre-testing, learning environments, and mastery post-testing in order to make sure that individuals receive learnable packages of self-instruction, while the "course chopper" is more interested in the external form of a module than in the opportunity for individualization. An analytical table of contents provides the title of the transparency and the function in order to effectively delineate the advantages and incentives of "module building," thereby demonstrating the disorganization of a "course chopper." Descriptors—\*Career Education, Case Studies (Education), Community Attitudes, \*Curriculum Development, \*Primary Education, \*Program Evaluation, Questionnaires, Teacher Attitudes, \*Teaching Techniques

The documented case history is an account of how three teachers handled a prepackaged career education component for grades K-3. The article is divided into three sections: (1) the career education materials they received; (2) their reactions to these materials; and (3) a few guidelines. The materials present formulated objectives, considerations, resources, eight activities, and an evaluation procedure. Section two discusses how the three teachers adapted the materials and presents the questionnaire that the Superintendent of Schools sent out to the community to be utilized as feedback to the career education program. Section three is an enumerated list of guidelines. (JB)

Descriptors—Curriculum Development, Data Analysis, Educational Needs, Educational Programs, \*Health Occupations Education, Occupational Surveys, \*Optometrists, \*Paramedical Occupations, Post Secondary Education, \*Surveys, Tables (Data), \*Task Analysis

Identifiers—\*Optometrist Assistants

The two-part task analysis provides data relating to: (1) the frequency and proficiency of tasks in an optometric practice that are presently or could be assigned to an assistant and (2) the employment potential for trained optometric assistant graduates. The results were to be utilized for curriculum development for the optometric assistant training program. A task analysis survey form was sent to the 347 members of the Wisconsin Optometric Association and to the 65 Optometric Assistants of Wisconsin members (with 50.4 percent of the optometrists and 66.2 percent of the assistants responding). The analysis and implications of the general information

data are discussed and indicate the necessity for curriculum to include skills and knowledges for the graduate to successfully meet certification requirements. The task analysis data, the second section, examines 14 task categories and concludes that further studies should be made in the selection of tasks for the curriculum. The 70-page appendix includes correspondence, the task analysis survey form, responses, and analyses of frequency and proficiency in tabular and graph form. The accompanying supplement to the final report supplies general information and averages of frequency responses. (JB)

Identifiers—\*Lithography, Navy

The rate training manual and nonresident career course (RTM/NRCC) form is a self-study package that will enable third class and second class lithographers to fulfill the requirements for that rating. Chapter one provides a brief history of printing and discusses the duties and qualifications of the Navy lithographer. Chapters two through eighteen are composed of such course topics as job planning, cold type composition, artwork preparation, photographic equipment, photographic materials, the line negative, the halftone negative, negative corrections and stripping, platemaking, the offset press, the multilith 1250, the A. B. Dick Offset Duplicator (Model 350), the ATF 20 and 20A Presses, paper and ink, bindery equipment, letterpress printing, and shop administration. Numerous diagrams and illustrations are included throughout. The document concludes with four appendixes of additional materials: reference reading, a formulary, maintenance of lithographic equipment, and a glossary. A subject index and the assignment booklet (a component) of the Nonresident Career Course conclude the document. (BP)

Descriptors—Conservation Education, Educational Coordination, Environmental Education, Instructional Improvement, \*Performance Based Teacher Education, Program Improvement, \*Student Teachers, Student Teaching, Surveys, Teacher Attitudes, \*Teaching Skills, \*Vocational Agriculture, \*Vocational Agriculture Teachers

Recognizing the need for competency-based teacher education to become more closely coordinated with the field of experience of teachers, the study focuses on identifying professional competencies which majors in agriculture and natural resources education should have developed prior to student teaching. Based on interviews with four supervising teachers, a checklist of competencies was prepared and mailed to 27 vocational agriculture teachers (who had served as supervising teachers) who were asked to rank the degrees of need for mastery of each competency. The analysis of the 20 respondents indicates a great or considerable need for student teachers to have developed several competencies prior to their field work. Ratings are presented in tabular form. Nine of the highly rated competencies (instructional planning, instructional materials and resources, conducting instruction, supervised occupational experience programs, working with FFA, evaluating instruction, counseling, maintaining community relations, and maintaining a professional role) are summarized. Recommendations stress coordination of the segments of teacher education programs and improvement of these programs. An appendix containing the checklist of competencies and accompanying letter conclude the report. (JB)

Performance Objectives in the Teaching of Vocational Agriculture. Professional Series in Agricultural Education, No. 3.

Michigan State Univ., East Lansing. Dept. of Secondary Education and Curriculum.

Spons Agency—Michigan State Dept. of Education, Lansing. Vocational Education and Career Development Service.

Pub Date Aug 73

Note—26p.; For related document, see CE 004 420

EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage

Descriptors—\*Behavioral Objectives, \*Curriculum Development, Curriculum Planning, \*Educational Objectives, Individual Differences, \*Performance Based Education, Performance Criteria, Vocational Agriculture, \*Vocational Agriculture Teachers

The use of performance objectives in vocational agriculture is put into perspective with two assumptions. First, in formulating performance objectives, the teacher must consider the program objectives, the characteristics of the students, and the teaching resources of the community. Second, the diversity of interests, abilities, and other characteristics of teachers preclude the uniformity of general prescriptions for all teachers. The definition of the concept of a performance objective, its basis and origins (employability of students, task analysis, and goal statements), and special considerations in formulating objectives are defined. Presentations in the affective domain (attitudes and values), differences between performance objectives and other objectives, and performance objectives in the vocational agriculture field that encompass the utilization of community resources and problem-solving techniques are examined. A selected bibliography on instructional objectives completes the document. (JB)

Career Education and the Rural School Curriculum.

Pub Date Jul 75

Note—14p.

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*Career Awareness, \*Career Education, Career Exploration, Community, Curriculum Development, \*Elementary Secondary Education, Occupational Information, \*Program Descriptions, \*Rural School Systems, Self Concept, Vocational Development, Vocational Maturity

Identifiers—New Hampshire (Groveton)

New Hampshire Supervisory School Union 58--Experimental Schools project (Groveton, New Hampshire) has developed a rural schools oriented career education program for grades K-12, which incorporates the total community. The program focuses on three major themes: (1) Self Awareness--Who Am I? (kindergarten and grade 1), (2) Awareness of Community Workers (grades 1-3), and (3) Awareness of the World of Work (grades 3-12). In grades 3-6, emphasis is on student awareness of the world of work, while in grades 7-8 exposure to the world of work is through career guidance seminars, observational activities, and elective mini-courses. In grades 9-12, students are involved in elective mini-courses, career exploration seminars, and worksite placement. Teachers write their own career awareness lessons with assistance from the career/vocational education coordinator and then test them in their classrooms and revise them before distribution to other teachers. The Cornell Career Awareness Inventory and the Career Maturity Inventory are used to determine levels of career awareness and vocational maturity. An integral part of program development is direct teacher involvement in the process through in-service training. (EA)

A Comprehensive Study of Vocational Interests, Occupational Opportunities and Cooperative Education for the Mid-Plains Nebraska Technical Community College Area.

Pub Date 75

Note—9p.; Paper presented at the Annual Meeting of the American Education Research Association (Washington, D.C., April 1975)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*Community Colleges, \*Cooperative Education, Curriculum Development, \*Educational Assessment, \*Educational Planning, Employment Opportunities, Manpower Needs, Occupational Information, Occupational Surveys, School Surveys, Secondary School Students, \*Technical Education, Vocational Interests

Identifiers—\*Nebraska

The main purpose of the study was to develop a cooperative education plan for the Mid-Plains Technical Community College area through assessment of: (1) vocational interests of students in grades 9-12, (2) occupational opportunities of employers, and (3) various existing cooperative education programs. Vocational interest assessment consisted of administration of the Ohio Vocational Interest Survey and the Minnesota Work Values Inventory to 929 secondary students; occupational opportunities were assessed by analyzing 827 valid employer responses to an Occupational Opportunities Survey and a Cooperative Education Resources Survey. Visitation was made to all Nebraska two-year postsecondary institutions with Federal cooperative education programs as well as other selected technical community colleges with non-governmental programs. Exemplary cooperative education programs in other States also were surveyed. Findings indicated that, despite high interest levels, only about one-third of the high school students were enrolled in vocational or business-oriented programs. Future enrollments in postsecondary vocational-technical and business schools were highly related to early identification of students. The top-ranking interest area was farming-fishery-forestry, while the greatest occupational need was in the category of services. It was concluded that training programs in the services area were needed, especially for food and beverage preparation and service. (EA)

**Descriptors**—Biomedical Equipment, \*Curriculum Development, Curriculum Guides, Educational Programs, Field Studies, Instructional Materials, \*Medical Laboratory Assistants, Pilot Projects, Post Secondary Education, Program Coordination, Program Descriptions, \*Program Design, \*Program Development, Program Evaluation, \*Technical Education

The report describes the Biomedical Equipment Technology project carried out by Technical Education Research Centers between 1967 and 1974. The project developed a curriculum and a program for training biomedical equipment technicians in two-year schools. The report discusses the three phases of the project: development of pilot programs, coordinated program development, and dissemination and implementation. Details are provided on the development of a curriculum guide, the development and testing of instructional modules (17 modules in medical electronics and instrumentation are described briefly in an appendix), the development and dissemination of the educational program, and the internal and external evaluation of the project. Appendixes comprise approximately half of the report and include: a summary of project goals and materials developed; a description of the field trials of the medical electronics and instrumentation modules; lists of institutions, business, and industries involved in the project; figures on the dissemination of project products; and reprints of three relevant articles. **Descriptors**—\*Cluster Analysis, \*Cluster Grouping, \*Literature Reviews, \*Occupational Clusters, Occupations, Tables (Data), Taxonomy

**Identifiers**—OAI, \*Occupational Analysis Inventory

The study explored the feasibility of deriving an educationally relevant occupational cluster structure based on Occupational Analysis Inventory (OAI) work dimensions. A hierarchical cluster analysis was applied to the factor score profiles of 814 occupations on 22 higher-order OAI work dimensions. From that analysis, 73 occupational clusters were identified and interpreted. Although those clusters were for the most part individually meaningful, the desired hierarchical pattern of clustering did not emerge in an interpretable form, and 155 of the 814 occupations in the sample failed to cluster in a logical manner at any stage of the hierarchical process. Several factors are considered that may have attenuated the clarity of the hierarchical structure. There is a long review of literature and a brief description of the clusters grouped under the following occupations: technical/scientific, business/organizational, clerical, sales/service, health-related, teaching/counseling, art/decorative, stationary machine operating, service/repair of electrical and mechanical systems, environmental/earth-working, and manual. Nearly half of the document comprises appendixes treating: importance scale, occupational clusters formed on the basis of OAI-derived higher-order work

dimensions, and mean work-dimension and attribute-requirement profiles for 73 OAI-derived occupational clusters. (Author/PR)

**Identifiers**—Appalachia Educational Laboratory, EBCE, \*Employer Based Career Education

The report examines demographic and attitudinal characteristics of the 44 students who entered the Appalachia Educational Laboratory's Employer-Based Career Education (AEL/EBCE) program in September 1972 and January 1973. The data were obtained from student information sheets completed in February 1973. Regarding home and family life, the majority of students lived with both natural parents, in male dominated family settings. All but one of the students were unmarried. Frequency of dating varied considerably between the sexes and the class groups. The students' attitudes toward school were neutral and expressed neither strong approval nor disapproval, but most students indicated that they would continue in school even if attendance was voluntary. A substantial number of students rated their homework assignments as difficult. With respect to vocational and educational plans, one-half indicated a desire to graduate from college, and despite their involvement in the EBCE program, in some cases for as many as five months, many made their plans without help from anyone. Twenty-four tables, comprising over half the document, follow the text. (Author/JR)

**Descriptors**—Career Awareness, \*Career Education, Demonstration Programs, Educational Programs, Evaluation, Individualized Programs, Pilot Projects, Secondary Education, Secondary School Students, Standardized Tests, \*Student Characteristics, Tables (Data), Testing, Test Reliability, \*Test Results, Test Validity, Vocational Development, \*Vocational Maturity, \*Work Experience Programs

**Identifiers**—Appalachia Educational Laboratory, \*Career Development Inventory, CDI, EBCE, Employer Based Career Education

The report analyzes the values of the Career Development Inventory (CDI) as a means of assessing the vocational maturity of the 44 students in the Appalachia Educational Laboratory's Employer-Based Career Education (AEL/EBCE) program. The test instrument measures attitudinal and cognitive skills which correspond with program goals, and was considered sufficiently reliable and valid as a measure of vocational maturity for the purposes of evaluating the AEL/EBCE program. The results of the administration of the CDI to the students on three occasions indicate that EBCE students performed best on the cognitive section of the test, and poorest on the first of two attitudinal sections. The report concludes

that compared with a tenth grade norm group, the EBCE students' entering scores on the CDI were low, and the rank of the subtest scores was the reverse of the expected order. The test also indicated the importance of a counselor with wide-ranging knowledge of vocational development theory and a variety of career experiences on the cognitive career skill development of the students. **Identifiers**—Appalachia Educational Laboratory, EBCE, Employer Based Career Education, \*Iowa Tests of Educational Development, ITED

The report assesses the ability of the 44 Appalachia Educational Laboratory's Employer-Based Career Education (AEL/EBCE) students to maintain their expected academic competence as measured by a nationally normed achievement test, the Iowa Tests of Educational Development, administered at different times during the 1972-73 program year. The students comprised two groups: those entering in September 1972 and those entering in January 1973. The former were tested in September 1972 and in February and May 1973; the latter were tested in February and May 1973. Test results indicated that: students registered much greater competence in mathematics than in reading, language arts, social studies, science, and the use of sources; during the year the students' growth rate exceeded the expected growth rate, even in mathematics, in all areas except use of sources; there were no significant test score differences between the group which participated for the entire academic year and the group which participated for only half of the year; and whether students took courses for credit or non-credit had little apparent effect on performance in science, social studies, and mathematics. Three appendixes provide variance tables for growth score comparisons, post-test raw score comparisons, and subtest scores according to sex and credit/non-credit differences. (Author/JR)

**Identifiers**—Appalachia Educational Laboratory, EBCE, \*Employer Based Career Education

The report evaluates attitudinal changes among the 44 Appalachia Educational Laboratory's Employer-Based Career Education (AEL/EBCE) students during the 1972-73 academic year, as mea-

sured by the semantic differential, a test in which students were asked to select one of seven spaces separating bipolar adjectives for each of 20 pairs of adjectives describing nine different concepts or abstractions. Students examined at the beginning of their involvement in the program (Group One beginning in September 1972 and Group Two beginning in January 1973) indicated a positive attitude to only one concept, education; all other concepts were viewed as neutral. The data also indicated that the attitudes of Group One students remained fairly stable during the year. A comparative analysis of the Group One and Group Two students showed that none of the group main effects were statistically significant on any of the nine concepts, and that although some group by adjective interaction effects were found, none were meaningful in terms of the questions for which answers were sought. Of the report's three appendices, one reproduces the semantic differential test instrument, and two provide statistical tables depicting analyses of variance for the test concepts. (Author/JR)

**Identifiers**—Appalachia Educational Laboratory, EBCE, Employer Based Career Education, KOIS, \*Kuder Occupational Interest Survey

The report investigates the pattern of interests among the 44 students at the Appalachia Educational Laboratory's Employer-Based Career Education (AEL/EBCE) program during the fall, winter, and spring of the 1972-73 program year as measured by the Kuder Occupational Interest Survey (KOIS). Group One students (those matriculating in September 1972) took the test on all three occasions; Group Two students (those matriculating in January 1973) took it on only the latter two occasions. Thirteen significant correlations were found, indicating that the number of significant occupational and college major interests of the first group of male students (17 students) was rather stable. These correlations show that students with higher numbers of interests retained higher numbers of interests. The number of occupational interests of the second group of females (13 students) was stable. Verification scores were stable, except for the second group of 10 male students. No significant differences were found in the number of significant interests in occupations or college majors for males or females in either the first or second groups between any two occasions. An appendix provides lists of scales on the KOIS arranged according to female norms, male norms, and specific college major interests. (Author/JR)

grams, Individualized Programs, Personal Adjustment, Pilot Projects, Secondary Education, Secondary School Students, Social Adjustment, \*Standardized Tests, Student Attitudes, \*Student Characteristics, Tables (Data), Testing, \*Test Results, \*Work Experience Programs

**Identifiers**—Appalachia Educational Laboratory, EBCE, Employer Based Career Education, SIS, \*Student Information System

The report describes an evaluation of seven affective and cognitive traits of 40 of the 44 students in the Appalachia Educational Laboratory's Employer-Based Career Education (AEL/EBCE) program during the 1972-73 program year as measured by the Student Information System (SIS). All students were tested in February and in May 1973; Group One students (those matriculating in September 1972) had had one semester's exposure to AEL/EBCE before testing, and Group Two students (those matriculating in January 1973) had had none. In the February test, Group One students appeared to have superior psychomotor creativity and superior maturity, but were inferior in learning attitude to Group Two students. In the May test, the difference in psychomotor creativity between the two groups was less and was not statistically significant. The difference between the groups in learning attitude, maturity, cognitive skills, personal adjustment, social adjustment, and flexibility remained approximately the same. Given these findings, the traits that were measured by the Student Information System questionnaire appear not to have been affected by the EBCE program. (Author/JR)

**Identifiers**—Appalachia Educational Laboratory, EBCE, \*Employer Based Career Education

The report examines the attitudes of the 44 students in the Appalachia Educational Laboratory's Employer-Based Career Education (AEL/EBCE) program toward the program as indicated by their responses to an interview schedule (included in an appendix) administered near the end of the first program year (1972-73). Regarding post-high school plans most students intended to attend college or another postsecondary educational institution, but of this group only one-fourth had specific institutions and dates of entry in mind. All students testified that the program influenced their career decision. Regarding attitudes toward AEL/EBCE, nearly all students felt that the program met or exceeded their expectations. Students favorably compared the EBCE program with the public high schools they previously attended. Regarding suggestions for improving the EBCE program, most frequent student responses concerned specific aspects of the program such as providing better job experiences. Comparing student outcomes to program objectives revealed that students' career decision-making ability and their planning skills were insufficiently developed, whereas their occupational knowledge and communications skills developed satisfactorily. **Identifiers**—Appalachia Educational Laboratory, EBCE, \*Employer Based Career Education

The report examines the attitudes of parents of 31 of the 44 students in the Appalachia Educational Laboratory's Employer-Based Career Education (AEL/EBCE) program toward the program as indicated by their responses to a standard interview form (which appears in an appendix). Twelve interviews involved both the mother and the father of the student; in the remaining 19 cases the student's mother was interviewed alone. Most parents felt that the AEL/EBCE program was superior to their child's previous program. All but one felt that their child also rated AEL/EBCE as superior. More than 80 percent of parents' responses regarding behavior changes in their child described positive changes. Most parents felt their child learned as much as or more than in previous programs, especially regarding job information. Parents rated on-the-job experience as the greatest strength of the AEL/EBCE program, and transportation difficulties as its greatest weakness. More than half of the parents felt the AEL/EBCE program helped their children to choose a career. Parents' criticisms generally focused on the program's permissiveness, instructional unconventionality, and insufficient applicant screening. Regarding program objectives, parents favorably rated their child's career decision-making ability, and job-related and job-skill experience. (Author/JR)

**Identifiers**—Appalachia Educational Laboratory, EBCE, \*Employer Based Career Education

The report examines the use of student activity sheets in evaluating the performance of students in the Appalachia Educational Laboratory's Employer-Based Career Education (AEL/EBCE) program. All activity sheets completed during the second semester of 1972-73 for selected participants in the following subject areas were examined and are analyzed in detail in the report: English/communications, secretarial skills, social sciences, sociology, physical and life science, and mathematics. In general the activity sheets were considered a good monitoring device in a highly flexible instructional program such as AEL/EBCE. Limitations arising from their use, however, were students' failure to comment on their assignments in the space provided and the instructional managers' mechanical repetition of assignment objectives on the sheets. The evaluation of the use of activity sheets suggests the disadvantage of adapting course work to individual student interests, the need for instructional managers' developing course outlines specifying minimum skills and understandings required of students, and the possibility of adopting a more

interdisciplinary problem-centered approach to instruction. (Author/JR)

Identifiers—Appalachia Educational Laboratory, EBCE, Employer Based Career Education

The evaluation summary covers the first year's operation of the Appalachia Educational Laboratory's Employer-Based Career Education (AEL/EBCE) program. The report's first section describes the student, employer-related, and parent-related goals of the program; program operation and costs; and replication concerns (transportation, costs per student, site coordination, and translation of student work into academic credit). Another section on methodology describes the students and employers who participated in the program, the program's treatment of the students and employers, and the design and use of the various instruments used in the program evaluation. A third section on results considers students' academic achievements, career maturity, attitudes toward EBCE and miscellaneous student indicators, and parents' and employers' reactions to the program. Two final sections present a summary and conclusion and a discussion of the evaluation. Eight appendices which collectively comprise 25 pages include: number, title, and authors of FY 1973 EBCE Evaluation Reports; numbers of students placed at employer sites 1972-73; employer site/cluster distribution; semantic differential; activity sheet; student interview form; parent interview schedule; and parent questionnaire. Part 1 of a 6-part series of pamphlets deals with anecdotes from the author's diverse teaching experiences in a high school vocational agriculture program. The 11 stories, to be utilized in vocational agriculture teacher education, are followed by questions and activities analyzing the case studies and prompting alternative solutions. The stories revolve around a vocational agriculture teacher's experiences with both parents, students, and teachers in dealing with: program development, agricultural improvement, teaching problems, low-achievers, father-son relationships; students' psychological problems, animal husbandry, student placement in vocational agriculture programs, disciplinary problems, and field trips. Adult Education Legislation in Ten Countries of Europe.

European Bureau of Adult Education, Bergen (Netherlands).

Pub Date 74

Note—74p.; Special Issue—Selections from various issues of Notes and Studies (numbers 62-63)

**EDRS Price MF-\$0.76 HC-\$3.32 Plus Postage**

Descriptors—\*Adult Education, Educational Finance, \*Educational Legislation, Educational Objectives, Financial Support, \*Foreign Countries, \*Organizational Development, \*State of the Art Reviews, Tables (Data), Teacher Education, Teacher Salaries

Identifiers—Austria, Belgium, Denmark, France, Netherlands, Norway, Sweden, Switzerland, United Kingdom, West Germany

The booklet reports on the results of a meeting of 10 nations held, under the auspices of the European Bureau of Adult Education, to make determinations about the present and future states of legislation which affects adult education. The 10 nations represented were: Austria, Belgium, Denmark, France, West Germany, the Netherlands, Norway, Sweden, Switzerland, and the United Kingdom. There is a brief survey of present conditions in each of the nations. The conference's recommendations concerning future legislation are outlined within the following framework: objectives and tasks of adult education; organization and structure; financial support; educational leave; staff, status, and working conditions; and training for teachers and organizers of adult education. The major portion of the booklet is a comparative survey of current (through July 1974) legislation in each of these areas for each of the countries. Most of the material is presented in either outline or tabular form. A separate section tabulates new laws on

adult education in the Federal Republic of Germany. A final section lists adult education laws and regulations for each of the countries. (PR)

**Descriptors**—Comparative Analysis, Data Analysis, Demand Occupations, Educational Programs, Employment Opportunities, Employment Patterns, \*Employment Statistics, Job Market, Labor Force, Labor Market, \*Labor Supply, \*Manpower Needs, Manpower Utilization, Occupational Clusters, \*Occupational Surveys, \*State Programs, Tables (Data), \*Vocational Education

**Identifiers**—\*Oklahoma

The purpose of the report is to enumerate current (for the year ending June 30, 1975) data on manpower supply and demand on selected occupations and training programs in Oklahoma. An introduction explains how the data were acquired. The tables list occupations, the number of workers in demand for each occupation, and the number of workers (primarily from vocational-technical and adult training programs) in supply. The occupational supply is tabulated according to its educational source: vocational-technical schools (secondary, postsecondary, and adult) or other educational supply (Federal, private schools, and Oklahoma Employment Security Commission registrants). A separate column indicates the numerical difference between the two. There is a separate table for each of 11 regions in the State. The report cautions that its data are to be viewed dynamically and not to be regarded as absolute values. (Author/PR)

**Teacher Liability in School-Shop Accidents.**

Pub Date 73

Note—148p.

Available from—Prakken Publications, Inc., 416 Longshore Drive, P.O. Box 623, Ann Arbor, Michigan 48107 (Cloth bound \$6.50; Paperback \$4.50)

**Document Not Available from EDRS**

**Descriptors**—Accident Prevention, \*Federal Legislation, Injuries, \*Legal Responsibility, Safety, \*School Accidents, School Safety, School Shops, \*State Legislation, \*Teacher Responsibility

**Identifiers**—\*Liability

The intent of the book is to stimulate interest in the problem of shop-teacher liability and to identify certain needs which have not been adequately met by existing laws and statutes. Chapter 1, The Significance of Teacher Liability, discusses basic legal considerations, the environment of the school shop, and the possibility of liability. Chapter 2, Elements of Liability, pinpoints negligence as the basic problem of liability and discusses the law concerning contributory negligence. Chapter 3, The Nature and Extent of Shop-Teacher Liability, describes the function of the State in relation to the public school system by explaining in detail: common law, statutory law, school law, the legislation regarding school districts, common-law immunity, legal status of teachers, school-shop accidents, and court cases. Chapter 4, Safeguarding Teachers from Litigation and Damage Claims, discusses legislation of benefit to school teachers passed in several States and the abrogation of common-law immunity. Chapter 5, Safety: An Instrument in Preventing Liability, presents suggestions as well as legislation concerning safety measures to prevent accidents. Chapter 6, The Consequences of Liability, covers recommendations based on needs. Eight appendixes containing pertinent materials and information and a selected bibliography are included. (JB)

**State-Administered Research and Development Projects in Vocational Education Supported Under Section 131(b) of Part C of the Vocational Education Amendments of 1968: Fiscal Year 1974.**

Bureau of Occupational and Adult Education (DHEW/OE), Washington, D.C. Div. of Research and Demonstration.

Pub Date May 75

Note—96p.

**EDRS Price MF-\$0.76 HC-\$4.43 Plus Postage**

**Descriptors**—\*Educational Research, \*Research Projects, \*State Federal Aid, \*State Federal Support, \*Vocational Education

**Identifiers**—\*Vocational Education Amendments 1968

The listing of State-administered research and development projects was compiled on the basis of information supplied to the U. S. Office of Education by each State. The arrangement is alphabetical by State and for each project provides the title, the name of the grantee or contractor conducting the project, and the amount of Section 131(b) funding obligated for the project. For any given State, the total amount of funds obligated in a particular fiscal year may or may not be equal to the State's allotment for that fiscal year. The two reasons for this difference between funds allotted and funds obligated for grants and contracts are: (1) that a State may reserve some of the State allotment for support of the State Research Coordinating Unit, using the remaining amount for the award of grants and contracts, and (2) that a State could carry unused funds over and obligate them in the following year. (Author/JB)

**Building and Using Staff Development Resources for Adult Education: A Five-Year Report: 1969-74.**

Southern Regional Education Board, Atlanta, Ga. Spons Agency—Office of Education (DHEW), Washington, D. C. Div. of Adult Basic Education.

Pub Date Dec 74

Note—63p.

**EDRS Price MF-\$0.76 HC-\$3.32 Plus Postage**

**Descriptors**—\*Adult Basic Education, Adult Educators, Advisory Committees, Diffusion, Inservice Teacher Education, \*Interinstitutional Cooperation, \*Projects, Regional Cooperation, \*Staff Improvement, \*Statewide Planning

**Identifiers**—Adult Education Staff Development Project, Region IV

The purpose of the original three-year project was to establish a comprehensive regional plan for professional staff development for teachers of disadvantaged adults in the Southeast, but the focus shifted during the following two year phase toward using these resources for disseminating the latest and best information and materials. A project dateline outlines the major activities and dates. The report outlines the roles of various State, Federal, and local institutions; the barriers the project faced; and the motivations of people and groups responsible for creating the first regional staff development project in adult basic education (ABE). The two phases of the project are discussed in terms of the six formulated objectives and outcomes. Phase 1 developed State and regionwide staff development systems and Phase 2 utilized these staff development systems as vehicles for disseminating innovative ideas and materials to ABE teachers at the local level. Major outcomes were: stronger leadership in State departments of education, university and college services for staff development in adult education, trainers for inservice personnel, planning committees, establishing written plans for each project, and obtaining technical expertise for the projects. Recommendations focus on the strengthening of services and programs. (JB)

**Descriptors**—\*Curriculum Design, \*Curriculum Development, \*Curriculum Evaluation, \*Educational Needs, Educational Objectives, \*Educational Research, Formative Evaluation, Information Dissemination, State of the Art Reviews, Summative Evaluation

The focus of the state of the art paper is on educational product development and evaluation, a relatively new field. After defining the terms curriculum, development, and evaluation, the report classifies the two major forms of curriculum development as system-based (external changes

brought into curriculum) and subject-based (internal changes in the content of the curriculum). Three contemporary strategies for curriculum development are: the Tyler strategy (preliminary analysis, selecting and defining objectives, selecting and creating learning experiences, organizing learning experiences, and curriculum evaluation), the DeVault and Anglin strategy, (needs assessment, development and tryout, field verification, and implementation), and the Popham strategy (goal selection, explication of the product's mission, development of the initial product, developmental testing and revision, installation testing, and diffusion). Evaluation in product development involves both summative and formative evaluation, the latter having a major role in the development of curriculum products. Formative evaluation helps form and provide feedback information in a systematic manner and assists the curriculum development process by examining procedures and materials. Implications for further instructional product development emphasize: curriculum development as a practical matter, early dissemination, the unity and continuity of curriculum development, and the necessity of post-publication evaluation. References conclude the report. (JB)

Descriptors—Adult Education, \*Adult Education Programs, \*Educational Innovation, \*Program Descriptions

The seven descriptive position papers were prepared after selection for the Multi-National Workshop on Basic and Functional Education for Adults. Those selected are significant innovative programs of adult education in the U. S. which may have direct applicability to improving program practices in various parts of the world. The programs described are: the Appalachian Adult Education Center (Morehead State University, Kentucky); The Georgia Expanded Food and Nutrition Project (Georgia Cooperative Extension Service, Athens); The Dr. Martin Luther King, Jr. Adult Education Center (Kankakee, Illinois); Top of Alabama Regional Adult Secondary Education Project (Huntsville, Alabama); Regional Occupation Centers and Programs (Los Angeles Unified School District); Minnesota Literacy Council, Inc. (St. Paul, Minnesota); and Parents and the Developing Child (Utah State Board of Education). Information such as the program's setting, organization and administration, program description, educational strategy and activities, and future activities and projections is discussed in detail for each program. Par for the Corps: A Review of the Literature on Selection, Training, and Performance of Peace Corps Volunteers.

Pub Date 75

Note—487p.

**EDRS Price MF-\$0.92 HC-\$24.75 Plus Postage**  
Descriptors—Data Analysis, Evaluation, \*Federal Programs, \*Government Employees, Institutional Research, Literature Reviews, Organizations (Groups), \*Overseas Employment, Personnel Data, \*Personnel Selection, Program Evaluation, Research, Research Needs, Research Utilization, Statistical Studies, Statistical Surveys, Tables (Data), Task Performance, \*Volunteers, Volunteer Training

Identifiers—\*Peace Corps

The Peace Corps has probably had the most comprehensive system ever developed for large-scale selection of personnel; by 1973, nearly 400,000 persons had applied for appearance. During much of its history, a Division of Research has been operative; the monograph surveys most of the publications of that division as well as a number of other studies performed independently of the Peace Corps. The purposes of this review are to: (1) describe the personnel selection procedure; (2) report and evaluate research on personnel assessment, selection, training, and overseas performance, (3) suggest ways of utilizing research findings; and (4) suggest specific research needs. The book disseminates information not generally available, includes a good deal of general background material about the Peace Corps, and emphasizes numerical and empirical data. Autobiographical books or journalistic analyses have been omitted or treated briefly; some interpretive articles are discussed. The book is technical in tone and non-controversial in nature. Only the final chapter, "An Overview of Peace Corps Goals and Research," is concerned in part with value statements and summary evaluations of specific programs or of the Peace Corps as a whole. A 41-page bibliography is included. (Author/AJ)

Identifiers—College Entrance Examination Board

Today's harsh economy gives a spirit of urgency to the call for an effective harmonizing of occupational development with academic learning. Whether we as teachers or administrators are in agreement or not, the evidence is very clear that our students expect their college years to yield occupational as well as academic outcomes. It is time that we bring system and order, curricular strength, and philosophical unity to a condition that remains in many places ad hoc, unsystematic, and not consciously and deliberately responsive to the lifetime needs of learners and wage-earners. Within the past year, the College Entrance Examination Board has taken two integrally related steps toward becoming a significant force in career development during the remainder of this decade, and, perhaps, on into the 1980's. The first consists of a State-level study of career education now in its final stages. The study is exploring a number of barriers to full implementation of career education at the State level. The College Board is also attempting to come to grips with a concrete service to the process of career education. We have studied numerous institutions across the country to identify good linkages between schools and the workplace. The list of worthy sites where career education is finding a prominent place is nearly endless. (Author)

A Critique of Research Entitled "The Effectiveness of Public and Proprietary Occupational Training" by Wellford W. Wilms.

American Vocational Association, Washington, D.C.

Pub Date 31 Oct 74

Note—15p.; For the original Wilms study, see ED 100 459

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*Analytical Criticism, \*Content Analysis, Educational Benefits, \*Educational Research, Evaluation, Literature Reviews, Post Secondary Education, Program Effectiveness, \*Proprietary Schools, Public Schools, \*Research Methodology

Identifiers—Wilms (Wellford W)

The findings, conclusions, and recommendations of the Wilms study leave much to be desired. The reported results and interpretation of those results are generally not supported, nor was the design adequate either to confirm or refute the author's central hypothesis. In its present state, the report of the study cannot serve as a valid professional reporting source. The report departs from the generally accepted format of scientific reports and mixes facts and interpretations rather freely. In order to assess the study, therefore, the reviewers were forced to reconstruct it according to the logical sequence found in most technical reports, i.e., problem, objectives, method, results, conclusions, and recommendations. The review conforms to that sequence. The reviewers believe that few verifiable results have emerged, or could have emerged, from the study because of numerous design flaws and a severe lack of the design and procedural information which would be needed to evaluate the study's adequacy. Editorializing of the author's biases and assumptions occur throughout the report, unsupported by study data. When the data do not support the author's expectations, there seems to be a tendency to dispel undesired conclusions with an alternative explanation or assumption not based on study data. Identifiers—\*India

Traditional adult education has been literacy-oriented, but the curriculum content and methodology has been inadequate in maintaining motivation and interest. An important effort to eradicate these problems has been the Farmer's Functional Literacy Program in India. This major project relates adult education and training in modern agricultural practices. The experimental project was designed in India to develop curriculum materials specifically oriented to problem-solving rather than oriented solely to information supply. The project's five phases consisted of: an exploratory phase, a syllabus and curriculum construction phase, material preparation phase, an action phase, and an evaluation. A survey was conducted to identify crucial problems faced by farmers. From the findings, problems and objectives were classified and selected. Remedial measures were established, focusing on these problems. The organization of the syllabus reformulated the problems in terms of positive remedial operations and transformed into units or contents which are described. The two steps in the syllabus incorporate these remedial measures for farmers and then convey skills needed for improvement. Illustrations of problem-solving approach and curriculum development are provided. A brief report of the action phase is provided, and tentative evaluation criteria discussed. (Author/JB)

Identifiers—New York (New York)

The New York City revised curriculum bulletin is designed to offer maximum assistance (1) to high school administrators to plan and establish a State-approved driver education program and (2) to instructors who will teach in such programs. Chapter 1, on organizing driver education programs, discusses in detail the types of instruction in day secondary schools, qualifications for instructors, establishing a driver education program, practice driving equipment, evaluation, other driver education programs, and scheduling. Chapter 2, on teaching driver education, discusses in detail classroom teaching and practice driving instruction; provides instructional guides for 23 units (each unit presents the topic, recommended time, objectives, a synopsis, a list of teaching highlights, and a list of student activities); lists 23 practice driving instructional guides specifying instructional areas, teacher orientation, and student objectives; discusses teaching with simulators; and gives suggestions for motorcycle and motor bike driver education. The 10 appendices contain information on the New York State Motor Vehicle and Traffic Laws; New York City traffic regulations; a glossary; samples of official New York State forms; a list of teaching, safety, and test equipment dealers; additional resources; and a list of sources of driver education films and filmstrips with corresponding code numbers. Identifiers—Washington

The booklet explains the selection and use of a system to build career development programs and presents a sample career development program produced by the system. The system provides a framework to build a program and is based on the theory of three levels of learning—perceptual, conceptual, and generalization. The model, or sample system, is organized around five goals: self-awareness and self-identity, career awareness, career planning, career preparation, and work and leisure. Each goal is subdivided into grade levels (K-3, 4-6, 7-9, and 10-12), and within each grade level are outlined: a developmental objective, behavioral objectives, process objectives and strategies, outcomes, and evaluation. The National Advisory Council's annual report focuses on the dramatically increasing numbers of adult Americans who are continuing their education on a part-time basis; in this regard, the council recommends the adoption of a national statement of policy reaffirming the need for lifelong learning opportunities for all citizens. In support of this policy, the council submits specific recommendations: (1) to help improve the access of adult part-time students to these opportunities, and (2) to help develop professional manpower to serve adult learning needs and to design alternate educational programs on their behalf. A major task of the council was to complete a congressionally mandated evaluation of Title I of the Higher Education Act of 1965 ("Community Service and Continuing Education"). The recommendations stemming from this evaluation are incorporated into the annual report. Appended to the summary of recommendations are: (1) a summary of supportive statistical data on adult part-time students, presented in narrative form, with an attached copy of the council's letter to United States senators, recommending appropriate actions, (2) a report from the Community Service and Continuing Education Program (Title I) to the council; and (3) a directory of State-supported Title I projects. **Identifiers—**California, Illinois, North Carolina, Texas, Virginia

Adult basic education programs in California, Illinois, North Carolina, Texas, and Virginia were reviewed to assess the progress made by the programs in reducing illiteracy. The programs' management was also evaluated. It was found that although some positive achievements have been made, the program successfully reaches only a small fraction of those needing it. In the program's first nine years, about 4.6 million adults enrolled, but only about one percent of the 57 million adults in the target population and four percent of the 15 million adults with less than eight years of schooling have participated in any given year. Through fiscal year 1972, 17 percent of the 3.5 million participants at or below the eighth grade level had achieved an eighth grade equivalency education. Management problems include: lack of realistic and measurable program goals and evaluative criteria, misdirected recruiting, limited benefits of special projects and unsystematic dissemination of their results, lack of coordination with Federal antipoverty and manpower-training programs, and inaccurate reporting of data. The report recommends several

actions (including legislative and congressional) for combating these problems. (Author/PR)

The report is a compilation of information from State Quarterly Research Activity Reports submitted by State Research Coordinating Units regarding research activities conducted under Section 131(b) of Part C of the Vocational Education Amendments of 1968. It also includes all reported research projects administered by the State educational agency but not funded under that legislation. Each State's activities are listed under the subheadings: Projects Completed, New Projects Funded, Research Related Activities, and Projects and Activities Planned. Career education ranked high on the list of priorities for research projects. Other areas of emphasis included: followup studies, evaluations, competency studies, manpower studies, and programs related to health careers. In addition, the States have continued to fund projects for the expansion and improvement of their ongoing vocational programs. (Author/PR)

**Identifiers—**\*Vocational Education Amendments 1968

The handbook is designed to guide coordinators of cooperative vocational education programs who will be able to relate the material to their fields of specialization. Chapter 1 introduces cooperative vocational education, general and specific objectives, definitions of areas related to cooperative education, and discusses part G of the 1968 Vocational Amendments. Chapter 2 describes the role of the cooperative teacher-coordinator and the responsibilities of the total job. Chapter 3 discusses instruction in cooperative vocational education and critical tasks related to teaching. Chapter 4 focuses on guidance and placement. Chapter 5 concentrates on coordination activities and community involvement. Chapter 6 outlines public relations activities, and chapter 7 is devoted to the organization and responsibilities of advisory committees. Chapter 8 examines youth organizations and their objectives. Chapter 9 studies the relationship of adult education to cooperative education, program and curriculum development in this area, promotion methods, and evaluation. Chapter 10 concludes with an outlook on providing for research in cooperative vocational education. References are found at the end of each chapter. Appendixes present sample forms and a checklist of program evaluation criteria. (JB)

**Descriptors—**Leadership Training, \*Management, Management Education, \*Organizational Climate, Organizational Development, \*Organizational Effectiveness, \*Performance Factors, Supervisory Training, \*Work Environment

People function within situational contexts, and these contexts define and limit behavior. An organization is a very important context and, accordingly, produces potent forces which circumscribe and channel the activities, attitudes, and motivations of personnel. For this reason, both individual and group behavior within an organization is simply not the same as that outside of it. Carried over to management, this suggests that the first thing of which a manager must become aware is that behavior in organizations is usually the result of numerous determinants, many of which will have their source in the work context. To neglect context factors can only cause a manager to misunderstand the problem and take the wrong course for its resolution. Fortunately, the work context is one thing that can be greatly influenced and controlled by managers. The major point of this discussion is that many problems that lead to serious interference with organizational effectiveness have their sources in the failures of organizational leaders to provide work-context conditions that are most conducive to effective performance. Three general factors that control performance in every organization are: effective management, effective leadership, and effective training. (Author/PR)

The bill is designed to amend the Public Health Service Act in order to revise and extend the programs of assistance under Title VII for training in the health and allied health professions, and to revise the National Health Service Corps scholarship training program. The bill details the exact additions and deletions to be made in the original Act. The amendments are organized around the original topics of the Act: Title I—extension of current authorities through fiscal year 1975; Title II—general provisions; Title III—assistance for construction of teaching facilities; Title IV—student

assistance and National Health Service Corps; Title VI—grants for health profession schools; Title VII—special project grants and contracts; Title VIII—public and allied health personnel; Title IX—medical residency training programs; and Title X—miscellaneous (physician distribution, education of allied health personnel, study of allied health personnel, study of funding alternatives for health professions education, and recovery). **Employment In Perspective; Unemployment Among Household Heads.**

Bureau of Labor Statistics (DOL), Washington, D.C.

Pub Date May 75

Note—16p.

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

**Descriptors—**Employment, Employment Level, \*Employment Statistics, \*Heads of Households, Labor Force, Labor Supply, Tables (Data), \*Unemployment, Working Parents, Working Women

The jobless rate among all household heads reached 6 percent in April 1975, double the average rate over the 1963-74 period (2.8 percent), and half again as high as the previous peak (4 percent) recorded during the first half of 1963. The number of unemployed household heads increased from 1.4 to 3.2 million from October 1973 to April 1975, from 34 percent to 39 percent of the unemployed. About three-quarters of the household heads in the labor force are men heading families of two or more persons and one-tenth are female family heads. The unemployment rate for male family heads has increased two and one half times since October 1973 to 5.3 percent in April 1975, but was still much lower than the 9.3 percent rate for female family heads. The financial effects of unemployment on the family can be cushioned by the presence of other wage earners. According to the latest information available on this subject, in March 1974 about 30 percent of the families with an unemployed head had a full-time earner, usually the wife. However it is doubtful that the additional worker compensated for the loss of income incurred by the unemployment of the household head. (Author/JR)

**Descriptors—**\*Adult Basic Education, Adult Education, \*Program Descriptions, \*Teaching Methods

The report relates the experience of contractors with the Manpower Administration of the Department of Labor in providing adult basic education to manpower program clients in research and demonstration projects. It summarizes the findings and progress of several experimental projects from the initial efforts under the Manpower Development and Training Act of 1962 to those still underway as the Comprehensive Employment and Training Act of 1973 came into force. Drawing on experiences from the programs described, the focus of the report is on ways to provide adults with academic skills. Among the topics considered are: individualized instruction, programmed instruction, diagnostic and evaluative tests, learning motivation, behavioral objectives, learning environment, teacher training, use of tutors, counseling and supportive services, English as a second language, and projects of special significance. The report points to many unresolved problems and to the need for further research to document the teaching techniques, materials, and environments that work best for particular kinds of clients. Appended are brief discussions of related activities in manpower programs administered by the Department of Labor and of relevant research by the Office of Education. (Author/PR)

**Schooling the Middle Manager.** Professional Study No. 5406.

Air Univ., Maxwell AFB, Ala.

Pub Date Apr 74

Note—120p.

**EDRS Price MF-\$0.76 HC-\$5.70 Plus Postage**

**Descriptors—**\*Comparative Analysis, \*Management Development, \*Management Education, Management Systems, Military Training, Officer Personnel, On the Job Training, \*Training Techniques

The aim of this study is to evaluate industrial approaches to management development programs to ascertain the applicability of using similar schooling techniques in Air Force managerial development. The primary emphasis is on where the Air Force might benefit from industry's experience in the middle manager area. An additional objective is the examination of the current Air Force effort in managerial schooling development. The conclusion infers that: management development programs are needed; each individual's training needs are unique; only a portion of the total officer force can attend Air Force off-the-job training programs; a great number of officers must depend on on-the-job training methods for managerial training, and many of these methods are not used; the Air Force lacks an overall plan for management development; the great potential of the Junior Officer Councils as a management development tool is being wasted; formal exposure to management concepts is coming too late or not at all in the career of many officers; and more experience is needed with the major new innovation in management development being used by industry (the Assessment Center) before conclusions can be reached on its applicability to the Air Force. **Descriptors—**\*Employment, Employment Opportunities, Military Service, \*Military Training, \*Models, Occupational Choice, Research Methodology, Transfer of Training, \*Veterans, \*Wages

The paper examines the effect of military training and experience on the civilian earnings and employment of persons who have served one term of military service. Since training effects are specific to individuals and to civilian occupations, empirical problems in precisely defining the meaning of training effects arise. Additional problems in understanding and estimating training effects result from selectivity bias. Preliminary assessments of the effects of military training on civilian earnings indicate that when civilian occupational choice is ignored, military training does not seem to significantly affect civilian earnings. However, within occupations, military training does sometimes have such an effect. Having discussed these theoretical pitfalls and preliminary findings of the project, the paper develops a model of choice from which it is possible to derive empirically estimable relationships to calculate military training effects and to impute the total returns to training in a military specialty from the occupational choices actually made by enlisted personnel. Finally, the paper discusses four problems which need to be solved before the model can be applied (treatment of unemployment, choice of critical sample sizes, survey non-response, and selection of civilian alternative categories), and outlines a plan for proceeding with the analysis of military training premiums. Descriptors—\*Courses, Educational Programs, \*Post Secondary Education, \*Secondary Education, Tables (Data), \*Vocational Education

The report tabulates and analyzes data on the occupational curricula of 17,460 secondary and 11,731 postsecondary schools. A standardized list of 170 occupational fields was used to ascertain the exact programs offered at each institution. For some of the analyses, these fields were grouped into seven main fields: agri-business; marketing and distribution; health; home economics (personal); home economics (career); business and office; technical; and trade and industrial. Data were collected from all States and territories, and are presented in table form with accompanying discussion. At the secondary level, the programs offered by the largest number of schools were: homemaking; stenographic, secretarial, and related; typing and related; agricultural production; and filing, office machines, and clerical. Programs offered by the largest numbers of postsecondary institutions were: cosmetology; stenographic, secretarial, and related; commercial pilot training; accounting and computing; filing, office machines, and clerical; typing and related; business data-processing systems; and aircraft operations. Correspondence programs were offered by 338 schools, of which 155 offered only correspondence work. In addition, there are data on funding, accreditation, and date of school foundation. The survey forms used are appended. (Author/PR)

**Vocational Education Success Measures and Related Concerns.**

Washington State Advisory Council on Vocational Education, Olympia.

Pub Date Jan 75

Note—58p.

EDRS Price MF-\$0.76 HC-\$3.32 Plus Postage

Descriptors—Advisory Committees, Employer Attitudes, Graduate Surveys, Job Placement, \*Program Effectiveness, \*Program Evaluation, \*Questionnaires, School Community Relationship, School Industry Relationship, \*State Surveys, Student Opinion, Tables (Data), \*Vocational Education

Identifiers—Washington State

The study of vocational education success measures and related concerns in Washington State is based on surveys of employers, graduates of vocational programs, current students in vocational programs, and local advisory committee members. Current vocational students regard the quality of present programs more highly than do either vocational graduates or employers. In measuring the success of vocational programs, all groups consider student satisfaction, successful job placement, skill development, on-the-job advancement, and placement in advance training programs as valid measures of success. Responses also indicate that employers, vocational graduates, and vocational students do not make extensive use of workforce forecasts, and that current students are more concerned with increasing the placement services offered by vocational training institutions than are the other respondent groups. Regarding future directions for vocational education, responses indicate strong support for career education in the State's common schools and the organization of vocational education planning conferences for labor, industry, and educational personnel. The study concludes with a list of seven immediate and long-range recommendations. Seven appendixes which include the study plan, the four survey instruments, firms and agencies in employer and graduate samples, and educational institutions and classes sampled, comprise over half the document. FILMS, Albany, N.Y.

Spons Agency—Quebec Univ., Montreal.

Pub Date 5 Jun 75

Note—27p.

EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage

Descriptors—\*Educational Strategies, \*Medical Education, \*Nursing, Teacher Workshops, \*Teaching Methods

The discussion of the nursing education module consists of three sections. Section 1 provides a kick-off speech for a workshop on modules for nursing educators. The text of the kick-off address is given, supplemented by applications to be suggested during the workshop. Section 2 contains an outline of the explanations, illustrations, anecdotes, and diagrams used to explain the module, correlated by matching paragraph number to Section 1. Its purpose is to provide more details for the ideas summarized in the kick-off speech. The material was prepared for use at a workshop on how to apply modules to

individualized learning situations designed for independent study. The three part outline provides materials correlating the text of the speech to one or more examples for each component under study, and to applications for further analysis and investigation on the part of the listeners. In Section 3 a brief glossary of module terms, a discussion of the end product, sample application exercises, and a bibliography are provided. (Author/BP)

Descriptors—Group Dynamics, Group Relations, Human Engineering, Human Resources, Job Satisfaction, Leadership, Management, Management Systems, \*Manuals, \*Models, \*Organizational Climate, Organizational Development, \*Organizations (Groups), Peer Relationship

The materials in the manual are intended to provide the reader with a basic knowledge of the way work gets accomplished in organizations and with some basic tools useful for learning and teaching these concepts. The first section introduces the general nature of organizations and includes materials about the nature of groups and their place in organizations and the importance of such concepts as roles, control, authority, and power. The next section covers the major social-psychological aspect of organizational functioning as measured by the Navy Human Resource Management Survey. Subsections examine major organizational factors including command climate, supervisory leadership, peer leadership, and work group processes and also briefly describe the areas of integration of personnel and mission and satisfaction. The third major section is a presentation of the model of organizations used as a basis for the survey. Included is a description of relationships among the factors discussed in the first section. The final section provides exercises that have been found valuable for teaching and learning about the concepts described in earlier sections and includes examples of a few of these exercises. A 20-item annotated bibliography and items and indexes used in the survey are appended. (Author/PR)

On-the-job training literature from both civilian and military sources was reviewed. Selected references from the study are organized under the following headings: literature reviews and bibliographies, handbooks and manuals, cost effectiveness literature, technique comparison studies, systems analysis of training, approaches to program evaluation, and military documents. Many of the items are annotated, some rather extensively. In addition, a number of references were selected that were thought to contain innovative ideas that should be considered for improving on-the-job training programs. The list of possible innovations is organized under the following topics: administration, audiovisual presentation, computer-assisted techniques, evaluation, incentives/motivation, instructional techniques, periodic surveys, and program design. The various ways in which these innovations might address current problems in the Air Force on-the-job training program are described and commented on. Estimates are also made of the resource requirements involved if possible modifications in existing procedures were to be implemented. (Author/PR)

Babin, Patrick  
Bias in Textbooks Regarding the Aged, Labour Unions, and Political Minorities.

Ottawa Univ. (Ontario). Faculty of Education.

Spons Agency—Ontario Dept. of Education, Toronto.

Pub Date 30 Jan 75

Note—196p.

**EDRS Price MF-\$0.76 HC-\$9.51 Plus Postage**

Descriptors—Foreign Countries, \*Labor Unions, Literature Reviews, \*Minority Groups, \*Older Adults, \*Textbook Bias

Identifiers—Canada

The report opens with detailed summaries of historical background information for each of the groups involved and with a review of the literature on bias in textbooks in Canada, the United States, and other countries. Over a time span of six months, 211 readers evaluated 1,719 textbooks. Readers located 104 biases in 78 textbooks. The 23 biases against the aged occurred mainly in English primary texts. Bias by omission accounted for most of the 65 findings concerning labor unions; however, strong negative statements about unions constituted most of the other biases. The 16 biases against political minorities were mostly ones of omission. The investigators believed that biases against labor unions could have a strong negative effect on student attitudes. Biases regarding the aged and political minorities, on the other hand, were not considered pronounced enough to negatively affect student attitudes. The investigators recommended objective balanced treatment of minority groups in textbooks, and the formulation of guidelines for textbook evaluation. Seven appendixes include the evaluation instrument; related biases against the French, Indians, other ethnic minorities, and women; suggestions for improving the evaluation instrument; and lists of texts containing bias. Review of Army Officer Educational System.

Department of the Army, Washington, D.C.

Pub Date 1 Dec 71

Note—774p.

**EDRS Price MF-\$1.39 HC-\$38.72 Plus Postage**

Descriptors—Curriculum, \*Educational Programs, Elective Subjects, Faculty, Military Schools, \*Military Science, \*Military Training, \*Officer Personnel, Organization, Post Secondary Education, \*Program Descriptions, Student Evaluation, Teaching Methods

Volume 1 of the review of the Army officer educational system is a summary report which deals with the following topics: the environment of the seventies and its implications for officer education, overview of the roles and missions of

Army schools and gaps in coverage, basic course, advanced course, Command and General Staff College, Army War College, civilian education, theory of teaching, faculty, student evaluation, organization, areas of special interest, and consolidated list of recommendations and guidance. Twenty-two appendixes comprising over 60 pages document or supplement the themes covered in the text. Volume 2 is a full report which covers the same topics only in more detail, and contains in addition five supplementary appendixes; a 15-page bibliography; discussions of perspectives and philosophies, and of costs, feasibilities and priorities; and an index. Volume 3 is a survey of innovative educational programs at the various Army officer schools. Specific programs are discussed in detail (each with a separate fact sheet) and grouped according to the following topics: faculty, students, curriculum, methods of instruction, evaluation, electives, civilian education, and academic management. Identifiers—Vocational Education Act 1975  
The bill proposes to provide financial assistance to States and other agencies and institutions to assist them to: operate and improve existing programs of vocational education; develop new programs of vocational education; provide vocational guidance, counseling, and placement; and provide part-time employment for those who need it. Details are set forth on the apportionment of funds and on the role of national and State advisory councils. Grants to States under this Act are to be used for: vocational-technical programs of instruction, work-experience programs, vocational education personnel development and training, and implementation of previously supported projects and activities. Grants may also be used to help provide specific vocational education services: guidance and counseling; provision of opportunities in private vocational schools; equipment, maintenance, and operation; administration, supervision, planning, and evaluation of programs; acquisition, analysis, and dissemination of data; personnel exchange; use of media and of student, parent, and citizen involvement; operation of business activities in connection with vocational education programs; placement and followup; maintenance and operation of industrial arts courses; and work-study programs. Grants are also provided for research, innovation, and demonstration. (Author/PR)

Value of Personnel Classification Information.

Air Force Human Resources Lab., Lackland

AFB, Tex. Personnel Research Div.

Report No—AFHRL-TR-75-2

Pub Date Mar 75

Note—34p.

**EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage**

Descriptors—Cost Effectiveness, Enlisted Men, Entry Workers, Information Theory, \*Information Utilization, Manpower Needs, \*Manpower Utilization, \*Military Personnel, \*Personnel Data, Personnel Evaluation, Personnel Policy, \*Personnel Selection, Talent Utilization, Vocational Aptitude

Identifiers—Air Force

The study outlines the development of a methodology for meaningfully estimating the value of classification information used by the Air Force to make selection and job assignment decisions which lead to the satisfaction of first-term

enlisted manpower requirements. The methodology, called the optimal allocation strategy, is employed to solve a representative allocation problem in a hypothetical enlistment year. The exercise serves to show how the value of available personnel information may be estimated when used in the most efficient manner possible. Four conclusions are drawn from the study: the value of military classification information currently available to the Air Force can be estimated in tangible terms; the value of even better classification information which could become available in the future as a result of specific research can be estimated in tangible terms; the means for getting the most out of current available information exist; and a variety of personnel policies and programs can be evaluated in terms of both real and realizable dollar payoffs. Mannan, M. A.

The Economic Aspects of Non-Formal Education: A Selected Annotated Bibliography. Program of Studies in Non-Formal Education, Supplementary Series. Paper No. 3.

Agency for International Development (Dept. of State), Washington, D.C.; Michigan State Univ., East Lansing. Inst. for International Studies in Education.

Pub Date 75

Note—90p.

EDRS Price MF-\$0.76 HC-\$4.43 Plus Postage

Descriptors—\*Annotated Bibliographies, Bibliographies, Cost Effectiveness, Economic Development, \*Economic Factors, \*Educational Development, \*Educational Economics, Educational Planning, Human Capital, \*Non-formal Education, On the Job Training, Vocational Retraining

The 303 items in the annotated bibliography are arrayed under four headings: (1) general literature—economic issues, (2) general literature—nonformal education, (3) economics of nonformal education (including cost-benefit analysis, investment and return in human capital, and economics of on-the-job training and retraining), and (4) planning and development. The author states that much of the literature is scanty, not sharply focused, and bears on nonformal education only indirectly or by inference; many of the entries deal with the larger topic of the economics of education, but by inference or accident have some particular relevance to nonformal education. Descriptors—Adult Education, Apprenticeships, \*Educational Programs, Foreign Countries, \*Machine Tool Operators, \*Manpower Development, Post Secondary Education, Skilled Occupations, Socioeconomic Background, \*Trade and Industrial Education, Vocational Education, Work Experience, Work Experience Programs

Identifiers—Brazil (Sao Paulo), SENAI, Servico Nacional De Aprendizagem Industrial

The study deals with the development of skilled industrial manpower in Sao Paulo, Brazil, and with the Federal government's SENAI (Servico Nacional de Aprendizagem Industrial) industrial apprenticeship and training program. An analysis of six variables among lathe setter-operators showed that: present work situations among the operators varied greatly, especially regarding wages; present work situation controls (Physical conditions on the job, length of employment, entry level) also varied greatly; initial socioeconomic conditions were better for the operators than for the general population; formal educational level of the operators did not differ from that of the general labor force; the work experience of most operators was primarily industrial; and only 11.5 percent of the operators reached the skilled occupational level without some form of specialized industrial training. A

linear regression model was used to determine the effect of the six variables on wage per hour, number and difficulty of operations performed, and time taken to reach the skilled occupational level. Since industrial training is required to reach the skilled occupational level and since private schools train many more persons than do SENAI schools, some types of private school training may provide acceptable alternatives to some types of SENAI training. Non-Formal Education Approaches to Teaching Literacy. Program of Study in Non-Formal Education, Supplementary Series. Paper No. 2.

Agency for International Development (Dept. of State), Washington, D.C.; Michigan State Univ., East Lansing. Inst. for International Studies in Education.

Pub Date Feb 75

Note—22p.

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*Adult Basic Education, Adult Education, \*Adult Literacy, \*Developing Nations, Educational Development, Educationally Disadvantaged, Foreign Countries, Literacy, Literacy Classes, \*Literacy Education, \*Non-formal Education, Program Content, Program Development, Program Planning, Speeches

The author feels that nonformal adult literacy education should be structured around several observations he has made concerning such education: adults learn to read and do arithmetic faster than do children; the difference in learning rate between adults and children in regard to writing is negligible; learners vary greatly in their learning speeds; learners have a slight preference for group rather than individual instruction; learners supported and encouraged by the community are more likely to succeed than those who are not; learners who need literacy for their work are more persevering and successful than those who do not; literacy instruction need not be directly related to the learner's specific purposes; literacy programs oriented to occupational problems have usually been more successful than have more general programs; and instruction conducted intensively and continuously has fewer dropouts than that done at a more leisurely pace. These observations are based primarily on programs conducted in Iran, Tanzania, Turkey, and Zambia. One section of the pamphlet considers the value and uses of literacy, and there is a brief consideration of the problems of program management and bureaucracy. (PR)

Research in Adult Education in the British Isles: Abstracts and Summaries, Principally of Master and Doctoral Theses Presented Since 1945.

Pub Date 74

Note—361p.

Available from—National Institute of Adult Education, 35 Queen Anne Street, London W1M 0BL, England (\$15.00)

Document Not Available from EDRS

Descriptors—\*Abstracts, \*Adult Education, Adult Learning, \*Adult Programs, \*Annotated Bibliographies, Curriculum, Educational Administration, Educational History, Educational Methods, \*Educational Research, Educational Theories, Foreign Countries, Graduate Study, Guidance, Instructional Staff, Organizations (Groups), Reference Materials, Student Participation

Identifiers—\*Great Britain

The 191 graduate theses and research papers (dated 1945-1974) which are summarized in this volume provide a descriptive account of the adult education movement in the British Isles as well as reflect the nature of research that has been conducted by many types of institutions. All of the research included is available on interlibrary loan. Theses and papers are grouped into eight main sections with topical subheadings. Each summary/abstract includes title, author's aim, method, discussion, findings, and coding (additional classification). Listed below are the main sections, subheadings, and the number of theses or papers: Section 1, Historical and Descriptive Surveys (12); Section 2, Particular Movements and Organizations: Mechanics' Institutes, political and religious reform societies, cooperative education, university extra-mural teaching and the Workers' Educational Association, local adult education,

residential education, technical training, HM Forces/Merchant Navy, education for women, retirement, library service, and mass media (57); Section 3, Participation in Adult Education: composition of students, attitudes/motives/behavioral patterns, literacy, attendance (44); Section 4, Theory of Education (15); Section 5, Curricula and Courses (5); Section 6, Educational Methodology (34); Section 7, Guidance and Counseling (6); Section 8, Organization and Administration (9); Section 9, Staffing (9). A Select Bibliography of Adult Education in Great Britain: Including Works Published to the End of the Year 1972.

Pub Date 74

Note—220p.

Available from—National Institute of Adult Education, 35 Queen Anne Street, London W1M 0BL, England (\$12.00)

Document Not Available from EDRS

Descriptors—\*Adult Education, \*Adult Education Programs, \*Annotated Bibliographies, \*Bibliographies, Directories, Educational Administration, Educational History, Educational Theories, Encyclopedias, \*Foreign Countries, Mass Media, Organizations (Groups), Periodicals, Teaching Methods, Units of Study (Subject Fields), Yearbooks

Identifiers—\*Great Britain

The emphasis in the selectively annotated bibliography is primarily on nonvocational adult education. The 1,756 entries are grouped into four large categories, with subdivisions: general (bibliographies, yearbooks and directories, encyclopedias, and periodicals); social and educational background (general works, history of education, and mass media); history and organization of adult education (general historical and descriptive surveys, particular movements and organizations, special aspects, and administration); and theory and method (general social and educational theory, theory of adult education, methods of teaching and study, and particular academic subject areas). Each of these is then divided into a number of subtopics. Most of the items are annotated. There are some cross-references, and many references to works not included in the bibliography. Entries have been restricted to works published before the end of 1972, but exceptions have been made for a few major works published since that date. Author and subject indexes are included. (PR)

Petrello, George J.

A Status Report on the Personal Finance Course. Wagner Coll., Staten Island, N. Y.

Note—9p.

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*Consumer Economics, \*Credit Courses, \*Economic Education, Educational Assessment, \*Higher Education, \*Money Management, Questionnaires, \*School Surveys, Statistical Surveys, Student Attitudes

The personal finance survey was designed to investigate the scope and success of personal finance courses on the collegiate level. A 12-item questionnaire was mailed to heads of departments or deans at 32 colleges offering economics and business administration courses. Limited to one page, the questionnaire was designed so that questions could be answered with check marks or one-word answers. Twenty-six questionnaires (81 percent) were returned. We believe the results of the survey indicate that the concept of instruction in personal finance has successfully passed the experimental stage. The course is open to business majors as well as to non-majors in 54 percent of the responses. Generally the course requires no prerequisites, and in 62 percent of the schools freshmen can take the course. All schools responding included investments, insurance, borrowing, and savings as content covered. Student attitudes toward personal finance compared favorably with attitudes toward other courses. A surprisingly large number of respondents cited the use of case problems, visual aids, and independent assignments for instruction. The raw score results and percentages are presented. (Author/PR)

Fitzgerald, Sheila Wesselman, Roy L.

An Organizational Pattern for Determining Goals in Career Education.

Note—18p.

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

**Descriptors—**\*Career Education, Curriculum Design, Curriculum Development, \*Curriculum Planning, Decision Making, \*Educational Change, \*Educational Objectives, Organizational Development, Program Development  
Administrators and teachers who are formulating a career education program for their school or school district are confronted with a wide range of decisions to be made. By viewing career education as a "curriculum organizer," the authors present the range of questions that must be discussed before decisions and directions are determined. Fourteen dimensions grouped under three major decision categories (curriculum, teaching structures, and bureaucratic/organizational pattern) lead into the major decision factor—change in the existing instructional program. **Identifiers—**Pennsylvania (Pittsburgh)

The study investigated the interaction of personal and environmental factors influencing seventh graders' selection of career exploration courses for increased exploration in the eighth grade. A stratified random sample (496 students) was drawn from the Pittsburgh Public School's Occupational, Vocational, and Technical Exploratory Program. Personal and environmental factors included: (1) achievement subscores for industrial arts/home economics/business education; (2) factors of age, race, breadwinner's socioeconomic status, and home school; (3) vocational attitude maturity; (4) motivation; (5) occupational values of interest and satisfaction, salary, prestige, and security; (6) attitude scores for industrial arts/home economics/business education; and (7) student self-reports on teacher/program/peer influence on course choices. The dependent variables were 12 career exploration courses in rank order of popularity. Computations included Pearson product moment correlation, multiple regression analysis, and Behrens-Fisher t-tests. Some conclusions were that exploratory business education courses can successfully be implemented at the middle school and that it is possible to design learning activities which appeal to a wide range of student backgrounds. Sex, race, and occupational value-security were the most frequently appearing and stable influencing variables. Career exploration course selection by preadolescents is only moderately explainable by personal/environmental analysis. (Author/EA)

Technical Education, \*Technical Mathematics, Technology, Trade and Industrial Education, Worksheets

**Identifiers—**Machine Trades

Through a research grant funded by the Vocational Division of the Indiana State Department of Public Instruction, a developmental research project was undertaken to develop machine trades-related mathematics materials using the terminology, concepts, and methods of modern mathematics. The two volume set is designed to be utilized by first and second year machine tool technology students. Included in the document are technical information lead-in sheets, machine trades technical information sheets, technical assignment sheets, sample technical operation sheets, and sample technical job sheets. The technical information lead-in sheets present, in simple and direct manner, important terminology, concepts, and methods utilized in modern mathematics. The units may be used for both practice and reference; practice problems with answers are divided with each lead-in sheet. Each of the machine trades technical information sheets presents specific machine tool technology, technical information utilizing the modern mathematics approach, and terminology. As much as possible these units emphasize understanding of the concepts and formulas involved. Technical assignment sheets including assigned problems and answers have been included to provide the student with practice. Appended is a partial listing of books that might be utilized for additional study in the machine trades and in modern mathematics. (Author/BP)

**Descriptors—**\*Agricultural Education, Curriculum, \*Curriculum Development, Curriculum Planning, Curriculum Research, Educational Methods, \*Educational Strategies, \*Models, Occupational Clusters, \*Performance Based Education, Performance Criteria, Post Secondary Education, Secondary Education, Task Analysis, Vocational Agriculture, Vocational Education

The report explains the construction of the function-task-competency method of developing vocational education curricula in agriculture at the secondary and postsecondary levels. It discusses at some length five approaches to the development of vocational education curricula used in the past: the subject approach (which centers on subjects taught on a yearly basis); the integrated approach (which cuts across all subject areas on a yearly basis); the job analysis, occupational analysis, or competency approach (which focuses on task analysis); occupational areas or cluster approach (which defines competencies which are common to a number of related jobs and/or occupations); and functions of industry approach (which focuses on the different processes performed in business and industry to achieve success). The report develops a conceptual model for integrating these approaches into a comprehensive curriculum model consisting of a linear diagram which proceeds successively from occupational clusters through function, tasks, competencies, competency clusters, and a subjective value, philosophy, and student interest screen to curriculum development. After discussing the assumptions underlying the model, the report concludes with brief discussions of the five operational phases of the model construction, and the methodology and significance of the study. **Identifiers—**\*Wisconsin

The report examines the professional competencies needed by postsecondary and secondary school agricultural education instructors. A questionnaire covering 11 functions, 39 tasks, and 89 competencies was administered by mail to the 435 vocational agriculture instructors in Wisconsin, of whom nearly two-thirds of the secondary school and postsecondary production instructors and one-half of the postsecondary nonproduction instructors responded. A detailed examination by competency of the responses to the questionnaire indicates such things as: nonproduction respondents stressed inservice over preservice education for 23 of the 89 competencies; secondary and postsecondary production instructors either had no preference for one or the other or placed more emphasis on preservice programs; a positive relationship existed between the secondary and nonproduction respondents' participation in student teaching and their ability to plan for instruction; in general, respondents that had most frequently participated in inservice activities placed greater emphasis on the development of professional competencies in their inservice rather than their preservice educational programs. The report closes with brief discussions of competencies agriculture education instructors should possess, clientele needs, and adequate delivery system development. Four appendixes reproducing the questionnaire and tabulating the study's results comprise 40 pages. (JR)

**Identifiers—**Army

The collection of five monographs focuses on the idea of reciprocity as expressed through an informal "contract" between the individual and the organization, and examines specifically that portion of the contract that involves the individual leader, his superior, and his subordinates. The basic idea is that the individual leader at any level expects certain behavior from his superior, his subordinates, and himself. Also, both his superior and his subordinates expect certain behavior from him. It appears that only when these expectations are known and met can true leadership take place. These monographs attempt to define the appropriate terms of the informal contract and the extent to which they are recognized and fulfilled throughout the Army. Attention is focused on four basic leadership modules: Junior NCO leadership; Senior NCO leadership; Company Grade Officer leadership; and Field Grade Officer leadership. Data on the modules are structured so as to reflect racial characteristics and attitudes in the first two monographs: "Demographic Characteristics of U. S. Army Leaders" and "Satisfaction with U. S. Army Leadership." The remaining monographs examine the informal contract in terms of specific behaviors for Junior NCO leadership, Senior NCO leadership, and Company Grade Officer leadership. An appendix lists 43 leadership behaviors. (Author/PR)

Manpower Requirements for Massachusetts: by Occupation, by Industry, 1970-1980.

Massachusetts State Div. of Employment Security, Boston.

Pub Date Apr 74

Note—31p.

EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage

Descriptors—Demand Occupations, Employment Opportunities, Employment Patterns, \*Employment Projections, Employment Statistics, Employment Trends, \*Industry, Labor Market, \*Manpower Needs, Manpower Utilization, Occupational Surveys, \*Occupations, \*State Surveys, Statistical Data, Statistical Surveys, Tables (Data)

Identifiers—\*Massachusetts

The report is an approximation of industrial and occupational needs for 1970-80 for 225 industries and 445 occupations in Massachusetts based on industry and employment records for 1960-71, occupational employment levels as reported in the 1970 Decennial Census, and the national industry/occupational matrix. The occupational demand detailed in the report's two lengthy tables is based on anticipated changes in industrial employment and replacement demand likely to arise due to deaths, retirements, and transfers of experienced workers to other occupations. Industry employment trends indicate: manufacturing will suffer the greatest decrease in employment; employment in contract construction will increase substantially; employment in transportation, communications, public utilities, wholesale and retail trade, finance, insurance, real estate, and public administration will grow moderately; and employment in agriculture, forestry, and fisheries will decline. From the occupational standpoint, the growth in the professional, technical, and kindred occupations will be substantial; the net demand in the clerical field will be the largest among the nine major occupational divisions; demand for workers in the service worker field will increase over the 1970-80 period; and among the remaining occupational divisions, all except operatives and kindred workers and farmers and farm workers will show positive growth rates. The Way Out: A Pilot Project in Adult Literacy. Report No. 1-1974.

Council of Adult Education, Melbourne (Australia).

Pub Date 74

Note—52p.

EDRS Price MF-\$0.76 HC-\$3.32 Plus Postage

Descriptors—\*Adult Literacy, \*Adult Programs, \*Foreign Countries, \*Functional Illiteracy, Group Experience, Illiteracy, \*Pilot Projects, Small Group Instruction, Teacher Workshops

Identifiers—\*Australia

The purpose of the 1973 Pilot Literacy Project (Victoria, Australia) was to explore the nature of the problem of nonmigrant adults who had attended school but who considered themselves illiterate or functionally illiterate, to discover what sort of people were illiterate and to what extent, and to examine home influences and educational background. Of the 166 illiterate and semi-illiterate people involved, nearly half were self-generating starters, about one-third responded to a television presentation, and one-third were already known to agencies. The majority had primary school education and over half had one to three years of post-primary schooling. Approximately three-fourths of the group were below 35 years of age. The project geared toward a noninstitutional approach. Tutors, referred to as group leaders, worked as a task force operating in homes, factories, libraries, and community and church centers. The project was subsidized for 12 groups not exceeding five members. The social benefits derived from group involvement were improved self-concepts, increased employment opportunities, and group unity. Monthly workshops for tutors provided continuous evaluation, information, and support group functions. The concluding section sets forth recommendations by the Victoria Council of Adult Education to combat adult illiteracy. (EA)

Descriptors—\*Audiovisual Aids, \*Career Awareness, \*Career Education, Elementary Education, \*Instructional Materials, Junior High Schools, \*Resource Guides, Resource Materials, Secondary Education

With the emphasis on the development of a career education program and its integration into the existing school curricula, the guide's purpose is to identify for K-12 teachers selected career education instructional materials which can be used for the purpose of implementing a classroom oriented career awareness program. These materials collectively provide students with a wide variety of sensory as well as affective, cognitive, and psychomotor domain information and experiences. The first part of the document focuses on the K-6 grade levels with a listing of filmstrips, films, cassettes, posters, booklets, multimedia kits, and pupil books. The second part of the document focuses on the 7-12 grade levels with a listing of such instructional materials as filmstrips, booklets, textbooks and manuals, cassettes, transparencies, workbooks, and multimedia kits. Each listing provides a brief description of the materials and the publisher. Also provided after each section is a list of the addresses from which the materials can be obtained. (Author/BP)

Document Not Available from EDRS

Descriptors—\*Career Education, \*Educational Administration, Educational Needs, Educational Objectives, Educational Resources, \*Guidelines, Instructor Coordinators, \*Models, Program Development, Resource Guides, Resource Materials, Staff Orientation, \*Teacher Guidance, Teacher Workshops

Identifiers—Needs Assessment

Intended as workshop guidelines, the model for career education implementation contains six modules which outline the procedure for integrating career education into the instructional process, and describes a multi-media approach to guide administrators through the developmental process. Module one, Preparation for District Career Education Implementation, provides an overview of career education for key school administrators and outlines a positive plan of action to implement a K-12 career education program. Module two, Development of School District Goals and Objectives, outlines realistic goals and objectives for career education products and processes. Module three, Conducting and Interpreting Career Education Needs Assessments, pertains to instruments for conducting assessments and materials for interpreting their results. Module four, Building Staff Awareness and Orientation, provides guidelines for a presentation to assure staff awareness of the career education concept. Module five, Processes and Resources, suggests commercial and teacher developed materials and provides guidelines for a slide/tape presentation demonstrating the diversity of approaches to career education curriculum infusion. Module six, Implementation, discusses teachers' development of plans for career education curriculum infusion by grade level and subject matter area and the selection of faculty teams to insure sequential curriculum change. Identifiers—Pennsylvania (Middle Western)

In the middle western area of Pennsylvania, four model programs have been developed at the high school level to provide occupational orientation and preparation for the educable mentally retarded: The Community Based Work-Study Program, The Academic Special Education Program, The External Vocational Program, and The Internal Vocational Program. The study was undertaken to investigate the post-school employment success and selected characteristics of graduates from each of these programs. The opportunity was also provided for graduates to evaluate the effectiveness of their high school programs. The study was based on 183 (71 percent of the possible 259) graduates. Some significant findings included: a significantly higher proportion of successfully employed graduates had been enrolled in work study programs than in any of the other three programs; female special education students are not, regardless of program, being properly prepared for post-school employment success; the unemployment rate of the special education graduate is five times greater than the regular education graduate; driver education is of great importance; and placement services were successful

in placing eight out of nine graduates. Data on 93 variables are presented in a number of tables, and 15 specific recommendations are made from them. (Author/PR)

On-The-Job Training: A Practical Guide for Food Service Supervisors.

Hospital Research and Educational Trust, Chicago, Ill.

Pub Date May 75

Note—96p.

Available from—Hospital Research and Educational Trust, 840 North Lake Shore Drive, Chicago, Illinois 60611 (\$5.00)

Document Not Available from EDRS

Descriptors—Adult Education, \*Food Service Occupations, Food Service Workers, Job Analysis, Job Skills, Learning Activities, Lesson Plans, Occupational Information, \*On the Job Training, Planning, \*Supervisors, \*Task Analysis, Task Performance, \*Teaching Guides

Identifiers—JIT, \*Job Instruction Training

The on-the-job training guide was developed to assist food service supervisors in preparing, presenting, and evaluating a Job Instruction Training (JIT) lesson, a method which employs step-by-step learning of job-related tasks. Part 1, preparing for a JIT lesson, discusses the checklist of duties, the job description, the skills inventory, the training schedule, the schedule for refresher training, the individual development record, the task procedure, and the lesson plan for a lesson on preparing dishes for washing by hand or by machine. Part 2, conducting a JIT lesson, explains the four steps involved in training: preparing the worker, presenting the task, trying out performance, and following through. Part 3, evaluating a JIT lesson, discusses improving training procedures through instructor self-evaluations, and worker and observer evaluations. Part 4, providing more examples, repeats the procedures used in part 1 for use in preparing training lessons for storeroom clerks, assistant cooks, salad makers, tray assemblers, and cook's helpers. Part 5, "Good Luck in Your Training," contains blank forms useful in preparing JIT lessons. (JR)

Riley, Clayton Turner, Betty

Developmental Programs in Distributive Education: Internship Training for Distributive Education Students. Final Report.

Western Kentucky Univ., Bowling Green.

Pub Date Apr 74

Note—73p.

EDRS Price MF-\$0.76 HC-\$3.32 Plus Postage

Descriptors—Career Choice, \*Career Education, Career Planning, \*Developmental Programs, \*Distributive Education, Field Experience Programs, \*Internship Programs, Program Descriptions, Program Development, \*Records (Forms), School Industry Relationship, Secondary Education, Technical Education, Vocational Education

The Distributive Education Development Project was developed to give high school students an opportunity to observe on-the-job experiences by means of an internship system. The project provided information and suggested procedures for implementing the internship program in State vocational-technical schools and high schools by establishing provisions for student visits to distributive businesses to receive first hand information on the specific skills and competencies needed upon entering the work force. Three results were seen as significant accomplishments: businessmen involved in the program upgraded their knowledge of distributive education; a model coordinator handbook (not included in the document) was developed; and students were provided with career decision opportunities, hands-on job experiences, and the opportunity to evaluate their choice. Two-thirds of the document comprises appendixes reproducing: the rotation schedule; sample survey forms, internship agreement, and training plan; pretest and posttest; observation experience form; program participants; suggested calendar of rotation; daily progress report and progress chart; and the proposal for the internship program. Operation Breakthrough, 1973-1974. Final Evaluation Report. And: Fourth Quarterly Progress Report for Operation Breakthrough.

EDCON Associates, Willow Grove, Pa.

Pub Date [74]

Note—57p.

EDRS Price MF-\$0.76 HC-\$3.32 Plus Postage

Descriptors—Attendance, Business Responsibility, Case Studies, Demonstration Projects, \*English (Second Language), English Instruction, Enrollment Influences, \*Entry Workers, Experimental Programs, Failure Factors, \*Industry, \*Inplant Programs, Organizational Development, Program Evaluation, \*Spanish Speaking, Standardized Tests, Statistical Data, Success Factors, Tables (Data), Test Results

Identifiers—Attendance Influences, \*Operation Breakthrough

The document comprises the final evaluation report and the fourth quarterly progress report of Operation Breakthrough, an experimental demonstration project to upgrade Spanish-speaking workers in entry-level factory jobs. Ten classes at six sites with a total of 133 students were held; 53 attended at least 50 of the total 150 hours. Classes were conducted either prior to or after working hours, although part of the class time overlapped with company time; the companies' support of the program thus involved both teacher and worker compensation. Low attendance rate was a consistent problem, but attendance figures rose the second year, due to the companies' involvement in planning, financing, and monitoring the classes. Three sets of classes operated according to the intentions of the proposal and were found to have few operational problems while three other of the organizations' operations lacked what had been identified as essential elements. Classroom aides (company personnel) were used during the first year, but rarely during the second. They were viewed as important by teachers and administrators, allowing class flexibility and providing a resource for job-related English instruction. Conversational English was deemed important to the students. The document reports the results of interviews, monitoring visits, and test instruments. A program guide is being developed. (Author/AJ)

One and One-Half Years After High School Graduation: The Class of 1972.

National Center for Educational Statistics (D-HEW/OE), Washington, D.C.

Report No—NCES-75-701

Pub Date 16 Jun 75

Note—5p.

Journal Cit—Advanced Statistics for Management Bulletin; n21 June 16, 1975

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—Educational Research, \*Followup Studies, \*Graduate Surveys, \*High School Graduates, Longitudinal Studies, National Demography, National Surveys, Post Secondary Education, Statistical Analysis, Statistical Data, Statistical Surveys, \*Student Characteristics, \*Work Experience

The bulletin presents selected results of the first followup survey of the national longitudinal study of the high school class of 1972, conducted by the National Center for Education Statistics. Information is presented, in percentages (weighted national estimates), on the personal characteristics, postsecondary schooling, and civilian work experiences of these young people one and one-half years after high school graduation. In some cases, descriptive statements include comparisons of subgroups classified by high school program, race, ability, socioeconomic status, or sex. Information on nine personal characteristics is offered, including a rating of 11 values (86 percent found marriage and family life most important, 8 percent considered community leadership least important). The bulletin reveals that 64 percent had attended some kind of school or college since high school; of those, high percentages were satisfied with their growth and skills development. Those working (64 percent of the class) were most satisfied with working conditions, least satisfied with advancement opportunities. The most successful methods of obtaining jobs were direct application to employer (52 percent) and friends and relatives (46 percent); newspaper advertisements netted only 15 percent of respondents' jobs, and employment and placement services helped only 6 percent. A brief background description of the study, definitions, and footnotes are provided. (AJ)

Illinois Public Community College Statewide Occupational Student Follow-Up Study: Phase 1 Preliminary Report.

Illinois Community Coll. Board, Springfield.

Pub Date Jun 75

Note—38p.

EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage

Descriptors—\*Career Education, College Curriculum, College Programs, College Students, \*Community Colleges, Data Collection, Educational Accountability, \*Enrollment Influences, \*Followup Studies, Part Time Students, Post Secondary Education, Sex Differences, \*Student Characteristics, Tables (Data)

Identifiers—ICCB, \*Illinois, Illinois Community College Board

The first statewide followup study of occupational/career education students in Illinois community colleges was developed through the efforts of the Illinois Community College Board (ICCB) Research Advisory Council and the special Occupational Followup Subcommittee. The Phase 1 data for the followup study consisted of reporting student characteristics. Participation in the followup study consisted of all 38 community college districts in Illinois and 46 community colleges involving 27,663 students. The preliminary data for Phase 1 of the study were reported by each of the Illinois public community colleges and based on the number of new fall 1974 students in the occupational/career program. The reports classified these students by their curriculum, type of attendance (45.3 percent full-time, 54.7 percent part-time), sex (49.7 percent male, 50.3 percent female), and original intent for enrolling at the college (56.2 percent preparation for employment in career areas, 21.2 percent skill improvement). The preliminary report shows that although there are slight differences between the original intent of male and female students, significant differences occur between full-time and part-time students. It is concluded that followup data will be needed and can be accomplished through proposed phases 2 (withdrawal analysis) and 3 (followup and employer surveys). Appended materials include sample report forms and a standardized survey instrument. (BP)

The Adult Basic Education Program: 1971-72 Regular and 1972 Summer School Terms. Consolidated Program Information Report.

National Center for Educational Statistics (D-HEW/OE), Washington, D.C.

Report No—NCES-75-309B

Note—5p.

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*Adult Basic Education, Budgeting, Budgets, \*Educational Finance, \*Expenditures, \*Federal Aid, Federal Programs, Financial Support, Program Budgeting, \*Program Costs

An estimated 820,000 adults were enrolled in Federally-funded adult basic education projects during the 1971-72 school term. A total of \$36.7 million was expended in projects operated during the 1971-72 school term and the 1972 summer school term. Expenditures were primarily for direct educative services and supporting services. Direct educative services accounted for an estimated \$25.9 million (70.5 percent). Of that total, \$13.6 million was expended on English language arts, reading, and social sciences; \$4.1 million for natural sciences and mathematics; \$3.8 million on vocational training; and \$4.4 million on other services including textbooks, cultural activities and studies, and special curricula for the handicapped. Supporting services accounted for \$10.3 million (28.1 percent) of the total Federal expenditure. Approximately \$4.5 million of that was spent for administration and information dissemination. A total of \$203,000 was spent on program development. Expenditures for other services including testing, psychological and guidance services, library resources, and audiovisual materials, amounted to \$5.0 million. Together, direct educative services and supporting services accounted for 98.6 percent of all money expended. Other services, including maintenance and operation of plant, fixed charges, ancillary services, and capital outlay, accounted for \$516,000 (1.4 percent). (Author/PR)

The Public Service Occupations Curriculum Project was designed to serve as a master curriculum resource for school districts in the implementation of a career education program in public service occupations. The project produced comprehensive curriculum materials for grades 7-12 and adult education which can be adapted by local school districts to suit their particular needs. The report summarizes the activities of the project and evaluative data gained from field testing the curriculum in vocational and general modes of education. Much of the document reproduces and discusses the results of field-test questionnaires used for students, teachers, and administrators. Test sites in California and New York are described in some detail. The major results of the program were: administrators, teachers, and students generally agreed that the project materials had content validity; teachers felt that the curriculum guides were easy to adapt to their teaching styles and could be used in varying instructional situations; and the program is administratively feasible. The summary report is an outgrowth of a 1972 meeting of the National Advisory and Review Committee of the California State Department of Education, Vocational Education Section. The principal intent of the report is to provide project staff and consultants insight into the problems of career development for public service occupations, as well as solutions to those problems. The report is organized around six key issues confronting project implementation to which the Advisory and Review Committee addressed itself: definition of public service, goals of public service curriculum at the secondary level, curriculum content and planning, job category analysis, basis for entry level jobs, and curriculum guidelines concepts. Specific recommendations have been identified to further assist in project management and implementation. An introductory section considers the project's relationship to the U.S. Office of Education thrust in career education. (Author/PR)

**The Effects of a Training Package on ESL Teachers in ABE Programs.**

Pub Date 27 Feb 75

Note—89p.; Master's Thesis, Colorado State University

**EDRS Price MF-\$0.76 HC-\$4.43 Plus Postage**

**Descriptors**—\*Adult Basic Education, \*Adult Education Programs, \*Adult Educators, \*English (Second Language), Literature Reviews, Masters Theses, Paraprofessional School Personnel, \*Teacher Education, Teacher Improvement

Teachers and paraprofessionals working as instructors in adult English as a Second Language (ESL) programs needed special training to increase their ESL skills and subject matter knowledge. A review of the literature on adult education traces the development of the concept from the eighteenth century to the present, examines the recent particular development of Adult Basic Education (ABE) and ESL within the adult education movement, and hypothesizes that ESL/ABE instructors can improve their self-confidence and competency by participating in a teacher training instructional module. Such an instructional training package was presented to three groups (26 subjects) representing a wide range of ESL programs in Colorado and Wyoming. Research data indicated that an ESL training package given to three test groups improved their knowledge of selected ESL goals and objectives and of related ESL teacher competency information. The data lead to such conclusions as: training packages geared toward special needs of ESL teachers of adults can result in significantly increased knowledge gains; and the learning package structure is well received by teachers of varying knowledge levels who are teaching students of varied backgrounds. The learning

package script (32 pages) and course outline are appended. (Author/JR)

**Descriptors**—\*Academic Achievement, \*Adult Education Programs, \*Adult Students, \*Educational Alternatives, \*Educational Assessment, \*Equivalency Tests, \*External Degree Programs, \*High School Equivalency Programs, \*Performance Criteria, \*Pretesting, \*Secondary Education, \*Student Certification, \*Test Construction, \*Testing, \*Tests

**Identifiers**—Central New York External High Sch Diploma Program

The report describes the development of an alternative performance assessment procedure for certifying adults at the secondary school level in the New York External High School Diploma Program. Unlike standardized group tests, the alternative method is characterized by such features as flexibility in time and location of testing, variety of communication methods, and continuous feedback to students. The program's first developmental objective for 1974-75 was a field test demonstration. Preparatory steps for the field test included defining performance criteria (translating generalized competencies into behavioral terms, with accompanying performance indicators), designing assessment components (developing diagnostic procedures and procedures for assessing generalized and individualized competencies), and designing the operational form of the assessment system. Later steps included pre-testing the assessment system (selection and recruitment of subjects and observers, and method of testing), and defining the role of the learning consultants (program development, counseling adult learners, and administering tests). The second objective, the awarding of diplomas, included gathering information on the program's first 20 graduates for later use in program revision. Objective three, the production of a final external diploma assessment package, will require additional time to accomplish. (JR)

**The Janus Report: A Report on the Changing Social Setting in the United States with Implications for New Roles for State and Local Vocational Education Personnel.**

California Univ., Los Angeles. Div. of Vocational Education.

Pub Date Dec 74

Note—40p.

**EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage**

**Descriptors**—\*Administrator Role, \*Educational Change, \*Educational Innovation, \*Educational Needs, \*Educational Planning, \*School Community Relationship, \*Social Change, \*Social Influences, \*Vocational Education, \*Vocational Education Teachers

The report on the implications of social changes in the United States for vocational education personnel contains five recommendations aimed at helping vocational education personnel at all educational and administrative levels in the various States to better maintain, enhance, and adjust their services to target populations within the changing social environment. The rationale for the recommendations rests on the analysis of the present-day United States as a post-industrial society, one characterized by its open social system, its sophisticated information systems, its large interrelated institutions and organizations, and its large number of white collar workers. While social changes occur rapidly in post-industrial society, cultural and organizational changes do not keep pace. Although such lagging behind the times does not characterize vocational education, vocational educators must be aware of the need for openness in order to develop a capacity to interact with the environment bearing on the

system of vocational education, and must welcome the opportunity for such interaction. Like Janus of Roman mythology, they must look in all directions in order to effectively interact with the environment. Vocational educators, especially at the administrative level, must provide management leadership expertise so that challenges to education can be more adequately addressed. (JR)

**Identifiers**—\*Iowa

The document is divided into two approximately equal sections: The first is the annual report on the career education effort in Iowa in 1973; the second is devoted to the reaction of the State Board of Public Instruction to the Council recommendations for 1972. The two sections are divided by a page listing actions which were taken in Iowa to implement the council recommendations contained in the 1972 report. The 1973 report is composed of four summarized council observations of needs and four recommendations; the sequencing of the recommendations is intended to suggest an order that might be adopted for logical, universal implementation of the career education concept. The four recommendations are: (1) that a State definition for the term "career education" be developed; (2) that a plan be developed to coordinate efforts to infuse the concept in all teacher and administrator preparation programs; (3) that State curriculum guides be rewritten to include the career education concept; and (4) that a State coordinating committee develop a plan encouraging universal implementation of the concept. The second section lists the council's 1972 recommendations with a paragraph of comment by the State Department of Public Instruction following each of the 29 recommendations. (AJ)

**Identifiers**—\*Iowa

The State of Iowa Advisory Council on Career Education has elected to investigate each year one specific component or element of vocational and career education in the State, rather than undertake a comprehensive review. The topic of the 1974 report is cooperative work-study programs in the State. The Council collected information and observations by visiting 12 school systems in various sectors of the State, ranging in size from large to small, located in metropolitan, suburban, and rural communities, and including both schools that do offer and that do not offer cooperative programs. The council conversed with students, teachers, and administrators; data were also collected by the Council staff, and reviewed by the Council members for purposes of verifying or rejecting field observations. The report addresses itself to three major questions: (1) How valid and appropriate is the State plan for career education? (2) How effectively are the needs of the people of Iowa being served? (3) To what extent have the recommendations contained in the Council's 1973 report been implemented? Appended to the report are 80 pages of data on which the recommendations were based, including graphs, maps, tables, supplementary papers, and a summary of information gleaned from the field visits. **Identifiers**—EBCE, \*Experience Based Career Education

Experience-Based Career Education (EBCE) has been developed as an experimental program to help high school students bridge the gap between study and experience, between the classroom and the community. The key to the EBCE concept is the adult working in any local community environment who is willing to share occupational knowledge of the real world with an interested student. EBCE is a voluntary, tuition-free alternative program of full-time learning resulting in an accredited high school diploma. It differs from traditional work/education programs by emphasizing broad career and intellectual goals rather than vocational skills, by using experiential education to convey academic learning, and allowing students a greater role in educational planning. Four educational laboratories were selected in 1972 to develop and test pilot versions of EBCE in a variety of economic and social settings: Far West School, Oakland, California; Academy for Career Education, Philadelphia, Pennsylvania; Appalachia Educational Laboratory, Charleston, West Virginia; Northwest Regional Educational Laboratory, Portland, Oregon. One of EBCE's future challenges is to help school systems to make the changes needed to accommodate this complex innovation. The forthcoming EBCE dissemination/service plan includes regional demonstration centers, State networks, and interagency cooperation at the national level. (EA)

Heyel, Kathryn A.

A Selected Annotated Bibliography of Resource Materials for the Implementation of Career Education: Grades K-3. Publication No. 0003.

Rutgers, The State Univ., New Brunswick, N.J. Curriculum Lab.

Pub Date Apr 75

Note—116p.

Available from—New Jersey Vocational-Technical Curriculum Laboratory, Building 4103, Kilmer Campus, Rutgers University, New Brunswick, New Jersey 08903 (\$1.50 plus postage)

**EDRS Price MF-\$0.76 HC-\$5.70 Plus Postage**

Descriptors—\*Annotated Bibliographies, Audiovisual Aids, \*Career Education, Elementary Education, Instructional Materials, \*Primary Education, \*Resource Guides

The annotated bibliography of print and non-print materials associated with career education is for use in kindergarten through the third grade. The bibliography is arranged according to grade level and subdivided under each grade into typical course units usually associated with that grade. The headings are: Kindergarten (family, jobs, community, helpers, and school workers); Grade One (family workers, foods, clothing, and homes); Grade Two (food, clothing, shelter, schools/maps, and recreation); and Grade Three (communities, colonial times, kinds of communities, community needs, and citizenship). Under each curriculum category, media are classified as print or non-print materials. Print materials total 332 entries and are listed alphabetically by author. Non-print materials total 248 entries and are grouped according to medium and listed alphabetically by title. All entries provide bibliographic data, a brief annotation, and code letters identifying the source of each entry (principally book lists and catalogs). A brief summary outlines the findings, conclusions, and recommendations of the researchers involved in the project. Tables summarizing the characteristics of the entries are appended, together with a short reading list about career education. (BP)

Descriptors—Agribusiness, \*Agricultural Education, Career Awareness, Career Education, \*Curriculum Guides, \*Learning Activities, Primary Education

The document is a collection of teacher guides to sample units introducing agriculture at the primary level; part or all of the units can be used along with the regular curriculum during the school year. Intended to acquaint K-3 students with agriculture's important role, the purpose of the course is to impart basic knowledge of materials, tools, processes, concepts, and career opportunities in agriculture. Five introductory units prepare students to focus on agriculture; the guide outlines are very brief. The nine sample units on agriculture are activity-based; the teacher guides are presented in the form of brief outlines in general terms, outlining basic procedures and listing content-area skills such as reading and mathematics which may be developed in the course of the activities. Four of the nine sample units are field-trips (to an orchard, a tomato farm, a golf course, and a stadium); four others involve the planting and maintenance of school gardens (flowers from bulbs, flowers from seeds, fruit in a greenhouse, and vegetables); and the remaining sample unit teaches leaf collection and identification through a "school rake-up." A teacher evaluation form, agribusiness career information, listed teaching resources, and 10 student activity sheets are included. (AJ)

Career Development Guide: Grades K-5.

Oshkosh Area Public Schools, Wis.

Pub Date Jan 73

Note—174p.

**EDRS Price MF-\$0.76 HC-\$8.24 Plus Postage**

Descriptors—Career Awareness, \*Career Education, Career Exploration, \*Curriculum Guides, Educational Objectives, \*Elementary Education, Learning Activities, Resource Guides, Self Actualization, \*Vocational Development

The Oshkosh Career Development Guide provides a framework on which to build a career development program. The first 20 pages of the document include an introduction, a diagram of the career development model, a career development scope and sequence model chart, and a brief description of the program's three components: self, the world of work, and career planning and preparation. The remaining 112 pages comprise lesson plans, presented under the first two headings for grades K-3, and under all three headings for grades 4 and 5. Each lesson is based on a general concept and objective, further divided into behavioral objectives with accompanying suggested learning activities, resources and materials, and evaluation procedures to be used by the teacher. The document concludes with a local resource guide, a glossary of career education terms (K-12), sample teacher worksheet and evaluation forms, and resource materials evaluation forms. (BP)

Career Awareness for Deaf Education: Resource

Curriculum Guide: Pre-Kindergarten-Grade 12. South Dakota School for the Deaf, Sioux Falls.

Spons Agency—South Dakota State Dept. of Public Instruction, Pierre. Div. of Vocational-Technical Education.

Pub Date Jun 75

Note—263p.

**EDRS Price MF-\$0.76 HC-\$13.32 Plus Postage**

Descriptors—Behavioral Objectives, Career Awareness, \*Career Education, \*Curriculum Guides, \*Deaf Education, Educational Objectives, Elementary Secondary Education, Instructional Materials, Job Application, \*Learning Activities, Resource Materials, Special Education

The comprehensive career awareness curriculum guide for the deaf and the hearing-impaired is the result of a research and development project conducted at the South Dakota School for the Deaf; teachers produced and pilot-tested the materials. The pre-kindergarten through primary level guide (approximately 100 pages) consists of teacher objectives matched with lists of resources and career-related instructional activities; it provides a self-awareness and attitude-development program and a basic exposure to the world of work. Guides for intermediate-level instructional units (30 pages), to be taught independently or incorporated into the regular curriculum, provide information about the world of work and opportunities to explore various occupations, and broaden the student's awareness of his environment. Identifying personal strengths and weaknesses is emphasized, to aid in realistic career-planning. The secondary teacher's guide (60 pages) matches teacher-objectives with lists of resources and learning activities. The content is related to occupational information about 12 job clusters; the curriculum developers were careful that their selections would be the most practical for the deaf person. A guide to teaching job-seeking skills (40 pages) and a listing of established postsecondary facilities offering programs for deaf students complete the document. (AJ)

Allied Health Education/Transfer of Credit: Recommendations of the North Carolina Articulation Project.

North Carolina State Dept. of Community Colleges, Raleigh.; North Carolina Univ., Chapel Hill.

Spons Agency—National Institutes of Health (DHEW), Bethesda, Md. Div. of Allied Health Manpower.

Pub Date Oct 74

Note—91p.

**EDRS Price MF-\$0.76 HC-\$4.43 Plus Postage**

Descriptors—Administration, \*Articulation (Program), \*Credit Courses, \*Credits, Dental Assistants, Dietetics, Educational Programs,

Environmental Technicians, \*Health Occupations Education, Medical Laboratory Assistants, Medical Record Librarians, Medical Record Technicians, Nutrition, Physical Therapy, Post Secondary Education, Radiologic Technologists, \*Transfer Policy

Identifiers—\*Credit Transfer, Respiratory Therapy

The North Carolina Allied Health Articulation Project was launched to develop procedures which would enable an individual to transfer credit from an allied health education program in one setting to some program in higher education. In 1972-73, study committees were appointed to deal with the allied health professions of physical therapy, radiologic technology, medical laboratory technology, and the dental auxiliaries. The following year committees focused on medical record administration, nutrition and dietetics, respiratory therapy, and environmental health technology. The disciplines of this report are restricted to those for which preparation is likely to be acquired in two and four-year institutions of higher education. The three basic patterns leading to professional status which are expected to prevail are: (1) pre-professional curriculum--associate degree (optional), (2) basic professional curriculum--academic certificate or associate degree, and (3) intermediate professional curriculum--academic certificate or associate degree. The third section of the report examines problems related to credit transfer involving criteria for admissions, credit, grades, curriculum, student services, and institutional autonomy, and then recommends appropriate guidelines. More than half of the document consists of an appendix which outlines the status and the recommendations for the transfer of credit of the eight allied health professions studied by this project. A Career Education Entitlement Plan: Administrative and Political Issues.

Syracuse Univ. Research Corp., N.Y. Educational Finance and Governance Center.

Spons Agency—National Inst. of Education (DHEW), Washington, D.C.

Pub Date Apr 75

Note—91p.

**EDRS Price MF-\$0.76 HC-\$4.43 Plus Postage**

Descriptors—\*Adult Students, \*Career Education, \*Educational Administration, Educational Finance, Educational Policy, \*Education Vouchers, Policy Formation, \*Political Issues, Post Secondary Education, Student Costs, Training Allowances, Tuition Grants

Identifiers—Basic Educational Opportunity Grant, BOEG, G I Bill, TAP, Tuition Assistance Plan

The examination of administrative and political issues in career education entitlement (voucher) plans opens with a discussion of various rationales and models for entitlement programs. A discussion of existing and proposed entitlement schemes covers the Basic Educational Opportunity Grant Program (BEOG), the educational benefits provided under the G. I. Bill, the Tuition Assistance Plan (TAP) of New York State, and entitlements proposed by Norman Kurland, Herbert Striner, and Charles Benson and Harold Hodgkinson. The discussion of administrative issues covers: general administrative concerns; a new entitlement agency; participant, institution, and program eligibility; student protection; information; advice and counseling; special issues related to participant support services; employed participants' needs; participant placement; and entitlement evaluation. The discussion of political issues assesses the likely reactions of the public in general, students, professionals in postsecondary education (not institutional spokesmen), institutional spokesmen, educational associations, other leading lobbying groups, the States, and the Congress. A discussion of next steps offers two proposals: one for experimenting with a new program, the other for building on existing entitlements. Four appendices (a bibliography, administrative and political issues in career education voucher and entitlement plans, and an experimental entitlement scheme for adults to aid career related education) comprise 25 pages. Criteria for Evaluating Graduate Study in Adult Education: Findings of a Study Conducted for

the Commission of Professors of Adult Education.

Chicago Univ., Ill. Center for Continuing Education.

Pub Date [74]

Note—6p.

EDRS Price MF-\$0.76 HC-\$3.32 Plus Postage

Descriptors—\*Adult Education, Bibliographies, \*Evaluation Criteria, Evaluation Methods, \*Graduate Study, Graduate Surveys, Performance Based Education, Performance Criteria, \*Program Effectiveness, \*Program Evaluation, Student Opinion

The report identifies and organizes criteria for evaluating and determining the effectiveness of graduate programs in adult education. The first phase of the study, a review of the appropriate literature, contributed to the formulation of 22 criterion statements relevant to the development of graduate study in adult education. The study's second phase involved: defining the field of adult education; developing a behavioral classification scheme for the educational objectives of graduate programs in adult education; identifying existing statements of education objectives, professional competencies, and specific on-the-job behaviors of adult educators; classifying, refining, and formulating these statements into behavioral descriptions of these objectives; and refining those behavioral descriptions into a series of 23 statements for evaluating graduate study in adult education. Phase three involved surveying the opinions of adult education graduate students and doctorates regarding the importance of graduate study in developing professional competencies in the 23 behaviors. The phase three findings indicate that all 23 behaviors are important in the practice of adult education and that nearly all adult educators have a need for increasing their competence in these behaviors. Suggestions for improving graduate programs in adult education conclude the study, with an 11-page bibliography following. (JR)

The Perceived Effectiveness of Innovation Diffusion Tactics. Research and Development Series No. 99.

Ohio State Univ., Columbus. Center for Vocational and Technical Education.

Spons Agency—National Inst. of Education (DHEW), Washington, D.C.

Pub Date Jan 75

Note—119p.; For related documents, see ED 079 468 and ED 087 900

Available from—Center for Vocational Education, The Ohio State University, 1960 Kenny Road, Columbus, Ohio 43210 (\$7.50)

EDRS Price MF-\$0.76 HC-\$5.70 Plus Postage

Descriptors—Administrative Problems, Administrator Attitudes, \*Adoption (Ideas), Change Agents, \*Change Strategies, Data, Data Analysis, \*Diffusion, Educational Change, \*Educational Innovation, Educational Research, Failure Factors, Information Dissemination, Information Utilization, Perception, Statistical Studies, Success Factors, Teacher Attitudes, \*Vocational Education

The document summarizes research on the process of diffusing innovations in vocational education. The purpose was to: (1) determine if empirical dimensions of three conceptual domains (innovation, client, and strategy) exist; (2) if they exist, to identify them; (3) to describe them with empirical information; and (4) to relate the dimensions to perceived effectiveness of diffusion tactics. An interim report described the innovation and client domains; the final report identifies types of diffusion tactics and relates selected variables (types of diffusion tactics, types of clients, stages of adoption, and types of innovations) to the perceived effectiveness of these tactics. Stages of adoption are identified as awareness, interest, evaluation, and adoption. The most important finding of the study was a significant difference in the perceived effectiveness of diffusion tactics across all stages of adoption. The ratings for stage of adoption was different across all tactics. The interaction of these two variables was also significant. Individuals in the client clusters perceived tactic effectiveness differently. Respondents in different roles tended to perceive tactic effectiveness differently. These findings empirically document the need for differential use in educational change tactics for persons in different

roles and for projects in different stages of adoption. (Author/AJ)

Moore, Eddie A. Bender, Ralph E.

Professional Educational Competency Needs of Three Groups of Vocational Agriculture Teachers in Ohio. Summary Research 3.

Ohio State Univ., Columbus. Dept. of Agricultural Education.

Pub Date 75

Note—23p.

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—Agricultural Education, \*Inservice Teacher Education, Performance Based Teacher Education, Preservice Education, \*State Surveys, \*Teacher Education, Teacher Educators, \*Teacher Qualifications, \*Vocational Agriculture Teachers

Identifiers—Ohio

To identify professional education competency needs for vocational agriculture teachers in Ohio, 555 secondary vocational agriculture teachers teaching in the State during 1973-74 were surveyed. The target population was stratified into three groups: (1) four-year college agricultural education majors, (2) four-year college technical agriculture majors, and (3) non-college graduates recruited from business and industry. The study sample included 79 college technical agriculture majors, 43 non-college graduates, and a random sample of 200 professionally prepared teachers. Data were collected through mail questionnaires from 83 percent of the vocational agriculture teachers, 75 percent of the technical agriculture majors, and personal interviews with non-college graduate teachers. Questions covered educational/occupational backgrounds of the respondents, teachers' perceptions of the importance of 256 professional education competencies, and teachers' perceptions of their proficiency. The number of competencies most needed by the three groups of teachers varied considerably. Inservice education needs for the 256 competency items indicated 23 items for professionally trained teachers, 99 items for technical agriculture majors, and 255 for non-college graduates. It was recommended that Ohio teacher educators/supervisors in agricultural education continue evaluation of competency needs of the three groups in up-dating pre-service and in-service teacher preparation programs. A Proposal to Assess the Needs of Students in Ten School Districts. Final Report.

Missouri State Dept. of Education, Jefferson City. Research Coordinating Unit.

Pub Date 31 May 75

Note—79p.

EDRS Price MF-\$0.76 HC-\$4.43 Plus Postage

Descriptors—Career Education, Career Planning, \*Educational Assessment, Educational Needs, \*High School Students, Questionnaires, Relevance (Education), Statistical Surveys, Student Interests, \*Student Needs, \*Student Opinion, \*Surveys

Identifiers—\*Needs Assessment

State Fair Community College, Sedalia, Missouri, surveyed the needs of students in grades 9-12 in 10 non-urban Missouri school districts. The project was designed to gather data for use by area schools, the area vocational-technical school, and the career education staff that has been working with these schools. The report reproduces the survey instrument (the Missouri Student Needs Survey) and analyzes the data obtained. The following results of the survey are singled out: responses from students in smaller school districts were similar to those from students in larger districts; students showed uncertainty about future plans; students felt they needed considerable or additional help with vocational and educational planning; students indicated that their counselors had not discussed their ability and achievement tests with them individually; students felt that teachers were making their classes as meaningful as possible; and students indicated that most of their class work is not relevant to their interests or future plans. Appendixes comprise more than half of the report, and provide information on student responses to the survey, student needs and interests, a student-needs workshop, and a calendar of administration. Descriptors—\*Career Education, \*Curriculum Development, Educational Research, \*Models, Speeches

Identifiers—CCEM, \*Comprehensive Career Education Model

The development of the largest school-based career education model program, by the Center for Vocational Education (CVE), went through several stages. The three levels of career awareness, career exploration, and vocational preparation became an integral part of the Comprehensive Career Education Model (CCEM) at an early stage. Eight elements were derived from eight statements which defined areas considered to be essential in career education. CVE, in cooperation with six school districts, designed and prepared some 133 K-12 career education curriculum units, 45 of which have been revised and field tested by CVE. Sixtyone other units are being revised and field tested by the American Institutes for Research (AIR). The entire set of units was intended to be illustrative rather than comprehensive. The thrust of the AIR project has been for impact. Three groups, publishers, school administrators, and teachers, were surveyed to determine their needs and goals and their reactions to the current form of the units. The units were then analyzed and their content coded on a lesson-by-lesson basis. These data will be used in revision to prevent redundancy and assume that a coherent career education program will evolve from the revision process. Further revision and field testing will be followed by arrangements for commercial publication. (Author/SA)

Field Testing and Revision of the AIR Career Education Curriculum.

Pub Date 75

Note—8p.; For related documents, see CE 004 565 and CE 004 567-568; Paper presented to American Educational Research Association (Washington, D.C., March 30-April 3, 1975); Appendix A, referred to in the document, is not included

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*Career Education, \*Curriculum Development, Educational Research, \*Models, Speeches

Identifiers—CCEM, \*Comprehensive Career Education Model

The American Institutes for Research (AIR) has been involved in the design and development of career education curriculum materials for well over a decade, even before the term was originated by the U.S. Office of Education. This led to the involvement of AIR in the design and development of the Comprehensive Career Education Model (CCEM). Four general constraints under which career education programs must operate are: they must be economically feasible, they must be able to operate with regular classroom staffing patterns, they must be considerate of teacher time and effort, and they must fit the needs of local users. Important factors determining the adoption of such programs are acquisition cost and teachers' and administrators' perceptions of the potential classroom utility of the material. All these aspects, and others, will be considered in the process of field testing and revision of curriculum units for CCEM. (SA)

Descriptors—\*Career Education, \*Curriculum Development, Curriculum Research, Educational Research, Feasibility Studies, \*Models, Speeches

**Identifiers—**CCEM, \*Comprehensive Career Education Model

The first phase of the American Institutes for Research (AIR) activity in the revision of 61 curriculum units of the Comprehensive Career Education Model (CCEM) project focused on obtaining information that would aid in revising the units to meet the needs of publishers, school administrators, and teachers. Three separate acceptability studies were carried out to obtain reactions to the first CCEM materials: an in-depth review of the materials by classroom teachers in a workshop setting; a review of the sample units by school administrators; and a review by publishers who have an interest in career education materials. A common set of review materials consisting of three sampler units and evaluation forms was used in all three studies. Results of the studies confirmed the presence of a high interest in career education and should lead direction to the planning of the next steps. (SA)

At the end of the first nine months of the American Institutes for Research (AIR) project to revise and field test the Comprehensive Career Education Model (CCEM) curriculum materials, activities are proceeding on four fronts. A coding of 61 curriculum units on a lesson-by-lesson basis has been completed and a content analysis is now being carried out. Five units have been carried through initial revision and another batch of 15 units will be revised following dialogues with publishers to obtain publisher requirements. Teachers have been trained and provided with evaluation instruments for field testing the first batch of revised units. Dialogues are being carried out with publishers who are interested in bidding on the materials that eventually will be produced in the project. (Author/PR)

**Descriptors—**\*Career Awareness, \*Career Education, Elementary Education, Elementary School Teachers, Instructional Materials, \*Material Development, \*Program Descriptions, Resource Materials, Surveys, Teacher Developed Materials, \*Visual Aids

The career awareness materials project concentrated on making visual aid materials and knowledge of their use available to the elementary school teachers in the Bethel (Oregon) School District. The program assigned staff members in developing new materials and made those materials available to other teachers in the District. The materials included bulletin boards, posters, games, kits, maps, study prints, realia kits, and study series. A survey of the teachers taking part in the project indicated that the materials are of assistance to those teachers acquainted with career awareness concepts, that additional inservice programs are needed for teachers to better understand the program and make better use of the materials, and that additional materials need to be collected to enhance resource availability. Demographic and statistical information for the District and a survey of project costs are included in the project summary. (JR)

**Descriptors—**\*Career Education, Career Exploration, \*College High School Cooperation, Course Descriptions, \*Demonstration Programs, Pilot Projects, \*Program Descriptions, Secondary Education, \*Small Schools

The report describes a program whose primary objectives were to develop a model program wherein the resources of the community college and the secondary school are utilized to expand occupational education opportunities in a manner that related high school education to the world of work, and to provide secondary students with programs of occupational orientation, exploration, occupational cluster training, counseling and guidance in small, isolated high schools whose size and resources have restricted their programs in the past to instruction aimed primarily at preparation for college. The two-year program involved career education training for instructors, aids, and consultants in two relatively isolated Oregon secondary schools; career education instruction for the schools' students by means of learning packages; and a mobile career education laboratory. The report's summary and conclusions indicate that the program was a success. Half the document consists of course outlines for the following 10 courses: welding, small engines, gas engine trouble shooting, construction skills, drafting, commercial design, consumer problems, child care and development, clothing construction, and personal development. **Descriptors—**Administrator Responsibility, Career Exploration, Curriculum, \*Demonstration Programs, \*Educational Objectives, Industrial Arts, Junior High Schools, Pilot Projects, \*Program Descriptions, \*Program Development, Teacher Improvement, \*Trade and Industrial Education, Vocational Education

The report describes the organizational phase of a project designed to create program models and supporting literature for exploratory industrial career development programs for grades seven to ten. The project was undertaken by Oregon State University in cooperation with the Oregon State Department of Education and involved the formation of a consortium for program development among four Oregon school districts. The successful completion of phase one (staff development, curriculum development, and administrative requirements development) resulted in the development of five program models, the participation of selected staff from each district in monthly inservice activities, the impact of the program on all industrial education staff, and the commitment by each school district of staff and/or funds toward the implementation of program models. Appendixes make up virtually all of the document and present detailed outlines of program goals and performance indicators for the four districts: the Albany Career Exploration/Industrial Arts (Student Managed Learning) Program; the Ashland Junior High School Exploratory Industrial Career Program; for Klamath Falls, two articulated programs (the Ponderosa Junior High School Industrial Career Exploration Program, and the Mazama Mid-High School Exploratory Industrial Career Program); and the Philomath Alive Program (Allied Learning in Vocational Exploration). **Descriptors—**Academic Achievement, \*Career Awareness, \*Career Education, Educational Assessment, \*Educational Programs, Elementary Education, \*Evaluation Methods, Program Evaluation, \*Student Evaluation, Teacher Developed Materials

The report describes a project designed to evaluate the effectiveness of career awareness instruction in the Bethel District (Oregon) elementary schools' World of Work program. Teachers from each grade level developed formats for the evaluation instruments which were administered to students, with the results in turn being evaluated by an evaluation committee and by outside evaluators. Analysis of the test results indicated that the instruments at some grade levels were too easy, and that questions at the fifth and sixth grade level were too social studies oriented and hence needed extensive revision. The study concluded that due to changes in curriculum it would be necessary to revise the Bethel World of Work guide. Demographic information for the study and a summary of its costs appear at the end of the report. (JR)

**Descriptors—**\*Career Awareness, \*Career Education, \*Educational Programs, Elementary Education, Guidance, Individualized Programs, Inservice Programs, Inservice Teacher Education, \*Program Evaluation, \*School Community Relationship

The report describes a project whose major thrust was to personalize students' learning experiences, through the community's occupational environment, in developing a strong guidance-based career education program for elementary grades. A series of staff workshops and small study groups focused on the development of career awareness programs and particular units for each grade level. Major outcomes of the project were: integration of career awareness with social studies curriculum; development of guidance activities at each level; development of a field trip model; development of a student services program; refinement of student activities; and development of a program utilizing community volunteers from junior high, senior high, community college, and school patrons. An outside evaluation report of the project concluded that the amount of staff involvement was an asset

to the project, but that the failure to strictly correlate curriculum changes with accepted career awareness objectives constituted a handicap. The final report includes a quarterly report of the project which presents both long- and short-range goals, objectives, and activities for the project. The report ends with conclusions, recommendations for areas of future development, and a brief summary. Demographic and statistical information and a summary of project costs are included. **Identifiers—Marshall High School, Oregon (Portland), PCE, \*Project Career Education**  
 Intended for use by Marshall High School faculty as they integrate career education into their curriculum, the project notebook is based on the (Portland, Oregon) overall Area 2 program goals for career education which proposes that all children completing school should have sufficient knowledge and competencies to enter into a field of employment or an advanced training program in that field. The first section, goals and components, discusses K-10 activities in the areas of career awareness and career exploration. Also explained are the five components of career education at John Marshall High School (file folders, self understanding surveys, speakers, field trips, and resources). The remaining sections of the document describe the school's integrated career activities in the areas of art, business education, counseling, language arts (English), health and physical education, home economics, humanities, industrial education, math, modern languages, science, social studies, and special education. Concluding the document are a discussion of the functions and resources of the Career Planning Center (CPC), a description of self understanding survey instruments being utilized, and a list of additional resources available through Area 2 offices.  Project Career Education Activities for Grades K-3 is based on the overall Area 2 (Portland, Oregon) program goals for career education which proposes that children completing school should have sufficient knowledge and competencies to enter into a field of employment or advanced training program in that field. The first section discusses the project's goals, concepts, and components, related to the total K-10 career awareness and exploration program, discussing the educational strategies of resource development, field trips, speakers, file folders, and self understanding surveys. The body of the document is divided into integrated career awareness activities for the following grade levels: kindergarten/grade 1 (with sections entitled ourselves, school, others, jobs, and making things); grade 2 (with sections entitled vocational, family, citizenship, and leisure); and grade 3 (with sections entitled health and science, music, language arts, self awareness, and social studies). For each activity the theme, grade level, curriculum area, life role, purpose, objective, material/resources, and

teaching procedures are specified. The document concludes with sample activity blanks and evaluation forms. (BP)

The Portland (Oregon) Public School Project Career Education (PCE) resource supplement (K-6) was developed to be added to the PCE/K-10 Activities for Career Education. The first section of the document consists of instructions for use of the document, the minimal expectations of the project, the goals and components for career awareness (resources, field trips, and speakers), six activity guide evaluations for grades K-6, and a grade six activity guide insert. The remaining sections consists of resource materials and information related to: (1) field trips in the Portland area; (2) a list of audiovisual aids specifying grade levels, academic subject area, and topic; (3) free sources of career education materials; (4) children's books arranged by author, specifying grade level and academic subject area; and (5) additional teacher reference information, including life role definitions, occupational classifications, career clusters, associated occupations, and a career education bibliography. **\*Integrated Curriculum, Interdisciplinary Approach, Learning Activities, Personal Values, Primary Education, Program Evaluation, \*Reading Instruction, Reading Materials, Reading Material Selection, Reading Skills, \*Resource Materials, Teaching Procedures**

The study identified primary grade-level materials that might be useful in helping children considered socioeconomically disadvantaged to secure personal identities and self-awareness in relation to the social and economic systems around them. Major project activities were: (1) developing pertinent course-level goals for career and consumer education and reading skills instruction; (2) studying reading and language arts materials commonly used in Portland public schools for content related to career and consumer education; and (3) surveying Portland teachers for their current thoughts and classroom procedures in the teaching of career and consumer education concepts. The study committee concluded that teaching career and consumer education concepts in concert with reading skills is feasible and is an approach supported by teachers. The project report comprises one-quarter of the document. Appendixes range from job descriptions of the project committees to prototypical instruction guides, an orientation to their use, and an evaluation instrument for their users. A one-page bibliography of primary instructional materials, a cross-referenced goals checklist, and descriptor concepts for each goal are also appended, as are data showing agreement levels among teachers for the importance of career and consumer education goals and formative and summative project evaluation reports. The document is a sampling of lesson plans for career education in secondary academic subject areas, produced by North Dakota school personnel with the State board, for a vocational education exemplary project. It is a preliminary draft compiled for field-testing. Project objectives include: (1) preparing youth to cope with continued change in the world of work, (2) acquainting students with major occupational fields, (3) helping students assess themselves, and (4) helping students acquire necessary job information. Other objectives stress attitudes, realism, planning, and educational relevance. Individual lessons are presented in the areas of English, mathematics, biology, art, economics, office education, social studies, foreign language, and guidance. Several in-depth lessons are presented for English classes (comprising more than half the document); there is one lesson outlined for each of the other disciplines. Each lesson plan includes broad and specific objectives, a list of activities, a teaching guide entitled "Suggested Technique," and a list of resource materials. There is special emphasis in the English lessons on self-awareness, examination of attitudes and beliefs and their sources in society and in the family, and rational decision-making. Lessons in the other subject areas concentrate on occupational information, job skills, and self-evaluation. (AJ)

Identifiers—\*North Dakota

The final report describes an exemplary three-year program in vocational guidance and occupational preparation in North Dakota designed to integrate career development activities throughout the elementary-secondary curriculum. The program, which involved both teachers and students in a wide variety of career development activities, resulted in the organization of inservice programs for administrators, teachers, and counselors, and the development of career activity guides, an administrator's guide, 75 fifteen-minute television tapes, selected career guidance material, special intensive training programs for school dropouts, and a model career guidance program. An interim evaluation of the program's third year concluded that of all participating groups only guidance personnel participated less than enthusiastically. The final evaluation of the program suggested that even though the exemplary program did not turn into a statewide project as originally planned, the program did accomplish its overall goal of exposing students to the world of work. The report concluded that the career development process needs more emphasis throughout the curriculum and offers two pages of recommendations to that effect. Ten appendices covering 40 pages provide such information as a bibliography, sample activities, and a summary of the results of the Career Development Summer Institute. (JR)

Descriptors—Educational Objectives, Educational Philosophy, Educational Planning, \*Educational Programs, English Instruction, Junior High Schools, Office Occupations Education, \*Prevocational Education, Program Design, Program Development, \*Program Planning, \*Teacher Workshops

The report describes a workshop held to facilitate compliance with recent Tennessee legislation and organized to: (1) plan a model pre-vocational education program at the seventh and eighth grade level and (2) plan for personnel development for teachers, counselors, coordinators, and others responsible for prevocational education programs. Pre-workshop activities included gathering appropriate resource materials, visiting existing pre-vocational and career education programs, preparing reference materials and meeting with consultants and selected school representatives. The two-week workshop brought together individuals of varying backgrounds who represented the complete spectrum of course offerings at the model school, Central Middle School (CMS), and made liberal use of consultants, small and large group work, audio-visual materials, and field trips. Participants' evaluations were generally favorable. The workshop produced statements of philosophy and goals for the CMS pre-vocational education program, instructional units for each participating teacher, a public relations plan for advertising the program to both teachers and the general community, and proposed courses in pre-vocational education to be offered at Middle Tennessee State University. Nine recommendations summarize the workshop's findings. Fifteen pages of appendices include lists of workshop participants, consultants, and visitors, as well as pre-vocational units for English and office occupations. (JR)

Student Needs Assessment Guide.

Vale School District 15, Oreg.

Spons Agency—Oregon State Board of Education, Salem. Div. of Community Colleges and Career Education.

Pub Date Jul 74

Note—496p.

**EDRS Price MF-\$0.92 HC-\$24.75 Plus Postage**

Descriptors—Audiovisual Aids, Career Choice, \*Career Education, Career Exploration, Decision Making, Educational Objectives, Employment Potential, Employment Qualifications, Employment Trends, \*Junior High School Students, Leisure Time, Middle Schools, Occupational Clusters, \*Resource Materials, Self Concept, \*Self Evaluation, \*Student Needs, Teaching Guides, Work Attitudes

Designed as a component of a career exploratory program at Vale Middle School, Vale, Oregon, the Student Needs Assessment Guide provides middle school teachers with an instrument to be used in helping students assess themselves as individuals and to match this assessment with current and expected roles in the adult world. The guide consists of two major components: (1) student needs assessment program goals/objectives and (2) resources. Major goals (pertaining to self-awareness, self-image, values, decision-making, student occupational potentials, career choice, work attitudes, employment skills, job requirements, occupational clusters, maintaining employment, employment trends, and leisure-time activities) are outlined in a three-column format which identifies suggested activities and resources (cross references to the appendixes) to be related to specific objectives. Over 450 pages of the document consist of appendixes, with major coverage given to Appendix A, classroom activities. The vast compilation of "hands-on" materials includes various forms, rating sheets, self-concept/personality checklists, interest and attitude surveys, emotional maturity self-tests, personal data sheets, evaluation checklists, profiles, and experience and self-analysis questionnaires. Other appendixes contain references for films, filmstrips, kits and games, transparencies, and tapes, which are arranged in triple-column format with titles and descriptions, location, and appropriate user level. Alice in Wonderland, or, Through the Looking Glass; Resources for Implementing Principles of Affirmative Action Employment of Women.

Pub Date Jul 75

Note—14p.

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

Descriptors—\*Affirmative Action, \*Annotated Bibliographies, Books, \*Equal Opportunities (Jobs), Females, \*Feminism, Films, Microfilm, Organizations (Groups), Pamphlets, Periodicals, \*Resource Guides, \*Sex Discrimination, Slides, Tape Recordings

The annotated bibliography of resources for implementing principles of affirmative action employment of women consists of an alphabetical listing of 64 references of periodicals, organizations, films, books, pamphlets, tapes, slides, and microfilms. In a three-page introduction to the problem, the author defines an affirmative action program as "a set of specific result-oriented action-commitments and procedures designed to systematically achieve an equitable redistribution of both sexes (and other protected classes) within a workforce." The author further sees the program as one containing goals and timetables so that the workforce distribution takes place as soon as possible within a prescribed time period, with major program emphasis on the recognition and removal of barriers, identification of persons unfairly excluded or held back, and action enabling them to compete for jobs on an equal basis. Disparate treatment of sexes, wage differentials, and harassment are singled out as examples of specific charges typically needing to be filed by females in institutions without affirmative action programs or with token programs. The author also stresses open advertising policies that communicate news of specialized employment opportunities to all qualified women. (Author/EA)

The Picture of a Dropout.

Mesa Public Schools, Ariz. Dept. of Research and Evaluation.

Spons Agency—Arizona State Dept. of Education, Phoenix. Div. of Vocational Education.

Pub Date [74]

Note—54p.

**EDRS Price MF-\$0.76 HC-\$3.32 Plus Postage**

Descriptors—Data Analysis, \*Dropout Characteristics, \*Dropout Identification, Dropout Prevention, \*Dropout Research, Educational Research, \*Potential Dropouts, \*Profile Evaluation, Secondary Education

Identifiers—Arizona (Mesa), \*Mesa High Schools

To determine whether needed components of the career education program were directed toward the potential Mesa school dropouts, a study was made of their characteristics. Samples used were an exhaustive sample of the 431 dropouts of the 1972-1973 school year and a random sample of the 1973-1974 potential dropouts (those students over age 16 or beyond grade 8). Selected demographic data were collected and student absence rates monitored. The Mesa school dropout comes from a diverse background and prediction is questionable. Recommendations include a continuation of the data collection for permanent profiles of the student body, a classification of students by course of study in one of three categories: college preparatory, general education, or vocational education, a followup of no-shows to document summer dropouts, and teacher/student contract programs. Recommendations for counselor activities concern record-keeping and more time scheduled with students. (MU)

Descriptors—Career Awareness, Career Choice, \*Career Education, Career Exploration, Career Planning, Cooperative Education, \*Elementary Secondary Education, Job Training, Occupational Clusters, Occupational Information, \*Post Secondary Education, \*Program Design, \*State Programs, Vocational Development, Vocational Education  
Identifiers—\*Wyoming

The Wyoming Comprehensive Occupational Education Program (K through community college) focuses on positive work attitudes and job-entry skills. In kindergarten through grade six, occupational attitudes are incorporated into the existing elementary school curriculum. A career-orientation program is designed for grades seven and eight that provides occupational information, job interests and aptitudes, job applications and interviews, and the future employment outlook. Students are supplied with the Wyoming Occupation Resource Kits (WORK) from the State Department of Education. Career exploration is the theme in grades nine and ten; students are provided with the opportunity to explore various occupational clusters and to establish a tentative choice of occupational goal by age 16. This is followed by the development of career preparation broad skill programs in grades 11 and 12 that encourage the development of cooperative education programs: industrial cooperative education, distributive education, cooperative office education, cooperative agriculture occupations, cooperative service occupations, and diversified occupations. Postsecondary (grades 13 and 14) and adult education programs for training/retraining are provided by the community colleges. (EA)

**Identifiers**—\*Obstetrics

The report describes the development of a set of equivalency tests for students in Nursing 2 who have had prior clinical laboratory training or experience in pediatrics, obstetrics, or geriatrics. For each of the three areas the examination packet includes: the course clinical objectives, the challenge examination objectives, a self-study guide, a description of the method and the objectives of the examination, a list of instructions for the tester, a "Giving Care to the Patient" performance evaluation tool, other performance evaluation tools that might be used in the test (teaching/learning, nursing care plan, oral medication administration, and intravenous fluid administration), and possible question topics. (The obstetrics examination includes the above items for both care of the newborn and care of the mother during pregnancy, labor, delivery, and post partum.) Three appendixes, comprising nearly a third of the document, include: performance evaluation tools for intravenous fluid therapy, oral medications, a nursing care plan, teaching/learning, patient problems analysis, an annotated bibliography on challenge examinations in nursing, forms and their tabulated results regarding use of challenge examinations in other undergraduate nursing programs and students' past nursing experiences, and a narrative summary of the project. **Trends in Overtime Hours and Pay, 1969-74. Special Labor Force Report 179.**

Bureau of Labor Statistics (DOL), Washington, D.C.

Pub Date 75

Note—14p.

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

**Descriptors**—Age, Blue Collar Occupations, Demography, \*Employment Statistics, \*Employment Trends, Females, \*Labor Force, Males, Marital Status, Occupational Surveys, \*Overtime, Premium Pay, Race, Tables (Data), Union Members, \*Wages, White Collar Occupations, Working Hours

Based mainly on Current Population Survey 1969-1974 data, the report examines recent trends of overtime work, the impact of overtime work on earnings, and the current and past composition of the overtime force. In May, 1974

about 16.1 million workers, one out of every five employed persons, reported working more than 40 hours in his/her principal job; 6.7 million of this number received premium pay for their work. Although one-half of overtime persons were white-collar workers, only one-fifth of these workers received overtime pay. Blue-collar workers accounted for two-fifths of the persons on extended workweeks; nearly three-fourths of the workers received premium pay. Male workers were almost three times as likely as women workers to work overtime. White men were more likely to work overtime than blacks; however, black men were more likely to receive premium pay for overtime hours. A greater percentage of union members (one-fifth of all overtime workers) received premium pay than nonunion members. The proportion of employees working overtime with premium pay varied widely among different industries and occupations. Relatively little growth in the number of overtime workers was shown for the six-year period. (EA)

The manual was designed to offer a comprehensive and unified source of information on professional career planning in all fields of medicine and the allied health vocations. Section 1 deals with the fundamental question, "How does one prepare oneself to become a physician?" Beginning with the high school level, factual information is presented to qualify as a licensed physician. Relevant data are presented on some of the world's major medical institutions and North American medical schools are described regarding: admission, tuition, financial aid, living expenses, and academic and scholastic matters. Separate chapters deal with post graduate specialty programs; medical education opportunities abroad; medical education financing; and immigration, training, and employment information for foreign physicians. Section 2 discusses major types of health service organizations and facilities; choosing a health career; provides occupational information for 200 health care job categories specifying duties and education, training, and experience requirements; professional affiliations; and job relationships. Appended are lists of 100-bed hospitals, referral agencies, placement agencies, major pharmaceutical companies, State agencies on aging, major U. S. voluntary health organizations, career information sources, State and local health careers programs, and health career films. (Author/BP)

**Identifiers**—New York, \*Recurrent Education

The report on postsecondary education in New York State is a general survey of general education, technical education, and professional education programs in the State's postsecondary educational institutions. The report's introductory sections present current and projected statistics on numbers of colleges and students and discuss the basic educational programs and the standardized examinations used in establishing student proficiencies in certain academic areas. The discussion of general education programs covers the various programs, including a special baccalaureate program for adults, a weekend college program, a university without walls, and the Regent's External Degree Program, at eight New York postsecondary institutions. The survey of technical education reviews the technical programs in the State's community colleges, and agriculture and technical institutes, and the minimal offerings of the State's non-public junior colleges. The discussion of professional education describes various methods employed for maintaining professional knowledge and skill: the use of media, career ladders programs, preceptorship programs for intra-professional advancement, independent ventures, and organizational efforts toward coherent patterns. The report concludes with discussions of problems and policy considerations affecting adult education in New York State. (JR)

**Identifiers**—\*4 H Clubs

The guide for developing 4-H curricula for training adult volunteers stresses changing factors which argue in favor of individualized training programs for the volunteers. It provides an outline for a minimum curriculum which consists of a basic orientation program for beginning leaders and suggestions for additional training based on the volunteers' responsibility, background, interests, and needs in one or more of the following areas: organizational leadership; project/activity leadership; area organizational leader coordinator; area project and activity leader coordinator; volunteer boards in 4-H; leaders councils; sponsors; citizens of community; business and governmental agencies; civic, service, fraternal, and religious organizations; and things more experienced leaders might want to know. **Descriptors—**\*Adult Leaders, \*Educational Philosophy, \*Educational Principles, Extension Agents, Individual Needs, Leadership, Personal Growth, \*Volunteers, \*Youth Clubs  
**Identifiers—**\*4 H Clubs

The pamphlet elaborates on the philosophy that the role of 4-H Club extension agents and volunteers is to help people to do things for themselves, rather than to do things for them. It presents brief discussions of 22 principles dealing generally with the importance of extension agents and volunteers in the operation of 4-H Clubs, the need for personal growth and development of all participants in the clubs, the need for individual consideration and clear role definition for volunteers, the need for learning goals for youth and volunteers to facilitate the implementation of learning experiences, the advantages of group participation, and the need for leadership development. **Identifiers—**\*4 H Clubs

The guidelines on leadership development for urban 4-H Clubs contain two brief introductory sections: the first, rationale, presents definitions of the roles of volunteers, professionals, and paraprofessionals in 4-H Clubs; the second, purpose and objectives, explains the principles behind the curriculum. The section on curriculum format is divided into four sections: section one includes a description of the leadership roles of volunteers, paraprofessionals, and professionals with a model showing the relationship of the roles in the 4-H program; section two lists statements of the knowledge and skill needed to perform each function, along with statements about appropriate attitudes and some available resources and materials; section three describes learning experiences which may be appropriate for the teaching/learning process and includes a sample lesson plan for staff development; section four describes a plan for reporting evaluative data relative to the curriculum. **Identifiers—**\*4 H Clubs

The National 4-H Urban Program Development Committee's Plan for Action outlines some of the primary concerns of the urban 4-H program. It discusses the need for 4-H in urban areas and the particular relevance of sound program design and delivery in helping urban youth, especially those from low-income families, to find ways to improve their situation. It discusses staffing title definitions at the professional, paraprofessional, and volunteer levels; considers urban resource development from the standpoint of procedures and examples of available resources; and suggests a program evaluation process. The plan concludes with a series of recommendations regarding administration, program materials, research and evaluation, and resource development for urban 4-H programs. (JR)

**Identifiers—**Louisiana (Lafourche Parish), Needs Assessment

The manpower survey, conducted in Lafourche Parish, Louisiana, determined current and future manpower requirements and related them to the occupational skills needed in the vocational-technical program in the schools. Data were obtained from employer respondents through a mail questionnaire sent to nearly 1,800 firms in the parish with a return of 500. From the data collected and analyzed the Lafourche Parish manpower needs and occupations requiring less than four years of college are discussed. Further stated are the manpower requirements in terms of total employment and background, skill classifications, the occupational mix, new jobs available, a summary of occupational requirements, and vocational-technical education requirements. Twenty-five recommendations are listed. Appendixes make up more than two-thirds of the document

and consist of general manpower tables, occupational tables, and the survey of manpower and training needs questionnaire. (BP)

**Descriptors—**Animal Caretakers, Job Analysis, Job Skills, \*Occupational Information, Occupational Surveys, Paramedical Occupations, Receptionists, \*Skill Analysis, Statistical Data, Tables (Data), \*Task Analysis, Task Performance, Technical Occupations, \*Veterinary Assistants, \*Veterinary Medicine

The occupational survey's purpose was to identify the skills which are performed and essential for success in three veterinary lay occupations: animal health assistant, animal hospital receptionist, and animal health technician. Survey objectives were accomplished by constructing an initial task inventory of 21 duty areas, validating the initial inventory, and conducting a random survey of 100 veterinarians. A computer analysis of the 40 survey responses resulted in a computation of frequencies and means for each task statement. The analyses findings cover the 268 specific tasks performed in each of the three veterinarian lay occupations, the relative importance of the specific task, and a comparison among the three occupations for each task statement. The findings are supported by tables showing the statistical means and frequencies. A 16-item bibliography is appended. (BP)

**Descriptors—**\*Administrator Attitudes, Attitude Tests, \*Counselor Attitudes, Educational Attitudes, Educational Background, Educational Objectives, Performance, Professional Associations, \*Professional Recognition, Program Effectiveness, State Supervisors, \*State Surveys, Tables (Data), Teacher Educators, \*Vocational Agriculture, Vocational Agriculture Teachers  
**Identifiers—**West Virginia

The study surveyed the attitudes toward vocational agriculture of all West Virginia superintendents, principals, county vocational directors, and guidance counselors in schools offering vocational agriculture. Survey was through Likert-type

attitude scales (included in the appendix) to which all 257 individuals in the population responded. Independent variables included: years in present position, previous enrollment in vocational agriculture, years vocational agriculture had been offered in the school and the county, membership in vocational professional associations, instructional areas of certification, understanding of goals and objectives of vocational agriculture, attitudes toward vocational agriculture teachers, and effectiveness ranking of departments and teachers by State supervisors and teacher educators. Results indicated all four groups were relatively favorable toward vocational agriculture and fairly accurate in understanding its objectives. Respondents who were certified in vocational agriculture and members of vocational professional associations tended to have a more favorable attitude toward vocational agriculture. All four groups also tended to have favorable attitudes regarding teachers of agriculture; guidance counselors tended to be the most favorable. High positive relationships were indicated between teacher educators and supervisors on their department/teacher rankings. Concluding recommendations by the authors relate to further program improvement. (EA)

**Descriptors**—\*Curriculum Development, Evaluation Methods, Individualized Instruction, \*Law Enforcement, Military Personnel, \*Military Training, Peer Teaching, \*Performance Based Education, \*Police, Problem Solving, Program Effectiveness, Program Evaluation, Student Evaluation, Systems Approach, Teaching Methods

**Identifiers**—Basic Law Enforcement Course, BLEC, \*Military Police, United States Military Police School, USAMPS

In accordance with the Army's emphasis on performance-oriented instruction, this project was undertaken to revise the Basic Law Enforcement Course (BLEC) offered by the U.S. Military Police School at Fort Gordon. Through a unique combination of systems engineering, group problem-solving, and peer instruction, an individualized, open-access curriculum design was developed. This design afforded the basic MP student greater flexibility and choice in the use of a variety of instructional techniques made available (e.g., videotaped demonstration, slide-tape programs, practical exercises, peer instruction, and performance tests). A prototypic unit of the course was fully developed and tested in a trial run to assess its feasibility, training effectiveness, and overall acceptance by the instructors and students. Only minor operational problems were encountered. Instructor and student attitudes were universally favorable to the new design. An experimental group of 51 students trained in the prototypic unit on the trial run surpassed by a significant margin the performance of a control group that had been taught the same material through conventional methods. On the basis of the trial run results, systems engineering of the entire BLEC was undertaken in accordance with open-access design. (Six appendixes include various task analysis procedures.) **Descriptors**—Behavioral Objectives, Evaluation Methods, \*Field Studies, Individualized Instruc-

tion, Military Personnel, \*Military Training, \*Performance Based Education, \*Program Attitudes, Program Development, \*Program Evaluation, Program Improvement, Questionnaires, Skill Development, Systems Approach, Task Analysis, Teaching Methods

**Identifiers**—Advanced Individual Training, AIT, Armor Crewman, \*Armor Reconnaissance Specialist, Weapons

Performance-oriented instruction was developed, field tested, and refined in two Advanced Individual Training (AIT) programs—Armor Reconnaissance Specialist (MOS 11D) and Armor Crewman (MOS 11E). Tasks for both MOS (Military Occupational Specialty) were inventoried and the inventories were reduced by eliminating those tasks which are not required for entry-level duty performance. Performance objectives were written for tasks that could be feasibly and appropriately trained. These performance objectives were translated into performance measures and tests. Both programs were revised to include the performance objectives and measures. Field test, data collection, and refinement of the two training programs extended over 10 successive training cycles. The approximate number of trainees involved were 1,000 and 2,000 respectively. Programs were refined on the basis of observation of instruction, results of formal performance examinations, and attitude indicators. The final programs resulted in high trainee proficiency levels, and favorable trainee and instructor attitudes. Questionnaires used to sample trainee and instructor attitudes toward the performance-oriented programs are appended. (Author/BP)

Covering the time period from September 1970 to July 1973, the final report reviews the overall goals, activities, and accomplishments of a pilot project in the New Orleans public schools to provide the exemplary program for occupational preparation (EPOP) for children of the inner city area. At the beginning of the third program year, technical assistance was employed to develop a comprehensive evaluation design incorporating product and process objectives. The resulting document enabled the EPOP staff to clearly communicate its objectives and delineate responsibilities throughout the program. Procedures for monitoring activities and data collection enhanced the level of program operations. Many resources focused on classroom activities to develop occupational awareness. Exploratory, skill, and semi-skill training at the secondary level were made available to students to meet the basic goals of the program. (Author/MU)

Project Career Exploration's overall purpose was designing and implementing a method of providing juniors and seniors in high school with career exploration opportunities relative to the occupational programs offered by the Waukesha County Technical Institute and other postsecondary institutions. Course outlines make up the body of the report, outlining objectives, materials, and presentation guidelines. Resource addresses are provided for each unit of study. Courses were designed to provide knowledge of the range of occupations within a given career cluster as well as an understanding of the environment, job opportunities, and the types of special skills required for specific occupations. Health careers and hospitality careers were selected by a committee of high school representatives for development into career exploration courses to be offered on a semester basis. The courses, consisting of lectures, field trips, and guest speakers, were taught in the evening once a week for two and one-half hours. (KH)

**Descriptors**—\*Adult Basic Education, County Programs, \*Disadvantaged Groups, Educational Demand, \*Educational Needs, Identification, Program Descriptions, Recruitment, \*Research Projects, Underemployed, Unemployed

**Identifiers**—Arizona (Mohave County), Needs Assessment

The project was conducted to find out if there was a need for an adult education program to provide instruction in job-related competencies in the basic skills of reading, writing, math, spelling, and communications for the unemployed and underemployed of Mohave County, Arizona. The report presents the procedures used to identify the persons eligible and willing to take an adult basic education course related to job skills. Results of the study show the difficulty of locating and interviewing persons who may be uneducated, underemployed, or unemployed. Of 1,100 persons who may have less than an eighth grade education 164 were identified, 76 of them from welfare, employment, or other agencies. Of this number 32 indicated that they would take the course, which would justify the hiring of a part-time instructor. Not enough persons were located to substantiate the need for a continuing education program in adult basic education. The need for such education in Mohave County is described and recommendations for future studies are made. (MF)

**Identifiers**—Project VIGOR

The document is comprised of teacher developed career education curriculum materials for Oregon's exemplary program, Project VIGOR. The document presents a brief overview of the project's goals, provides sample units for typical learning activities, presents an inservice model for elementary teachers and a junior high school career education project. Sample units focus on: work in the woods (primary), the individualized field trip (primary), examples of elementary level

activities, career education study units for intermediate grades (careers in business, communications, building trades, art, home economics and related careers, careers in fishing, farming, and forestry), and a careers in science unit. Also presented are an exploration program for grades 7-8 and the course outline of the food service course for grades 11-12. A seven-page section presents an inservice model on career awareness for elementary teachers and an inservice project on music and career awareness. A detailed step-by-step report of the development of a resource center at Gilbert Middle School discusses the program's philosophy and seventh and eighth grade objectives, and presents general recommendations regarding resource center development. Identifiers—\*Wisconsin

The study described in the report constructed a task analysis for the adult vocational education coordinators in Wisconsin in the areas of business education, general education, home economics, agriculture, health, trade, and industry. The survey instrument contained two parts: the first gathered factual and statistical information about the coordinators; the second estimated the frequency of performance and degree of importance (to which numerical values were assigned) of the 148 tasks in the broad areas of program planning and development, instructional planning, evaluation, public relations, students, and professional growth. The resulting task analysis (organized according to the broad task areas, the tasks being ranked within each area according to the median value of the degree of importance for each of the six areas of coordination) indicated that, of all task areas, program planning and development received the highest rating of importance. Next in importance was instructional planning; public relations rated

moderately important. For the other three areas, the tasks were considered moderately important, but were rarely or never performed. Nearly 100 pages of appendixes include the study instrument, the coordinators' task survey instrument, and tabulations of the degree of importance and degree of performance of the tasks. (JR)

Descriptors—Business Education, \*Enrollment, \*Enrollment Influences, Equal Opportunities (Jobs), \*Females, Job Training, \*Middle Aged, \*Proprietary Schools, Tables (Data), Technical Education

Identifiers—Ohio (Cuyahoga County)

The basic objective of the study was to investigate the participation of mature adult women, over age 35, in the proprietary business, trade, and technical schools in Cuyahoga County, Ohio. Data were collected by telephone on the 29 registered resident-study schools of Cuyahoga County and two Cleveland-based home study

schools pertaining to enrollment figures that reflect adult women's participation, the programs of study, and cost of attendance. Two institutions with more than 10 mature women enrolled were visited to obtain additional information regarding courses, facilities, and women's participation. The findings indicated that mature women over 35 years of age comprise about 2.5 percent of the total estimated enrollment of the 30 schools surveyed. Only one woman over age 35 was training for a nontraditional female job; two-thirds of the mature women enrollees were receiving training for clerical and sales occupations. The survey revealed that there are many openings available to mature women with the right skills and that proprietary schools are interested in providing such training; however, women re-entering the labor market often are unable to pay the training fees. The report describes an elementary grade level career awareness program which was organized around four open-spaced non-graded learning centers: a kindergarten and three other learning centers in which students stayed for two-year periods to explore the 15 career clusters identified by the U.S. Office of Education. Each learning center used a single career theme (restaurant, library, hospital) as the foundation of the career program. The results of pre- and post-Knowledge of Careers tests administered to randomly selected students indicated that post-test mean scores were higher on all program levels, especially at lower levels, than the pre-test means. An evaluation of the program operation based on a Likert-type questionnaire administered to the teaching staff indicated their favorable perceptions of each aspect of the program which was assessed (for example, program improvement, program effectiveness, student attitudes, program objectives, program implementation, and program administration). The report concludes with eight recommendations for improving the program. Two appendixes include the Knowledge of Careers Tests by levels and the teacher questionnaire. (JR)

**Careers for Liberal Arts Graduates: Employment Success Two Years After Graduation.**

Southern Illinois Univ., Carbondale. Coll. of Liberal Arts.

Pub Date [74]

Note—13p.; For related document, see CE 004 625

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

Descriptors—Career Ladders, Career Opportunities, Careers, \*College Graduates, \*Employment Patterns, \*Followup Studies, Job Placement, \*Liberal Arts Majors, Salaries, Tables (Data), Unemployment, \*Vocational Followup  
Identifiers—Southern Illinois University Carbondale

Eliminating the unstable employment period for college graduates in the first year or two after graduation, the followup study of the Southern Illinois University (Carbondale) 1972 liberal arts graduates was undertaken in November, 1974. Of 735 liberal arts graduates in 1972, there were 375 respondents. The liberal arts graduates reflected a satisfactory employment rate when comparing their unemployment rates to national rates; their overall unemployment rate was 7.5 percent, ranging from a rate of 12.5 percent for unmarried males to 2.0 percent for married

males. Graduates were engaged in a variety of careers (250 job titles) and showed a high level of employment, with over half earning over \$10,000 a year and three-fourths listing their job as having career potential. Their major difficulty seemed to be the long process of finding satisfactory employment. Since few of the liberal arts graduates had a job-related major, the results question the assumption that a job-related major is necessary for a satisfactory job. An alphabetized list of the careers of the responding liberal arts graduates itemizes the graduate's college major, career potential assessment, and his/her 1974 yearly salary. A raw data summary of the followup study is also included. (EA)

**Identifiers**—Southern Illinois University Carbondale

The 1974 followup study of the 1972 liberal arts graduates of Southern Illinois University (Carbondale) was conducted to provide information about the present status of graduates regarding their rate, variety, and level of employment and to gain input on whether the College of Liberal Arts should place more emphasis on career preparation. Data were obtained two and one-half years after graduation, allowing sufficient time for employment stability. Findings on the 375 respondents of the 735 liberal arts graduates indicated: 85.9 percent in the labor force; overall unemployment of 7.5 percent; about 40 percent pursuing an advanced degree; employment in the whole range of organizations, occupations, and industries; 76.5 percent realizing satisfaction with their present job and 71.2 percent realizing career potential; and over 50 percent of full-time employees with salaries over \$10,000. Relationship of job to major was not a highly significant indicator of employment level. While 70.5 percent of the graduates would choose the same or another liberal arts major, approximately 75 percent wanted more career preparation in their academic programs. Half of the document consists of appendixes of related tables, research methodology, and a copy of the questionnaire. (EA)

The overall objective of Career Education Through Multi-Experience Centers is to develop and implement a comprehensive career education program for special education in the Quincy, Illinois public schools. Part one of the report provides statistical data on the project. The bulk of part two analyzes the progress made toward accomplishing the program's six objectives (design 10 multi-experience centers, develop appropriate student evaluation instruments, increase students'

career awareness, improve students' attitude toward their educational environment, increase the regular education staff members' acceptance of special education students, and develop more positive self concepts in secondary level students), with separate consideration of operational and evaluation procedures, the extent to which these procedures were implemented, and the generally positive evaluation results for each objective. Other project topics covered in part two include: expectations; effects on other schools and on cooperating community organizations; activities to assure continuation; and objectives, procedures, and evaluations for 1975-76. Part three, a dissemination report, lists newspaper articles about the project, project presentations, and requests for various types of project information. Five appendixes include detailed descriptions of the 10 career centers, evaluation instruments, reactions and evaluations of multi-experience centers, State certification of personnel, and the project brochure. **Descriptors**—Apprenticeships, Career Education, \*Conference Reports, \*Cooperative Education, Educational Philosophy, Post Secondary Education, Role Perception, Rural Education, School Community Relationship, School Industry Relationship, Secondary Education, Urban Education, \*Vocational Education

The conference report on cooperative vocational education contains four main sections. The first, background papers, contains three papers: Education in a Changing Society, Carl H. Madden; A Prospectus for Cooperative Vocational Education, William F. Pierce; and Critical Issues in Cooperative Vocational Education, Robert M. Worthington. The second section, summaries of contributing presentations, summarizes the remarks of: John A. Pinkston, a business man; J. C. Turner, a labor leader; and Paul W. Briggs, Robert L. Bennett, and Edward C. Roberts, educators. The third section, group reports on cooperative vocational education, discusses seven issues: role expectations in career education, expansion of cooperative education in career/job preparatory curricula, relationship to apprenticeship training, liability considerations, participation of students under age 16, rural and urban considerations, and employer participation. The fourth section is an evaluation of the conference by John K. Coster. (JR)

**Descriptors**—\*Continuous Progress Plan, Disadvantaged Groups, Flexible Schedules, \*Individualized Curriculum, Individualized Instruction, \*Office Occupations Education, Performance Factors, \*School Calendars, Self Evaluation, \*Student Evaluation

**Identifiers**—\*Mountain Plains Program

The study investigated the effect of weekly instructor monitoring of a curriculum calendar on student progress within the individualized, competency-based Mountain-Plains office education program. Subjects were adult members of disadvantaged families and included all Mountain-Plains students entering office education career preparation between November, 1974 and February, 1975. Students, unaware of the experiment, were randomly placed in an experimental (calendar) or a control (no calendar) group for a six-week period. Attendance and progress hours

were recorded, with the rate of progress computed weekly for each student. For the experimental group, the instructor constructed, with the student, a curriculum calendar based on established average time to complete a given package. Design for the experiment was a post-test only control group design. The major conclusion of the study was that the curriculum calendar utilized with adults within a self-paced, individualized office education curriculum provides an effective method of significantly increasing the students' rate of progress. The majority of staff and students commented positively on the calendar; instructional time required for its use was not excessive. Likewise, the curriculum calendar was viewed as a valuable tool in minimizing student length of stay in the program, thus, improving cost benefit factors. (EA)

**Descriptors**—Attitude Tests, \*Child Rearing, Discipline, Evaluation, Individualism, \*Opinions, \*Parent Attitudes, Parent Child Relationship, \*Questionnaires, Rejection

**Identifiers**—\*Mountain Plains Program

Development of the Child Raising Opinion Questionnaire to assess the attitudes of Mountain-Plains parents toward children was undertaken due to the inadequacy of other instruments in this area. Important factors in the development of the instrument were the parenting attitude of acceptance/rejection, the ability to perceive the child's individuality and "personhood", and parental resistance to learning about children and child raising techniques. The questionnaire, which is included in the report, consists of four scales: learning receptivity, discipline, indulgence dependency, and nurturance responsibility. The learning receptivity scale is designed to measure the extent to which a parent is receptive to learning about children, while the discipline scale measures the extent to which the parent believes in harsh authoritarian forms of discipline. Indulgence dependency is concerned with the extent to which the parent believes in indulging children; nurturance responsibility is related to the extent to which parents feel responsible for believing in tasks and behaviors which are nurturant and promote maximum development of the child. \*Laws, \*Lawyers, Performance Factors,  
\*Public Opinion, Speeches

Law enforcement today is under intense and increasing public pressure regarding allegations of wrongdoing such as wiretapping, illegal entry, and unlawful surveillance. Meanwhile, law enforcement must continue its main task of investigation and prosecution of criminal offenses in which the prosecutor plays a key role. In many communities the prosecutor's job remains a political office or a part-time occupation, and the costs of these shortcomings are high. Some recommendations for upgrading prosecutorial performance include additional continuing education programs and frequent and periodic reviews of our criminal codes to keep them in step with the times. New legislative tools for prosecutors also need to be sought, and the problem of financial resources to support prosecutive operations is a major one. Changes in the public's perception of the true nature of these problems and adjustments in the criminal justice process will enhance productivity. However, in the final analysis, the real opportunity to improve the criminal justice process exists in how prosecutors perform their duties at the local level. Prosecutors must never hesitate to follow the evidence where it leads, and there must be absolute regard for the guarantees of the Bill of Rights. (EA)

Programs, \*Critical Incidents Method,  
Evaluation, \*Interaction Process Analysis, Mea-  
surement Techniques, Speeches, Systems Anal-  
ysis, \*Systems Approach, \*Systems Develop-  
ment

Identifiers—SHAPES, \*Shared Process Evalua-  
tion System

The paper describes the Shared Process  
Evaluation System (SHAPES) for analyzing the  
process of community development. The system's  
basic organizing unit is the critical incident, an  
event judged to be essential to the continuation  
of a particular community development project  
or as representing a choice point in the project's  
history. Three sets of design criteria were used  
in developing SHAPES: criteria related to infor-  
mation discrimination and gathering; those related  
to validity, bias, and reliability; and those related  
to flexibility of information storage and retrieval. In  
the system, community development is defined as  
taking place when the priorities of different fields  
(individual or group actors in the community) are  
in relative agreement and result in effective  
shared activity. The SHAPES System in operation  
addresses itself to four questions: Who was in-  
volved? What happened? In what contextual  
model should the project outcome be viewed?  
What were the project outcomes? These four  
questions together with the instruments designed  
to provide data for their analysis constitute the  
essence of SHAPES. A field test of SHAPES  
produced positive reactions from an outside  
evaluator, field agents, and community infor-  
mants, thereby encouraging its further refinement  
and application. (JR)

Education, \*Military Training, Organizational  
Development, Participant Satisfaction, Program  
Attitudes, \*Program Development, \*Program  
Evaluation, Small Group Instruction, Tables  
(Data), Training Techniques

The report describes the development and  
evaluation of an in-unit, leadership/management  
training program (based on experimental training  
methodology for providing Army leaders with  
behavioral skills and techniques) implemented  
within three battalion-sized combat units at Fort  
Bliss, Texas, in 1974. The program was organized  
around workshops designed to train leaders in in-  
dividual and group problem-solving, management  
by objectives, and performance management. To  
evaluate the effect of the training, two survey in-  
struments (an organizational climate survey and a  
skill use inventory) were developed. Seventy-six  
of the 92 key leaders trained were interviewed 2  
to 12 months after the 60 hours of training was  
completed. In general, all of the participants ac-  
cepted the training content as leadership/mana-  
gement skills useful to the Army leader in obtaining  
organizational goals. Over two-thirds estimated  
that they had increased their on-the-job use of  
the workshop skills and were able to identify  
positive consequences. Results of the project  
showed no conclusive evidence with respect to  
hard data (unit performance), but the soft data  
(estimates of the effects of skill use on-the-job)  
suggest that with the removal of several opera-  
tional obstacles the training program could prove  
effective on unit performance and organizational  
climate. (Author/JR)

sociations, \*Team Training, Teamwork  
Identifiers—Health Delivery Systems, Institute of  
Medicine

The conference brought together on a national  
scale equal numbers of leaders (120 in all) from  
the major health professions to define the issues  
in the increasingly important matter of inter-  
disciplinary education, in order to give impetus to  
more detailed considerations of institutional, re-  
gional, and ultimately national levels of health  
education. The report comprises a description of  
the organization of the conference and the  
development of the report, the chairperson's in-  
troduction; and the recommendations and conclu-  
sions of the steering committee. Discussion  
groups considered six questions: (1) Why educate  
teams? (2) Who should be so educated? (3) How  
should students be educated (classroom empha-  
sis)? (4) How should students and professionals  
be educated (clinical emphasis)? (5) What are  
the requirements for educating health care  
delivery teams? (6) What are the obstacles? Two  
papers presented at the conference on these  
themes are among the appendixes, as is a report  
of the proceedings. The steering committee's  
recommendations are aimed at three levels: ad-  
ministrative, teaching, and national, stressing the  
importance of recognition of an obligation to en-  
gage in interdisciplinary education, the value of  
clinical settings for developing interdisciplinary  
education, and the need for governmental and  
professional support of interdisciplinary education  
for health care delivery teams. (AJ)

The Use of Social Security Earnings Data for As-  
sessing the Impact of Manpower Training Pro-  
grams: Final Report of the Panel on Manpower  
Training Evaluation.

National Academy of Sciences - National  
Research Council, Washington, D.C. Assembly  
of Behavioral and Social Sciences.

Pub Date Jan 74

Note—48p.

EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage

Descriptors—Data Analysis, \*Data Collection,  
\*Evaluation Methods, Information Needs,  
\*Manpower Development, \*Manpower Utiliza-  
tion, \*Program Evaluation, Tables (Data)

Identifiers—\*Social Security

The Panel on Manpower Training Evaluation  
has recommended that Social Security earnings  
data be more widely used in evaluating man-  
power programs, especially those that tend to  
serve prime-age males, such as the MDTA (Man-  
power Development Training Act) or NAB-JOBS  
(National Association of Businessmen-Job Oppor-  
tunities in the Business Sector) programs. In spite  
of some limitations, earnings data provide very  
accurate and inexpensive longitudinal information  
that can be efficiently analyzed and provide as  
adequate a source of comparison groups as tailor-  
made sample survey studies, with the additional

potentiality for matching pairs of observations on selected characteristics such as prior earnings patterns. The panel recognizes the issue of confidentiality and expects adherence to standards set for public use of government data. The panel has stressed that evaluation is limited by the quality of information available on the population of manpower program participants. A suggested approach was to develop accurate samples rather than attempt to gather information on all trainees; however, this precludes development of accurate trainee lists for each project. A concluding recommendation was the undertaking of a study comparing the outcomes of a true experimental design to evaluate a manpower program with outcomes as measured by Social Security data. (Author/EA)

Identifiers—Health Delivery Systems, Institute of Medicine

The document is a collection of six papers on key problems in health manpower which were presented at a symposium during the 1974 spring meeting of the Institute of Medicine. A seventh paper provides a summary of the major themes at the conclusion of the program. All of the symposium papers deal with the principal manpower issues of supply, distribution of physicians by geography and specialty, and the role of non-physicians in the delivery of health care. Although the speakers differ on the relative importance of these problems and remedies for them, there is general agreement on certain basic propositions: (1) there is a maldistribution of physicians by geographic location and specialty; (2) there is a need for more physicians to enter the primary care specialties; (3) greater use of physician-extenders could improve physician productivity in the delivery of health care; (4) there is little real prospect for solving distribution problems through voluntary actions taken by physicians, medical schools, or teaching hospitals; (5) simply increasing the supply of physicians will not solve distribution problems. (Author/AJ)

Identifiers—\*Minnesota

The vocational followup system in the Minnesota area postsecondary vocational-technical institutes gathers three types of data about the students: (1) biographical, (2) termination and change of program, and (3) followup data on graduates. As part of this three-pronged effort, the termination and change data in the report provide information concerning the number of enrollees who graduated, withdrew, completed training objectives, received trade certificates, or changed programs between July 1, 1972 and June 30, 1973. Appendixes include the system curriculum guide and the categorization system of reasons for withdrawal. (MF)

#### ED 110 825 CE 004 649

**Summary of One-Year Follow-Up Information on Graduates Who Graduated From Full-Time Day Programs of The Minnesota Area Vocational-Technical Institutes Between July 1, 1971, and June 30, 1972. Summary of All Graduates: Across the State.**

Minnesota Univ., Minneapolis. Vocational Follow-Up System.  
Pub Date Nov 73

Note—48p.; For related documents, see CE 004 647-648

**EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage**  
Descriptors—\*Area Vocational Schools, Curriculum Design, Employer Attitudes, \*Followup Studies, \*Graduate Surveys, Job Satisfaction, Occupational Clusters, Post Secondary Education, State Surveys, Student Opinion, Technical Institutes, \*Vocational Followup  
Identifiers—\*Minnesota

The main purpose of a followup of Minnesota area postsecondary vocational-technical institute graduates was to determine what happens to

graduates after they leave school. Information obtained from graduates and their employers allows school personnel to judge the effectiveness of their programs and how they might be improved. Experience with the followup system in Minnesota has been very successful. During the July 1, 1971-June 30, 1972 year returns were received from 80 percent of the graduates and from 92 percent of their employers. The data are presented in 35 tables and corresponding narratives covering the broad subject matter of the graduates' employment status at one year after graduation, including their employment history, employer followup, and graduates' evaluation of their school training programs. Appendixes give the system curriculum guide for broad occupational clusters and curriculum area for specific programs, and a list of the counties in Minnesota's 11 economic regions. (MF)

**A Further Examination of Enlistment Motivation and the Disposition of Army Applicants. Technical Report No. 75-15.**

Human Resources Research Organization, Alexandria, Va.

Spons Agency—Army Research Inst. for the Behavioral and Social Sciences, Arlington, Va.  
Report No.—HumRRO-TR-75-15

Pub Date Jun 75

Note—65p.

**EDRS Price MF-\$0.76 HC-\$3.32 Plus Postage**  
Descriptors—Armed Forces, Behavioral Science Research, Comparative Analysis, \*Data Analysis, \*Enlisted Men, \*Military Personnel, Military Service, Military Training, \*Motivation, \*Participant Characteristics, Questionnaires, Research Projects, Tables (Data)  
Identifiers—Army, \*Military Enlistment

The study was conducted to (1) determine the structure of reasons leading to the enlistment decision, (2) isolate factors leading some initial Army applicants to enlist in one of the other services instead of the Army, and (3) compare data collected in a draft-free environment (FY74) with data collected in FY 72. Based on a sample of 28,079 (11,502 Army), data were obtained from questionnaire responses at Armed Forces Examining and Entrance Stations. The questionnaire included items on endorsement of reasons for enlistment, selection of service, influences in selection of service, and various demographic characteristics. Frequency distributions and factor analysis were used and cross-tabulations were prepared. According to the surveys, the Army's main attraction has been its ability to provide some kind of skill or advanced training to enlistees. Other findings included: (a) the proportion of Army enlistees who initially preferred another service increased 8 percent; (b) the Army gained in educational quality and lost in mental quality of its applicants; (c) age, geographic region, and educational level were the most important characteristics associated with making the Army an enlistee's first choice of service. The questionnaire and intercorrelation matrices for reasons for enlistment are appended. (Author/BP)

Descriptors—Aircraft Pilots, \*Cost Effectiveness, Course Content, Educational Programs, \*Equipment Evaluation, Equipment Utilization, \*Flight Training, Individual Instruction, \*Military Training, Program Development, Program Evaluation, \*Simulators, Training Objectives, Training Techniques, Transfer of Training, Vocational Education  
Identifiers—\*Helicopters

The report describes a study conducted to evaluate Device 2B24, which simulates the UH-1 helicopter and an instrument flight environment, and to determine its suitability for cost-effectively accomplishing the instrument phase of Army rotary wing flight training and facilitating UH-1

helicopter transition training, aviator proficiency evaluation, standardization, and flight training quality control. The three-phase mission suitability test involved examining the 2B24's advanced features in a training context, developing a new instrument training program for use with the device, and administering that training to 16 volunteer officers who had completed Army primary rotary wing training (100 hours) but had no helicopter or instrument flight experience. Results confirmed the device's mission suitability regarding both cost (per-student saving of over \$4,000) and transfer of training (instrument training concluded in an average of 6.5 flight hours, as opposed to 60 flight hours for students in the existing program). Findings also indicated that the standardization, evaluation, and quality control goals had been partially met, and that the device's design is such that their fuller achievement is likely in the future. Four appendices include: suitability test Army participants, course outline for UH-1 instrument and transition training, maneuver performance record forms, and reference material study guide. **T-4G Methodology: Undergraduate Pilot Training T-37 Phase.**

Air Force Human Resources Lab., Williams AFB, Ariz. Flying Training Div.

Report No.—AFHRL-TR-74-107

Pub Date Dec 74

Note—78p.

**EDRS Price MF-\$0.76 HC-\$4.43 Plus Postage**

Descriptors—Aircraft Pilots, \*Aviation Technology, \*Course Content, \*Course Descriptions, \*Curriculum Guides, \*Flight Training, Individual Instruction, Military Training, Performance Based Education, Post Secondary Education, Technical Education, Training Objectives, Training Techniques

The report's brief introduction describes the application of T-4G methodology to the T-37 instrument phase of undergraduate pilot training. The methodology is characterized by instruction in trainers, proficiency advancement, a highly structured syllabus, the training manager concept, early exposure to instrument training, and hands-on training. The introduction also describes the results of a test of the methodology, in which one particular flight training class required an average of 42 percent fewer flying hours (8.8 aircraft hours) than are included in the regular T-37 instrument syllabus. The bulk of the report consists of an appendix whose first part consists of discussions of problems associated with the T-4G Methodology T-37 Syllabus, instructor pilot reactions to the syllabus, results of the application of the syllabus, grade adjustment information for the test population, and recommendations. The bulk of the appendix (60 pages) consists of the syllabus which includes special instructions, task objectives, and performance criteria for the following areas of T-37 flight training: flying training; contact training; instrument trainer training (including basic instruction, basic maneuvers, radio navigation, radar, and mission profile); instrument flight training; navigation training; and formation training. An additional appendix presents a flow chart of the regular against the test syllabi. (JR)

Descriptors—\*Career Education, Cataloging, \*Classification, \*Educational Resources, Filing, Government Libraries, Indexing, Information Centers, Information Dissemination, Information Processing, Information Retrieval, Information Services, Information Sources, Information Storage, Library Facilities, Library Planning, \*Resource Centers, \*Resource Materials, Subject Index Terms

Identifiers—USOE Office of Career Education Resource Library

The introductory section of the paper expresses its purpose: to devise a classification scheme for

career education resource material, which will be used to develop the USOE Office of Career Education Resource Library and will be disseminated to interested State departments of education and local school districts to assist them in classifying their own career education resource materials. The second section of the paper describes the classification of career education resource material, revised after critiquing by 50 randomly selected career education practitioners. The third section describes the classification scheme, defines the nine cataloging terms used, and lists the 40 key descriptors utilized in the filing system. The classification headings are discussed to eliminate confusion of terms. The fourth section describes the use of the key descriptors and card catalog for the purpose of searching and retrieving needed material, and the storage problem is discussed. Section five explains how the index card is designed for conversion to computer card, and the main advantages of a computer system of retrieval are discussed. Brief descriptions of discipline and content areas, of special groups, and of types of materials are appended, as well as a sample index card. (Author/AJ)

Descriptors—Assignments, \*Aviation Technology, Course Content, Equipment Maintenance, \*Fuels, Individual Instruction, \*Instructional Materials, \*Job Training, \*Manuals, Military Training, Post Secondary Education, Technical Education

Identifiers—\*Boatswain Mate F 1 and C, Navy

The Rate Training Manual and Nonresident Career Course (RTM/NRCC) form a self-study package that enables Aviation Boatswain's Mate F to fulfill the requirements for advancement to ABFI and the ABFI for advancement to the rank of ABFC. In preparing for advancement examinations, the manual should be studied in conjunction with Military Requirements for Petty Officers 1 and C, NavPers 10057 (series). Chapter one discusses the enlisted rating structure, the requirements for advancement, responsibilities involved in advancement, and various advancement opportunities. Chapters two through ten cover the following topics: aviation fuels division afloat, JP-5 systems afloat, operation of the JP-5 system, gasoline systems afloat, aviation lube oil system, fuels division ashore, quality assurance and surveillance, maintenance and repair, and administration. The document concludes with a subject index and a 61-page course assignment booklet. (BP)

Descriptors—\*Adult Students, \*Disadvantaged Groups, \*Educational Objectives, \*Rating Scales, Rural Population, \*Student Motivation, Values

Identifiers—\*Mountain Plains Program

Sixteen educational aims were rank ordered by 188 adult rural disadvantaged family members who were student participants in the Mountain-Plains Program. Results were examined by factor analysis and by the Thurstone (unweighted) scaling method; the factor structure was weak, indicating considerable independence for the individual items. Students ranked a feeling for other people, a continuing desire for knowledge,

and emotional stability as their most important aims and a sense of civic responsibility and loyalty to America as their least important aims. The high ranking of personal/interpersonal aims seemed to be contrary to current thinking which assumes practical vocational needs to be those dominant among disadvantaged populations. The study was seen as strong validation for the Mountain-Plains approach to meeting the needs of disadvantaged populations. (Author/EA)

**Revision of the Child Raising Opinion Questionnaire. An Affective Evaluation Study. Parent Involvement Report No. 3.**

Mountain-Plains Education and Economic Development Program, Inc., Glasgow AFB, Mont.

Pub Date Jul 75

Note—16p.; For related documents, see CE 004 655 and CE 004 657

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

Descriptors—Adult Students, \*Child Rearing, \*Parent Attitudes, \*Questionnaires, Rural Population, Student Opinion

Identifiers—Mountain Plains Program

The report describes revisions made to the Child Raising Opinion Questionnaire for assessing attitudes toward child rearing in the Mountain-Plains student population. Two new scales were developed for the Questionnaire: one measuring resistance to learning about children in particular and resistance to outside influences in the area of child raising generally; the other measuring confidence/adequacy in dealing with children. In addition, new items were included in the section of the questionnaire dealing with general child raising practice to eliminate the former transparency of the questionnaire items, to shift the score mean in the direction of the scale mean, and to obtain greater variance in responses. The report also includes the revised questionnaire in its new booklet form with the response categories appearing on each page and with a separate answer sheet for recording responses. (JR)

Descriptors—Behavior Rating Scales, Disadvantaged Groups, Individual Characteristics, Personality Assessment, \*Personality Development, Personality Studies, \*Personality Tests, \*Personality Theories, Psychological Evaluation, Rural Population, Student Characteristics

Identifiers—\*Mountain Plains Program

Tracing problems observed among the Mountain-Plains student population, a trend of apparently improper or arrested personality development emerges. Observations indicate that a majority of the student population does not possess normally developed trust, autonomy, initiative, industry, sense of identity, or ability to develop intimate relationships, nor have most (in any way other than in production of children) engaged in generativity. In order to test these observations, the entering student population from summer 1973 to spring 1974, all of whom were young adult family members of average intelligence and defined as rural disadvantaged, were administered two instruments designed to measure personality traits and the basic constructs of self-actualization. The students' test results were compared with adult norms selected from the respective test manuals. The test results indicated that Mountain-Plains students scored below normal in objective measures of trust, autonomy, initiative, industry, identity, and intimacy. While the results do not irrefutably support the arrested personality development interpretation of personal/personality problems with the population under study, the indicators are extremely strong in favor of that interpretation. Supplementary tables provide Ericksonian Ego Qualities and Age Periods, selected test scales, and personality

development of Mountain-Plains students versus norm groups. (JR)

**Practice and Incentive Effects on Learner Performance: Aircraft Instrument Comprehension Task.**

Arizona State Univ., Tempe. Dept. of Educational Technology and Library Science.

Spons Agency—Air Force Human Resources Lab., Williams AFB, Ariz. Flying Training Div. Report No—AFHRL-TR-74-104

Pub Date Dec 74

Note—29p.

**EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage**

**Descriptors**—Flight Training, \*Military Personnel, \*Motivation, Performance Tests, Predictor Variables, \*Skill Development, \*Task Performance, \*Testing Programs, Test Results  
**Identifiers**—Air Force

To study the effects of practice and incentive on learner performance on the aircraft instrument comprehension task, 48 third-year Air Force cadets were chosen as subjects. The subjects were expected to be able to identify which one of four pictures of aircraft in flight most nearly corresponded to the position indicated on a panel of attitude and heading instruments. Incentives were in the form of additional points and an opportunity to "fly" a formation trainer. The practice variable was manipulated by changing the instructional materials. The pretest-treatment-post-test experimental design provided data for analysis. Data revealed that neither variable (practice or incentive) significantly affected the accuracy of post-test responses, but they did affect in a positive way the post-test rate of responding. The rate of responding is often considered to be a good indicator of an individual's productivity. Sample instructional materials and a post-test item are appended. (AG)

**Identifiers**—Canada

Prepared at the request of the executive committee of the Commission of the Professors of Adult Education, the monograph explores problems and solutions that American and Canadian professors of adult education report in initiating and revising graduate programs. Survey questionnaires (approximately two-thirds return rate) were sent to one professor at each institutional graduate program included on the 1972-73 membership listing in the Commission of the Professors of Adult Education. The questionnaire consisted of three parts: program characteristics, four items on each of 22 issues related to program initiation/revision, and comments on starting a new program. An age-of-program categorization was used throughout the data analysis to identify developmental trends. Twenty to 70 percent of the programs reported problems related to 10 widespread issues: the number of professors in the program, their mix of competencies, their departmental location, the specialized adult education courses, the process for approval and modification of courses, ways to relate out-of-department courses to adult education, combined department arrangements, the attraction of able graduate students, the function of faculty research, and the chairman's role in obtaining support for the adult education graduate program. Each of these issues is described in one of the monograph's 10 sub-sections. (EA)

**Descriptors**—\*Case Studies (Education), Data Collection, \*Educational Innovation, Program Development, School Attitudes, School Environment, School Involvement, \*School Organization, \*Systems Development, Tables (Data)

**Identifiers**—Operation Guidance

To identify factors which affect the acceptance of innovation in school organizations, a career development product entitled Operation Guidance (OG) was the object of a case study. Five basic organizational characteristics were used to roughly quantify attributes of the organization of the six schools studied. The characteristics were: centralization of decision-making, standardization of practices and procedures, personnel supervision, complexity of organizational structure, and staff heterogeneity. The school community was considered on three levels: attendance area, district, and State. Eight situational descriptors were chosen to characterize each school's setting: district pupil expenditure, community per capita income, community population, geographic location, eligibility for ESEA Title I funds, work structure of students' families, and the location of the student population. Other, less tangible, aspects were also considered. Data collection instruments were surveys, profiles, indexes, charts, and collections of selected facts. (One hundred-fifty pages describe in detail what took place in adopting OG at each of the sites and relate the procedures to the characteristics of the sites. Forty-six hypothesized generalizations are presented concerning how and what influences facilitate the adoption of system-type innovations. Appended materials include comments on instrument development, sample data collection devices, and data tables.) (AG)

**Identifiers**—\*East Providence Career Education Project

Observations and interviews were used to evaluate the East Providence Career Education Project for 1973-1974. Data available on processes and products suggest that the program is substantially meeting its goals in spite of low attendance figures and student performance on various tests. A lower socioeconomic class of students with its resultant lower motivation and reading ability, the fact of double sessions in the school, and the future-oriented nature of career education goals may account for the limited showing of the program. Recommendations are for a continuation of the program. (MU)

**Descriptors**—Background, \*Interinstitutional Cooperation, \*Organizations (Groups), Program Development, \*Reference Books, Universities

**Identifiers**—\*Univ Council on Educ for Public Responsibility

A reference source to the University Council on Education for Public Responsibility, the document covers the formation, functions, and development of the Council over the past 14 years. Chapter 1 provides an historical background of the Council. The following two chapters describe specific cooperative projects initiated by the Council. One project was the urbanism project, demonstrating the positive and negative forces at work in the city, which resulted in the nationally televised "Metropolis: Creator or Destroyer?" and a book of readings, "Metropolis: Values in Conflict." Another less successful project was the study of automation. Chapter 4 deals with reorganization and revision for a more viable organization; Chapter 5 covers new directions in adopting the national conference concept and describes the 1970, 1972, 1973, and 1974 national conferences. The concluding chapters, 6 and 7, provide an evaluative assessment of the organization and implications for the future. Approximately one-half of the document consists of five appendices pertaining to organizational and planning meetings, proposals, by-laws, national conference programs, and a book outline. (EA)

**Identifiers**—Field Workers, Guatemala

Although there is a great need for field workers in the process of social change in underdeveloped countries, there are several weaknesses in the field worker system: inadequate supply, narrow range of competence, inadequate quality control, and inflexible learning situations. In order to expand the reach and breadth of such non-formal education programs a pilot project involving unpaid, relatively untrained village volunteers equipped with audio cassette tape machines was devised. Three villages in the Ocosada Valley in Guatemala were used as the study site during July 1974. Four cassette tapes were prepared, each 22-29 minutes in length and containing information, stories, and music in a magazine-type format. Evaluations were conducted among the volunteers and the general village populations. The study's results indicated that: in no case were the machines lost, stolen, or damaged; people in the villages listened to and learned from the tapes and acted upon what they had learned; the monetary cost of the system was minimal; the program worked as a latent training system for volunteers who became sought-after sources of information; and there were no logistical problems with batteries, tapes, or machines. The study concludes that the system can stretch rural manpower resources in rural development. (JR)

**Understanding the Process of Differential Diagnosis: Prerequisite to the Training of Medical and Veterinary Medical Practitioners.**

Pub Date Apr 75

Note—43p.; A paper presented to the \*Adult Education Research Conference, (St. Louis, Missouri, April, 1975)

**EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage**

**Descriptors**—\*Clinical Diagnosis, \*Learning Processes, \*Medical Education, Medical Evaluation, Medical Students, Task Analysis, Teaching Methods, \*Thought Processes, Transfer of Training, \*Veterinary Medicine

The paper describes an auto-tutorial methodology for training veterinary medical practitioners to perform differential diagnoses. It describes in detail the three phases of differential diagnosis: sensory pick-up, a combination of cognition and memory; categorization, the process by which diagnosticians group symptoms and signs prior to diagnosis; and inferential strategy, a combination of what diagnosticians refer to as intuition and confirmation techniques. The paper criticizes traditional methods of classroom instruction in differential diagnosis which present practitioners with informational cues in single disease categories in symptom-grouped fashion rather than in multiple disease categories characteristic of real-life situations. Students instructed in traditional methods when confronted with a real diagnostic problem must first complete a transfer from the learned system of information (single disease categories) to the alternative system (multiple disease categories) before diagnosis can take place. The paper briefly reviews a pilot study, utilizing both graduate and undergraduate veterinary medical students, which yielded data tending to verify the transfer hypothesis. Through an understanding of the differential diagnostic process, however, simulation exercises can be constructed to teach the organization of information into multiple disease categories and the inferential skill required to utilize the multiple disease categories to reach tentative diagnoses. **Racial Attitudes of One Group of Adult Educators.**

Pub Date 18 Apr 75

Note—32p.; A paper presented at the Adult Education Research Conference (St. Louis, Missouri, April 16-18, 1975)

**EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage**

Descriptors—\*Adult Educators, \*Attitude Tests, \*Discriminatory Attitudes (Social), \*Extension Agents, \*Northern Attitudes, \*Racial Attitudes, \*Semantic Differential, \*Tables (Data)

Identifiers—Northeastern States

The study examines attitudes toward blacks of 127 randomly selected county level white 4-H and youth professionals in 12 Northeastern States (a 98 percent response rate). The subjects were randomly divided between one control and one treatment group and administered the Situational Attitude Scale, a racial attitude measurement instrument consisting of 10 bipolar semantic differential scales for each of 10 personal or social situations. The data indicate that the attitudes of white 4-H and youth professionals in the Northeastern Region of the U.S. are different toward blacks than toward whites (confirmed in 18 of the 100 items and 3 of the 10 situations). Support was not found for the four sub-hypotheses: that females have more negative attitudes toward blacks than do males, that older professionals have more negative attitudes toward blacks than do younger professionals, that persons who lived in a primarily rural environment during ages 1 to 10 hold more negative attitudes toward blacks than do those who lived in a primarily urban area during those years, and that persons who are not members of an integrated staff at the professional level hold more negative attitudes toward blacks than do those who are members of an integrated staff. Identifiers—Drake University (Des Moines)

Literature on counseling adult college students is extremely limited; few if any training programs are currently operating with the purpose of preparing counseling specialists in adult education. Moreover, college/university orientation programs for new entering adult part-time even-

ing students are virtually nonexistent. Recognizing the need for supportive services, Drake University initiated an orientation and counseling program for new entering adult evening students during fall and spring semesters of 1972-73. Individuals were randomly assigned to a treatment group (28 students) and a control group (27 students) and pretested and post-tested. The orientation program, consisting of seven weekly 1 1/2 hour meetings, was geared to increased self-understanding, major developmental tasks of college students, the development of self-appraisal and self-direction, and better emotional development. A unique feature of the program was the development of a simulation game, BALANCE, to help students in their adjustment to the college experience. Statistical analysis revealed that students participating in the orientation and counseling program had a significantly higher grade point average at the end of the semester. (EA)

Descriptors—\*Adult Education Programs, \*Adult Educators, \*Community Education, \*Effective Teaching, \*Ethnic Groups, \*Inservice Teacher Education, \*Low Income Groups, \*Nutrition Instruction, \*Participant Characteristics, \*Program Effectiveness, \*Teacher Characteristics, \*Urban Extension

Identifiers—New York (New York), \*Paraprofessional Personnel

The study evaluates the educational effectiveness of indigenous paraprofessionals engaged in Cooperative Extension's nutrition education program for low income families in an inner city community of New York City. Of the 20 paraprofessionals, all but one black or Spanish-speaking women, nearly all gained in knowledge and understanding of teaching and learning strategies, a majority changed their feelings positively toward their job, and a majority rated above average job-persistence factors while on the job. In addition, 10 of the 14 rated on teaching performance with clientele were rated at the mean or above. The experimental and comparison groups of homemakers were demographically similar to the paraprofessionals except for having less education, more and younger children, and being more Spanish-speaking than black. During the program, participants exhibited higher nutritional intakes and levels and more nutritional knowledge than did the nonparticipants. In sum, the study provided evidence that it is possible to select, conduct inservice education for, and place in an inner city community paraprofessional women, of backgrounds similar to their clientele, who can help their clientele improve their nutritional knowledge and practices. Five tables correlating and analyzing by means of stepwise regression the dependent and independent variables are appended. (JR)

**Evaluation of the Use of Group Dynamics Training in the Expanded Food and Nutrition Education Program.**

Pub Date 17 Apr 75

Note—31p.; A paper presented at the Adult Education Research Conference (St. Louis, Missouri, April 17, 1975)

**EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage**

Descriptors—\*Adult Education Programs, \*Adult Educators, \*Educational Research, \*Extension Education, \*Group Dynamics, \*Group Instruction, \*Group Membership, \*Interaction Process Analysis, \*Low Income Groups, \*Participant Characteristics, \*Speeches, \*Teaching Methods

Identifiers—EFNEP, Expanded Food and Nutrition Education Program

The paper evaluates the use of group dynamics training for Expanded Food and Nutrition Education Program (EFNEP) aides in Ohio and assesses low income homemakers' adoption of group participation. The treatment group of aides was given week-long experimental group dynamics training which was coupled with nutrition and money management subject matter. A second group participated in two, day-long group dynam-

ics training sessions, and a third group had no training in group dynamics except for a brief introduction. The aides studied were the total population of EFNEP aides in three Ohio Extension areas. Aides in the first two groups registered an increase in positive attitude toward group teaching over time. The second and third groups registered an increase in knowledge of group dynamics methods over time whereas the first group remained stationary. Regarding adoption of group methodology, the treatment group significantly attained the training objectives. The data indicate, however, that other factors besides training can influence aide adoption of group methodology. The data also show a substantial proportion of low income EFNEP homemakers desire some kind of group activity, especially rural women, metropolitan black women, and women with few years of schooling. Thorson, James A.

**Variations in Attitude Toward Aging as a Function of Educational Level.**

Pub Date 17 Apr 75

Note—12p.; A paper presented at the Adult Education Research Conference (St. Louis, Missouri, April 17, 1975)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

Descriptors—Age, \*Analysis of Variance, \*Attitudes, \*Attitude Tests, \*Educational Background, \*Negative Attitudes, \*Older Adults, \*Participant Characteristics

Identifiers—\*Kogan Old People Scale

The study reports on the use of the Kogan Old People (OP) scale, a 34-item Likert scale, in a variety of research applications. In the study's first phase, 59 subjects from three different training programs dealing with the elderly completed the OP scale. The results of this phase indicated that attitude toward old people became more negative as age of respondent increased. From these results it was hypothesized that race and social class might also affect attitudes toward old people. In phase two a group of high school students, all at nearly the same age and educational level, completed the OP scale. Grouping the respondents according to race and class produced no consistent pattern of differences in mean scores. Grouping the two samples indicated that no consistent pattern or increase in positive attitudes can be demonstrated by subjects' age. However, respondents having one or more years of higher education had a more positive attitude than the non-college group. Thus, among the groups tested, years of education appears to be an important factor contributing to variation in attitudes toward the aged. Sampling procedures were not random, so the results are not generalizable to a larger population. (JR)

**Content Analysis: A Method for Research and Evaluation in Adult Education.**

Pub Date 18 Apr 75

Note—19p.; A paper presented at the Adult Education Research Conference (St. Louis, Missouri, April 18, 1975)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

Descriptors—\*Adult Education, \*Case Studies, \*Content Analysis, \*Correlation, \*Data Analysis, \*Decision Making, \*Research Methodology

Content analysis is a systematic and objective technique which reduces into smaller sub-parts existing communications. It is the analytical reduction of a text to a standard set of statistically manipulable symbols representing the presence, intensity, or frequency of characteristics. A case study of the use of content analysis is the U.S. Forest Service's formulation in the early 1970s of a development policy for the Shawnee National Forest in southern Illinois. The alternatives were: no projects, new limited access highway, combination scenic drive and trail, national scenic trail, and improve existing roads. Three hundred documents expressing public opinion were analyzed according to various categories, given a numerical score, and cross tabulated. On the basis of the assumption that people's attitudes regarding the alternative were related to underlying concerns and factors, which when subjected to multiple correlation analysis could be used to predict attitudes, the content analysis verified the decision to opt for the scenic route over the existing road system. As a method of describing, understanding and explaining, pre-

dicting, and deciding, especially in cases where available data is not in the form required, content analysis is a reliable and valid research method and central to the development of adult education. (Author/JR)

An Evaluation-Management Information System for Vocational Rehabilitation.

Report No.—P-5404

Pub Date Mar 75

Note—46p.

Available from—The Rand Corporation, Santa Monica, California 90406 (\$3.00)

**EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage**

Descriptors—Cost Effectiveness, Evaluation Methods, Federal Programs, \*Management Information Systems, \*Models, National Surveys, Recordkeeping, \*Systems Development, \*Vocational Rehabilitation

The paper provides the basic concepts and structure of an evaluative-management information system that meets the needs of vocational rehabilitation program and project managers and allows inter- and intra-program and project comparisons. Cost-benefit analysis has not (1) provided managers with relevant information upon which to base their decisions, (2) provided a systematic means for making tradeoffs, nor (3) helped managers develop consistent incentives and standards to measure internal project efficiency. Three major factors must be agreed upon before developing an evaluation system: quantifiable program objectives, benefit-cost framework, and a control group to be used as a standard for estimating gains in client income attributable to the program. Some problems to be considered in structuring mathematical models are estimating client income gain and using a national labor market survey as a statistical control. The mathe-

matical relationship between sample survey mean, sample survey size, and the prediction of foregone income for single clients and aggregations of clients influences the prediction variance. The new design for a national longitudinal survey is a continuous work history survey based on calendar months which allows for complete recording of single employment, multiple employment, job search, training, and withdrawals from the labor force. A Study of the Coordination of the Higher Adult Education Function Within State Systems.

Pub Date 18 Apr 75

Note—16p.; Paper presented at the Adult Education Research Conference (St. Louis, April, 1975)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

Descriptors—\*Adult Education, Educational Administration, \*Educational Coordination, Educational Planning, Educational Programs, \*Higher Education, State Programs, \*State Surveys

The paper reports the findings of a two-tier data survey involving the chief executive officers of State systems of higher education in determining the extent of their coordination-control of higher adult education. The first general phase of the study indicated that 42 of the 50 systems surveyed had responsibility for higher adult education. In phase two, the 12 State systems having a high degree of involvement in the coordination-control of higher adult education were grouped into three basic models: the voluntary model, the central unit plus regional organizations model, and the central unit at the State level model. Major findings of phase two indicate that a majority of the 12: play a major part in the administration and governance, conduct statewide planning, pay more attention to planning outcomes than to actual planning, allocate functions to institutions according to their strengths and capabilities, have authority over program review, pay slight attention to resource allocation and utilization, take part in evaluation, assign jurisdiction over programing based on the nature and mission of the institution, do not provide financial aid to adult part-time students on a par with full-time on campus students, and rarely employ non-traditional formats. Rosenthal, Harriet P.

The Effect of Teacher Expectancy Upon the Achievement and Intelligence Test Scores of Adult Students.

Pub Date 75

Note—42p.; Paper presented at the Adult Education Research Conference (St. Louis, Missouri, April, 1975)

**EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage**

Descriptors—\*Achievement Rating, \*Adult Educators, \*Adult Students, Behavioral Science Research, \*Expectation, Negative Attitudes, Racial Discrimination, Student Characteristics, \*Teacher Attitudes, Teacher Stereotypes

Identifiers—\*Self Fulfilling Prophecy

The primary purpose of this study was to replicate and extend research in the area of teachers' expectancies toward an adult education population in a remedial course, the General Technical Review Course at a military base in the Southeastern United States. The students, 68 blacks, 27 whites, and 12 Spanish speakers were initially administered an achievement and an I.Q. test. Teachers (three white females and one black male) were informed that the tests were designed to identify "academic spurters." Approximately 20 percent of the students were randomly designated as "spurters" and the teachers given the "results." At the end of the course, students were again tested and teachers completed an evaluative rating form for each student. For the students, the results indicated that the self-fulfilling prophecy may have operated for the white experimental group but not for the nonwhite experimental group. For the teachers, analyzing the data by high-low achievement within race indicated that teachers credited white students who achieved (they had more personality, they studied better, and they were more personable), but black and Spanish-speaking students who achieved were not credited (the nonwhite high achievers were not differentiated from the nonwhite low achievers). A possible explanation

is that "self-induced" teacher biases, prior expectancies based on race, were operating. (Author/JR)

Behavior Theory and Adult Education.

Pub Date Apr 75

Note—39p.; Paper presented at the Adult Education Research Conference (St. Louis, Missouri, April, 1975)

**EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage**

Descriptors—\*Adult Education, Adult Learning, Annotated Bibliographies, Behavioral Science Research, \*Behavior Change, Behavior Development, \*Behavior Theories, Individual Characteristics, Learning Theories, Positive Reinforcement, \*Self Reward

The paper proposes that when behavior change is the major target of an adult education program, the designer must consider three factors: (1) the four basic targets for behavior change efforts (behavior goals and plans, basic knowledge and skills needed for successful performance, physical environment, reinforcers of behavior); (2) individual differences of the learner (self-esteem level, meaningfulness of behavior goals, self-image clarity, perceived locus of control); and (3) qualities of the target behavior. It describes self-behavior modification through self-goal setting, self-monitoring, self-reinforcement, and self-controlled environment change. Advantages and disadvantages of self-behavior modification are also proposed. Behavior theory is then related to adult education design, and an interactive model that can provide structure and/or freedom to individuals according to their needs to use in behavior change programs for adults is introduced. The paper also presents results of a study of the effects on new behavior development of educator- vs. learner-determined reinforcement in a reading and information handling program for technical professionals in industry, which suggest that adult learners will self-reward and that they find self-rewards more satisfactory than externally determined reinforcement. Social Indicators and Program Evaluation.

Pub Date Apr 75

Note—14p.; Paper presented at the Adult Education Research Conference (St. Louis, Missouri, April, 1975)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

Descriptors—\*Adult Education Programs, Evaluation Methods, Models, \*Program Evaluation, \*Social Factors

Identifiers—\*Social Indicators

The paper examines the concept of social indicators as ways of evaluating macro level adult education programs. In general social indicators deal with social factors which affect the quality of life of the population. Social scientists are recognizing the need for both economic and social indicators. Even as the need for social indicators is discussed, the problems which may be associated with their use (questions of measurement, the reduction of social indicators into economic terms, the definition of quality of life) are recognized. Typical social indicators include: health, public safety, education, employment, income, housing, leisure and recreation, and population. In assessing adult education programs with respect to social indicators, the time factor seems to be crucial. In a model evaluation the procedure moves from focusing on a social concern (one source of program objectives) to identifying appropriate social indicators, to collecting evidence, to comparing the evidence to the social indicators. As the program is judged and referred back to the social concern, the cycle starts again, presumably at a more advanced point in relation to the social concern. All adult educators need to work to establish evaluative procedures which attend to qualitative as well as quantitative aspects of program output. (JR)

Note—107p.

EDRS Price MF-\$0.76 HC-\$5.70 Plus Postage

Descriptors—\*Career Education, Curriculum Development, \*Information Dissemination, \*In-service Teacher Education, Instructional Improvement, Instructional Materials, Resource Materials, \*State Programs, Teacher Workshops, Technical Education, \*Vocational Education

Identifiers—\*Hawaii

Because the insular nature of the State of Hawaii limits easy access to materials available nationally and even curtails dissemination of locally developed curricular materials, the materials familiarization and dissemination portion of an educational development project was designed to provide educators throughout Hawaii with an information system that would better help them meet the vocational-technical and career education needs of their students. The report of the materials familiarization and dissemination activities tells how up-to-date curriculum and resource materials were selected, purchased, and duplicated for dissemination. These and other materials already available locally were presented, explained, demonstrated, and discussed by various experts in a series of workshops held on Oahu and the Neighbor Islands. Educators in vocational-technical and career education and related areas were made familiar with some of the most recent useable materials, together with the methods and techniques by which they might be effectively implemented in the on-going instructional programs of the State. Appended to the report are materials related to the workshops (brochures and agenda, topics and consultants, participants, and evaluations) and a three-page list of the materials purchased and/or duplicated. Identifiers—Adult Career Education Resources Survey

The document is a compendium of abstracts of career materials from a variety of media; materials were reviewed not only in terms of suitability for use by adults, but also in terms of quality of career information. Reading levels have been included for each piece of written career information material. A supplement to a previously published resource guide, the document provides additional career information resources, with increased proportions of materials which are produced in audio-visual media formats, written at reading comprehension levels better suited to adults with lower levels of reading skills, and/or addressed to the needs of women and minorities. Focus has also been placed on inexpensive or free materials. Entries for printed materials are catalogued according to 16 major occupational areas; audiovisual materials are catalogued separately. Forms employed in the adult career education resources survey are appended. (Author/AJ)

Descriptors—\*Adult Education, \*Career Education, Critical Thinking, \*Integrated Curriculum, \*Language Arts, Learning Activities, \*Lesson Plans, Oral Communication, Reading Instruction, Student Characteristics, Writing Skills

Identifiers—Adult Career Education Resources Survey

The Adult Career Education Resources Survey was designed to (a) compile career information resources for adults and (b) provide materials that will encourage adult educators to integrate career education activities into ongoing curricula. The document was developed and revised by the Survey staff to meet the second objective; it provides a group of field-tested exercises for use by adult educators which serve to help adult students become familiar with a spectrum of careers and which permit introduction of career materials into other learning contexts. From two to six exercises are provided in each of four curriculum areas: reading, writing, oral communication, and critical thinking. To assist the teacher in integrating career activities into ongoing curricula, every activity includes these characterizations: (1) skills reinforced by the activity, (2) performance objective, (3) materials required, (4) time required, (5) a summary of the activity, which describes briefly the suggested tasks from initiation to completion, (6) potential results, and (7) potential populations for utilization. Information on the field-testing of these activities is provided in the document. (Author/AJ)

Biser, Harry C.

The Influence of the Admissions Officer in Making of College Policy.

Pub Date 11 Oct 73

Note—12p.; Not available in hard copy due to marginal legibility of original document; Paper presented at the Annual Conference of the National Association of College Admissions Counselors (29th, Chicago, Illinois, October 11, 1975)

EDRS Price MF-\$0.76 Plus Postage. HC Not Available from EDRS.

Descriptors—\*Academic Rank (Professional), \*Administrative Policy, \*Admissions Counselors, Committees, \*Counselor Functions, \*Policy Formation, Role Perception, Speeches

In discussing the current status and role of the admissions counselor, the author maintains that the admissions officer, if he is to function effectively as the college's educational emissary, must have a thorough understanding of the curriculum and must either serve on curriculum committees or have faculty status. He deplores the fact that this is not so in many institutions, and cites many examples of how an admissions officer is neglected in certain decisions concerning admitting students and how he is subjected to pressures by various groups. The admissions officer can contribute positively to the organization of college orientation programs, and he should have a say in college publications. He should also be given more authority and should participate in central administrative committees. Moreover, he can increase his influence in his college through active involvement in national and regional organizations. Finally, through the use of data gathered from test sheets, interviews and surveys, the admissions officer can provide valuable information on curriculum choices and academic planning. (Author/SE)

The Effects of a Reinforcement-Counseling Procedure on the Social Behavior and Sociometric Status of Elementary Students.

Pub Date 73

Note—13p.; Best copy available, some pages may reproduce poorly; Paper presented at the Annual Meeting of the Canadian Guidance and Counseling Association, 1973

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*Behavioral Counseling, \*Behavior Problems, Elementary School Students, Group Counseling, \*Peer Relationship, Reinforcers, \*Social Reinforcement, \*Sociometric Techniques, Speeches

Previous research has shown that certain counseling methods, unlike behavioral counseling procedures, have been unsuccessful in improving the sociometric status of unpopular and uncooperative/elementary students. This study attempted to assess the effectiveness of behavioral counseling. Forty elementary students were identified as unpopular and uncooperative. Twenty of them were assigned to a control group while 20 others were assigned to four groups of reinforcement counseling. The latter groups met twice a week for five weeks, and the students were assisted to increase the frequency of their rewarding and cooperative behavior while in the presence of their peers. Following treatment, the sociometric instrument was readministered to all students who were randomly assigned to four groups of 10 Ss each. Each group participated in a series of work tasks, and observations were made of the counseled and control students' rewarding and cooperative behavior. Analysis of the results revealed no significant differences between the control and counseled groups on gain in sociometric choices or in their behavior while participating in the series of work tasks. Reasons for the failure of the behavioral procedure were attributed to problems in reinforcing students who would not behave in rewarding or cooperative ways toward their peers. (Author/SE)

Sixteen Questions and Responses Concerning the Development of a School District Standardized Testing Program.

Pub Date 74

Note—17p.

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—Achievement Tests, \*Educational Testing, \*Objectives, Program Development, Psychoeducational Processes, \*Psychometrists, School Psychologists, \*Testing Programs, \*Test Results

The author, as a testing consultant, has considered and answered 16 questions on the various aspects of testing usually asked by school staff members. The questions and answers are primarily concerned with statistical aspects of achievement tests and the best way to interpret test results to clients, parents and teachers. The need for caution in the choice of particular tests is stressed; thus, tests should be neither too easy nor too difficult for students, and tests should be chosen by a committee who specifies the particular goals for which a test should be administered. The author notes the importance of informing faculty members about the meaning of test scores and how such scores might help them in their classrooms. Moreover, in interpreting a test score one should be aware that a score reflects a current situation resulting from the interaction of various complex variables, so that judgements about a student's academic future should not be based on test scores alone. Finally, the author presents a bibliography of books and journals, dealing with various aspects of testing, to assist testers in any difficulties they might encounter in their work. (SE)

Graduate Programs for Black and Asian Graduate Students in Pupil Personnel Services.

Pub Date Apr 74

Note—16p.; Paper presented at the Annual Meeting of the American Educational Research Association (Chicago, Illinois, April 1974)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—Community Involvement, \*Counselor Training, Cultural Differences, Cultural Pluralism, \*Educationally Disadvantaged, \*Educational Objectives, Financial Support, Graduate Study, \*Minority Groups, Negro Students, Program Development, \*Pupil Personnel Workers, Racial Discrimination, Speeches

Identifiers—\*Education Professions Development Act, EPDA

Several studies have shown that public schools in the United States are staffed with counselors and teachers who have a limited cultural understanding of black and other minority students. Moreover, racist attitudes have permeated all levels of the educational system, preventing the development of programs that would help black students to attain higher education and thereby help their people. The federal Education Professions Development Act (EPDA) was a progressive step in re-evaluating educational goals. The EPDA California center, one of seven centers created under the program, has tried to establish an advanced degree program which has a multi-cultural curriculum designed to train a new kind of pupil personnel worker. A major stress has been on on-site instruction and an effort to enlist effective community participation in higher education. The author suggests the need to introduce courses which reflect the cultural characteristics of all ethnic groups and explain the differences among various cultures in various parts of the country. Moreover, minority communities should be actively involved in the educational process, and financial aid to minority students should be increased. Finally, the suggested program would require a longer preparation period than do traditional programs. (SE)

**Effect of an Advance Organizer upon Learning for Sixth-Grade Children Maintaining an External Locus of Control Orientation.**

Pub Date Apr 74

Note—11p.; Paper presented at the Annual Meeting of the American Educational Research Association (Chicago, Illinois, April 15-19, 1974)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—Analysis of Variance, \*Behavior Patterns, \*Cognitive Processes, Comparative Analysis, Elementary Education, Elementary School Students, \*Learning Processes, \*Locus of Control, Perceptual Development, Research Projects, Retention, \*Social Differences, Socioeconomic Status, Speeches, Verbal Learning

The inferior performance of external locus of control (LOC) subjects (Ss) on achievement tests has been attributed by many researchers to cognitive and perceptual deficiencies. Several studies have shown that advance organizers (AO) which provide optimal anchorage and mobilize existing relevant concepts, facilitate learning of verbal material. This study tested the hypothesis that learning of an unfamiliar passage by sixth-grade external LOC Ss can be improved by the help of AO. Thirty-three lower socioeconomic status (SES) black Ss and 34 Jewish upper-middle SES Ss were identified as either external or internal LOC. Half of each LOC group received an introductory passage with concrete examples and inclusive terms (the AO group) while the introductory passage of the other half (control group) did not have any AO. Both groups received the same unfamiliar study passage followed by a 10-item test on the study passage. An analysis of variance on the scores of the latter test indicated that while the main effect of AO was not significant, AO had a significant effect only on the retention ability of lower SES students with an external LOC. There is a need for further studies using a larger number of Ss representing various grade levels. (Author/SE)

**Selective Group Approaches in Hospital Settings.**

Pub Date [73]

Note—15p.; Not available in hard copy due to marginal reproducibility of original document.

EDRS Price MF-\$0.76 Plus Postage. HC Not Available from EDRS.

Descriptors—\*Behavior Change, \*Group Dynamics, Institutionalized (Persons), \*Interaction Process Analysis, Medical Services, Program Descriptions, \*Psychiatric Services, Psychosis, \*Psychotherapy, Schizophrenia

The author considers group therapy as one of the most appropriate approaches to help psychotic patients, especially schizophrenics. He advocates the formation of four graded groups of patients based on the seriousness of their problems. The first is an intake group formed of newly admitted patients. Interaction in a group situation provides the psychiatrist a good opportunity to study the nature of the problems of each patient so as to place him in one of the other

three groups. The second is a group for regressive patients, the most difficult cases with which to deal. The psychiatrist, with patience, understanding and support of a patient can gain his confidence and establish communication between the latter and the other members of the group, and then move him into the third group of less serious cases. With the latter group the emphasis is on correcting distorted perception and, through creating a healthy group atmosphere, initiate emotional and behavioral change. The fourth group is formed of predischarged patients who are allowed to join outpatients and family members. In this group, attempts are made to enhance self-esteem and recondition members to their immediate environments. (SE)

Descriptors—Community Involvement, \*Crisis Therapy, Drug Education, \*Intervention, \*Prevention, Program Descriptions, \*School Community Relationship, \*Teamwork, Training The Crisis Prevention-Intervention Project (CPI) of the Boston Public Schools is described in two parts: a six-month evaluation report and an interim report by the project director. The goals of this pilot project for the five Boston schools (three public, two parochial) were: (1) to develop an operational program of crisis intervention and prevention that would alleviate in-school forces which lead to discontentment and/or crisis; (2) to undertake a survey of the needs of the schools to prevent disruption; and (3) to design an instrument to test for crisis-proneness in a school. The administrative organization and CPI includes a project director, advisory council and five support teams with representation from faculty, administration, parents, students and police groups from the school community. Training programs, specific problems of the project, initial impact areas and related projects are discussed. Results of brief needs assessment survey of staffs and board members are included. (GMF)

**Counseling Workers over 40: GULHEMP, a New Approach.**

Pub Date 10 Apr 74

Note—30p.; Paper presented at the Annual Convention of the American Personnel and Guidance Association (30th, New Orleans, Louisiana, 1974); Not available in hard copy due to marginal legibility of original document

EDRS Price MF-\$0.76 Plus Postage. HC Not Available from EDRS.

Descriptors—Age Differences, \*Employment Opportunities, Equal Opportunities (Jobs), \*Industrial Personnel, \*Job Placement, \*Medical Services, \*Middle Aged, Models, Social Discrimination, Speeches, Task Analysis

Identifiers—\*GULHEMP Method

This series of presentations describe a method of job counseling and placement for the middle-aged which combines pre-employment physical worker analysis with job analysis for effective matching of job requirements with worker capacities. The matching process involves these steps: (1) job analysis by an industrial engineer; (2) worker examination by medical staff including medical and social tests and histories; and (3) comparison between medical and job profiles and recommendation to employer. The profile is determined by Dr. Koyl's GULHEMP method (general physique, upper and lower extremities, hearing, eyesight, mentality and personality). Both physical and job analyses are scaled to these fitness categories. Advantages to this matching system of job placement include: (1) identification of medical problems and resulting referral and treatment; (2) sensitization of state employment agencies to the needs of middle aged workers; (3) assistance to employers in the placement of physically qualified workers to the satisfaction of both employer and employee; (4) lower incidence of illness and turnover "profiled" workers; and (5) a method to eliminate age, sex and race discrimination in employment. Identifiers—\*Missouri

A comprehensive Career Education Project for 10 secondary non-urban high schools in Missouri has been developed to implement job development and job placement programs and follow-up of area high school seniors. The program components seek to: (1) establish a Centralized Job Placement Office; (2) implement a job placement service in each high school; (3) establish a centralized career information and audiovisual library; (4) establish working relationships with community employers; (5) follow up graduates and drop-outs; (6) provide selected seniors with a two-week on-the-job-work experience in a field of interest; and (7) develop a Model Job Placement Guide and directory of job opportunities. Participating schools encourage a team approach to job placement by utilizing the available human resources such as superintendents, principals, teachers, students and community employers. Brief questionnaires distributed to participating counselors, teachers and students were utilized to obtain information needed for program implementation. (GMF)

**Action Counseling with Suspended Students.**

Pub Date [74]

Note—5p.

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—Counseling Programs, Counselor Training, \*Discipline Problems, \*Family Counseling, \*Group Counseling, Occupational Guidance, \*Parent School Relationship, Program Descriptions, Secondary Education, Speeches, \*Suspension

Identifiers—\*Cooperative Community Counseling

The Cooperative Community Counseling Project was designed to undertake an intensive joint individual and family counseling program to reduce maladaptive behaviors of students who were suspended from community high schools. Counselor training for this program included weekly seminars focusing on specific topics: (1) general problems associated with suspensions, (2) study of employment and educational opportunities for urban youth, (3) study of disciplinary practices in real school situations, (4) critique of counseling interviews and techniques, and (5) production of a documentary film about work with suspended students. The program consisted of individual and group counseling, academic assistance, occupational and educational guidance, teacher descriptions of student behavior, parent interviews and evaluation. Inventory and interview data on students' perceptions of the program indicated some differences between project and control groups. The results suggest that schools should make counseling-related activities a basic part of treatment procedures for suspended students. (GMF)

Descriptors—Data Analysis, \*Drug Education, \*Educational Accountability, Educational Objectives, \*Evaluation Methods, Measurement Instruments, Models, Program Development, \*Program Effectiveness, \*Research Needs, Resource Materials, Test Results

This text is the first in a series of handbook providing methodology information for drug program planners and administrators. This handbook is designed to address the private sector need for assistance in their consideration of methods, techniques and approaches necessary for effective local program implementation and evaluation. The first section of the handbook describes program objectives, goal setting considerations, pitfalls in data collection, and research designs considered appropriate for the evaluation of drug education programs. The second section presents a number of reliable measures for program evaluation, an orientation for the effective use of the sample instruments, and information for locating additional measures. Drug education measures for use with young children, adolescents, college students and adults are included or described. The third and final section deals with the analysis and interpretation of data, and includes discussions on student evaluation results, the use of computers and the dimensions of program planning. Descriptors—\*Drug Abuse, \*Drug Education, \*Evaluation Needs, National Surveys, \*Program Improvement, Questionnaires, \*State Programs

This survey is one of a series conducted by The Drug Abuse Council, Inc. to explain the efforts of the public sector to control and prevent drug abuse. The survey attempts to document the involvement of the states in drug abuse prevention, treatment and control by undertaking a census of existing programs and expenditures, as well as a review of unmet problems and needs. The analysis contains survey results for all states, with size and geographic breakdowns whenever appropriate. The results are organized by responses to questions in the following areas: state administration and coordination, funding, data and epidemiology, treatment and rehabilitation, education and prevention, law enforcement, and technical assistance from the federal government. The report includes an analysis of the possible problems developing in efforts by the states to respond to drug abuse. (Author/SJL)

Descriptors—\*Drug Abuse, \*Drug Education, Field Interviews, High School Students, \*Program Evaluation, \*Student Attitudes, \*Student Research, Surveys

This report represents the findings obtained from investigations conducted by nine student research groups based in high school s in each geographical region of the United States. Each research group conducted three-month studies of the drug education programs and formulated recommendations for program modifications and new approaches. Major issues for fact finding included: (1) the incidence of drug abuse among high school students; (2) student attitudes on drug use and abuse; (3) the nature of existing drug education programs; (4) the effectiveness of those programs; and (5) students' perceptions of their drug education needs. The groups' research findings indicate widespread usage and availability of illicit drugs, failure of existing drug education programs to affect student drug usage, and the need for involvement of the community-at-large. The students repeatedly criticized the prevalence of a subject-matter orientation to school drug programs, instead suggesting the need for a personal-problems or social-problems

orientation. Included in the report is a discussion of the limitations and weaknesses of this student project. (Author/SJL)

Descriptors—\*College Students, \*Counseling Centers, \*Counseling Services, Counselors, Higher Education, \*Mental Health Programs, Psychiatrists, Psychologists, Role Perception, \*Symposia

This symposium explores the general roles and functions of a college counseling center and of the professional staff within it. Contributors to the symposium discussed the role of the director, the counseling psychologist, the clinical psychologist, the psychiatrist, and the sociologist in fostering positive mental health on college campuses. The role of a college counseling center director was seen to be that of a coordinator in the sense that he sees to the smooth and effective functioning of the center's operation. The role of the counseling psychologist must evolve within a particular framework that has three characteristics: (1) it must be consistent with the aims of the institutions, (2) it must not duplicate the functions of other personnel, and (3) it must have its well-springs in the nature of the student body. The role of the clinical psychologist is that of helping students work through certain existential problems while the psychiatrist diagnoses and treats referred cases, especially problem psychoses. The function of the sociologist is to define the cultural profile of the student population. All of these roles and their interrelationships with each other are delineated. (RWP)

Note—19p.; Paper presented at the Annual Convention of the American Personnel and Guidance Association (31st, New York, New York, March 23-26, 1975)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*Behavioral Science Research, \*Behavior Change, Change Strategies, \*Classroom Participation, Elementary Education, \*Elementary School Students, Research Projects, Self Evaluation, \*Student Behavior, Student Participation

Identifiers—\*Self Monitoring

The purpose of this study was to examine the effect of self-monitoring on classroom participation. Twenty-four male and twenty-four female sixth-grade students were randomly assigned to four treatment conditions: (1) self-monitoring participation; (2) self-monitoring non-participation; (3) teacher request; and (4) control procedure. Students in group 1 increased their classroom participation during the treatment and posttreatment phases of the experiment, while students in the other three groups did not. More students in group 1 enjoyed the task and felt it was helpful to them than did students in group 11. (Author)

**The Suitability of the California Test of Personality and Rokeach's Dogmatism Scale as Selection Instruments for Security Police.**

Pub Date 75

Note—93p.; Master's Thesis, Wayne State University

EDRS Price MF-\$0.76 HC-\$4.43 Plus Postage

Descriptors—\*Adjustment (to Environment), \*Armed Forces, Behavior Rating Scales, Comparative Analysis, Dogmatism, Masters Theses, Personality Tests, \*Personnel Selection, \*Police, Psychological Tests, Research Projects, \*Screening Tests

Identifiers—\*California Test Of Personality, CTP

The purpose of this study was to determine if the California Test of Personality and Rokeach's Dogmatism Scale could be used as screening instruments for Air Force Security Police. Thirty-six Air Force Security Police assigned to TUSLOG Det 94-2, Turkey comprised the sample for this study. The variables measured by the instruments—personal adjustment, social adjustment, total adjustment, and degree of dogmatism—were compared to ratings given by senior supervisors. Statistical analysis was conducted to determine if there were any relationships between the supervisory ratings and the scores on the CTP and Dogmatism Scale. The analysis revealed no significant relationship between the ratings and the scores on the CTP or on the Dogmatism scale. (Author)

Descriptors—\*Academic Achievement, Educational Research, Group Dynamics, \*Junior High Schools, \*Peer Relationship, \*Performance Factors, Social Organizations, \*Teamwork

This study utilized the Teams-Games-Tournament (TGT) concept, an educational technique employing team competition within the classroom. The hypothesis was that mediating TGT's effects on academic performance is a change in the relationship between academic performance and sociometric status of students. Subjects were 232 seventh grade students incorporated into a 2x2 design varying both competition (team vs. individual) and practice (individual vs. group modes. Team competition changed the peer group norms as predicted, creating a positive

relationship between academic performance and sociometric status, whereas no such relationship existed for students in the individual competition. Implications for the sociology of education are discussed. It was concluded that this study goes beyond a description of effects of successful academic performance on peer group status and offers a means of changing peer group consequences of academic success. Descriptors—Child Development, \*Measurement Instruments, \*Psychometrics, Rating Scales, \*Secondary School Students, Self Evaluation, \*Social Development, \*Student Attitudes, Student Development, Student Evaluation

Identifiers—\*Psychosocial Maturity Inventory

The educational community lacks tools for assessing the nonacademic growth of students—their growth as persons and as social beings. This paper describes the development of an attitude inventory based on an interdisciplinary model of psychosocial maturity. The Psychosocial Maturity Inventory, a self-report instrument, is comprised of nine subscales and is suited for the assessment of youngsters in the approximate age range 11 to 18. Among the studies reviewed are ones which (1) specify at various age levels the internal consistency of the subscales; (2) report the association between the subscales and various measures of academic achievement; and (3) describe the relationship of the subscales to other measures of personality, such as "faking good," anxiety and self esteem. Factor analyses of the Inventory provide an empirical base for testing the proposed theoretical structure of psychosocial maturity. The Appendices provide additional detail on the psychometric properties of the Inventory. (Author)

**Self-Management Projects in Counselor Education.** Pub Date 75

Note—12p.; Paper presented at the Annual Convention of the American Personnel and Guidance Association (31st, New York, New York, March 23-26, 1975)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—Behavior Change, Counselor Performance, \*Counselor Training, \*Practicums, Professional Training, \*Self Control, Speeches, \*Teaching Methods, \*Training Techniques

Much emphasis in the literature has been given to the idea that counselors can teach their clients self-management procedures and that through these procedures the clients can learn to solve their own problems. The concept of self-management as applied to the counselor education process and more specifically to the modification of counselor behaviors is discussed. The benefits of training counselors through self-management procedures are described. A specific plan that has been used with pre-practicum and practicum students is outlined. Each student is required to select some aspect of his or her counseling behavior and modify it according to the self-management plan. This plan suggests how a student can (1) identify a problem, (2) analyze the problem, (3) set a goal, (4) determine and implement a strategy, and (5) evaluate the project results. Three projects that students have completed are described. One project dealt with reducing the number of times the counselor used a meaningless filler in her speech. A second project concerned a student who wanted to ask fewer close ended questions and more open ended questions. The third project dealt with increasing the frequency of empathic responses. General student reactions to the self-management projects are also summarized. (Author)

**School Counseling: Criticism and Contexts.**

Pub Date [Mar 75]

Note—28p.; Paper presented at the Annual Convention of the American Personnel and Guidance Association (31st, New York, New York, March 23-26, 1975)

EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage

Descriptors—Accountability, \*Counseling Effectiveness, \*Counselor Evaluation, \*Counselor Role, Elementary School Counselors, \*Guidance Counseling, \*Role Perception, Secondary School Counselors, Speeches, Standards, State of the Art Reviews

The purposes of this paper are: to identify specifically the criticisms of school counseling; to analyze what accounts for these criticisms; to indicate how school counseling should and is responding to its critics; and to look at where school counseling is headed. Through a review and analysis of the conceptual and empirical literature dealing with the development and status of school counseling the range and scope of contemporary criticism are delineated. It is suggested that criticisms of school counseling emanate from problems relating to untrained, undertrained, and uncommitted counselors; professional identity and role; societal contexts; professional ideology; and accountability. Each of these problems is defined and examined and suggestions are made regarding constructive responses to criticism and effective evaluation procedures. There is a bibliography of 124 entries. **Beyond The Test Score.**

Pub Date Nov 74

Note—11p.; Paper presented at the Workshop on Assessing Culturally Different Black and Indian Students (Greensboro, North Carolina, November 14-16, 1974)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—Counselor Certification, \*Educational Principles, Elementary School Students, School Psychologists, Secondary School Students, Speeches, State of the Art Reviews, \*Student Testing, \*Teacher Education, \*Testing Problems, \*Test Interpretation

Two factors are responsible for the abuses in testing of children: emotional expectations and a misdirected educational training system. The former is most prevalent among those who are not thoroughly trained in testing and test interpretation, and should be responded to by maintaining strict certification standards. The second reason for abuses in testing, a misdirected educational training system, could be partially resolved by strengthening the competencies of educators in such areas as how to achieve a sense of self competence and identity, how to get along with others, how to work within and with a group without losing a sense of self, how to rear children, how to use leisure time, and how to decide on a vocation. Teachers should be trained for involvement in an educational enterprise that deals with values and people, not just academic matters. (Author)

Identifiers—\*Teams Games Tournament, TGT

The research literature surrounding TGT, an instructional technique employing team competition, indicates that the technique facilitates social processes and academic achievement in the junior high school classroom. The present study extends the test of TGT by employing the technique in third grade classes, teaching basic language arts skills for a six-week period. Sixty students were randomly assigned to either a TGT or control condition. Students in the TGT condition were divided into leagues, and tournaments were organized around 22 simple instructional games, several of which were formed around each general curriculum objective. Post-treatment results indicate significant positive TGT effects on both the Hoyum-Sanders Elementary English Test and a treatment-specific test of language arts skills. TGT also appeared to increase cohesion among the students and decrease the number of social isolates in the classroom. No treatment effects were noted on several scales measuring student perceptions of the classroom. The results provide additional evidence of the usefulness of incorporating TGT into the classroom structure, even with young children. (Author)

This paper, presented at the Fifth Annual Conference of the Australian Science Education Research Association in 1974, discusses the various strategies for analyzing the data gathered to explore the effect of specific school variables on educational achievement. The discussion centers around the International Association for the Evaluation of Educational Achievement (IEA) strategy of analysis, the use of variance estimates, the use of variation estimates, and the treatment of compound variables. The author contends that none of the strategies is completely satisfactory and calls for further discussion and experimentation. (RWP)

Research on Counselor Effectiveness.

Pub Date [8 Mar 75]

Note—10p.; Paper presented at the Annual Convention of the American College Personnel Association (50th, Atlanta, Georgia, March 5-8, 1975)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*Counseling Effectiveness, \*Counselor Evaluation, Counselor Performance, \*Evaluation Criteria, \*Psychologists, \*Research Methodology, Speeches

A limited study was conducted, asking counseling psychologists why they did not research the effectiveness of their counseling. The reasons given for failing to investigate effectiveness were: (1) methodological and criteria problems seemed unsolvable; (2) anxiety existed about discovering a lack of professional competence; (3) the intricacy of the therapy hour cannot be translated into specific criteria; (4) problems related to what type of individual does the ratings of counseling effectiveness; and (5) psychologists were unwilling to suffer the inconvenience of having to research their competence. Many felt it was an intrusion on their time, which could be better spent with clients. The over-used criteria which have uniformly failed to predict counselor effectiveness were discussed. The author suggested therapist-specific variables in interaction when client characteristics would be a profitable area for investigation. Some small amount of work has been done here. An increased use of long-range behavioral observation of the therapy interaction was suggested. (Author)

Descriptors—\*Classroom Games, \*Classroom Techniques, \*Educational Games, Elementary Education, English Curriculum, \*Language Arts, Research Projects, \*Teaching Techniques

Identifiers—\*Teams Games Tournament, TGT

The present study is a replication of the initial use of the Teams-Games-Tournament (TGT) technique in the primary grades. TGT is a classroom management technique in which (1) students are placed on four member teams; (2) the student teams compete in regularly scheduled tournaments; and (3) the tournaments are structured around instructional games. Fifty-four third grade students were randomly assigned to either a TGT or control condition. Both treatment groups were exposed to a six-week curriculum unit teaching language arts skills. The results indicate a positive TGT effect on language arts skills and on classroom social processes. This study provides important validation of the effectiveness of TGT in the primary grades. Descriptors—Affective Objectives, Cognitive Objectives, Curriculum Guides, \*Family Life Education, \*Homemaking Education, \*Parenthood Education, Secondary Education, \*Student Participation, \*Teaching Guides

This booklet presents many ideas for involving students in family life education programs. Designed primarily for use by family life educators, it includes such topics as the use of cognitive and affective objectives in family life education, organizing family studies content by generalizations, and focusing on the student as an active learner. It offers both philosophical background and concrete techniques for involving students in the curriculum. Selected references are appended to each section. (HNV)

Identifiers—California (Sacramento), Iowa (Des Moines), Ohio (Columbus)

The Exemplary Projects Program of the U.S. Department of Justice's Law Enforcement Assistance Administration is a systematic method of identifying outstanding criminal justice programs throughout the country, verifying their achievements, and publicizing them widely. This brochure is part of an attempt to publicize three operations. The first is a community-based corrections program in Des Moines, Iowa. The second is a citizen dispute settlement program in Columbia, Ohio, and the third is a diversion program for juvenile status offenders in Sacramento, California. The reports provide considerable detail on operating methods, budget, staffing, training requirements, potential problem areas, and measures of effectiveness. (Author/HMV)

Note—9p.; Speech presented at the Commencement Exercises at Edinboro State College (Edinboro, Pennsylvania, May 24, 1975)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—College Graduates, \*Educational Philosophy, \*Foundations of Education, Higher Education, \*Self Evaluation, Speeches

In addressing the graduating class of Edinboro State College, the U.S. Commissioner of Education asks the following 10 questions to determine if the students have really become educated: (1) Do they have a salable, specialized skill they can use to earn a good living? (2) Have they learned how to learn? (3) Do they have a thirst for knowledge and a hunger for learning? (4) Can they communicate? (5) Have they developed a clear set of standards and ideals to guide their life and daily living? (6) Have they learned how to disagree without being disagreeable? (7) Have they educated their feelings, their spirit, and their inner soul? (8) What is the state of their mental health? (9) Are they economically literate? (10) Do they know themselves? (Author)

Identifiers—\*Shostrom POI

The purpose of this study is to examine the concept of self-actualization, with primary emphasis on the possible correlation to academic achievement exhibited by the students in the Information Systems (Telecommunications) curriculum at the Naval Postgraduate School. The author provides a summary of an extensive review of the literature on the concepts of "self" and "self-actualization." In addition, the results of scores obtained from the Shostrom POI, a personality inventory constructed to measure levels of self-actualization, are correlated to the grade point averages of the aforementioned students. Descriptors—\*Alcohol Education, \*Alcoholism, \*Behavior Change, Elementary Secondary Education, Models, \*Prevention, Program Descriptions, \*Systems Approach

The final report on a project designed to develop a model learning system for alcohol abuse and alcoholism prevention contains format details of four specific programs. Each program is geared to obtain maximum success in reinforcing responsible behavior, to change learner behavior, and to insure effective implementation in a variety of institutional settings. The four target populations specified are: (1) students in medical schools, (2) students in registered nurse training institutions, (3) Federal Civil Service Employees, and (4) elementary school students. A detailed description of each of the programs includes a breakdown of program components and component modules, plus a list of objectives and success criteria for module outcome. A comprehensive plan for field testing the learning system is also presented. (Author)

An Analysis of Job Placement Patterns of Black and Non-Black Male and Female Undergraduates at the University of Virginia and Hampton Institute.

Report No—N75-15490

Pub Date 74

Note—125p.; Ed.D. Thesis, University of Virginia Available from—National Technical Information Service, 5285 Port Royal Road, Springfield, Virginia 22161 (Order No. N75-15490, HC-\$5.25, MF-\$2.25)

Document Not Available from EDRS

Descriptors—Bias, College Attendance, Doctoral Theses, \*Employment Opportunities, \*Employment Patterns, Equal Opportunities (Jobs), Prediction, \*Racial Factors, Research Projects, Sex Differences

Research questions were proposed to determine the relationship between independent variables (race, sex, and institution attended) and dependent variables (number of job offers received, salary received, and willingness to recommend source of employer contact). The control variables were academic major, grade point average, placement registration, nonemployment activity, employer, and source of employer contact. An analysis of the results revealed no statistical significance of the institution attended as a predictor of job offers or salary, although significant relationships were found between race and sex. Descriptors—\*Continuous Learning, \*Educational Philosophy, Educational Theories, Elementary Secondary Education, \*Learning Theories, \*Psychosocial Processes, \*School Environment, Speeches

The authors survey the lifelong process of education and focus on certain issues enhancing or inhibiting learning. They summarize their conclusions in the following six points: (1) at all age levels learning programs of varying kinds need to be developed to fit students of varying learning styles and teachers of varying teaching styles; (2) these programs should allow for observing, sampling, and debate between both faculty and students; (3) interaction between students and teachers of varying styles can develop respect for the human uniqueness of both; (4) broadened work-study programs and available low interest loans will further youth's transition to adulthood through financial independence; (5) broadened merit scholarships without regard to parents' financial status will encourage many students; and (6) learning as a life-long process focuses on identity, independence, social and personal intimacy as well as facts and skills. The Effectiveness of Human Relations Training for Proctors in a Mastery Based Educational Psychology Course.

Pub Date [Mar 75]

Note—22p.; Paper presented at the Annual Meeting of the American Personnel and Guidance Association (31st, New York, New York, March 23-26, 1975)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—Effective Teaching, \*Human Relations, Individual Instruction, \*Interpersonal Competence, Research Projects, \*Sensitivity Training, \*Skill Development

In order to investigate the effectiveness of human relations training for proctors, students of a mastery based educational psychology class were randomly assigned to be tutored by either a proctor who had received training in human relations skills or a proctor who had not. Results indicated that those tutored by the trained proctors showed significantly higher rates of learning and quality of learning. Rating scales indicated that these higher rates were due to the more empathetic and understanding behaviors of the trained proctors. Viewed as a pilot study, this research implies the need for further investigation into the proctor-student interaction component of personalized systems of instruction. (Author)

Descriptors—\*Counseling, \*Counseling Programs, \*Counselor Functions, \*Financial Needs, Program Descriptions, Pupil Personnel Workers, Secondary Education, \*Student Loan Programs, Student Needs

An increasingly important function of high school counselors is advising students about financing their postsecondary education. With substantial increases in the amount of student financial aid funds available from the federal government, state aid programs, and local and other sources, the counselor's role has been significantly affected. This paper outlines several programs instituted at one high school in an effort to disseminate financial aid information to students. These programs include: (1) an early fall assembly for the entire senior class during which the financial aid counselor offers information on financial opportunities and the processes of seeking financial aid; (2) a college night during which a special session on financial aid procedures is conducted; (3) a financial aid workshop in which parents are assisted in the completion of the Parents' Confidential Statement; and (4) the distribution of a 60-page handbook detailing scholarship and loan programs to students seeking a variety of postsecondary options. Developing Individualized Counseling.

Pub Date Mar 75

Note—19p.; Papers presented at the Annual Meeting of the American Personnel and Guidance Association (31st, New York, New York, March 23-26, 1975)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*Counseling, \*Course Organization, Educational Accountability, Elementary Secondary Education, \*Guidance Objectives, \*Guidance Programs, \*Program Development, Program Guides, Pupil Personnel Services, Workshops

This document contains four separate presentations which comprised a workshop at the APGA Convention, 1975. The workshop was designed to help guidance counselors set up a successful guidance unit, and each presentation examines a particular component of the unit. Hence, the first paper deals with problems encountered by guidance personnel in writing usable performance objectives. The second presentation is concerned with identifying measurement strategies and instruments for assessing student outcomes. The third paper discusses selecting and organizing instructional materials or counseling strategies, and the final article deals with designing a format for the guidance unit. Ideas presented are practical and adaptable. (Author/HMV)

Changing Teacher Competence Perceptions by Focused Video-Tape Feedback.

Spons Agency—Office of Education (DHEW), Washington, D.C.

Pub Date 26 Mar 75

Note—19p.; Paper presented at the Annual Meeting of the American Personnel and Guidance Association (31st, New York, New York, March 23-26, 1975)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—Behavior Change, \*Classroom Observation Techniques, \*Effective Teaching, Feedback, Inservice Teacher Education, Instructional Films, Peer Groups, \*Protocol Materials, Research Projects, \*Teacher Behavior, \*Video Tape Recordings

Identifiers—\*Professional Competence Peer Opinionnaire

The study provided teachers with systematic opportunities to: (1) be videotaped in their classrooms; (2) privately view their tapes and receive verbal and written critiques of their positive classroom behaviors; (3) share exemplary segments of their tapes in regularly scheduled teacher inservice group meetings; and (4) view and critique, in the group meetings, the tapes of other teachers. Teachers' professional competence perceptions were defined as the amount of information known and the degree of professional com-

petence accorded to faculty colleagues, as measured by changes in teachers' scores on the Professional Competence Peer Opinionnaire (PC-PO). Significant gains were observed in the amount of information known about the professional competence of the faculty colleagues and in the degree of professional competence accorded to faculty colleagues at the conclusion of the study. The study concluded that teachers are interested in enlarging their effective teaching behavior repertoires. Further, when teachers have opportunities to observe and adopt productive techniques utilized by their colleagues, the professional competence they ascribe to their colleagues and the amount of information they have concerning the professional competence of their colleagues will be increased. Focused videotape feedback teacher inservice training is believed to provide such opportunities. (Author)

Licensing of Psychologists and Counselors in Florida: An Opinion and Recommendations.

Pub Date Nov 74

Note—14p.

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*Certification, \*Counselor Certification, \*Counselors, Professional Personnel, \*Psychologists, Special Degree Programs, \*State Licensing Boards, State of the Art Reviews

Identifiers—\*Florida

This paper discusses the Psychological Licensing Act in Florida as it relates to doctoral level counselors with degrees of a "psychological nature," as opposed to degrees with a "major in psychology." By implication, it addresses problems of licensure of professionals in many states who identify themselves as counseling psychologists and whose degrees are awarded by non-APA approved programs in colleges of education. This paper should be of special interest to counselors in private practice who do not currently enjoy licensing as counselors or as psychologists. Specific recommendations for licensing of psychologists, counselors, clinical social workers, and marriage and family counselors under a revised Florida statute are made. (Author)

Descriptors—College Students, \*Health Services, Higher Education, Program Descriptions, \*School Health Services, Speeches, \*Student College Relationship, Student Needs, \*Student Participation, Student Personnel Services

A college senior at the University of Southern California describes the innovation of a Student Health Advisory Committee at USC in accordance with the belief that, since the campus Health Center is student supported, students are entitled to have a direct input into the policies, organization and services offered. This committee is composed of an executive committee which includes the officers of the Advisory Committee, a fixed number of staff members and student members. Students are in the voting majority. Several of the changes instituted by this committee include: (1) installation of individual cubicles where a student may privately discuss a health problem; (2) initiation of a self-help cold clinic; (3) establishment of a pharmacy within the Student Health Center; (4) provision for free legal advice regarding health-related matters; and (5) implementation of various research projects. The Committee has also devised a system by which students and staff may participate in staff selection. (Author/HMV)

**Identifiers—**Eastern Michigan University, \*Mini University

This brochure describes the novel professional staff development model used by the Division of Student Affairs (DSA) at Eastern Michigan University. The inservice training model revolved around the design and implementation of a Mini-University format for the 76 staff professionals and six graduate assistants within the DSA. Basically, the "Mini-U" consists of a combination of the concepts of the Free University model and a mini-course, in that it consists of an effort to accomplish rather specific instructional objectives with a small group of learners in a brief time period. Eleven non-tuition Mini-U courses were generated in the early fall, seven of which met minimum enrollment requirements. Course descriptions and implementation efforts are included in this brochure. **Guidance Services for the Developmentally Disabled: A Model for Schools.**

Pub Date [75]

Note—5p.; Paper presented at the Annual Convention of the American Personnel and Guidance Association (31st, New York, New York, March 23-26, 1975)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

**Descriptors—**Counseling, \*Counselor Role, Developmental Psychology, Elementary Secondary Education, \*Guidance Services, \*Handicapped Students, Models, \*Physically Handicapped, \*School Community Cooperation

This paper briefly elaborates on two major points of a school model for implementing guidance services for the developmentally disabled. (1) Methodology and Techniques—While it is not necessary to abandon the basic techniques which are effective with any other group of individuals, there is likely to be a different emphasis upon the basic techniques and methodology because of the type of person whose behavior and attitudes it is desirable to change. Group counseling and guidance, individual counseling, play therapy, psychodrama, may each be useful in assisting and guiding disabled individuals. (2) Specific Services and Resources—Guidance services to the developmentally disabled should provide for the full range of individual needs including personal, social, educational, and vocational aspects. These services may be provided by the total educational staff including teachers, administration, supportive services, students, parents, and community and statewide resources. Guidance services should be extended also to parents of the developmentally disabled. It is imperative that the school counselor establish a positive working relationship with educational staff, parents, and community resources, as well as know all about the various resources which are available in his community and on a statewide basis. Deliberate Psychological Education is an emerging method for delivering psychological services. The focus is educational and preventive and the aim is to increase personal learning and psychological competence via educational experiences that integrate intellectual, conceptual knowledge with affective, personal knowledge. A number of psychological education issues are covered in this review. They are (a) an explana-

tion for the emergence of psychological education at this time; (b) historical parallels in education, psychology and religion to deliberate psychological education; (c) the quest for a proper and substantial foundation for psychological education; (d) the politics of implementing and maintaining psychological education; (e) territoriality and the "bad news" concerning psychological education. **Identifiers—**\*Air Force Academy

The number of qualified candidates from which the United States Air Force Academy selects its new cadets each year has decreased to the point where, in the future, every qualified candidate may have to be selected. In addition, the number of cadets dropping out of the Academy program is at an all time high. This study considers the entire candidate counseling program as it now stands and compares it with proven techniques of professional counseling and recruiting. It is concluded that the present candidate counseling program needs major revision. Several specific recommendations are made which could aid the counseling program in meeting its objectives in the future. (Author)

**Descriptors—**\*Armed Forces, \*Counseling Effectiveness, Counseling Programs, \*Counseling Services, Human Relations, \*Integrated Activities, Military Organizations, \*Organizational Change, State of the Art Reviews

**Identifiers—**\*Air Force

The Air Force has maintained an increasing awareness of the basic principles of personnel counseling and human relations. However, it does not have a basic integrated counseling program at base level. This study addresses five base level activities whose dominant mission involves counseling. These activities are: the Education Services Office, Transition Unit, CIAC Unit, Personal Affairs Section, and Social Actions Office. Each of these activities provides an independent counseling service. Under the current organization, there is no centralized control to induce cooperation and provide a unity of purpose for the base-wide counseling effort. This study proposes a reorganization of the five activities that would remove redundancies and provide an integrated counseling program. The proposed program would have a central focus dedicated to serving the individual and the Air Force. (Author)

**Identifiers—**Torrance Tests of Creative Thinking

This practicum was designed to improve creative problem-solving skills in children through the use of career concepts. Although the full program was developed for youngsters in grade three through six, this project exposed fifth and sixth graders at the Northside School, Levittown, New York to the Career Awareness Program for a period of weeks. This Program was infused into the present curriculum. An investigation was then conducted to determine the extent to which these classrooms had made gains in the skills of creative problem-solving, compared to those in the control group. The data shows that the gain scores for the experimental students were significantly better than those for the control students in three of the four scales of the Torrance Tests of Creative Thinking (Fluency, Flexibility, and Elaboration). In the elaboration scale (which is identified in this study as the scale most closely related to creative problem-solving), gain scores for females were significantly higher than those for males. The complete curriculum guide for grades three through six is appended. Objectives and lesson plans are color coded for each grade level. (Author/CJ)

Children judged the ability and effort of peers whose test performance varied across two dimensions: number of problems attempted and percentage correct. There was a developmental progression in the children's evaluative approach. Younger children used only one cue, number correct, to evaluate both ability and effort. Older children used both cues and made significantly more negative ability and effort evaluations. (Author)

Unemployment of those aged 16 to 23 is due largely to inadequate job preparation. Most educators have little exposure to the world of work outside of education, and may unknowingly provide incorrect, restrictive or out-of-date information to students. This Educators-in-Industry Handbook is designed to provide G.E. plant representatives with guidelines to develop and implement local programs to provide educators—especially guidance counselors—with first-hand industrial experiences. The Handbook should be utilized as a source from which a local program might be adapted to meet the needs and constraints peculiar to a particular location. It discusses the background of, and need for, local programs developed and implemented at G.E. facilities. It provides guidelines to initiate, conduct and follow-up a program. It also provides examples of application and evaluation forms, program schedules, and budget items useful in designing and administering a local program. (Author/HMV)

**Identifiers**—Personalized System of Instruction, PSI

While the Personalized System of Instruction introduced by Keller individualizes the college classroom, it may be impractical when time is limited by administrative rules, without modification. Having students pace themselves within a fixed academic time period usually leads to procrastination and cramming at the end of the semester/quarter. The present system attempted to correct the problem of cramming by providing students enrolled in a course in physiological psychology with "self-charting forms" to permit precise feedback early in the semester. It was found that emphasizing the use of the forms increased their effectiveness and adding point contingencies increased the effect still more. Sections of the course (which combined modified Keller elements with a point-token system and a lecture-discussion classroom format) exposed to the con-

tingencies did more early work in both qualitatively graded and ungraded categories, crammed less, and did better during chart-submission contingency intervals on instructor-paced, graded, objective exams. Student responses to course/instructor-evaluation forms were slightly superior as a result of the treatment. The system is simple to use. (Author)

**Minority Counselors: Are They Really Needed?**

Pub Date [75]

Note—15p.; Paper presented at the Annual Convention of the American Personnel and Guidance Association (31st, New York, New York, March 23-26, 1975)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

**Descriptors**—\*Counselors, \*Counselor Selection, \*Ethnic Groups, Junior Colleges, Minority Groups, \*Racial Differences, Research Projects, Speeches, \*Student Attitudes

To determine if male junior college students differed in counselor preference by ethnicity and type of problem a stratified random sample of 60 students was drawn: 20 Mexican Americans, 20 Blacks, and 20 Whites. Subjects who were presented with validated counselor photographs representing the three ethnicities then assumed both administrative and personal problem situations and made counselor selections. Significant differences were found in student preference for Mexican American, Black, and White counselors for both problem situations. When provided a choice Mexican American, Black, and White students tended to prefer a counselor of their same ethnicity. In general, students also wanted to speak with a counselor of their same ethnicity more for the personal than the administrative problem situations. The results clearly support the view that counselor ethnicity is perceived by students as a significant variable in counselor selection. (Author)

**Identifiers**—Louisiana (New Orleans)

The Delgado Rehabilitation Center, New Orleans, Louisiana, conducted this study to determine the influence of family therapy on clients receiving rehabilitation services at the Center. An experimental group of randomly selected relatives of 33 clients received group therapy while 39 other randomly selected relatives served as controls. Criteria variables used to evaluate the influence of group therapy were of two types: (1) those measuring the client's rehabilitation potential through evaluation of personal, social, educational and vocational factors; and (2) those reflecting the client's adjustment and vocational success a year after leaving the Center. Client changes among the experimental group were significantly higher for a number of personal and vocational objectives, while no significant changes were evidenced by the control group. (SJL)

This briefing paper describes a new U.S. Office of Education program—the Educational Opportunity Center (EOC). The services available through this program include professional coun-

selling, information on student financial aid and advice on academic and career possibilities. Authorized under the Educational Amendments of 1972, the Educational Opportunity Centers focus educational services upon certain geographical areas that have major concentrations of low-income or disadvantaged persons. The Centers coordinate a variety of available educational resources in one place, making it possible to help a larger number of persons. The report lists the 12 Centers, describes who can benefit from the facilities and services, and delineates the services provided at three of the Centers. (Author)

Descriptors—\*Decoding (Reading), \*Graphemes, Primary Education, Pronunciation, \*Reading Programs, Spelling, Teaching Methods  
Identifiers—Model 2 Reading Programs

The linear sequencing of correspondence rules in the Mod 2 reading programs creates problems for rule instruction and the efficient application of the rules during word decoding. Training forms are suggested for overriding possible interference brought on by isolating the alternative pronunciations of graphemes. Learning to classify major rule dimensions and to scan the classification structure efficiently are proposed to improve retrieval of rule information during word decoding. (Author)

Identifiers—\*Effective Reading Programs, Right to Read

This program, included in "Effective Reading Programs..." serves 1728 students in kindergarten through grade six and 429 students in grades seven through twelve. Most of the students are white, live in a small town, and are from middle-income families. The program began in 1961 and provides detailed guidelines for each grade level on screening instruments, techniques, and scheduling. Usually, a reading specialist diagnoses the student's ability and current reading competence. The reading specialist then recommends that the classroom teacher individualize the student's reading program. The specialist provides appropriate materials and suggests teaching methods geared to the individual's specific reading problem. Often an aide or volunteer tutor works with individual students to improve reading skills. Since several different approaches to instruction are used in the district, the student may be placed in a basal text classroom, a structured phonics classroom, or another type of classroom which meets the individual's needs. If the problem remains, the student is assigned to remedial classes of no more than three students. If the problems are multiple and severely handicapping, the student is placed in a special classroom. (RB/AIR)

Identifiers—\*Effective Reading Programs, Right to Read

This program, included in "Effective Reading Programs..." serves 360 predominantly Spanish-speaking students from middle-income families living in a small city. The program was begun in 1973. The program strives to meet the reading needs of all students, to provide for growth in their reading achievement, and to improve their self-concepts; it operates in two-year cycles, providing reading instruction for all students at the seventh-grade level and following them through the eighth grade. In the relaxed environment of a reading center, students receive reading instruction that is individualized, sequential, and continuous. All English classes are scheduled into the reading center on a rotational basis for 3-week periods of instruction, for a total of 18 weeks during the year. After giving diagnostic tests, reading center teachers write a prescription for each student, recommending reading activities for the student's particular needs and interests. A contract, or 3-week study plan, is drawn up by the teacher and student, generally outlining two or more lessons per day plus independent reading. At the end of the cycle, a new group of seventh-grade students is served. (AIR/RB)

**Some Relationships Between Listening Comprehension and Rate of Presentation.**

Pub Date Jun 75

Note—116p.; M.Ed. Thesis, Rutgers The State University of New Jersey

EDRS Price MF-\$0.76 HC-\$5.70 Plus Postage

Descriptors—Elementary Education, Elementary School Students, Grade 6, \*Listening Comprehension, Reading Ability, \*Reading Comprehension, Reading Research, Reading Skills, \*Reading Speed, \*Speech Comprehension

This study was conducted to determine the relationship between listening comprehension and rate of presentation using meaningful prose materials. A total of 103 students from a suburban sixth-grade class in a central New Jersey school district participated in the study. To determine reading comprehension levels, the students were administered the comprehension subtest of the Gates-MacGinitie Reading Test, Survey D. It was concluded that as the rate of presentation increased, comprehension decreased among sixth-graders. Furthermore, above-average readers tend to comprehend listening material better than other readers. (Author/RB)

**Some Difficulties in Using Cloze Procedures to Assess Readability.**

Pub Date Apr 74

Note—138p.; M.Ed. Thesis, University of Melbourne

EDRS Price MF-\$0.76 HC-\$6.97 Plus Postage

Descriptors—\*Cloze Procedure, Elementary Education, Grade 6, \*Independent Reading, Instructional Materials, Measurement Instruments, \*Readability, Reading Research, \*Reading Skills, \*Test Construction, Testing

This thesis explores some difficulties associated with the use of the cloze procedure, particularly in relation to the interpretation of an individual's score on a cloze test. Cloze tests were administered to 112 grade-six children in four schools. The results indicated that for the children in this study the easiest words to replace were those that are one syllable long, or articles, or conjunctions, or prepositions, or pronouns. It is suggested that there is likely to be considerable overlap between the expected scores for the independent and instructional reading levels. Some of the limitations of the study are discussed. Available from—University Microfilms, P.O. Box 1764, Ann Arbor, Michigan 48106 (Order No. 75-12,606, MFilm-\$5.00, Xerography-\$11.00)

Document Not Available from EDRS

Descriptors—College Instruction, \*Developmental Reading, Doctoral Theses, Factual Reading, Higher Education, \*Reading Achievement, Reading Comprehension, \*Reading Instruction, Reading Programs, \*Reading Research, Reading Speed, Teaching Methods, \*Vocabulary

The major purpose of this investigation was to determine the relative efficacy of two methods of teaching reading in a college learning-improvement project. Seventy students from undergraduate psychology classes were divided into two instructional groups and one control group. It was hypothesized that subjects receiving modified paperback scanning instruction would score significantly higher on reading vocabulary, comprehension, accuracy, and rate tests than subjects receiving vocabulary expansion instruction. The results of this study showed that in regard to reading accuracy after compensation for initial differences in verbal ability, the modified paperback scanning method was superior to the vocabulary expansion method. In regard to reading vocabulary, comprehension, and rate, the hypothesized superiority of the modified paperback scanning method over the vocabulary expansion method did not materialize. Recommendations for further research are as follows: increase the number of instructional sessions, determine the point at which a significant loss in reading accuracy occurs, and study within-individual changes in reading achievement. This doctoral dissertation examines students' perceptions of their teachers' feelings toward them and possible relationships that exist between perceptions and reading achievement. In addition, the study sought to determine if differences in positive feelings exist among Caucasian, Negro, and Indian students; between Title I and non-Title I students; and between male and female students. Five hundred twenty-one subjects comprised the sample for this study. It was concluded that when students had positive perceptions of their teachers' feelings toward them, reading achievement scores were higher than when negative feelings were perceived; when differences between individual questions on the "Feeling Tone Questionnaire" existed, this indicated lower

reading achievement; and the rank order of students' positive perceptions of their teachers' feelings toward them were: Caucasians, Negroes, Indians; non-Title I students, Title I students; females, males. Recommendations for further research are included. (Author/RB)

**Document Not Available from EDRS**

**Descriptors**—\*Class Activities, \*Content Reading, Doctoral Theses, Elementary Secondary Education, Grade 7, Language Arts, \*Literature, Reading Improvement, \*Reading Readiness, Reading Research, \*Reading Skills, Teaching Methods

This study was designed to determine statistically whether the prolonged use of three prepared reading readiness activities has any influence on seventh-grade students' abilities to read unfamiliar literature; which of the readiness activities is most influential on students' abilities; and whether or not longevity of such influence exists. The study involved four treatment groups of 25 students each, and consisted of two parts extended over 49 school days of treatment were followed by a posttest to measure immediate use of reading skills, and 23 days of waiting were followed by a post-wait-test to measure retained use of readiness skills. Since significance was not found to exist between any of the experimental treatment groups and the control group, no statistical determination can be made as to the effect of prepared reading readiness activities on students' competency to use content area reading skills in reading unfamiliar literature. In effect, students exposed to prepared reading readiness activities are not necessarily better able to read unfamiliar literature than are students not exposed to such prepared activities. Thus, the effect of readiness in the study cannot be determined statistically. (Author/RB)

**A Study of Teacher Behavior and Attitudes in Elementary Schools with High and Low Pupil Achievement.**

Pub Date Apr 75

Note—20p.; Paper presented at the Annual Meeting of the American Educational Research Association (Washington, D.C., March 30-April 3, 1975)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

**Descriptors**—\*Academic Achievement, \*Behavior Patterns, Educational Research, \*Effective Teaching, Elementary Education, \*Teacher Attitudes, \*Teacher Behavior, Teacher Role

Seven schools in which pupil achievement was high were matched with seven schools in which pupil achievement was low. Nine teachers were selected for observation in each school; teachers filled out questionnaires, and principals were interviewed. Significant differences in favor of schools with high pupil achievement were found in teacher expectations for pupils, in teacher attitudes toward pupils, in the use of positive reinforcement, in the cognitive load of materials presented, and in a number of related variables. Principals in schools with high pupil achievement generally saw their teachers as more competent. Implications of these findings for further work on variables of teacher behavior are discussed. This program, included in "Effective Reading Programs..." serves from 10 to 40 junior college students each semester. The students come from several ethnic groups and are from low-income families in a small rural town. They represent various age groups, including adults returning to school after years of absence. Begun in 1971, the program consists of a series of individualized laboratory reading courses offered for credit by Wharton County (Texas) Junior College. The program is designed to assist the student in becoming a better reader by supplementing regular reading classes. Four semester-length courses focus successively on word attack skills, vocabulary development, and comprehension; critical reading and newspaper reading skills; various other study skills; increasing speed and comprehension; and skimming and scanning and further work in critical reading skills. Each student takes a diagnostic exam and has an individualized reading program prepared by the reading specialist based on the results of the exam. The student then enters into a contract with the reading instructor, who establishes the guidelines for student objectives and responsibilities. (AIR/RB)

The Model 3 communication skills lexicon consists of three lists of words developed by the Southwest Regional Laboratory (SWRL) for use in communication skills instruction in K-6. This report documents the procedures used for developing a technical lexicon for subject areas in kindergarten and the elementary grades. To develop a music lexicon, five sources (a general lexicon, two music dictionaries, and two elementary music series) were selected and perused for music terminology by two SWRL staff members. Master lists for each source were compiled and submitted to SWRL music experts for evaluation. It was found that the procedures followed were generally appropriate for developing a lexicon. The results of the compilation and evaluation are discussed in this paper. Appendixes include instructions for evaluators, lists compiled from each source, and a tentative music lexicon. (JM)

**Perceptual Decoding Processes for Language in a Visual Mode and for Language in an Auditory Mode.**

Pub Date Oct 74

Note—85p.; Qualifying Paper, Harvard University Graduate School of Education  
EDRS Price MF-\$0.76 HC-\$4.43 Plus Postage  
Descriptors—\*Aural Stimuli, Cognitive Processes, \*Decoding (Reading), Grammar, \*Linguistic Theory, Memory, Neurolinguistics, \*Reading Processes, Sensory Integration, Visual Perception

The purpose of this paper is to gain insight into the nature of the reading process through an understanding of the general nature of sensory processing mechanisms which reorganize and restructure input signals for central recognition, and an understanding of how the grammar of the language functions in defining the set of possible sentences in the language. Chapter 1 discusses neural coding in perceptual processing systems and explores such topics as short-term memory and developmental and learning factors which affect central human processes. Chapter 2 discusses linguistic theory on the nature of the language system and two models of perceptual processing. Chapter 3 discusses similarities and differences in decoding strategies for oral and written language inputs. (TS)

Blair, Timothy Rawlings  
Relationship of Teacher Effort and Student Achievement in Reading.  
Pub Date 75

Note—94p.; Ph.D. Dissertation, University of Illinois at Urbana-Champaign

Available from—University Microfilms, P.O. Box 1764, Ann Arbor, Michigan 48106 (Order No. 75-14,084, MFilm-\$5.00, Xerography-\$11.00)

Document Not Available from EDRS  
Descriptors—Doctoral Theses, \*Effective Teaching, Elementary Education, \*Reading Achievement, \*Reading Instruction, Reading Research, \*Teacher Characteristics, Teacher Evaluation, \*Teaching Methods

This research finds that teacher effort in reading instruction is associated with student achievement in the primary and middle grades. Teachers who exert a greater amount of effort on the job in reading produce higher reading achievement scores in their classes at both the primary and middle-school level as measured by the Stanford Achievement Test. The negative effects of low effort were more pronounced in the middle grades than at the primary level. Five reading consultants in a suburban New England town rated their teachers on the Teacher Effort Scale in Reading, a scale designed to differentiate between those teachers who manifested a great deal of effort in their work and those who did not. Efforts to secure and utilize supplementary materials, provide differentiated instruction, keep records of student progress, and arrange conferences dealing with each individual student's progress were scored on four subscales. The mean reading scores of 37 classes of high-effort and low-effort teachers were then analyzed by using a two-way analysis of covariance technique. (Author/MKM)

Hall, Addie June Gray  
The Effectiveness of a Multisensory Approach to Teaching Disadvantaged Children to Read the Alphabet.  
Pub Date 75

Note—72p.; Ph.D. Dissertation, The Florida State University

Available from—University Microfilms, P.O. Box 1764, Ann Arbor, Michigan 48106 (Order No. 75-13,949, MFilm-\$5.00, Xerography-\$11.00)

Document Not Available from EDRS

Descriptors—\*Basic Reading, \*Beginning Reading, Disadvantaged Youth, Doctoral Theses, Grade 1, Individual Instruction, Letters (Alphabet), Magnetic Tape Cassettes, \*Multimedia Instruction, Primary Education, \*Reading Programs, \*Reading Research, Word Recognition

A programmed-workbook cassette-delivered approach to letter and number recognition, "From Letters to Words," was compared with a traditional method of teaching letter recognition. The subjects were 153 disadvantaged first-grade students. The 75 experimental subjects were individually instructed by the investigators and teachers on the use of the program. Each experimental subject was assigned to work with the materials for 20 minutes each day. The 78 control-group subjects utilized the basal series approach supplemented by other teacher-supported

materials. The analysis of the data revealed that the experimental group means were significantly higher on three subtests of the Gates Reading Readiness Test. The experimental group learned to distinguish between words, recognize lower and uppercase letters, and recognize numbers at a rate exceeding that of the control group. The differences were significant at the 1 percent level of confidence. No statistically significant differences were found between experimental boys' and girls' means. (Author/MKM)

Document Not Available from EDRS

Descriptors—Doctoral Theses, Grade 3, \*Mexican Americans, Primary Education, \*Reading Achievement, Reading Research, Self Concept, Student Attitudes, \*Tutoring, Urban Education, \*Verbal Ability, \*Vocabulary

The relative value of individual or small group tutoring and isolated or contextual phrase presentation on the reading achievement scores, self-concepts, and reading attitudes of 78 inner-city third-grade Mexican-American subjects was explored in this study. All subjects received regular classroom reading instruction, but the contrast group was instructed in mathematics facts during the time that the experimental groups received individual or small-group tutoring on isolated words or words in context. No significant differences were found between individually and group-tutored subjects or between isolated word or context presentation when reading achievement was measured by vocabulary, comprehension alone, and combined vocabulary and comprehension. No significant difference was found between each of the experimental groups and the control group (which received no word instruction). All experimental subjects demonstrated a significant difference between pretest and posttest vocabulary scores. The findings suggested that absenteeism affects school reading achievement, there is a positive relationship between verbal intelligence and reading achievement, and tutoring results in improved self-concepts and attitudes toward reading. Allington, Richard L. And Others  
Poor and Normal Readers Achievement on Visual Tasks Involving High Frequency Low Discriminability Words.  
Pub Date May 75

Note—14p.; Paper presented at the Annual Meeting of the International Reading Association (20th, New York City, May 13-16, 1975)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—Elementary Education, Grade 3, \*Reading Difficulty, \*Reading Processes, \*Reading Research, \*Visual Discrimination, Visually Handicapped, Visual Perception, \*Visual Stimuli, Word Recognition

This study presented 24 third graders drawn from suburban elementary schools with high frequency, low discriminability words in four conditions. Subjects were randomly assigned to the four tasks individually. It was hypothesized that poor and normal readers would differ in their ability to read high frequency, low discriminability words presented tachistoscopically in isolation but would not differ in their ability to match the words to form, to graphically reproduce the words following a tachistoscopic presentation, or to select the appropriate word from a group of distractor words after a tachistoscopic presentation. The hypotheses were supported. It was concluded that a visual perceptual deficit is probably not a major factor in reading disability. (TS)

Relationship Between Reading Achievement and Piaget's Conservation Tasks for Beginning Second Grade Students.  
Pub Date 75

Note—113p.; Ed.D. Dissertation, University of Southern California

Available from—University Microfilms, P.O. Box 1764, Ann Arbor, Michigan 48106 (Order No. 75-15,581, MFilm-\$5.00, Xerography-\$11.00)

Document Not Available from EDRS

Descriptors—\*Beginning Reading, \*Cognitive Development, \*Conservation (Concept), Doctoral Theses, Grade 2, Primary Education, \*Reading Achievement, \*Reading Processes, Reading Readiness, Reading Research Identifiers—Piaget (Jean)

In order to determine if there is a relationship between reading achievement and the ability to conserve as measured by replications of Piagetian conservation tasks, 160 beginning second-grade students were identified as achievers or low achievers according to reading and intelligence test scores, and their performance on the Piagetian tasks was correlated with their achievement scores, years of formal school, sex, chronological age, and socioeconomic status. A significant relationship between the ability to conserve and reading achievement was found for the achiever group (N = 121) and the combined sample (N = 160). A significant relationship was found between the ability to conserve and socioeconomic status and between the ability to conserve and sex for both the achiever group and combined sample. The ability to conserve was found to be significantly related to socioeconomic status for the low-achiever group. The following were among the conclusions drawn: a conservation task seems to be an appropriate measure to use in diagnosing a student's readiness to read if used in conjunction with other data, and it would appear that the formal teaching of reading should not precede the child's ability to conserve. Descriptors—\*Adult Basic Education, \*Correctional Education, \*Individual Instruction, Prisoners, Reading Improvement, \*Reading Instruction, Reading Research, Teaching Methods, \*Tutoring

Identifiers—\*Offender Literacy Programs

The purpose of this study was to determine whether or not adult prison inmates reading below the third-grade level can significantly increase their reading level by the use of a tutor-student teaching method, supplemented by the use of flashcards. The subjects in this study were 10 functionally illiterate adult prison inmates, selected on a voluntary basis. They were pre- and posttested and were tutored on an individualized basis for 50 one-hour sessions by six inmates and the investigator. Following analyses of the data, three hypotheses were accepted: adult prison inmates reading below the third-grade level will increase their reading level by use of a tutor-student (one-to-one) teaching method; adult prison inmates will show reading improvement through the use of the tutor-student system after 50 one-hour lessons; and adult prison inmates will, after completion of the tutor-student system, further increase their reading level through the use of flashcards. Further study of positive attitudinal changes which occur while using an individualized teaching method is recommended. (LL)

\*Program Evaluation, Reading Achievement, Reading Failure, \*Reading Instruction, \*Reading Programs, Teacher Education, \*Urban Education

Identifiers—Reading Improvement Act 1973, Right to Read

Identification of ingredients of successful urban reading programs in order to effect an increase in reading achievement in urban schools is the purpose of this paper. An historical-sociological framework is established. Pertinent literature which seeks to explain the causes of reading failure in urban schools is reviewed. Among the topics discussed are the myth of cultural deprivation, Black English, visual perceptual deficits, and teacher attitudes. Successful reading programs and practices which have achieved measurable success in reversing reading failure are described. Among the programs analyzed are the Follow Through Program in public schools 11, 129, and 146 in New York City; the Woodland School in Kansas City, Missouri; the Ann Street School in Los Angeles; School 6 Annex in Passaic, New Jersey; and "Sesame Street." The Career Opportunities Program at the University of Massachusetts is discussed as an effective model for urban teacher training. Four proposals for change directed at increasing reading achievement are examined, including the Right to Read Program and the Reading Improvement Act of 1973. (Author/MKM)

Descriptors—\*Doctoral Theses, \*Models, \*Program Administration, \*Program Development, \*Program Evaluation, Questionnaires, \*Reading Programs, Secondary Education

A questionnaire designed to discover the effectiveness of a reading program model for secondary schools in the Los Angeles Unified School system was submitted to the junior and senior high school principals and 24 coordinators. Answers indicated that most schools considered most of the steps in the model, but that they varied the emphasis on remedial, enrichment, corrective, and developmental components. Leadership was often found to be lacking in the construction of a school preferred reading program. The model served most secondary schools as a guideline in constructing their preferred reading program or as a checklist against which a current program might be judged. (Author/MKM)

Bibliotherapy: A Brief Review.

Pub Date 75

Note—11p.

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*Bibliotherapy, Books, Changing Attitudes, \*Emotional Adjustment, Identification (Psychological), Literature, \*Literature Reviews, Psychotherapy, Reading Interests, \*Reading Materials, \*Self Concept

Bibliotherapy is defined as "a process of dynamic interaction between the reader and literature—interaction which may be utilized for personality assessment, adjustment, and growth." A review of the literature dealing with bibliotherapy and a discussion of its uses are contained in this paper. The review indicates that bibliotherapy, if properly and carefully used with any age level, is likely to produce a positive change in the reader's attitudes and self-concept. It is particularly effective if a large variety of books at different reading levels and appealing to the interests and needs of the readers is provided. There should be freedom of book selection and no pressure for reading. Furthermore, it is suggested that reading be followed by discussion to facilitate the interaction between the reader and the character(s) in the book, which is essential for the therapeutic process. The Problems of Validation in a Competency-Based Preservice Reading Education Program.

Pub Date Mar 75

Note—21p.; Paper presented at the National Right to Read Conference (Reston, Virginia, March 7, 1975)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—Evaluation Criteria, Higher Education, \*Performance Based Teacher Education, Preservice Education, \*Reading Instruction, \*Reading Programs, Teacher Behavior, Teacher Education, \*Teaching Models, \*Validity

A problem of teacher education is to successfully integrate the knowledge students learn in the college classroom with the practical experiences of student teaching. A principal objective of an ideal teacher training situation would be to establish a vertical integration of the various types of exposure to reading both prior to and during contact in classrooms with children learning how to read. An integrated time frame competency development model includes elements of information, skill development, and application. The model must be evaluated to determine its construct validity and internal consistency. Validation of the competencies required of preservice teachers is important. Studies of teacher behavior have not been consistent. The trend is to define teaching competencies in reading in terms of pupil performance in reading. An approach to the validation problems of a competency-based preservice reading education program being developed at Northwestern University consists of nine points concerning competency categories as hypotheses which must be exhaustively analyzed. This paper presents instructional outcomes and student exercises related to the student's acquisition of the reading skills minimally required for comprehension in the SWRL Reading Program. The two outcome areas of the reading comprehension program are the development of word decoding skills and the development of skills necessary for sentence and passage comprehension. Comprehension tasks are divided into the following areas: vocabulary and word recognition, picture conventions, punctuation, syntax, and sentence comprehension (literal, deductive, and inferential). Representative samples of comprehension tasks are given for the stories used in the two outcome areas of the program. (MKM)

The Effect of Various Teaching Techniques, Involving the Cloze Procedure, Upon the Reading Achievement of Community College Students.

Pub Date May 75

Note—17p.; Paper presented at the Annual Meeting of the International Reading Association (20th, New York City, May 13-16, 1975)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*Cloze Procedure, Disadvantaged Youth, Junior Colleges, \*Minority Groups, \*Reading Achievement, Reading Improvement, \*Reading Instruction, Remedial Reading, Teaching Methods

The purposes of this study are to ascertain the effectiveness of the cloze procedure when used as part of the remedial reading instruction in community college classes, and to determine if one type of teaching presentation—using the cloze procedure—is significantly superior to another. One hundred students from Bronx Community College who obtained a raw score of less than 60 on the Nelson-Denny Reading Test, Form A, served as participants in this study. Findings indicated that the reading achievement scores of community college students improved when the cloze procedure was used as part of the remedial instruction, but that there is no one teaching method in college remedial reading classes which emerges as superior to the others when used in conjunction with the cloze procedure. An Investigation of Critical Thinking While Reading in Grades Thirteen and Fourteen.

Pub Date 74

Note—79p.; Ed.D. Dissertation, Memphis State University

Available from—University Microfilms, P.O. Box 1764, Ann Arbor, Michigan 48106 (Order No. 75-10,059, Mfilm \$5.00, Xerography \$11.00)

Document Not Available from EDRS

Descriptors—\*Critical Thinking, Doctoral Theses, Higher Education, \*Intelligence, \*Reading Ability, \*Reading Achievement, Reading Research, \*Reading Skills

The problems stated for this investigation were as follows: (1) to determine if there is an increase in critical reading ability for students from grades thirteen to fourteen; (2) to determine if there is a difference in the critical reading ability of males and females in grades thirteen and fourteen; (3) to determine the relationship between critical reading ability and intelligence in grades thirteen and fourteen; and (4) to determine the relationship between critical reading ability and reading achievement in the two grades. The sample was composed of 535 students at the thirteenth and fourteen grade levels in the states of Arkansas, Mississippi, and Tennessee. It was concluded that significant differences in critical reading ability existed between students in grades thirteen and fourteen; no significant differences in critical reading ability appeared between male and female students in grades thirteen and fourteen; a significant difference existed between intelligence and selected critical reading skills; and a significant difference was evident between reading achievement and critical reading ability. Father to Son Reading: Its Effect on Boys' Reading Achievement.

Pub Date 74

Note—84p.; Ph.D. Dissertation, Syracuse University

Available from—University Microfilms, P.O. Box 1764, Ann Arbor, Michigan 48106 (Order No. 75-13,990, Mfilm \$5.00, Xerography \$11.00)

Document Not Available from EDRS

Descriptors—Doctoral Theses, Early Reading, Language Skills, \*Oral Reading, \*Parent Participation, Primary Education, \*Reading Achievement, \*Reading Readiness, Reading Research, Vocabulary Development, \*Word Recognition

The purpose of this study was to determine whether boys read to by their fathers for the six-month period immediately preceding entrance into first grade would score significantly higher on predictor instruments for first-grade reading achievement when compared with boys read to by their mothers or boys in an unplanned situation for the same period. All boys in a central New York State school's kindergarten sections were assigned to a father-read-to, a mother-read-to, a father-not-participating, or a control (unplanned reading) group for a six-month treatment period. The experimental groups were read to by the assigned parent reader about two or three times a week. The dependent variables were letter naming and word recognition (isolated words and words in context). The predictor criterion measures were administered individually at the conclusion of treatment, which coincided with the beginning of the boys' first-grade school year. Within the context of the study's limitations, the results indicated that father-read-to boys had significantly higher mean scores on the words in context or criterion measure than the mother-read-to, the father-not-participating, or the control group of boys. The Effects of Passive Listening and Direct Training in Listening upon the Reading and Listening Skills of a Group of Black Fourth Graders.

Pub Date 74

Note—93p.; Ph.D. Dissertation, Syracuse University

Available from—University Microfilms, P.O. Box 1764, Ann Arbor, Michigan 48106 (Order No. 75-14,002, Mfilm \$5.00, Xerography \$11.00)

Document Not Available from EDRS

Descriptors—Doctoral Theses, Elementary Education, Grade 4, Inner City, \*Listening Skills, \*Negro Students, \*Reading Improvement, \*Reading Instruction, Reading Research, \*Reading Skills, Teaching Methods

The purposes of this study were to determine if training in listening would result in the improvement of both reading and listening skills among black students, and if there would be any dif-

ferences between the results produced by a passive approach to teaching listening, a direct approach to teaching listening, and the offering of no special training whatsoever. Sixty subjects were randomly selected from a population of children attending a school located in the inner-city area of Syracuse, New York. Results of the study, subject to the limitations imposed by data collection and study sample, indicated that training in listening appeared to significantly affect the development of basic listening and reading skills. It also appeared that the direct and passive approaches were generally equal in producing reading gains. The same was not true in listening—the direct approach to teaching listening produced gains greater than those produced by the passive approach. Implications were reported for classroom implementation and future research possibilities. (Author/RB)

An Investigation of the Relationship of Selected Oral Language and Readiness Factors to First-Grade Reading Achievement.

Pub Date 74

Note—199p.; Ph.D. Dissertation, University of South Carolina

Available from—University Microfilms, P.O. Box 1764, Ann Arbor, Michigan 48106 (Order No. 75-16,487, Mfilm \$5.00, Xerography \$11.00)

Document Not Available from EDRS

Descriptors—\*Beginning Reading, Comparative Analysis, Grade 1, \*Measurement Instruments, \*Oral Communication, Primary Education, \*Reading Achievement, \*Reading Readiness, Reading Research, Reading Skills

This investigation examined the specific relationships between two reading achievement measures at the end of the first grade and the following measures: (1) three selected oral language measures, (2) five readiness measures, and (3) a combination of these measures. Further, the study attempted to determine if the relationships between the oral language and reading measures were stronger than those between the readiness and reading measures. The three oral language measures were oral fluency, mean length of communication unit, and understanding oral vocabulary. Data were collected on 60 first-grade pupils from two socioeconomic levels. Results showed that no statistically significant relationships were found between the three oral language measures and the two reading achievement measures for the total sample. With one exception, the obtained relationships were found to be statistically nonsignificant for each of the two socioeconomic strata. This investigation pointed up the need for seeking other measures of oral language to assess language competency, for extending similar investigations over several grades for a longer period of time, and for conducting experimental rather than correlational studies to ascertain the relationship between oral readiness and other language factors. This study sought to determine the effectiveness of a remedial reading program conducted in a large city school district over a five-year span of time. There were 200 students in the experimental group and 200 students in the control group. Stanford Achievement Test stanine scores were obtained at the beginning fourth-grade level for all subjects included in the study before the experimental group had been given remedial reading instruction. At the ninth-grade level the Huser Attitude Toward Reading Test was administered to both groups. The findings of the study indicated that remedial reading instruction made a significant difference (.05 level) in the achievement gains of the treated group. There

was also a significant difference (.05 level) in the attitude toward reading between those ninth-grade students who had remedial reading instruction and the control group of ninth-grade students who had not had remedial reading instruction. (Author/RB)

ESSO—Self-Concept and Basic Reading in a Secondary School Program.

Pub Date 75

Note—11p.; Paper presented at the Annual Meeting of the International Reading Association (20th, New York City, May 13-16, 1975)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*Content Reading, Curriculum Design, English Instruction, \*Program Descriptions, \*Reading Programs, \*Remedial Reading, Secondary Education, \*Self Concept, Senior High Schools, Social Studies, Special Education Identifiers—\*English Social Studies Opportunity Program

The English/Social Studies Opportunity (ESSO) Program is a program designed for students with learning problems at Paint Branch High School in Burtonsville, Maryland. The program blends remedial reading and special education into a secondary school program which attempts to build reading and study skills, to effect positive self-concept, and to prepare students to cope with adult life situations. English and social studies are taught in a resource-room setting by the ESSO team, which consists of a reading teacher, two special education teachers, and an aide; however, only two team members are in each class of 25-30 students during a class period. Students are mainstreamed in other academic and special subjects classes; they receive positive support and instructional assistance by the ESSO team, whose resources are available to both students and subjects. Sample schedules for two specific students are discussed to amplify the description of the program. (MKM)

The Effect of Instructional Variables upon the Achievement of Predicted Reading Expectancy in Eighth-Grade Students of Disadvantaged Status.

Pub Date 74

Note—166p.; Ph.D. Dissertation, The University of Alabama

Available from—University Microfilms, P.O. Box 1764, Ann Arbor, Michigan 48106 (Order No. 75-18,311, Mfilm \$5.00, Xerography \$11.00)

Document Not Available from EDRS

Descriptors—\*Disadvantaged Youth, Doctoral Theses, English Instruction, Junior High Schools, Mathematics Instruction, \*Reading Achievement, Reading Diagnosis, \*Reading Instruction, Reading Research, \*Reinforcement, Remedial Instruction, \*Teaching Methods

The purpose of this study was to identify promising instructional techniques for promoting improvement in the reading skills of students classified as "disadvantaged" in both the English and mathematics classrooms. Residual gain scores were computed in both English and mathematics for each of 165 students, and mean gain scores of classrooms were correlated with items on a questionnaire designed to identify instructional techniques. These techniques were grouped into seven clusters as follows: (1) the process of prescription and diagnosis, (2) the techniques of remediation, (3) the effect of individualization and grouping, (4) the development of oral competency, (5) the acquisition of vocabulary, (6) the attainment of cognitive skills, and (7) the effect of reinforcement. Some conclusions were that reinforcement emerged as the most important technique in teaching disadvantaged students. Prescription and diagnosis were important in the English area. Individualization and grouping and the development of oral competency were not strongly represented. Vocabulary items appeared to be completely ignored in both English and mathematics instruction. A Survey of Reading and Study Skills Programs in Selected Rocky Mountain Colleges and Universities.

Pub Date 74

Note—235p.; Ed.D. Dissertation, University of Wyoming

Available from—University Microfilms, P.O. Box 1764, Ann Arbor, Michigan 48106 (Order No. 75-12,846, Mfilm \$5.00, Xerography \$11.00)

Document Not Available from EDRS

Descriptors—Developmental Reading, Doctoral Theses, Higher Education, \*Junior Colleges, Questionnaires, Reading Materials, \*Reading Programs, \*Study Skills, \*Surveys, \*Universities

Identifiers—Rocky Mountain States

This study had the following twofold purpose: to survey the literature to provide historical background for reading and study skill programs in colleges and universities; and to survey the status of reading and study skills programs in selected institutions in the Rocky Mountain states. Some major findings from the questionnaire were that 84 percent of the institutions had reading/study skills courses, 9 percent had more planned courses; two-year institutions offered fewer courses per school but reached a higher percentage of students (14-19 percent) than did the four-year schools (3-5 percent); credit courses were offered by 79 percent of the colleges; 60 percent used reusable materials; machines were used for speed reading by 28 percent of the respondents; the individual laboratory was used at 34 percent of the schools, the lecture/group laboratory at 31 percent, with lecture/individual laboratory at 17 percent, tutorials at 13 percent, and the lecture at 5 percent; and approximately 10,000 students in the Rocky Mountain area were served at an estimated rate of 4.7 percent of total enrollments. Some major conclusions were that some teachers seemed confused about basic reading concepts and that programs seemed directed at minority and academically troubled students instead of total school populations. Monolingual Teaching Bilinguals: Reading in ESL for Spanish Speakers.

Pub Date Mar 75

Note—14p.; Paper presented at the Annual Meeting of the Western College Reading Association (8th, Anaheim, California, March 20-22, 1975)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*Bilingualism, Elementary Secondary Education, \*English (Second Language), \*Lesson Plans, Literature Reviews, Monolingualism, Native Speakers, Phonology, \*Second Language Learning, \*Spanish Speaking, Teaching Methods

The purpose of this paper is to examine pertinent research concerned with teaching English as a second language (ESL) to speakers of Spanish, to analyze fundamental problems Spanish speakers may experience when taught to read and learn in the target language English, and to suggest practices for teachers of ESL to assist Spanish-English bilingual readers in their specific linguistic needs. Following a brief review of the literature on the teaching of English as a second language, fundamental language differences are discussed, and phonological aspects of consonants and vowels as Spanish speakers reading English words may pronounce and interpret them are examined. A lesson for the native speaker of Spanish is suggested in a step-by-step presentation. (LL)

A Proposal for a Diagnostic and Remedial Reading Center for the Educational Park Complex of the ESUHS [East Side Union High School District, San Jose, California].

Pub Date May 75

Note—82p.; M.A. Thesis, San Jose State University

EDRS Price MF-\$0.76 HC-\$4.43 Plus Postage

Descriptors—Educational Objectives, Masters Theses, \*Program Descriptions, \*Reading Centers, \*Reading Diagnosis, Reading Difficulty, \*Reading Programs, Reading Skills, \*Remedial Reading, Secondary Education, Teaching Techniques

The emphases of the reading center proposed in this study are on the assessment of reading strengths, the isolation of reading deficiencies, and—in an instructor-learner environment—diagnosis and the prescription of action which will

enable students to master the reading skills necessary for independent reading in their high school careers. This study focuses on an operational philosophy and the goals for the center, diagnostic and assessment techniques, prescriptive teaching strategies and performance objectives, a means of evaluating the center and its services, a plan for program implementation, and the specialized services offered by the center in cooperation with agencies located within the Educational Park facility. Included are a list of references and six appendixes containing material related to the activities of the center. (JM)

A Two Year Report on an Inner City School's Reading Achievement Center.

Pub Date 75

Note—20p.

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—Differentiated Staffs, \*Individualized Reading, Intermediate Grades, \*Mexican Americans, Motivation, Reading Achievement, \*Reading Centers, Reading Diagnosis, \*Reading Improvement, \*Reading Programs, Urban Education

The Reading Achievement Center, at the Murchison School in the Mexican-American community of East Los Angeles, offers an individualized reading program for grades 3-6; the program was begun in the fall of 1972 and includes inservice teacher training, experimentation with new systems, and a commitment to help children develop a positive self-concept. The following four basic systems are involved in the center's programs: a diagnostic system, in which each child, upon entering the school, is tested thoroughly by a reading guide to determine reading accomplishments, needs, and potential; a prescriptive system, developed by the professional staff using results of the diagnostic tests and including a variety of materials and activities; a staffing system, consisting of three kinds of staff-directors (credentialed public school teachers), guides (one for every five children), and clerical workers; and a motivational system, using three methods of motivation—extrinsic and intrinsic motivation and positive environment. Results of posttesting of a random sample of children after two years show an overall positive growth pattern, with accelerated rates of growth showing an average increase of 25 percent in reading achievement. (Tables are included.) (JM)

Problems of the Young Adult and Mature Reader of English as a Second Language.

Pub Date May 75

Note—17p.; Paper presented at the Annual Meeting of the International Reading Association (20th, New York City, May 13-16, 1975)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*Adult Programs, Cultural Background, \*English (Second Language), \*Language Programs, \*Second Language Learning, \*Teaching Methods

TESL (Teaching English as a Second Language) students are usually people who are in the process of assimilating a new language and culture and therefore require more than a superficial knowledge of the language. Adults learning English as a second language might be taught by a language experience approach. Building upon the learners' experiences and needs will help them relate to the community and to their social roles. The orientation of a group of second language learners should be reflected in the curriculum and its philosophy and methodology. Current research suggests that children and adults learning English as a second language use common strategies and process linguistic data in fundamentally similar ways. While it is not appropriate to use the same teaching methods with children and adults in a native language learning situation, some of the ideas that have worked with children learning a second language may be transferable to adults in the same situation. Various language tests and readability formulas are discussed. (LL)

Descriptors—\*Grade 1, Intelligence Tests, \*Predictive Ability (Testing), Primary Education, Reading Ability, \*Reading Achievement, Reading Research, \*Reading Skills, \*Reading Tests

The problem investigated in this study was to determine the best combination of tests or subtests in a research battery which, when administered to beginning first-grade students, would enable the most efficient prediction of reading achievement. A total of 1052 children were randomly selected from first-grade classrooms within the State of Missouri. These children completed a battery of tests consisting of the following: the Cognitive Abilities Tests; the Developmental Test of Visual-Motor Integration; the Pre-Reading Screening Procedures; the Stanford Early School Achievement Test; the Alphabet and Numbers subtest of the Metropolitan Readiness Tests; the Boehm Test of Basic Concepts; and the Behavior Rating Scale. The findings of this study led to the following conclusions: (1) the ability to recognize upper- and lower-case letters and beginning sounds was the best single predictor of reading achievement; (2) measured intelligence, when statistically compared with the other variables in the study, was a reliable predictor of reading achievement; and (3) classroom teachers can predict end-of-year reading achievement of their students by using the Behavior Rating Scale. Artley, A. Sterl

The Controversy: Reading Problem or Learning Disability--What Are the Issues?

Pub Date May 75

Note—13p.; Paper presented at the Annual Meeting of the International Reading Association (20th, New York City, May 13-16, 1975)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—Definitions, \*Learning Disabilities, \*Reading Difficulty, Remedial Reading Programs, \*Retarded Readers

This paper discusses the current confusion in differentiating between reading disabilities and learning disabilities, as well as the role of the learning and reading specialist. The origin and history of the movement toward helping children labeled as having a reading or learning handicap are examined, and various definitions are discussed. It is concluded that the definition of learning disabilities is related to cerebral dysfunction and similar problems, and the definition of reading disabilities is related to educational, mental, social, and emotional problems. For the classroom teacher, however, such a distinction is still too vague and in many cases too impractical to serve as a guide for remediation. (TS)

The sixth edition of this text incorporates research done in the five years since the fifth edition was published and contains new terminology, new concepts, new illustrations, and new materials. The four guiding principles (breadth of scope, maintenance of a balanced point of view, practicality, and clarity) remain. Chapter topics are reading ability and disability; readiness for reading; beginning reading instruction; mature reading; meeting individual needs in reading; efficient reading instruction in groups; reading disability, dyslexia, and learning disabilities; assessing reading performance; physical, physiological, cultural, and cognitive correlates of reading disability; basic principles of remedial reading; developing word identification skills; remedial procedures for deficiencies in word identification skills; improving reading comprehension; fostering reading interests and tastes; and increasing rate of reading. **Some Interpersonal Factors Associated with Successful and Problem Readers.**

Pub Date Apr 75

Note—21p.; Paper presented at a symposium of Early Identification of Learning Problems: Issues and Findings at the Annual Meeting of the Society for Research in Child Development (Denver, April, 1975)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

**Descriptors**—Empathy, Interaction, \*Interpersonal Relationship, Parent Student Relationship, Peer Relationship, Primary Education, \*Reading Achievement, \*Reading Difficulty, \*Social Behavior, Tutoring

Three different studies concerned with the dimensions of social behavior in successful and problem readers, assessed in contexts of mother-child and peer-peer interactions, are reported in this document. The first study, involving observation of mothers of successful and problem readers while instructing their own and other children in several cognitive tasks, showed that mothers of successful readers spend more time in task preparation while mothers of problem readers are more controlling and directive during task performance, using more negative reinforcement. The second study, focusing on the tutorial behaviors of successful and problem readers, showed that competent reader male tutors administer more negative reinforcement to problem reader tutees than to tutees who are competent readers, and that male problem reader tutors and all female tutors administer more negative reinforcement to competent reader tutees than to problem readers. The third study, concentrating on the relationship between reading success and social behaviors, showed a definite correlation between the two, especially within the control (low risk) group. (Tables of findings are included.) (JM)

**A Continual Regrouping Program in Reading Readiness Skills for Kindergarten.**

Pub Date May 75

Note—20p.

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

**Descriptors**—\*Grouping Procedures, \*Kindergarten Children, Primary Education, Program Descriptions, Reading Achievement, \*Reading Programs, \*Reading Readiness, Reading Research, \*Reading Skills

The purposes of this study were to custom make a reading readiness program for a group of kindergarten children and to compare their progress with that of a second group. A pretest was administered to all of the children and then each child was grouped according to his or her needs. Two classes were involved in the study, one labeled control and the other experimental. In the experimental class the children were retested and regrouped according to their needs at three-week intervals. The children in the control class remained in the same groups throughout the program. At the end of the study a t-test was used to compare gain scores of both groups. The results of this study support the hypothesis that children in a continuous regrouping program will achieve greater success in performing reading readiness skills than those who are exposed to a non-regrouping program. Although both groups made significant progress, the gain scores of the experimental group were considerably higher than those of the control group. Based on the findings of this study, and from the findings of previous research, it is recommended that this method of grouping be implemented in other kindergarten classrooms. (Author)

**Descriptors**—\*Individualized Reading, Kindergarten, \*Preschool Education, Reading Development, \*Reading Instruction, Reading Skills, Surveys, Writing Skills

**Identifiers**—Sweden (Linköping)

In order to compare the effect of individualized reading and writing instruction for six-year-olds at nursery school with the effect of ordinary preschool activities not including reading and writing instruction, three groups of Linköping (Sweden) school children were studied—experimental groups (E) and control groups (K1) consisting of preschool children and a control group (K2) consisting of pupils who were in first grade while E and K1 were in nursery school. The 16 E and K1 groups (with 20 children in each group) were made as equivalent as possible on the basis of reading test results. Pupils in the E groups were taught reading and writing for 30 minutes twice a day throughout the school year and otherwise took part in regular preschool activities. In the K1 groups no reading and writing instruction occurred, and in the K2 groups such instruction occurred according to the usual school curriculum. Results of tests given at the end of the year showed that the E groups were superior to K1 pupils at almost all levels. (Tables of findings are included.) (JM)

Diagnosis, Reading Skills, \*Remedial Instruction, \*Tutoring

Language-disabled students who have experienced difficulties in the process of language acquisition and who may show talent in some academic areas yet fail miserably in others are increasingly able to attend college because of "open door" policies. How will colleges traditionally rooted in textbook-centered lecture courses deal with the language-disabled student? Several possible program organizations exist that involve learning laboratories which provide diagnosis, remediation, counseling, and tutoring by both subject-area instructors and peers. A varied media format of instruction is suggested to meet a variety of learning styles. Services to the faculty in the area of group reading scores and evaluating textbook readability are suggested. Colleges should accept responsibility for the language-disabled student so that the "open door" does not become a "revolving door." (MKM)

**Descriptors**—Elementary Secondary Education, \*Functional Reading, \*National Surveys, \*Reading Achievement, \*Reading Comprehension, Reading Research, \*Reading Tests, Study Skills, Teachers, Test Interpretation

**Identifiers**—\*Sweden

This paper describes a research project which was designed to analyze the extent of functional literacy at different grade levels in Sweden. Functional literacy is defined here as the use of the mechanics of reading for different information purposes. A test battery was administered to 2600 students in grades six through twelve. The test battery was intended to represent a sample of important skills needed for functional literacy in a modern industrial society. The battery included comprehension tests of normal prose, tables, forms encountered in everyday life, difficult prose such as text from a home insurance policy, and a reading rate score. The tests were administered twice with an interval of one year between testing. Some results were an increase in reading comprehension from grade to grade at all levels, with the exception of the highest percentiles in grades eleven and twelve, and wide overlapping of scores between grades. Questionnaires were sent to 950 head teachers asking for their opinion of the value of the skills measured by the test battery and asking them to indicate a minimum score for satisfactory ability. Partial data results are discussed. A majority of the teachers who responded indicated that they felt the skills measured were important. (MKM)

This paper describes several learning laboratory program approaches to teaching students how to prepare for professional school admission exams. That these exams are true aptitude tests is a myth repeatedly deflated when students study for the tests and manage to score significantly higher on a second testing. Factors in addition to intelligence which can influence the outcome on these standardized tests are familiarity with the exam and type of question likely to be encountered; practice in taking a mock exam under timed conditions, since working speed is a vital consideration; and reduction of anxiety level. The skills tested tend to be in two general categories for

most qualifying exams, verbal and math. Specific suggestions for teaching these skills, such as practice in working analogies, are given. A program offered by UCLA's learning skills center to prepare students for the Law School Aptitude Test is described. It consists of the following five parts: a trial test using an old LSAT examination, a seminar providing general information about the test, a demonstration of how to prepare for the test (recommended study guides are listed), a cases-and-principles workshop, and essay preparation tutoring. An Examination of the Use of Cloze Tasks During Primary Grade Reading Instruction.

Pub Date May 75

Note—13p.; Paper presented at the Annual Meeting of the International Reading Association (20th, New York City, May 13-16, 1975)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*Cloze Procedure, Models, \*Phonics, Primary Education, \*Reading Achievement, Reading Improvement, \*Reading Instruction, Reading Research, Reading Skills, \*Teaching Methods

Identifiers—\*Reading (Self Selection)

The purpose of this study was to examine the effect of systematic instruction with cloze tasks on the reading achievement of primary grade children. The cloze procedure was selected as an instructional strategy because of the close relationship of the cloze procedure to the psycholinguistic model of the reading process. Twenty-two first and nine second grade children from a university laboratory school were selected as subjects. Subjects ranged in reading ability from preprimer to third grade. No subject was experiencing severe difficulty in learning to read. Results from a cloze test, a test of word knowledge, and a standardized reading test indicated that the cloze treatment and the treatment combining self-selecting reading and phonic reinforcement activities had equal effect on the primary grade subjects. Creative Drama for Building Proficiency in Reading.

Pub Date 75

Note—10p.; Paper presented at the 20th Annual Meeting of the International Reading Association (New York City, May 13-16, 1975)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*Creative Dramatics, Elementary Education, Reading Comprehension, \*Reading Development, Reading Readiness, \*Reading Skills, \*Teaching Techniques

An effective tool for motivating children to read and for reinforcing their reading skills, creative drama includes all forms of improvised drama—dramatic play, pantomime, puppet shows, and story dramatization—and all four of the major language arts—listening, speaking, reading, and writing. The use of creative drama activities lets children enjoy themselves as they improve such reading readiness skills as visual and auditory discrimination, listening, oral expression, and articulation and as they build such reading skills as vocabulary development, sentence and story comprehension, word meanings, visualization, and sentence recognition. Creative drama can also motivate children to read as they do research on a topic for dramatization or become interested in reading more about subjects they have dramatized. (JM)

Descriptors—\*Content Reading, Dictionaries, \*Language Skills, Primary Education, \*Reading Instruction, \*Reading Programs, Reading Research, Reading Skills, Vocabulary Development, \*Word Lists

Previous work has led to identification of an extensive lexicon on which the Southwest Regional Laboratory (SWRL) 1970 primary-grade reading program will be based, as well as to the development of a considerable number of sound-symbol correspondence rules (see Berdiansky, Cronnell, and Koehler, 1969). The present document describes the initial steps taken in the development of a complete sequencing of these rules. This sequencing procedure is being based, in general, on the Desberg and Cronnell (1969) analysis of the characteristics of the rules. For the first block of this sequence, the rules were ordered primarily on the basis of their combined productivity, i.e., the number of words from the given lexicon which can be generated by the given combination of rules. The sequencing of rules and the listing of resultant usable words is covered in this report for the first block of rules only. Within- and across-block sequencing has not yet been entirely completed. (Author)

Descriptors—Elementary Education, \*Instructional Materials, Language Arts, \*Language Skills, \*Reading Comprehension, \*Reading Programs, Reading Research, \*Vocabulary Development

Language features which occur for the first time ("new" words and structures) in each story of Blocks 1 and 2 of the Southwest Regional Laboratory (SWRL) Reading Program are identified and discussed. The features were drawn from those defined and presented in Fiege-Kollmann's (1972) analysis of Blocks 1 and 2 stories. The new words and structures in each story are compared and contrasted with closely related words and structures which occurred in prior stories. Potential sources of difficulty in reading comprehension are pointed out. Structural contexts for the introduction of a new lexicon in prestory instruction are recommended. (Author)

Descriptors—Discriminatory Attitudes (Social), \*Reading Materials, \*Sex Discrimination, Sex Role, \*Sex Stereotypes, Social Attitudes,

\*Teacher Responsibility, Teaching Techniques, \*Textbooks, Textbook Selection, Womens Studies

The prevalence of sex role stereotyping in school readers, textbooks, workbooks, and reading materials used from kindergarten through college must first be recognized by students and teachers as well as by authors, illustrators, and publishers. Teachers should then work to foster environments and experiences in which females and males are equally endowed with strengths, weaknesses, capabilities, options, and potentials. A variety of approaches and exercises have been developed to accomplish this, such as analysis of books for sex role stereotyping, reading exercises which reverse conventional images of male and female, or research reports on subjects dealing with women inadequately covered in the textbook. Several sources offer suggestions for helping students and teachers focus on patterns of sex stereotyping and prejudice. (JM)

Descriptors—\*Basic Reading, Informal Reading Inventory, Phonics, Primary Education, \*Reading Instruction, Reading Programs, \*Reading Skills, \*Teaching Techniques, \*Word Recognition

This publication presents fundamental ideas necessary for effective teaching of word recognition as part of the reading process. Chapter 1 defines and discusses word recognition techniques. The second chapter reviews word recognition techniques and discusses how they aid the reader in unlocking words. Exercises and suggestions for teaching word recognition skills and subskills are presented in chapter 3. Chapter 4 presents an overview of the place of phonics in the reading program. Chapter 5 offers selected exercises for teaching phonics and related skills. A listing of word recognition skills by reading grade levels and a check list for use in evaluating the child's knowledge of word recognition skills are presented in chapter 6. A brief lesson plan for teaching word recognition skills when basal readers are used is outlined in chapter 7. An informal reading inventory is described in chapter 8, and chapter 9 contains summary comments on word recognition skills. (LL)

The intensive reading instructional centers in Hartford, Connecticut, provide reading services to over 500 pupils in the third, fourth, and fifth grades. Reading teams consist of a reading consultant, two master teachers with strong backgrounds in reading, and a part-time clerk-typist. Instruction takes place in eleven-week cycles. Each teacher specializes in one of three areas: decoding, individualized reading, or vocabulary and comprehension development. Significant test score mean gains and changes in reading levels have been reported. Data drawn from self-report forms completed by the children's parents, referring classroom teachers, and team members are highly supportive of the program, which has been in operation for ten years. A Content Referenced Interpretive System for Standardized Reading Tests. Final Report. National Council of Teachers of English, Urbana, Ill. Research Foundation.

Pub Date Aug 74

Note—280p.

EDRS Price MF-\$0.76 HC-\$14.59 Plus Postage

Descriptors—\*Criterion Referenced Tests, Evaluation Methods, Intermediate Grades, \*Reading Ability, Reading Difficulty, Reading Research, Reading Skills, \*Reading Tests, \*Standardized Tests, \*Test Interpretation

This report is divided into two parts in order to make the practical outcomes of a content referenced interpretive system for standardized reading tests available for immediate use by teachers and others, while presenting the technical aspects of the studies in a form appropriate for study by researchers in the fields of reading and educational measurement. The first part of the report presents a guide to the use of the system, which is designed to enable teachers, librarians, and other media specialists to provide students with instructional materials that are geared to individual reading abilities. The second part is devoted to the technical studies which provide empirical foundations for the system. In its present form, this system enables a raw score from any one of seven widely used standardized reading tests to be interpreted in terms of the probabilities that a student earning that score will be able to read a given book or other instructional materials. Development of the system to this point has been confined to work with students in the fourth, fifth, and sixth grades, and its current use should, therefore, be restricted to these levels. (RB)

Litvin, Martin

Including Conflict in Creative Writing.

Pub Date 75

Note—9p.

Available from—Log City Books, Box 270, Galesburg, Illinois 61401 (\$1.25 paper)

EDRS Price MF-\$0.76 Plus Postage. HC Not Available from EDRS.

Descriptors—Authors, \*Conflict, \*Creative Writing, English Programs, Higher Education, \*Language Arts, Secondary Education, \*Short Stories, Teaching Guides, Teaching Techniques, Writing, \*Writing Skills

Conflict is the basis of all stories and thus should appear in some form in the first sentence. There are three kinds of conflict: people vs. people; people vs. nature; and people vs. themselves. Conflict must be repeated in all the various elements of the story's structure, including the plot, which is the plan of action telling what happens to the characters in a story and having a beginning, a middle, and an end; the title, which should reflect in some way the main idea of the story; and the mood, which is the tone and feeling of atmosphere in a story. Characters should express and carry forward the conflict of the story, and their dialogue should be clear and reflect and repeat the conflict. Revision is one of

the most important and challenging aspects of creative writing. (This pamphlet concludes with a selected bibliography of books to read for examples of conflict.) (TS)

Learning Disabilities and the Language Arts: A Survey of Reading and Writing Instruction in the Secondary Schools; Addresses Presented at a Conference of the English Department of East Carolina University (Greenville, N.C., Nov. 7-8, 1975).

East Carolina Univ., Greenville, N.C.

Pub Date May 75

Note—117p.; Initiated and sponsored by the English Department

EDRS Price MF-\$0.76 HC-\$5.70 Plus Postage

Descriptors—\*Composition Skills (Literary), Conference Reports, English Instruction, Higher Education, \*Language Arts, \*Learning Disabilities, Nucleation (Language Learning), Phonology, \*Reading Instruction, \*Remedial Programs, Remedial Reading, Secondary Education

The main intentions of the two-day teachers' conference on language disabilities held at East Carolina University were to provide background information on how children acquire linguistic habits, to identify and suggest remedies for certain socioemotional problems which interfere with learning, to isolate problems arising from diversity in linguistic competence, and to describe reading and writing remedial programs for semiliterate students. This volume contains the following articles, all of which were presented at the conference: "The Acquisition of Language"; "Detecting and Correcting Reading Deficiencies"; "Six Strategies for Improving Freshman Composition Instruction in the 1970s"; "Freshman Composition: A Course Conceptualization"; "Achieving the Goals of Remedial English Programs"; "Developing Language Skills for Modern Living"; "Phonology and the New English"; "Accommodating Deficiencies in Reading and Writing"; and "Who Requires Remedial Reading." The Implications of Language for Facilitating Self-Actualization.

Pub Date 74

Note—178p.; Ph.D. Dissertation, Ohio University Available from—University Microfilms, P.O. Box 1764, Ann Arbor, Michigan 48106 (Order No. 75-11,961, Mfilm \$5.00, Xerography \$11.00)

Document Not Available from EDRS

Descriptors—Doctoral Theses, \*Intellectual Development, Language, \*Language Ability, \*Language Development, Language Enrichment, \*Language Research, \*Self Actualization, Semantics

The purpose of this study was to delineate the implications of language within an educational context as a means of facilitating self-actualization. Three premises identified in a priori fashion were drawn from the literature in linguistics, psychology, and general semantics, creating a three-part language continuum—acquisition, development, and experience. The first argument reasons that language, viewed as an innate biological aspect of the student, may facilitate self-actualization. This innate language structure, in turn, facilitates creativity, self-discovery, and expression of inner self. The second argument allows that language development and intellectual development, being interrelated, contribute to self-actualization. The third argument deduces that through the extensional devices of dating, indexing, and the hyphen, the student is able to relate language, in an isomorphic sense, to a world in process; this, in turn, provides a means by which change, variability, and wholeness can be integrated into his or her perceptual field. Factors That Influence Children's Free Choices of Topics for Creative Writing.

Pub Date 74

Note—204p.; Ph.D. Dissertation, University of Minnesota

Available from—University Microfilms, P.O. Box 1764, Ann Arbor, Michigan 48106 (Order No. 75-12,087, Mfilm \$5.00, Xerography \$11.00) Document Not Available from EDRS

Descriptors—Childhood Interests, Classroom Techniques, Composition (Literary), \*Creative Writing, \*Creativity Research, Doctoral Theses, Elementary Education, \*Student Interests, Student Motivation

Identifiers—\*Writing Topics

The purpose of this study was to determine the scores of children's ideas for creative writing when given freedom of choice of topic, and to determine if those children who expressed ideas reportedly original to them were more or less creative than the others. The subjects, selected from grades 2, 4, and 6, were a stratified random sample consisting of 90 boys and girls in Alberta, Canada. The students were instructed to write anything they chose for 10 weeks. The following conclusions were drawn: (1) when given freedom of choice to select topics, the major preferences of the children were fantasy, animals, and personalities in the order stated; (2) the major influences on the children's choices of topics, as reported by the writers, appeared to be the original ideas of the children themselves, direct personal experiences, and books, in that order; and (3) significant differences in the scores on the Torrance Tests of Creative Thinking were found among grade levels in three of the areas tested (flexibility, originality, and elaboration), as well as in the composite total scores as measured. Grade 2 children were lower achievers in the tests than were grade 4 or grade 6 children. (Author/LL)

A Comparative Study of Computer-Assisted and Non Computer-Assisted Instruction in Senior High School English Classes.

Pub Date 74

Note—107p.; Ed.D. Dissertation, Wayne State University

Available from—University Microfilms, P.O. Box 1764, Ann Arbor, Michigan 48106 (Order No. 75-13,293, Mfilm \$5.00, Xerography \$11.00)

Document Not Available from EDRS

Descriptors—\*Comparative Analysis, \*Computer Assisted Instruction, Educational Research, \*English Instruction, \*Grammar, Secondary Education, \*Teaching Methods

The purpose of this study was to investigate the results of using computer-assisted instruction to teach basic English grammar material in a senior high school English class. Two experimental groups (one male and one female) consisting of 51 students received computer-assisted instruction as part of the method of instruction, while the control groups (one male and one female) consisting of 63 students did not receive computer-assisted instruction. The design of the experiment involved giving pretests before the units were presented and before the experimental classes began to use the computer and posttests after instruction on five units was completed. Nine null hypotheses were investigated. The results of the analysis of data led to an acceptance of all nine hypotheses. There was no significant difference between the experimental and the control groups. It was recommended that further research be conducted concerning the use of computer-assisted instruction in the teaching of English, that other groups be studied, and that an attempt be made to determine whether computer instruction is an important variable. An Analysis of Racial Attitude Change in Eleventh Grade Students Using a Black Literature Package.

Pub Date 74

Note—172p.; Ph.D. Dissertation, The Pennsylvania State University

Available from—University Microfilms, P.O. Box 1764, Ann Arbor, Michigan 48106 (Order No. 71-10,800, Mfilm \$5.00, Xerography \$11.00)

Document Not Available from EDRS

Descriptors—\*Changing Attitudes, Doctoral Theses, Educational Research, \*English Instruction, Grade 11, Literary Analysis, \*Negro Literature, \*Racial Attitudes, \*Racial Discrimination, Secondary Education

Identifiers—\*Black Literature Package

This study analyzed racial-attitude change that eleventh-grade students underwent after reading black literature contained in a Black Literature Package. (BLP) Three intact classes of 65 students taught by one female English teacher in a

nearly all-white school located in central Pennsylvania were involved in this experiment. Findings suggested that black literature read by eleventh-grade students for five weeks independent of or in conjunction with the teacher did not change negative racial attitudes; state legislation which mandated teaching about blacks may have promoted responses in students different from the ones intended; students who experienced concentrated exposure to black literature may have developed polarized attitudes which frustrated the positive effects of black literature; students, in large and small group discussions, suggested that black literature should be taught in its chronological, historical, literary, and artistic settings within American literature; and writers of articles which appeared in the "English Journal," "College English," "Elementary English," and in other language arts publications need to temper their promotional recommendations of black literature as an effective agent for changing racial attitudes. **A Description and Analysis of the Role of the Teacher's Response While Teaching a Short Story.**

Pub Date 74  
Note—131p.; Ph.D. Dissertation, University of Pittsburgh

Available from—University Microfilms, P.O. Box 1764, Ann Arbor, Michigan 48106 (Order No. 75-13,190, Mfilm \$5.00, Xerography \$11.00)

**Document Not Available from EDRS**

**Descriptors**—Behavior Patterns, Case Studies, Doctoral Theses, Educational Research, \*English Instruction, Higher Education, \*Literary Criticism, \*Short Stories, \*Teacher Attitudes, \*Teacher Role, Teaching Methods

This investigation was undertaken to determine what relationships exist between the teacher's personal response to a literary selection, behavior when teaching the story, and response to student essays on the story. The investigative procedure used was that of a modified case study involving eight teachers. Findings indicated that teachers appeared to be devoting their attention most often to grasping story elements; commenting on such concerns as errors in style and mechanics rather than substantive matters; disregarding the importance of engagement-involvement and evaluation; and using the discussion technique of teaching literature in preference to dramatic, written, or visual techniques. Given the findings of the study, there appear to be strong relationships among the teacher's personal response to the story, behavior when teaching the story, and response to student essays on the story when that response concerns substantive issues in the essay. **Identifiers**—Elementary Secondary Education Act Title III, ESEA Title III

Designed for use in grades K-12, this teacher's resource manual advocates the use of a language-experience approach and diagnostic-prescriptive techniques derived from modern linguistic theory for the promotion of students' facility in written composition. The program utilizes an individualized approach and relates writing instruction to speaking, listening, and reading activities, as well as to the students' ideas and feelings. The first section includes a rationale, an overview, results, suggested guidelines for the teaching of writing,

meeting students' personal needs through writing activities, diagnostic guidelines and grid sheets, objectives and techniques, and a discussion of the oral reading of compositions. The second section offers techniques for the teaching of various grammatical principles and skills, such as transformations; noun, verb, and prepositional phrases; and appositives and dependent clauses. The appendix offers suggested writing and related reading activities and linguistic explanations of the aforementioned techniques. (LL)

Note—121p.

Available from—International Center for Educational Development, 16161 Ventura Blvd., Encino, California 91436 (\$4.95-paper)

**Document Not Available from EDRS**

**Descriptors**—\*Disadvantaged Youth, Elementary Secondary Education, \*Group Activities, \*Individual Activities, Language Fluency, Language Skills, \*Learning Activities, Poetry

This book contains 65 specific activities designed to help disadvantaged students learn to use language more skillfully and develop the ability to function well in the school environment. The descriptions of the activities are referred to as shoe box labs and generally include the title of the activity, instructions for performing the activity, and answers for those activities requiring answers. The purposes of the activities are to inspire students' creativity, fluency, flexibility, elaboration, and originality. Taken as a whole, the shoe box activities share certain characteristics: regardless of content and form they can be used by students whenever they feel like it; they do not have requirements that students must obey for any reason other than their own interest; and they contain activities that can be done by individuals or groups. The activities cover such topics as analogies, injustice, foods, commercials, sculpture, animals, state capitals, sounds, and poetry. (TS)

Lucking, Robert A.

**Comprehension and a Model for Questioning.**

Pub Date Apr 75

Note—11p.; Paper presented at the Annual Secondary School English Conference of the National Council of Teachers of English (3rd, Kansas City, Missouri, April 18-20, 1975)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

**Descriptors**—Cognitive Measurement, \*Comprehension Development, Effective Teaching, Elementary Secondary Education, Inquiry Training, \*Questioning Techniques, \*Reading Comprehension, Taxonomy, \*Teaching Models

**Identifiers**—\*Bloom's Taxonomy

The questioning techniques which teachers use when leading a class discussion of a reading assignment can be an essential component of profitable instruction. A brief review of the past 50 years of research on questioning levels indicates a need for attention to the cognitive level of queries as well as to their sequence since investigators have found a high percentage of questions asked by teachers could be classified in the category of rote memory. Unless a teacher is able to shift emphasis to higher cognitive levels, expecting a spirited and thoughtful discussion of a reading assignment may be futile. A model of questioning which takes into account all levels of thought and provides students with a means of digesting prose material is needed. Examples are given which follow a modified version of the Bloom taxonomy, with questions moving from specific facts to broader generalities. A sample sequence moves from questions of knowledge, comprehension, and analysis to questions of evaluation. Suggested guidelines for proper questioning include phrasing questions carefully, not answering one's own question, and allowing wait time for students to prepare answers. (MKM)

**Potential Benefits for the Novel Critic of Exploiting Analogies Between the Novel and the Closed System.**

Pub Date 75

Note—27p.; Unpublished paper prepared at Emporia Kansas State College

**EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage**

**Descriptors**—English Instruction, Higher Education, Literary Analysis, Literary Conventions, \*Literary Criticism, Literature, \*Novels, \*Systems Approach, Theories

This paper explores potential benefits for the novel critic of exploiting analogies between the novel and the closed system for more rigorous description and interpretation of novels; and further development of the body of theory of novelistic criticism, particularly where there are differences in critics' interpretations of the same work. A closed system is one of two types of concrete systems, the other type being the open system. The author also briefly identifies three areas which have implications for further study into a systems approach to analyzing novels. These areas relate to other literary genres, text processing analysis aspects of information science, and benefits of the "novel-closed system" analogies for general systems theory. (Author/RB)

Pub Date 75

Note—261p.; Ph.D. Dissertation, The University of Texas at Austin

Available from—University Microfilms, P.O. Box 1764, Ann Arbor, Michigan 48106 (Order No. 75-16,630, Mfilm-\$5.00, Xerography-\$11.00)

**Document Not Available from EDRS**

**Descriptors**—\*Attitude Tests, Democratic Values, Doctoral Theses, Freedom of Speech, Higher Education, \*Journalism, Mass Media, \*Measurement Instruments, Media Research, \*News Media, \*Press Opinion

**Identifiers**—\*Social Responsibility Theory

The objective of this study was to contribute a quantitative aspect to the Social Responsibility Theory of the Press which will make possible explanation and prediction of relationships between key elements of society and news-opinion media. The 31 tenets of the Social Responsibility Theory were isolated and categorized. Using these tenets, an attitude scale of 42 items on social responsibility of the press was developed. This basic set of Likert-type scale items was split into two versions, each containing 8 identical items plus 17 equivalent items. Each version of the scale was presented in a mailed questionnaire to a group of 600 newsmen composed of comparable numbers of daily newspaper city editors and commercial

television news directors. The response rate was 63 percent. Factor analysis revealed that the 31 tenets of social responsibility theory are contained in the following six concepts: press freedom and social responsibility, which are inseparable; interaction of communicators and the public in achieving social responsibility; professionalism among communicators as they fulfill their role; service in disseminating information and opinions; criticism of news performance by the public; and support by the government of the free flow of news and opinion on public affairs. Document Not Available from EDRS

Descriptors—\*College Freshmen, \*Composition (Literary), Discussion (Teaching Technique), \*English Instruction, Junior Colleges, Literature, \*Short Stories, \*Teaching Methods

The three teaching techniques used in three freshmen composition classes at a community college were lecture/discussion, semantic differential, and role playing. Teachers using the lecture/discussion approach presented information especially relevant to either the author, the work, or the milieu and followed the lecture with an open discussion. Teachers using the semantic differential approach established scales of opposite, or nearly opposite, concepts in regard to certain excerpts from the stories. The students recorded their responses to these excerpts by an appropriate mark on the scales. These responses were collected and analyzed, and a discussion was developed based on the results. Excerpts were also used as the basis for the role-playing technique. The goal was to have students identify with and project themselves into future behavior of characters, expressing the feelings and responses that may not have been given in the stories. The written responses to various excerpts were collected and analyzed. Conclusions indicated that the lecture/discussion method of teaching literature appeared to be more effective than the semantic differential one. The nonwritten responses were not affected by the various techniques. (Author/LL)

Available from—University Microfilms, P.O. Box 1764, Ann Arbor, Michigan 48106 (Order No. 75-17,009, Mfilm-\$5.00, Xerography-\$11.00)

Document Not Available from EDRS

Descriptors—\*Bias, Higher Education, \*Information Seeking, \*Information Sources, Journalism, Mass Media, News Media, \*News Reporting, Press Opinion, \*Question Answer Interviews

Identifiers—\*Media Bias

Behavioral research suggests that communication between two individuals is affected by such factors as their orientation toward a topic, the importance of the topic, and interpersonal attraction. Seven hypotheses were formulated to determine if these factors—originally discovered in a discussion setting—were operative in an information-seeking context such as a journalistic interview. Eighty reporting students were asked to assume the role of reporters assigned to prepare a set of interview questions they would ask a source about an issue involving the use of firearms by campus police officers. Results showed that a significantly greater number of questions were asked by those who disagreed with the source, those who disliked the source, and those who considered the topic of high importance. This experiment suggests that in interview settings, reporters may, through their questions, communicate their perceptions of sources and issues. The possible effects of such

variations in information seeking on news story content may be a subject for more research. (Author/RB)

Descriptors—Doctoral Theses, Educational Research, \*Journalism, Mass Media, \*Methods Courses, National Surveys, \*Preservice Education, Secondary Education, \*Teacher Education, \*Teaching Methods

Identifiers—\*Journalism Education

The purpose of this study was to determine what is being offered by colleges and universities to prospective teachers in methods of teaching secondary school journalism. A review of the literature was made, and a questionnaire was sent to 138 colleges and universities, asking whether the institution offered a publications course, a methods course and workshops, seminars, and journalism days; and requesting information on course outlines, objectives, and textbooks. Both the literature review and the survey showed that high school methods courses are being examined professionally, and prescriptions for developing such courses that include as a major objective preparing students as future media consumers are being offered. It was concluded that there is a need for more emphasis on social awareness in journalism education; there is a similar need in high school journalism courses; there is a need to motivate students to learn English composition and to use school publications as laboratories; and there is a need to give future journalism teachers a grounding in the social sciences, in journalism, and in ways to teach journalism. Recommendations for an ideal methods course are also included. (Author/RB)

**What Should We Censure in Children's Books?**

Pub Date Apr 75

Note—13p.; Paper presented at the Annual Meeting of the National Conference on the Language Arts in the Elementary School (7th, Boston, Massachusetts, April 11-13, 1975)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—Adolescent Literature, \*Censorship, \*Childrens Books, \*Childrens Literature, \*Content Analysis, \*Literary Analysis, Maladjustment, Moral Issues, Moral Values, Parents, Racism, Reading Materials, Sex Discrimination

Unfortunately, three of society's worst problems during the last decade—racism, sexism, and maladjusted parents—are reflected in the content of children's books. While censorship of books of questionable value is not recommended, it is necessary to judge and to find fault with them and ultimately to steer children into reading the good books which have also been written. Specific books do show definite racist and sexist bias, but others present blacks and women realistically without any suggestion of stereotypes. Although the most depressing of children's books are those depicting children with maladjusted parents, many books emphasize the loving and supportive relationships that can make the difference between healthy and unhealthy parents of the next generation. Descriptors—Communication (Thought Transfer), \*Credibility, Doctoral Theses,

Higher Education, \*Information Dissemination, \*Mass Media, Media Research, News Media, \*Public Opinion, Social Attitudes, \*Sociolinguistics, Values

The basic premise in the study of the mass media and media credibility was that the medium is a major factor in the determination of the credibility of information by receivers. Relationships between media credibility and sociolinguistic theory were explored, and the factor analysis was used to organize patterns of perception of media credibility into distinct types. Results indicated that the medium is a major, but not overriding, element; that the priority level of credibility appears to be low; that apparent credibility appears to be the standard used by people in the assessment of media credibility; that mass media credibility appears to be a question considered by only one type of person in a positive sense and not a question of importance to other types of persons; that negative assessments of credibility perception, such as significant positive acceptance of one channel and rejection of another channel, must be included in speculations about the meaning of credibility research; and that the importance of communicators is affecting credibility ratings among the mass media appears to be a negative factor and not the positive contribution expected. According to this study, the value of applying sociolinguistic theory to credibility research may be higher than appears on the surface. (Author/RB)

**Individual and Group Responses of Fourteen and Fifteen Year Olds to Short Stories, Novels, Poems, and Thematic Apperception Tests: Case Studies Based on Piagetian Genetic Epistemology and Freudian Psychoanalytic Ego Psychology.**

Pub Date 75

Note—685p.; Ed.D. Dissertation, State University of New York at Buffalo

Available from—University Microfilms, P.O. Box 1764, Ann Arbor, Michigan 48106 (Order No. 75-16,956, Mfilm-\$5.00, Xerography-\$11.00)

Document Not Available from EDRS

Descriptors—Adolescent Literature, \*Adolescents, Case Studies, \*Covert Response, Doctoral Theses, Literature, \*Literature Appreciation, Novels, \*Overt Response, Poetry, Psychological Studies, \*Reading Interests, Teenagers

A descriptive profile of adolescent response to literature is presented in this study, which also examines findings in terms of psychoanalytic concepts that relate response to life styles in terms of Piaget's genetic epistemology. There are two primary questions in this investigation: What is the psychological dynamic of response to literature? By what process does individual, subjective response to literature become shared by a group and in this sense become "objective"? The study also identifies and describes the following five variables which interact with each other and influence response to works of literature: stage-specific operations, identity theme, past experience, expectations, and reading ability. The first three carry the most weight. Among the conclusions are the following: the cognitive and affective parameters of any response in any form are determined by the respondent's stage-specific operations and personality; both stage-specific operations and identity theme are individual variables constructed within and with past experiences; response to literature takes a form that is learned; and the learning of a response form is a direct outcome of the expectations a respondent perceives via the questions that are asked. Descriptors—Composition (Literary), \*Composition Skills (Literary), Doctoral Theses, English Instruction, Higher Education, Negro Students, \*Performance Based Education, \*School Sur-

veys, Secondary Education, Student Interests, Teaching Techniques, \*Urban Youth

The teaching of composition in secondary schools over the last decade has not adequately developed the writing skills of urban students. Parts of this dilemma stem from the following three factors: inequities in public school financing; racism; and the obscure position of composition within the English curriculum, with preferences given to grammar or literature. A survey of a selected population of freshmen at a predominantly black college revealed that these students were having problems in two major areas of composition, mechanics and expression. An examination of three writing programs from different regions of the country revealed that all three programs were attempting to offer an alternate dialect to minority students with focus on correct use of standard dialect. One alternative approach which might alleviate the problem in composition at the secondary level is the competency-based approach in which the teacher acts as facilitator or assistant and the students assume more responsibility for learning. Emphasis is on students utilizing their own methods for learning and advancing at their own pace. (Author/JM)

Descriptors—Composition (Literary), \*Content Analysis, Doctoral Theses, \*English Curriculum, \*Evaluation Methods, History, \*Language Arts, Literature, Philosophy, \*Programed Instruction, Secondary Education

The purposes of this dissertation are to develop a model which can be used to evaluate programmed instructional materials in English; to apply this model to currently available programs in language, composition, and literature; and to describe both the early historical developments in programed instruction as an educational strategy in general and the specific details about early attempts at programing portions of the English curriculum. The model developed was based on four major components and applied to the programs, with some conclusion drawn concerning the degree of fidelity existing between the theory of programed instruction and the actual programs. Among the major conclusions arrived at in this dissertation are the following: most of the programs currently available omit one or more of the four necessary programing elements of pretest, posttest, validation data, or behavioral objectives; the programs generally create the conditions necessary for the student's attainment of the higher categories of learning as defined by Gagne (1965); and few, if any, of the programs exhibit more than superficial alignment with the goals of a secondary English program as defined by English educators. The Time Has Come to Talk of Many Things: Language Development in the Kindergarten.

Pub Date 75

Note—13p.; Paper presented at the Annual Meeting of the National Conference on the Language Arts in the Elementary School (7th, Boston, Massachusetts, April 11-13, 1975)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage  
Descriptors—\*Child Language, \*Dramatic Play, Kindergarten, \*Language Development, Language Enrichment, Primary Education, Role Playing, \*Teaching Techniques, Vocabulary Development

Dramatic play, an activity for which children show a natural inclination, provides kindergarten children with the opportunities for acquiring new vocabulary, extending word meaning, acquiring and practicing verbal expression and syntactical patterns, and gaining in language facility. In order to foster this language development, kindergarten children should be supplied with substantive content around which they may interact, with additional information about the topic provided as they are ready for it. In this way, children can engage in dramatic play; then discuss their activity, relating it to the informational source (such as a film); and, finally, explore the consequences and alternatives so that the activity becomes a reflective experience. An example of the language growth resulting from dramatic play may be seen in the activities of a San Francisco kindergarten class whose initial play with ships developed into an understanding of and a verbalization about San Francisco harbor activity. A set of data collected by researchers at the University of California at Riverside and presented to the Southwest Regional Laboratory (SWRL) is described in this document. The data consist of 14 hours of recorded interviews of 60 Mexican-American children in Riverside in grades 1-3. Comments are directed at the linguistic characteristics of the English spoken by the subjects. Those linguistic features that are distinct from Southwestern English are then noted. Further comments are directed at the quality of the materials and at the relevancy of the materials to present SWRL activity. (Author/JM)

Variations of Syntax and Vocabulary in Children's Writing.

Pub Date Apr 75

Note—19p.; Paper presented at the Annual Meeting of the National Conference on the Language Arts in the Elementary School (7th, Boston, Massachusetts, April 11-13, 1975)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*Composition (Literary), Composition Skills (Literary), Elementary Education, Grammar, \*Language Development, Language Research, \*Language Skills, \*Syntax, Teaching Methods, \*Writing Skills, Written Language

To write well is not a singular ability; it utilizes critical thinking, creativity, and a feeling for language. An examination of a number of pieces of writing by elementary school pupils shows that

some are highly imaginative while others are informative reports, simple statements of events, colorful descriptions, or various forms of poetry. Style is generally informal and relaxed, as it relates closely to speech and implies that the reader or listener is interested in what is being presented. As the pupil becomes more aware of the English language and its syntactical structure, this knowledge can help give form to ideas. The question naturally arises whether the study of grammar can help improve writing. Over the past decade attempts to prove that the study of grammar can improve writing were not significant, but research on generative grammar instruction increased the proportion of well-formed sentences and the complexity of sentence patterns. More recently, a study reported that sentence-combining practices have a favorable effect on the writing skills of students. (RB)

Report No—SWRL-PP-26

Pub Date 73

Note—21p.

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—Behavior Patterns, Caucasian Students, \*Child Language, Comparative Analysis, Elementary Education, \*Group Behavior, Interpersonal Relationship, \*Language Research, \*Language Usage, Negro Students, \*Sociolinguistics

The established unit for reporting sociolinguistic data has been the sociologically determined group. Characteristically, only the mean rate of nonstandard usage for the group is reported for any linguistic feature. Such reporting obscures the possibility of linguistic heterogeneity within the group. Data from Los Angeles school children show that school classrooms are heterogeneous with respect to different forms of agreement usage. An alternative analysis is proposed in which children are grouped on the basis of linguistic criteria. Members of these groups share a common grammar. There is an implicational relationship among the grammars employed by such linguistically determined groups. The linguistically determined groups do not map exactly onto traditional sociologically determined groups. This relation may be expressed as the probability that a member of a sociologically determined group is a member of some linguistically determined group. This interpersonal variation may be distinguished from intrapersonal variation, or the probability that a rule of a particular grammar will apply. (Author)

Who Writes Children's Books? An Inquiry Into Selected Social Characteristics of American Authors for Children and Adolescents.

Pub Date 75

Note—17p.

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

**Descriptors**—\*Adolescent Literature, \*Authors, \*Behavior Patterns, Childrens Books, \*Childrens Literature, Social Attitudes, \*Social Characteristics, Social Values

In order to learn more about contemporary authors of children's books and their sociological views, a study was conducted of a randomly selected sample of 220 Canadian and American authors living in either Canada or the United States. Biographical data was collected from the reference source "Something About the Authors" concerning sex, social class, education, place of birth and residence, marriage, children, political and religious affiliations, reference groups, and nonliterary or artistic occupations of authors. Findings show that authors of children's books tend to be white, middle-class married women with some college education, residing in the United States' northeast or west. They also tend to have children and to be occupationally identified with the higher, but not highest, prestige occupations. It is possible that the majority of these authors have held common social perceptions, but evidence shows that the recent demands of society have introduced authors from backgrounds in conflict with the established order who are now writing a different type of children's literature. *Edwards, Thomas O.***An Objective Evaluation of Expository Essays.**

Pub Date 75

Note—8p.

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

**Descriptors**—College Students, Composition (Literary), \*Composition Skills (Literary), Course Objectives, English Instruction, \*Essays, \*Evaluation Methods, \*Expository Writing, Higher Education, \*Models

An objective model for evaluating expository compositions is proposed in this article. The model requires that English composition instructors be cognizant of their instructional objectives and that they convey the criteria for a good essay to their students. The evaluation of compositions then is based on the manifestation of the stipulated criteria for good exposition. One implication of this model of evaluation is that it implicitly delineates the respective roles and responsibilities of the instructor and the learner. The evaluation instrument, which can be used for the evaluation of any type of written assignment, consists of an outline which breaks down various elements of expository composition and provides a numerical ranking system for their separate evaluation. *Olson, Miles C.***Subliminal Messages in Advertising.**

Pub Date Mar 75

Note—5p.; Paper presented at the Annual Meeting of the Conference on English Education (13th, Colorado Springs, Colorado, March 20-22, 1975)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

**Descriptors**—\*Communication (Thought Transfer), Illustrations, Imagery, Information Theory, \*Publicize, Sex (Characteristics), \*Visual Perception

**Identifiers**—\*Subliminal Perception

The technique of subliminal information giving has been considerably broadened in recent years so that magazine ads now employ it by carefully hiding images where they are not usually perceived with the conscious eye. In his recent book, "Subliminal Seduction: Ad Media's Manipulation of a Not So Innocent America," Wilson B. Key demonstrates that subliminal messages in ads are perceived and do have an impact on attitudes and actions. After conducting his own personal search to find the "hidden persuaders," the author of this article was convinced that advertisements are full of hidden information, which is usually of a sexual nature. He suggests that it is important that English teachers become aware of this phenomenon, since it is a part of communication. Furthermore, he contends that we cannot accept or reject such information until we become conscious of it and are able to act on it in our normal, rational ways. (LL)

**Descriptors**—Doctoral Theses, \*English Curriculum, English Education, Inservice Teacher Education, Preservice Education, \*Public Schools, Secondary Education, State Surveys, \*Teacher Education

**Identifiers**—\*Nebraska

The purpose of this study was to analyze and compare English education in small, average, and large high schools in Nebraska to determine the status of their present English course offerings and of the preservice and inservice training of English teachers in relation to their academic and professional preparation. The three procedures used to collect the data were questionnaires sent to English teachers in 311 public secondary schools, visitations to a stratified random sample of 20 high schools to interview English teachers, and an analysis of the permanent records of the 1973 graduates in the schools visited to determine the courses they had taken. Result showed the following: students from small high schools tended to earn as much or more credit in English courses as those from average or large high schools; there were trends toward offering more advanced and more varied elective courses in English and toward the deletion of required literature courses; new curricula in the English program had a significant impact on Nebraska schools, with large and average schools involved in more curricular change; teachers in large and average schools had taken more graduate courses in English and education; and inadequate library space and facilities curtailed instruction in small schools. **Document Not Available from EDRS**

**Descriptors**—Elementary Education, English Instruction, \*Language Arts, \*Language Programs, \*Language Skills, Performance Based Education, Program Descriptions, \*Program Design, \*Program Development

The purpose of this project was to facilitate the design and implementation of a language skills program in a small northern New England elementary school (K-6) and to document the process which the school used in accomplishing this task. When the staff was given the task of constructing the language skills objectives, a

small curriculum committee emerged; it consisted of four teachers, the principal, the consulting teacher, and the assistant superintendent, also the author of this report. The instructional objectives were constructed through discussion or negotiation between a committee member and one or two other teachers not on the committee. Formal committee meetings merely reviewed and accepted, for the most part, the objectives that had already been agreed to by the small groups. An administrative strategy set the task but allowed professionals the opportunity to further articulate it, permitting and encouraging staff involvement in, and control of, the design process. The study concludes that staff acceptance of a final program for instructional change is contingent upon their involvement in the design process. This viewpoint is substantiated both by this study and by the organizational literature which discusses institutions similar to the public schools. (Author/RB)

**Descriptors**—\*Child Language, Data Collection, \*Dialect Studies, Language Research, Language Usage, \*Linguistic Performance, \*Oral Communication, Primary Education, \*Research Tools

**Identifiers**—\*Convergent Communication Method

A structured elicitation technique, convergent communication, was investigated as a means of constraining the range of linguistic data from children in K-3 without unduly constraining the naturalness of the conversation context. The convergent communication situation is a two-person problem-solving task which ensures that all communication is verbal since the participants are seated on opposite sides of a visual barrier. The subjects, one pair of Anglo students in each grade K-3, were given tasks involving matching and sequencing pictures. The kindergarteners did not complete the tasks, and data from their interview has been excluded. The linguistic aspects investigated were the use of the copula, the use of questions, the use of possessives, and the use of comparative constructions. The relative frequency of these uses was compared with a study by Legum which elicited data from black children by naturalistic observation. The convergent communication technique appears to have value for use by those studying dialects. (MKM)

A possible application of generative-transformational (phrase-structure) grammar to the teaching of English composition at the college freshman level is described in this dissertation, which presents a potential textbook for a course on language and its relationship to culture. Topics discussed include traditional grammar, the bases of phrase-structure grammar, the process of sentence generation, a simplified series of transformations, rhetorical concepts, and the applications of phrase-structure grammar and other concepts of linguistic analysis to the beginning study of literature, with several sample poetic analyses. Appended to the study are a discussion of the results of the use of this textual material in a series of freshmen composition courses and some

sample materials used in conjunction with the textual material. (Author/JM)

Descriptors—\*Basic Vocabulary, \*Interference (Language Learning), Kindergarten, \*Negro Dialects, Primary Grades, \*Program Evaluation, Reading Programs, \*Vocabulary Development

Identifiers—Black English, \*Instructional Concepts Program

The Instructional Concepts Program of the Southwest Regional Laboratory (SWRL) is designed to help kindergarten children learn the labels of concepts which are important to success in school. Since vocabulary differences are characteristic of dialect differences, it is possible that some items taught in the Instructional Concepts Program are harder to learn for speakers of Black English than for speakers of other dialects and that these items can be related to known dialect differences. To test for this possibility, the items and subtests from the 1969-70 tryouts exhibiting the greatest number of errors were examined for the schools believed to consist mainly of black children. No such interference was found. (MKM)

Selective Exposure and Foreign News: A Multivariate Analysis.

Pub Date 74

Note—133p.; Ph.D. Dissertation, Southern Illinois University

Available from—University Microfilms, P.O. Box 1764, Ann Arbor, Michigan 48106 (Order No. 75-16,272, MFilm \$5.00, Xerography \$11.00)

Document Not Available from EDRS

Descriptors—\*Behavior Patterns, Community Surveys, Doctoral Theses, \*Journalism, \*Newspapers, News Reporting, \*Reading Habits, Reading Interests, Sex Differences, \*World Affairs

This multivariate study examined attitudinal and demographic variables affecting the degree of foreign news exposure on the basis of the data collected from 102 daily newspaper readers in Carbondale, Illinois. The data were obtained in personal interviews with the respondents. The ultimate goal of the study was to contribute to the investigation of selectivity in news reading, a mediating factor of effects of mass communication. The selective-exposure hypothesis—that people seek out consonant information that supports their existing views and avoid dissonant information which challenges their attitudes and interests—was tested in relation to foreign news reading. Results indicated that readers' selectivity, as well as their sex, was a significant predictor of the degree of foreign news reading. The hypothesis that male readers generally have a higher degree of foreign news exposure than female readers was accepted. Results of the study indicating that education and socioeconomic status were not significant predictors of foreign news exposure appear to contradict previous findings. (Author/TS)

Identifiers—\*Africa

This dissertation is a descriptive, comparative study of press-government relationships in the 34 nations of independent Black Africa south of the Sahara. Excluded from consideration are territories under European administration and those nations that have white minority governments. The 34 sovereign states are analyzed and systematically classified according to a common set of criteria that deal primarily with press restraints in these nations. The chapters deal with the colonial legacy in independent Black Africa, the role and function of mass media in contemporary Africa, and the classification of nations into types of press philosophies. Data for the dissertation is primarily derived from a mail questionnaire which was sent to 600 potential informants in the 34 nations. Another primary source of data was personal interviews with personnel at African embassies in Washington, D.C. Over 200 books, articles, and interviews are listed in the bibliography. It is concluded that broadcasting is becoming more professionalized but still remains under the direct control of the president or ministry of information in most countries. (Author/TS)

The Southwest Regional Laboratory (SWRL) First-Grade Composition Skills Exercises are designed to aid in the development of composition skills of first-grade children. The program consists of 64 two- or four-page exercises which were designed to correspond with the developing writing abilities of first-grade pupils. The tryout of the program followed a spring 1970 tryout; it began in September 1970 and ended in June 1971. The tryout population consisted of 14 first-grade classes in San Diego using the Second-Year Communication Skills Program. Since extensive performance data demonstrating the effectiveness of the program had already been gathered in the spring 1970 tryout, program evaluation was limited to feedback from six teachers concerning the program revisions. Two three-week institutes in adult basic education, with emphasis on teaching English to speakers of other languages or dialects, were held

at the University of Wisconsin in the summer of 1969. The institutes attempted to train and upgrade a number of culturally and linguistically sophisticated language teachers for adult basic education so that their skills would help remove the barriers hindering adults having an eighth-grade education or less whose linguistic backgrounds differ from those of speakers of standard American English. This document reports on the purpose, curriculum, curricular resources, additional sessions, speakers and consultants, dissemination of research and materials, recommendations, and conclusions and results of these institutes. Additional information consists of recruitment forms, instructional staff materials, various schedules, and lists of instructional staff and participants. (JM)

**Black English and Rule-Based Spelling Output.**

Southwest Regional Laboratory for Educational Research and Development, Los Alamitos, Calif.

Spons Agency—Office of Education (DHEW), Washington, D.C.

Report No.—SWRL-TN-2-71-02

Pub Date 25 Mar 71

Note—19p.

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage  
Descriptors—Dialect Studies, Distinctive Features, \*Error Patterns, Mexican Americans, \*Negro Dialects, \*Spelling, Spelling Instruction

The question of whether the Black English dialect affects the spelling performance of children who speak Black English is explored in this paper. Evidence is cited from existing research to show that Black English speakers make significantly more dialect-related errors than do non-Black English speakers. The various Black English features which may cause dialect-related spelling errors are discussed, predicted misspellings are noted, and new homophone sets created by Black English pronunciation are described. Finally, suggestions for empirical research and questions to be explored in relation to dialect and the Southwest Regional Laboratory (SWRL) rule-based spelling program are posed. Appendixes include an outline of Mexican-American dialects and spelling and an explanation of symbols used in the paper. (JM)

Descriptors—College Freshmen, \*Composition (Literary), Composition Skills (Literary), \*Educational Theories, \*English Instruction, Higher Education, Instructional Materials, \*Teaching Methods, Writing Skills

The articles in this book are concerned with teaching composition in freshman English courses. They were first published in "College English" during the years from 1966 to 1975. These selections represent both the theoretical discussions and the technical plans which were put forth in a period when freshman English was being dropped as a required course in many colleges. The contents are divided into the following two sections: "What Should Freshman English Be? Methods and Controversies" and "Tactics." Among the essays included are "Toward Competence and Creativity in the Open Class" by Lou Kelly, "The Teaching of Writing as Writing" by W. E. Coles, Jr., "Hydrants Into Elephants: The Theory and Practice of College Composition" by George Stade, "Behavioral Objectives for English" by Robert Zoellner, "Topics and Levels in the Composing Process" by W. Ross Winterowd, "Using Painting, Photography and Film to Teach Narration" by Joseph Comprone, "Teaching Freshman Comp to New York Cops" by David Siff, "Cassettes in the Classroom" by Enno Klammer, and "What Students Can Do to Take the Burden Off You" by Francine Haraway. Since 1970, the Connecticut Commission on the Arts has sponsored educational programs in which artists participate actively in the classroom with students and teachers. This book contains eight case studies showing the effects of visiting artists in eight Connecticut schools. Topics of these studies are song writing, dance movement in suburbia, art as a natural element, talking drums, a 30-day musical jam session, caustic meriment, creating an alternate school, and an interdisciplinary improvisation. Three additional chapters discuss efforts to develop longer term residencies for artists in two schools; the successes and failures of the new Poets in Colleges program; and the function, needs, and programs of artists assigned to schools. An annotated list of the participants is included. (JM)

Language Speaking, Writing, Listening: A Suggested Guideline for the Junior Division, Board of Education for the City of London (Ontario).

London Board of Education (Ontario).  
Pub Date Jun 74  
Note—56p.

EDRS Price MF-\$0.76 HC-\$3.32 Plus Postage

Descriptors—Composition (Literary), Creative Writing, \*Curriculum Guides, Elementary Education, \*English Instruction, Intermediate Grades, \*Language Arts, Language Skills, Language Usage, Listening, Literature Appreciation, Reading, Speaking

This booklet consists of guidelines for teaching language usage and skills, oral and written composition, and listening in the fourth, fifth, and sixth grades. A statement of approach introduces the three main sections of the guide. In the first section, programs are detailed in charts under the following four categories for each of the three grades: language usage and skills, writing, speaking, and listening. The second section, on aids to teaching, lists suggested activities for all three grades on the following topics: using literature to foster speaking, listening, reading, and writing; social courtesies; oral communication; creative writing; and language notebooks. The final section provides guidelines for teacher self-evaluation in teaching the language arts skills. A brief list of useful reference texts is included. (JM)

**A Comparison of the Written and Oral English Syntax of Mexican American Bilingual and Anglo American Monolingual Fourth and Ninth Grade Students (Las Vegas, New Mexico).**

CS 202 243

Pub Date 74

Note—13p.; Paper presented at the Annual Meeting of the Association of Teachers of English to Speakers of Other Languages (Denver, Colorado, March 5-10, 1974)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage  
Descriptors—American English, \*Bilingualism, Bilingual Students, Elementary Secondary Education, \*Language Usage, Mexican Americans, \*Monolingualism, Native Speakers, Spanish Speaking, Standard Spoken Usage, \*Syntax, Written Language

In comparing the written and oral English syntax of Mexican-American bilingual and Anglo-American monolingual students, this study sought to learn specifically whether these two groups of students represent the same speech population in English syntactic use. A total of 70 subjects were randomly selected for the four groups (bilingual and monolingual fourth and ninth graders). Each subject was taped in an interview to acquire a sample of oral language production—free speech—while free writings in class were used for written production. Oral and written samples were divided into T-units, and 20 T-units of each language production were randomly sampled for each student and then analyzed to test for central tendency, dispersion, and skewness. Results showed that the bilingual and monolingual students do represent the same language population in English syntactic usages, except in ninth-grade written average clause length. However, the study raises questions, and the subject warrant's further research. (JM)

Note—8p.; Paper presented at the Annual Meetings of the Conference on English Education (13th, Colorado Springs, Colorado, March 20-22, 1975)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*Educational Improvement, Educational Philosophy, Educational Research, Higher Education, Literature Reviews, \*Performance Based Teacher Education, Teacher Education, \*Teaching Models, \*Teaching Skills Competency Based Teacher Education (CBTE) may be gathering a bandwagon momentum and arousing high expectations, but it needs a realistic examination. Some of the advantages of the CBTE movement are that it specifies student and teacher outcomes, helps individualize instruction, brings about cooperation between the public schools and the colleges in working out plans for improving education, and focuses attention on some of the major areas in education that need improvement. Some of the problems with CBTE are that there is an inadequate research base for identifying the factors which produce effective teaching, and any attempt to relate teacher skills to student achievement does not offer an empirical basis for the prescription of teacher training objectives. To the extent that CBTE omits consideration of variables like school, community, and home factors related to student achievement, the movement cannot support its claim of being scientific. Industry can teach some lessons about competency that are useful to the CBTE movement, but it also must be remembered that education is not a production process. Finally, it must be remembered that working to improve teacher education must not divert educators from working for overall reform. (RB)

Descriptors—Communication Skills, Grade 1, \*Language Skills, Primary Education, \*Reading Instruction, \*Spelling, \*Spelling Instruction, Teaching Methods, \*Word Study Skills  
A component tryout of first-grade spelling was conducted using students who received concur-

rent reading instruction based on Southwest Regional Laboratory (SWRL) materials. Pretest and posttest measures obtained from four comparable first-grade classes were used as baseline data against which to judge program effectiveness. This report describes the results of the tryout of the first-grade spelling component. In most instances, weekly performance in tryout classes approximated or exceeded the 80 percent level. Posttest scores for tryout classes averaged 62 percent, 17 percent higher than the average of the comparison classes. The decline in performance from weekly test levels coupled with differences in performance on practice and transfer words suggests that the program's word attack procedures should be strengthened. Specific recommendations for improving these procedures are described, and suggestions are provided for modifying content, the word sequence, and teacher materials. (Author/LL)

Report No.—SWRL-TN-3-71-2

Pub Date 71

Note—18p.

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

Descriptors—Primary Education, \*Program Content, Program Descriptions, Reading Programs, \*Spelling, \*Spelling Instruction

This paper briefly describes the organization and content of the Southwest Regional Laboratory (SWRL) Mod 1 Spelling Program and its relation to the SWRL Reading Program. The Mod 1 Spelling Program includes 190 words and consists of 22 lessons. Eighteen of the 22 lessons are based on review lists which are composed individually for each participating class on the basis of test results from the preceding four or five weeks of instruction. To produce compatibility of the reading and spelling programs, the Mod 1 Spelling Program gives primary status to word elements rather than to individual phonemes. With the exception of certain transfer words, all words included in the spelling program also occur in the reading program. The general objectives of the spelling program parallel those of the reading program in that both concentrate on the learning of transferable skills as well as on the learning of specific elements and words. Appendix A is a program outcomes chart. Appendix B gives samples of practice exercise items. (TS)

**Dialectology and the Process of Discovery in the Classroom.**

Pub Date 75

Note—15p.; Paper presented at the Annual Meeting of the Conference on English Education (13th, Colorado Springs, March 20-22, 1975)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

Descriptors—\*Dialect Studies, Higher Education, Language Usage, Linguistics, Regional Dialects, \*Social Dialects, \*Teacher Attitudes, \*Teacher Education

This paper describes a graduate course for language arts teachers at Georgia State University in Atlanta, titled Social Dialects and Language Learning. Classroom procedures and activities in the course were organized into five cumulative, related phases to engage the teachers in useful fieldwork in order to achieve major objectives of the course. In the first phase of the work, teachers were asked to write a linguistic autobiography. The second phase of the work aimed at expanding the teachers' awareness of phonological, lexical, and grammatical contrasts in the idiolects of members of small groups formed in classes. The third phase was the preparation for the actual fieldwork, using a questionnaire as an instrument for investigating the language usage of others. The fourth phase involved the organization and management of language data for investigating the variation of language in several dimensions. The fifth phase involved speculation about the causes of language variation in terms of historical, social, and psychological factors. It is concluded that teachers showing respect for the speech of all stu-

dents in their classes may provide an excellent way of combating language prejudice by affecting the attitudes of the next generation of adults. (TS)

**The Academic Convention: Notes Toward an Evaluative Framework.**

Pub Date Apr 75

Note—22p.; Paper presented at the Annual Meeting of the International Communication Association (Chicago, April, 1975); Flow chart removed because of type size

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

Descriptors—Communication (Thought Transfer), Conference Reports, \*Conferences, Educational Research, \*Evaluation Methods, Higher Education, \*Information Dissemination, Meetings, Organizational Communication, \*Organizations (Groups), \*Research Methodology

Beyond being of therapeutic and social value and of short-run utility for individual attendants, interactions at academic conventions may, in fact, affect the directions of research within a particular discipline for years thereafter. The convention provides a forum for the diffusion of theoretical, methodological, and empirical information that precedes publication in at least one field by an average of 15 months. Conventions facilitate formal exchanges of information and the development of informal linkages. They allow for a larger number of different interpersonal link-ups than any other context available to members of a discipline, and they serve important function in the development and refinement of the sense of identity both for the sponsoring association and the parent discipline. Conventions, viewed as information diffusion, exchange, and utilization mechanisms, are as amenable to description, prediction, and control as are other information systems. A list of various research methods, which can be used for assessing the nature, function, and outcomes of particular conventions and convention sessions in these contexts, is included. (LL)

Descriptors—\*Language Role, Language Usage, \*Mutual Intelligibility, \*Religion, Religious Cultural Groups, Religious Factors, \*Sociolinguistics, \*Verbal Communication

Identifiers—\*Christian Science, Transcendent Communication

A sociolinguistic, ethnographic analysis of Christian Science oral testimonies is reported in this study. The study is based on the analysis of transcripts of four testimonial meetings of a branch church, interpreted through knowledge of Christian Science official literature, informal interaction with Christian Scientists, and knowledge of other testimonial meetings attended by the author over a one-year period. While traditional social science and linguistic approaches are drawn on, this study differs qualitatively from

these approaches by focusing primary attention on the situated production of these speech acts as accomplishments of a particular community. The purpose of this ethnography is to demonstrate how the management of these acts achieves the communication of a complex, shared transcendence which is analyzed as a coparticipation in a transcendent province of meaning which unites Christian Scientists as a community. While this study focuses exclusively on particular speech acts of one community, it is suggested that the methods used are applicable to the study of transcendent communication in general. **Multivariate Data Analysis: A Systems-Process Approach to the Study of Human Communication.**

Pub Date 75

Note—17p.; Paper presented at the 1975 Purdue University Post Doctoral Honors Seminar; Not available in hard copy due to marginal legibility of original document

**EDRS Price MF-\$0.76 Plus Postage. HC Not Available from EDRS.**

Descriptors—\*Communication (Thought Transfer), \*Data Analysis, \*Factor Analysis, Research, \*Statistical Analysis, Systems Analysis, \*Systems Approach

The use of multivariate techniques in the study of human communication gives the researcher the opportunity to view man's behavior in greater totality than the univariate methods. Human behavior can then be viewed in terms of process. Smith, in discussing the idea of process in communication research, states that "more complete explanations will be developed through attempting to employ more wholistic perspectives rather than by accumulating the results of individual analytic studies." It is suggested that through this view the complexity and multidimensionality of man can be considered. One statistical multivariate technique that attempts to view the interrelationships of components is factor analysis. The use of principle axis factor analysis is common in data reduction to simple structure. Another use for factor analysis is hypothesis testing. It is also suggested that greater use of this tool in determining the strength of an attitude in relationship to other attitudes would be of great help in communication. (LL)

**The Teaching and Reporting of Theatre History: Technological Advances and Possibilities.**

Pub Date 75

Note—10p.; Paper presented at the 1975 Annual Meeting of the American Theatre Association; Not available in hard copy due to marginal legibility of original document

**EDRS Price MF-\$0.76 Plus Postage. HC Not Available from EDRS.**

Descriptors—Drama, Educational Research, Filmstrips, \*History, Instructional Materials, Photography, Production Techniques, Slides, \*Teacher Developed Materials, \*Theater Arts, Video Tape Recordings, \*Visual Aids

Since the most immediate and efficient method of illustrating lectures on the history of the theatre is by using visual aids, theatre historians should learn the best ways of creating and using such aids as slides, slide/tape packages, commercially produced films and filmstrips, and video cassettes and tapes. These aids have characteristics which make them appropriate for different facets of a theatre program, especially in classroom instruction. However, some of them may also be used successfully in reporting research results, particularly those of performance reconstructions. Theatre historians must give more attention to reconstruction through actual performance and to recording those reconstructions for the benefit of other historians. Thus, graduate theatre programs should include basic photography and videotaping techniques. (JM)

**Descriptors**—\*Financial Support, \*Material Development, \*Programming (Broadcast), \*Program Planning, \*Public Television  
**Identifiers**—\*Public Broadcasting Service

The Public Broadcasting Service (PBS) has developed a new means of financing a portion of PBS' national programming—the "Station Program Cooperative" (SPC). Established in April 1974, the SPC is the product of a multifaceted attack on three critical and interrelated problems: (1) an increasing scarcity of funds for national programming; (2) a need for long-range financing for public broadcasting; and (3) political opposition to a centrally administered public television system. The SPC provides a mechanism for the nation's public television stations to select desired programs from a pool of available offerings, thus diminishing central control of national program selection. By sharing the production costs of the programs they select, the SPC taps a new source of funding for national programs, thereby providing programming that might otherwise be unavailable. And finally, by addressing itself to the problems of political opposition to a centrally administered system and developing a strategy for internal economic stability, the SPC indirectly addresses the problem of long-range financing. This book is about using movement, shape, color, texture, rhythm, sounds, and words to express ideas, attitudes, and feelings. It is about learning to be open to one's feelings and the feelings of others. The first four chapters deal with questioning, groundwork, and evaluation; they discuss such topics as arranging space, teacher participation, solving practical problems, exploring dreams, and student-student questions. The four sections of chapter 5 offer various learning activities which involve working with balloons, making monsters, exploring strange positions, relaxing, working with nonverbal cues, expanding sensory awareness, complaining, using a

still camera, using color to stimulate response, performing personal drama, sending messages, role playing, composing sound stories, writing poetry, and using a fairy tale. (TS)

*A Systematic Approach to Audience Response to Film.*

Pub Date Mar 73

Note—35p.; Study done at Indiana University; Not available in hard copy due to marginal legibility of original document

**EDRS Price MF-\$0.76 Plus Postage. HC Not Available from EDRS.**

**Descriptors**—Aesthetic Education, \*Art Appreciation, \*Audiences, \*Communication (Thought Transfer), \*Films, Film Study, \*Visual Literacy

This paper is divided into three parts, the first discussing the necessary conditions for an adequate response to Godard and Gorin's film "Vent d'Est." It is suggested that the film demands both cinematic and political sophistication on the part of the viewer and that the audience must accept the flatness, the "deconstruction" of the cinematic image, and be guided by the sound track. Part 2, "A Paradigm: The Ecology of Film," presents a global paradigm which takes into consideration the whole film process from inception to reception, regardless of the historical period the film is received in. The film as a system is divided into six distinct aspects or subsystems of the film process, and the relationships between these subsystems is elaborated on. The third part, "Categories of Audience Response in Film Viewing," offers a second paradigm in which film response is broken down into the following types: simple, compound, complex self-reflective, and complex self-critical. Each of these types of responses is further subdivided into emotional, intellectual, and a combination of both. It is asserted that there is no such thing as a "pure aesthetic" response. (LL)

**Descriptors**—Class Activities, Communication (Thought Transfer), Higher Education, \*Interpersonal Relationship, \*Interpretive Reading, \*Speech Instruction, \*Teaching Models, \*Verbal Communication

**Identifiers**—\*Critique Sessions

This study presents a theory of oral interpretation as a communicative art. Oral interpretation is defined as a process of preparation, performance, and feedback. A descriptive model of feedback as an intrapersonal and then interpersonal communication process is developed. This process is described as containing the three sub-processes of description, interpretation, and evaluation. The study utilizes the three-stage model to structure the verbal feedback of the oral interpretation critique session. In order to utilize the model to provide a structure for the critique session, a series of examples of typical feedback given in an oral interpretation critique session was developed. These examples were then analyzed as to their deficits and restructured around the three-stage model. The suggestions for further research in this study indicate that the model may prove useful not only in oral interpretation classroom critique sessions but for critique sessions in classes involving public speaking and the performing arts as well. **Descriptors**—Basic Skills, Communication (Thought Transfer), \*Communication Skills, Doctoral Theses, Educational Research, \*Goal Orientation, Language Skills, \*Program Evaluation, Racial Differences, Study Skills, \*Summer Programs, \*Teaching Methods

An appraisal of the study skills component of the Equal Opportunities Program's Summer Intensive Program at Pennsylvania State University in 1973 is the subject of this dissertation. Evaluation of certain aspects of this program was undertaken to determine whether a given teaching strategy (based on the structural method utilizing goal-setting techniques) works without bias toward race or sex. The hypotheses were that no difference will be found in performance of blacks and whites, males and females, on goal attainment; and that no difference will be found in the performance of blacks and whites, males and females, based on comparison of pretest and posttest scores. The study concluded that insofar as the writer was able to count and measure, there was consistent goal accomplishment with minimal disparity between races and sexes. The indication is that goal setting and goal attainment techniques inherent in the structural method might be a more powerful influence in learning basic communication skills than either race or sex. Speech education curriculums have been concerned primarily with teacher education. Now, speech communication educators are faced not only with the pressures of decreasing opportunities for their majors in the traditional academic marketplace, but also with the challenges of newly emerging possibilities for career roles. There is no fundamental incompatibility between liberal education and career education, and both are essential in a complex technological society. Some of the vocational areas which speech communication graduates have entered are public relations and advertising, personnel, business, industry, government, law enforcement, entertainment, social services, sales, and the ministry. Thus, there is a continuing need for persons competent in communications skills in many vocations. Career counseling, mini-minors in vocational fields, and internships in career relevant areas are ways of preparing communication majors for employment. Ways for colleges to develop and implement a career-oriented approach to communication education are explored. (MKM)

Minimal Performance Objectives for Communication Skills Education in Michigan.

Michigan State Dept. of Education, Lansing.

Pub Date 74

Note—46p.

**EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage**

Descriptors—\*Communication Skills, Composition Skills (Literary), Educational Assessment, \*Educational Objectives, Elementary Secondary Education, Listening Skills, \*Performance, Reading Skills, Speaking

The performance objectives for communication skills outlined in this document were developed over a two-year period by teachers and specialists throughout Michigan. Objectives are listed for reading skills, speaking/listening skills, and writing skills at each of three levels—third, sixth, and ninth grades. Examples and comments are also provided as sub-categories of the objectives. It is believed that assessment every three years allows ample latitude for the differing growth rates of students, but that teachers will also need to make interim checks of formative skill acquisition with a more elaborate system. An appendix lists the contributors to the development of the skills objectives. (JM)

Descriptors—\*Administrator Role, Contracts, \*Court Cases, Elementary Secondary Education, \*Legal Responsibility, Religious Factors, \*School Law, Student Rights, Supreme Court Litigation, Teacher Administrator Relationship

This monograph is a review of selected judicial decisions reported by state and federal courts during the past two years and related directly to the administration of elementary or secondary schools. The decisions were identified through a standard search of legal resources at the Temple University Law Library; each decision was read in its entirety as reported in the National Reporter System. Most of the 1973 and 1974 major school law decisions affecting administrators are included in this report. Treated in addition are two significant decisions rendered by the Supreme Court of the United States early in 1975. The 65 decisions in this publication are arranged under six headings: administrators, teachers, pupils, torts, religion, and contracts. The case reviews follow a consistent format: (1) the question to be resolved; (2) a brief summary of the facts; (3) the court's holding; and (4) the author's commentary, which is intended to explain the rationale of the decision as well as its general application to school administration. A major development of the law in the 1970s has been the extension of the principle of egalitarianism to the developmentally disabled, particularly the mentally retarded. In recent years numerous judicial decisions have overruled the practices of school districts that have excluded developmentally disabled children from educational programs. This monograph examines these cases and discusses their underlying legal principles, including the emerging "right to education" and the Fourteenth Amendment rights to equal protection and due process. The implications of

the cases are explained for school authorities, who must identify, evaluate, and place handicapped children in appropriate educational programs. State constitutional and statutory provisions for educating the handicapped that help to explain the development of the legal aspects of educating the developmentally disabled are also examined. The appendix contains proposals for state legislative action to respond to the judicially established right to education mandates. (Author/MLF)

Socialization Processes Among Administrative Candidates in Public Schools.

Pub Date Apr 75

Note—24p.; Paper presented at the Annual Meeting of the American Educational Research Association (60th, Washington, D.C., March 30-April 3, 1975)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

Descriptors—\*Administrator Education, \*Aspiration, \*Educational Administration, Elementary Secondary Education, Individual Characteristics, Interpersonal Competence, Management Development, Organizational Theories, Professional Training, Role Perception, Role Theory

This exploratory study generated 14 hypotheses regarding behavior of administrative candidates, leading to the observation that during the process of candidacy a great deal of informal learning occurs that is not presently attended to by either formal preparation programs or by the processes and procedures through which educational administrators are certified. Also, the actual nature of the candidate's behavior varies systematically along both qualitative and quantitative dimensions during the period of anticipatory socialization. The concepts of anticipatory socialization, interpersonal orientation, perspective, situational adjustment, and organizational space provided the basic theoretical framework. Four contextual properties characterize the behavioral situation of candidates: (1) candidates were processed through this period of their career as individuals rather than as members of a group; (2) the organization tended to view this period as one in which candidates could be tested in "live" situations; (3) the organizational role prescriptions for acceptable candidate behavior were ambiguous and not clearly specified, and (4) the behavior distances between candidates and members of the positive reference group varied systematically as a function of either individually initiated candidate behavior or organizationally directed changes in the role-set of candidates. Descriptors—\*Bibliographies, Building Design, Cost Effectiveness, \*Delinquency, \*Delinquency Prevention, Elementary Secondary Education, \*Literature Reviews, Reference Materials, School Administration, \*School Vandalism

There are two basic types of vandalism, malicious and nonmalicious. Both types can be controlled, but the methods of control differ. Most of the literature deals with malicious vandalism. Perhaps because security appears to be the only way to control malicious vandalism, it is often made the focal point of antivandalism programs. The most important consideration is the relationship between the cost of a security system and its potential value to the school. A comprehensive antivandalism program using security devices as part of an overall plan is often suggested. Unfortunately, the literature is full of suggestions and

assertations, but remarkably short on concrete facts documented by scientific research. There are two basic approaches to controlling malicious vandalism. Deterrent programs treat vandalism symptomatically, usually by emphasizing school security. The diagnostic approach attempts to prevent vandalism by attacking its causes. Thoughtful building design can greatly reduce nonmalicious vandalism. The well-designed building will be less vulnerable to all kinds of damage-malicious, nonmalicious, and even wear and tear. **Identifiers—**\*Canada

This report marks the conclusion of a two-year study of SEE (School of Experiential Education), an alternative high school. It is a statement of the examining group's perceptions of SEE's second year of operation and of implications for SEE's future development. Because the evaluation group believes that a new program such as this takes four to five years to develop to maturity, this is a progress report rather than a final evaluation. Chapter 2 describes the evaluation group's involvement with the school, discusses possible biases operating in the report, and details the data collection (primarily interviews and questionnaires) and analysis procedures. Chapter 3 presents some basic facts about the school and its applicants and documents some of the changes that have occurred over a two-year period. Chapter 4 describes students' adjustment, achievement, and growth patterns over a two-year period. Chapters 5, 6, and 7 discuss various aspects of SEE's climate as seen by students, parents, and teachers. Chapter 8 presents another perspective by contrasting SEE students with a sample of students who applied but were not selected in the admissions lottery. Chapter 9 explores the implications of the findings for SEE's future directions and offers recommendations to remedy some current problems. (Author/IRT)

This handbook offers a succinct discussion of inservice training programs for noninstructional school personnel. The booklet is intended for use primarily by school business officials and was developed for that purpose from a doctoral dissertation on inservice training written by Dr. Donald K. Sorsabal. Separate chapters of the booklet examine the purpose and value of inservice training, the definition of inservice training, basic concepts and principles of inservice training, determination of training needs, different types of training programs, and critical requirements for training programs. There is also an extensive bibliography listing publications and other reference materials that may be useful in designing an inservice training program. (JG)

**Descriptors—**Campus Planning, Construction Needs, \*Educational Facilities, Educational Finance, Elections, \*Facility Guidelines, \*Facility Planning, \*Facility Requirements, Master Plans, Public Relations, School Maintenance, Site Analysis, Staff Utilization, \*Systems Approach

Each of 16 authors treats a technical aspect of preconstruction planning in this bulletin. Application of systems logic appears in the organization of the chapters. The problem is defined as a survey procedure in chapters discussing the school business official, planning terminology, and staff structure. Variations of objective synthesis are presented in chapters about coordinating school planning with urban research, plant evaluation, financial resources and constraints, master plan priorities, and campus planning. Patterns of alternatives are analyzed in chapters concerning metropolitan school sites, decentralization versus centralization in urban development, computing school plan capacity, and comparative technology is school design. Implementation of the systems approach is shown in chapters about design for operation and maintenance, security mandates, selection of furniture and equipment, and public information in bond elections. Appendixes contain a glossary and plant evaluation standards. (Author/MLF)

This booklet presents recommendations for expanding the Certificate of Conformance Program for Financial Reporting of the Association of School Business Officials (ASBO) to include junior and community colleges. The guidelines were developed by participants in an ASBO research workshop on accounting and finance held in July 1974. The guidelines are intended to encourage two-year colleges to establish and maintain effective and timely financial accounting and reporting systems. This in turn can help improve financial management of the resources allocated to junior and community colleges. The guidelines are organized into four sections, which deal respectively with financial reporting procedures for the junior and community college certificate of conformance, format of the annual financial report, submission of annual reports, and establishment of the certificate of conformance program for junior and community colleges. **Descriptors**—\*Business Administration, \*College Programs, Higher Education, Inservice Programs, \*Management Education, Professional Education, \*Program Descriptions, \*School Surveys, Tables (Data)

**Identifiers**—Canada, United States

The purpose of this study was to determine which colleges and universities in the United States and Canada offer programs for the preparation or inservice education of school business officials and to describe the nature of the various programs offered. State directors of school finance and presidents of the various state and provincial associations of the Association of School Business Officials were asked to identify any institutions offering preparation programs for school business officials in their state or province. Each of those institutions was then asked to complete a questionnaire designed to provide a detailed description of its program. Approximately 75 percent of the identified institutions completed and returned this questionnaire. The data were then analyzed, and a short descriptive passage was compiled for each institution, detailing its type of program offerings, degrees awarded, admission requirements, residence requirements, credit hour requirements, and the name of a person to contact for further information. Much of the same information about all of the responding institutions was also summarized in tabular form. (JG)

This handbook is intended to guide educational administrators interested in adopting an Educational Resources Management System or Planning Programming Budgeting Evaluation System (ERMS/PPBES) by presenting detailed information on the experiences of various educational systems in implementing ERMS/PPBES programs. Data were gathered from a representative sample of eight school systems of varying sizes from throughout the United States and Canada. Each of the participating systems was asked to provide a brief statistical profile of the system, a description of their ERMS/PPBES strategy, a report of the resources required to implement ERMS/PPBES in the system, a description of the conceptual model followed by the system, and a report of problems encountered in planning and implementing ERMS/PPBES. Separate chapters present the complete report submitted by each school system, with the exception of some lengthy documentation and publication samples that are simply listed and described briefly. **Identifiers**—\*India

This monograph, relating to events that happened during 1966-68, is a case study of a voluntary, educational, and intercultural organization that had been service oriented for almost 15 years. The organization had been organizing literacy classes, opening rural libraries, providing health extension, and conducting a small program of publication and training. A grant was awarded, and the organization was asked to develop a new identity as a research and development organization for a national leadership role. This role change was to be accomplished by bringing in high-powered, well-trained professional workers from the outside and asking them to deliver research and development. The elite sabotaged their own rational model by hiring friends, students, and colleagues. Those who were already aboard felt inferior, rejected, and punished. There was resentment, intrigue, confrontation, fear, and pathology. By the time it ended, no one had gained, and the organization had lost. The case study points out that a new ideology, policy, doctrine, or organizational mission may be easy to own but more difficult to implement. The final chapter presents a conceptual reconstruction of the narration using a systems analysis approach on the study of an organization. (Author/MLF)

In the past, organizations have had problems during the implementation phase of Program Planning Budgeting Systems (PPBS). Under the approach developed by the Educational Manage-

ment Development Center (EMDEC), several school systems develop similar PPB systems, with EMDEC as the coordinating hub. District personnel are first familiarized with the program concept through the development of the program budget. Only after a year of budget work are personnel asked to develop goals, objectives, and targets. Cooperation by several districts permits the distribution of costs across the districts and encourages an exchange of information. The EMDEC approach is presently being tested with three school districts in Allegheny County, Pennsylvania. The three districts have had good success with the development of the program budget; the most difficult problem during the initial months was a lack of detailed information. To introduce program analysis and evaluation, the EMDEC approach uses two pilot programs for each district, so the implementation process can be easily modified for maximum effectiveness. The subsequent development of goals and objectives for the entire district simply involves the full application of guidelines designed during the pilot phase. (Author/JG)

Management by Objectives for a School District's Administrative Staff.

Carnegie-Mellon Univ., Pittsburgh, Pa. Educational Management Development Center.

Pub Date May 75

Note—63p.

EDRS Price MF-\$0.76 HC-\$3.32 Plus Postage

Descriptors—\*Administrator Evaluation, Elementary Secondary Education, \*Management by Objectives, Objectives, \*Performance Criteria, Program Descriptions, Salaries, \*Salary Differentials, \*Task Performance

Management by Objectives (MBO) has been found to be a useful means of conducting performance appraisals for professional employees. It is also an effective process for individual and organizational goal-setting and planning. Compensation systems may also be related to the MBO process. This paper addresses the concepts underlying MBO and its implementation for a school district's administrative staff. Several important phases of implementation (goal-setting, performance appraisal, and salary plan development) are emphasized in major sections of this report. The appendix contains detailed information and sample materials from a school district MBO-based salary plan. (Author/IRT)

Descriptors—Community Surveys, Elementary Secondary Education, \*Interviews, \*Public Opinion, \*Questionnaires, \*Sampling, School Community Relationship, School Surveys, \*Surveys

This report provides an introduction to the use of opinion surveys in gaining information about a school system in order to make decisions. The topics addressed are reasons for surveying, selecting the respondents, survey methods, selecting the survey sample, structuring the survey, writing the questions, training interviewers, pretesting the survey, analyzing the results, and reporting the results. This information should be helpful to a school administrator or school board member considering the use of an opinion survey. (Author)

Note—22p.

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*Educational Finance, \*Educational Planning, Elementary Secondary Education, \*Methods, Models, \*Prediction

Public school systems infrequently project their financial outlook beyond the coming year. Yet, financial projections over a multiyear period are

necessary if the financial "crises" that frequently occur in public organizations are to be avoided. This paper discusses the importance of financial forecasting and planning, the development of financial forecasts, a financial forecasting example, and additional planning steps. Suggestions are offered for implementing financial forecasting in school districts. (Author)

Descriptors—\*Change Strategies, Educational Change, \*Educational Legislation, Elementary Secondary Education, \*Models, \*Politics, School Law, Special Education, State Government, \*State Legislation, Systems Approach

By systematically identifying the typical stages in the development of educational legislation, this paper attempts to aid educators interested in proposing legislation on the state level. The authors describe the legislative process in terms of a model involving the following seven major functions: involving community groups, analyzing the present educational system, specifying legislative goals, developing a bill, preparing for passage of a bill, implementing the new law, and evaluating compliance with the law. Each function is discussed individually, using examples based on the passage of special education legislation in several states. (JG)

Identifiers—\*Planning Programming Budgeting System, PPBS, School Planning Evaluation Communication System, SPECS

Planning Program Budgeting Systems (PPBS) rest on the assumption that decision-making and resource allocation can be managed more efficiently when information about educational processes is collected uniformly and aggregated systematically. The School Planning Evaluation and Communication System (SPECS) conforms to this conception of PPBS as a purposive managerial system. Although the primary purpose of the SPECS project in South Lane School District was developmental, a limited study of teacher attitudes was carried out in each of the first three years of implementation. Both informal discussion with teachers and survey results showed the existence of three groups: those who were strongly pro-SPECS (approximately 45-50 percent), those who were strongly anti-SPECS (approximately 25-40 percent), and those who were apparently indifferent (approximately 15-25 percent). With one exception, there was little real change in teachers' perception of SPECS-related problems between 1971 and 1973. Furthermore, there was little change in teachers' views of SPECS' impact on organization, supervision, and administrative receptiveness within the district. (Author/JG)

Political Processes for an Interagency Project Renewal Policy: A Case Study of a Federal Agency's Negotiations to Influence State and Local Policies.

Pub Date Apr 75

Note—21p.; Not available in hard copy due to marginal reproducibility of original document; Paper presented at the Annual Meeting of the American Educational Research Association (60th, Washington, D.C., March 30-April 3, 1975)

EDRS Price MF-\$0.76 Plus Postage. HC Not Available from EDRS.

Descriptors—\*Adoption (Ideas), \*Case Studies (Education), \*Curriculum Development, Diffusion, Educational Change, Educational Innovation, Educational Policy, Elementary Education, Experimental Curriculum, \*Federal Programs, \*Interagency Cooperation

Identifiers—Developmental Arts Program

This study analyzes the six-month negotiation process of a federally funded program to renew an interagency curriculum diffusion project with a state department of education and nine school districts. Because of interagency dissension during the first project year, the federal agency made concessions to obtain project renewal policies. Federal concessions recognized state and local jurisdiction in high-risk policy areas. The federal agency dictated neither the process of state and local program development nor the expenditure of moneys for curriculum purchase. Changing state and local policies was more rapid than changing educational practices. (Author)

Descriptors—\*City Planning, Community Characteristics, Data Collection, \*Development, Environmental Influences, \*Evaluation Criteria, \*Evaluation Methods, Land Settlement, \*Land Use, Social Environment, Systems Approach, Urbanization

Identifiers—\*Land Development

This report suggests a set of measures and procedures that local governments may use for estimating the specific impacts of development on a community's economy, natural environment, public and private services, appearance, housing, and social conditions. It also offers a framework and a methodology for a community to use in arriving at its own set of evaluation criteria. The proposed measures and data collection methodology were devised primarily for municipal and county officials and their staffs who are involved in land-use matters. The suggested measures and how they are formulated are presented in Chapter 1 of Part 1. Chapter 2 discusses the role of the measures—that is, how they may be used by local decision-makers. Chapter 3 focuses on key methodological issues that have not been totally resolved but that should be kept in mind when applying the measures. Chapter 4 indicates how the measures may be used to consider explicitly the impact of development on different population segments or clientele groups. Chapter 5 suggests some ways of presenting or displaying the findings from the impact measures. Part 2 deals with the more technical details of applying the proposed measures. It discusses the rationale, limitations, and alternative forms for each measure and outlines procedures for data collection in each instance. (Author/MLF)

Identifiers—\*Land Development

This is the second in a series of reports concerned with evaluating the impacts of land development. This report discusses in considerable depth and detail how development affects the revenues and expenditures of local government. Questions include the following: (1) Will new development inflate the demand for public services and facilities in excess of the tax revenues it generates? (2) Are communities searching for new development and new sources of revenue to ease the tax burdens associated with existing developments that do not pay their own way? and (3) Are cities, suburbs, and suburban communities pitted against each other in obtaining additional tax dollars and excluding tax users? In this report a large number of fiscal studies were examined to determine why findings differ, to identify the major analytical issues, and to synthesize a judgment about the utility of fiscal impact analysis as a tool for better land-use planning and management. Pub Date Mar 71

Note—47p.

Available from—Publications Office, The Urban Institute, 2100 M Street, N. W., Washington, D. C. 20037 (Order No. URI-30003, \$1.50)

EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage

Descriptors—\*Administrator Guides, Administrator Role, Bibliographies, Community Surveys, \*Estimated Costs, Government Employees, Government Role, Research Methodology, \*Sampling, \*Statistical Surveys, Tables (Data)

This report is intended to provide government managers with some perspective on the nature and implications of sample surveys, their likely costs, and what can be expected from them. The authors discuss sample surveys less from the technical side than from the perspective of the officials who will make management decisions about an overall survey. Little attention is devoted to specific research methods, though the bibliography lists publications that provide such information. Much of the discussion applies to surveys in which government employees, rather than private citizens, supply the responses. Separate chapters discuss the overall sample survey process and the steps involved; the advantages of conducting a survey under government auspices, rather than through a university or private research organization; the costs involved in each phase of a survey; factors affecting the accuracy of a survey; and some further considerations in conducting a survey. The appendix contains tables that illustrate costs of conducting sample surveys of different types and scope. (Author/JG)

EDRS Price MF-\$0.76 HC-\$3.32 Plus Postage

Descriptors—\*Federal Aid, Federal Programs, \*Federal State Relationship, \*Government Role, Objectives, Performance Specifications, Program Evaluation, \*Revenue Sharing, \*Social Services

Special revenue sharing is a tool that can allow almost unlimited state flexibility in social service interventions, while primarily confining the federal role to the specification and measurement of national social service objectives. Goal specification and measurement procedures are crucial to the special revenue-sharing idea. Federally supported measurement organizations should be established in each state to develop indicators of goal achievement relevant to national social service goals. These indicators should be common to all states and should become the basis for sanctions against those states that, by comparison, perform badly. The federal role ought to be the enunciation of broad policy, the measurement of its achievement, and the development of sanctions for failures in achievement. The state-local role ought to include the specification and execution of interventions appropriate to national goals, with an absolute minimum of federal interference. Only when state and local achievement fall below satisfactory levels, as reflected by national indicators, should additional federal constraints be considered. (Author/JG)

Report No.—UI-1215-1

Pub Date Mar 75

Note—59p.

Available from—Publications Office, The Urban Institute, 2100 M Street, N. W., Washington, D.C. 20037 (Order No. URI-99000, \$2.50)

EDRS Price MF-\$0.76 HC-\$3.32 Plus Postage

Descriptors—Bibliographies, \*Labor Economics, Labor Market, \*Literature Reviews, \*Manpower Needs, Manpower Utilization, \*Models, \*Prediction, Technological Advancement, Trend Analysis

Obstacles to producing forecasts of the impact of technological change and skill utilization are briefly discussed, and existing models for forecasting manpower requirements are described and analyzed. A survey of current literature reveals a concentration of models for producing long-range national forecasts, but few models for generating short-range forecasts disaggregated to the regional, state, and local level. Since there is not much evidence on the accuracy of predictions, attention is focused on the reasonableness of the model structure. Models are also evaluated on the basis of their potential value in policy formation. It is assumed that this value depends on the value of supply adjustments in the labor market, but a review of the literature on supply reveals that evidence on adjustment is mixed. The conclusion is drawn that existing manpower forecasting models should be modified, so that they are more reasonable representations of labor markets. (Author/JG)

Identifiers—\*Skyline Wide Educational Plan, SWEP

This report presents the findings of a survey designed to describe the state of society in the 1980s, particularly as it will affect the educational needs of the Dallas-Fort Worth metropolitan area. The report was prepared to aid administrators of the Skyline Wide Educational Plan in their efforts to develop a comprehensive secondary school plan for the Dallas-Fort Worth metropolis in the 1980s. Questionnaires were distributed to a selected national sample of 290 individuals known to have devoted much of their professional time to contemplating and planning for the future. Questionnaire items consisted of various propositions gleaned from futuristic literature. Respondents were asked to indicate on five-point scales the likelihood of a given proposition and its probable impact on education. Respondents were also encouraged to identify areas or facets of education that would be heavily affected. Analyses and interpretation were based on computed mean, mode, and standard deviation scores for the 151 individuals who completed questionnaires. A number of statistical tables and diagrams summarize the survey results. Samples of the survey questionnaires are presented in the appendix. (Author/JG)

Learning in community schools is not solely book learning but is practical and related to the environment. Some related assumptions are that the school can be an instrument of social change and the community is the teaching laboratory. Case studies of some community schools in the United States, the Philippines, and Africa indicate that they succeed when the community is ready for change, the school is a terminal institution, and staff members are trained as both teachers and community developers. **Document Not Available from EDRS**

**Descriptors—**\*Community Involvement, \*Crime, \*Delinquency, Discipline, Discipline Problems, Elementary Secondary Education, Safety, Security, \*Violence

This handbook for parents and citizens does not emphasize assessment of the scope of violence in the schools so much as it emphasizes the way parents and citizens can better understand the many factors that make the problem and may lead to its modification. The handbook begins by examining how citizens can become involved in the schools, what they need to know, and who—teachers, students, community members, and the people who take care of the building—must be involved in a school security plan. The handbook goes on to discuss the training of security people, the physical plant, equipment, the educational program, school policies, discipline, and implementation of the security plan. Extensive appendixes cover a wide range of information related to violence in the schools, including results of a survey on the extent of violence in the schools, recent Supreme Court decisions on student rights, and sources of further information. This catalog contains descriptive abstracts of over 250 regular, handicapped, and guidance projects in Pennsylvania having substantive life during the period January 1, 1974 to June 30, 1975. Title III or Projects to Advance Creativity in Education (PACE) attempts to encourage new ways of teaching by providing needed services for children and adopting and demonstrating exemplary programs based on proven practices. This publication is intended to establish an awareness of the educational innovations supported by these funds so that practitioners will have enough information to decide whether to explore the programs in more detail, with the idea of adapting or adopting them. In addition to the abstracts submitted by project directors and arranged by project number, the publication contains a subject/grade-level index, an alphabetical list of local education agencies (LEAs), and a list of projects grouped by intermediate units. This is a collection of essays that originally appeared in the 1970-71 issues of "The School Administrator." All are concerned with the general topic of politics and education, and each was prepared by a recognized scholar. Each essay focuses on a set of critical questions and issues around which national policy evolves. The series is intended to provide a thoughtful basis for study and understanding of the problems and issues inherent in the changing relationships among levels of government. The essays include those originally published under the following titles: "The Politics of Education," "National Political Parties and Educational Policy Making," "Interest Groups and Federal Education Policy," "Relationships Between Federal and State

Systems," "The States and Urban School Systems," "Community Influence Systems and Local Educational Policy-Making," "Political Confrontation," "Planning and Politics," "Community Involvement in Educational Policy-Making," "The Politics of School Desegregation," and "Local Interagency Cooperation." Descriptors—\*Culture Contact, Elementary Secondary Education, \*Foreign Culture, \*International Organizations, \*School Demography Identifiers—\*Overseas Schools

One hundred thirty schools in 74 nations met the criteria for assistance as American-sponsored overseas schools in 1970-71-nonsectarian; non-profit elementary and secondary schools; established and maintained by American groups; enrolling American, host-country, and third-country youth; and following basically American or bicultural curricula and under the direction of American-trained personnel. Each school has been organized within the framework of formal and/or informal agreements with the host country. Typically, they are governed by a formal association of parents who elect a board of education to serve as their policy-making representative. Maps, figures, and graphs present demographic data about the students enrolled in these schools. The pamphlet reports on teacher preparation, curriculum development, and school-community relations at these schools. (Author/MLF)

Descriptors—Administrative Personnel, \*Administrator Attitudes, Administrator Characteristics, \*National Surveys, Occupational Surveys, \*Organizational Effectiveness, \*Professional Associations, \*Statistical Data

Identifiers—AASA, \*American Association of School Administrators

This booklet presents the findings of an extensive survey conducted in 1971 by the American Association of School Administrators (AASA) to investigate characteristics of its members and their views of AASA's organizational structure and activities. Survey questionnaires were mailed to a systematic sample of approximately 2,200 AASA members. Of that sample, approximately 1,600 members completed and returned the questionnaire. Results of the survey are discussed in a series of separate short sections that closely follow the order and wording of the original questionnaire. Primary emphasis of the discussion is on members' views of the value of various AASA activities. (JG)

Descriptors—\*Court Litigation, \*Educational Finance, \*Equal Education, \*Equal Protection, Nondiscriminatory Education, Property Taxes, Public Schools, \*School District Spending, State Legislation

Identifiers—Fiscal Neutrality, Serrano vs Priest

In 1971 the California Supreme Court published America's most significant court decision in recent decades affecting a state's program of funding the operation of its public schools. This was followed by court decisions in Minnesota, Texas, and New Jersey. Lawsuits based on the California case of Serrano v. Priest are being filed in courts throughout the country. The background of these court decisions is summarized. These lawsuits and decisions are anchored in the constitutional concept of equal protection that requires that the federal and state governments not discriminate unfairly between classes of people. Ten practical questions and their related issues that school administrators must deal with in the months and years ahead are discussed. (Author/MLF)

Descriptors—Administrative Personnel, \*Administrator Role, Collective Bargaining, Educational Administration, Elementary Secondary Education, Employer Employee Relationship, \*Industrial Relations, Job Analysis, \*Models, \*Occupational Information, \*Occupational Surveys

This booklet presents findings of a study conducted to explore the status of the emerging position of school district director of employee relations. Purpose of the study was to ascertain how widespread the position is, to examine the nature of the duties being currently performed by directors of employee relations, and to develop a model job description for the position. Data for the study were gathered through a survey of practicing school administrators and educational negotiators, as well as a review of the literature on private-sector labor relations. (JG)

**Descriptors—**\*Educational Administration, Elementary Secondary Education, Employment Opportunities, \*Equal Opportunities (Jobs), \*Feminism, Professional Personnel, \*Sex Discrimination, Sex Role, \*Sex Stereotypes, Working Women

The third of three booklets deals with the roles of women and men in educational administration. Recent data indicate that there is a notable underrepresentation of women in educational administration and they earn less. Guidelines to implement affirmative action include establishing a task force or a committee to study equal employment opportunity problems and develop a plan of action, and a districtwide analysis of all areas of employment. Superintendents are advised to

develop and implement a vigorous program of affirmative steps in the following employment areas: recruitment, selection, promotion, upward mobility, training, wage and salary structure, benefits and conditions of employment, and support programs and services. (Author/MLF)

**Identifiers—**Pennsylvania (New Castle), \*Schools Without Failure

A two-year evaluation of William Glasser's Schools Without Failure (SWF) program was carried out in the New Castle School District in Pennsylvania. Ten elementary schools were paired on the basis of size, socioeconomic status, and past achievement of pupils. In the first year, one school of each pair was randomly assigned to begin teacher training and implementation of the SWF program; in the second year of the study, both groups of schools received training in SWF methods and implemented the program. Data were collected and analyzed to determine whether the second year or the first year produced stronger changes and how schools that received two years of training differed from traditional schools. Tests and observations were conducted at the beginning and end of the first year and at the end of the second year. Measurements were taken of pupil achievement and attitudes, teacher and parent attitudes, disciplinary referrals to principals, and classroom interactions. (Author/JG)

**Descriptors—**Curriculum Evaluation, Educational Objectives, Elementary Secondary Education, Enrollment Projections, Enrollment Trends, Environmental Education, \*Facility Requirements, \*Land Acquisition, \*Land Use, Physical Education, School Demography, School Expansion, \*School Planning, \*Site Analysis, Site Development, Tables (Data)

The purpose of this study was to develop land-utilization options for the present holdings of the Berrien Springs Public Schools. In order to base these proposed options on facts and observable evidence, substudies of educational goals, enrollment projections, present school site, and the educational program were conducted. On the basis of the data obtained in these substudies, land-utilization options in three areas were developed—the biosphere, physical education, and general. The recommended biosphere is to be conducive to instructional use and to the encouragement of native wildlife and would contain an arboretum, a pond, trees, and garden space. Various options concerning outdoor physical education facilities are described and illustrated. General land-utilization options include a drainage system to remove standing water from school grounds, landscaping, installation of curbs or other restraining barriers around play area, and facilities for special education. In establishing educational goals through the Delphi technique, convergence of perception is of paramount interest. Progress toward integrated schools and changing sex roles make the perception of educational goals by groups defined by race and sex of practical significance. In three studies involving panels of community leaders, educators, and high school students respectively in metropolitan Atlanta, convergence in perceptions of goals was examined within each panel as a whole and among groups defined by race and sex within panels. It was found that both individual and group perceptions generally tended to converge. Goals reflecting serious areas of disagreement were identified. (Author)

**Descriptors—**\*Administrator Responsibility, Collective Negotiation, \*Corporal Punishment, \*Discipline Policy, Elementary Secondary Education, Political Issues, \*Student Rights, Student Teacher Relationship, \*Teacher Administrator Relationship, Teacher Associations, Unions, Violence

A discussion of the political aspects of administrative decision-making concerns the sanctioning or prohibiting of corporal punishment in schools in general and the action taken when teachers who use corporal punishment come under attack. The data, derived from the author's participant observation in the Detroit Public Schools, indicate that (1) corporal punishment has been an accepted and practiced control mechanism in many schools; (2) most large school systems have a machinery for protecting teachers who may be jeopardized because they have administered physical punishment; and (3) parents filing civil suits have found that both teachers and administrators have liability insurance and are represented in court by attorneys for their professional organizations. Where corporal punishment is sanctioned, educators are shielded effectively even when overzealous, ill-advised, or sadistic. The removal of that shield, the primary target in any political effort to bar corporal punishment, is the concern of the remainder of the paper. (Author/MLF)

Federal Aid, \*Federal Programs, Government Role, \*Management, Program Administration, \*Projects, School Districts, Superintendent Role

Recent federal legislation in education has had an impact on education in the local school districts. The most obvious example is the use of federal funds and the consequent requirement for accountability. The local education agency is now faced with the need for management of the requirements for accountability. It is the intent of this memorandum to report on an analysis of one dimension of this management of public funds and programs—project management. The discussion of the role of project manager includes an examination of his job description (function, principal responsibilities, authority, duties, and techniques of management) and of the problem areas of the role. It is assumed that the reader is knowledgeable about innovations in education, the effect of massive involvement of the federal government in education, and the development of project management as a discipline. A number of appendixes provide related information. (Author/IRT)

The development of training materials on project management for local education agency personnel involves a series of four steps. The first step, the analysis phase, was reported in Technical Memorandum No. 1. This second step, the conceptual phase, was conducted to provide a statement of performance and/or behavioral objectives for the subsequent design and development phases. The purpose of this memorandum is to present the results of the staff activities involved in the conceptual phase and to focus on the presentation of a statement of instructional objectives. The report consists of two main sections. The first outlines the instructional setting by focusing specifically on the conditions that affect the operation of project management in the local agency level. The primary ideas in this section deal with a precise description of the target audiences involved for the two proposed training programs. The second section presents the statement of behavioral objectives developed from task analysis of project management positions. Appendixes contain information on training films and on behavioral objective performance measurement criteria. (Author/IRT)

Identifiers—Executive Orientation Training Package

This memorandum reports on the third phase, the design, of a four-phase project to design project management training materials for local educational agencies. The first section of the memorandum explains some considerations regarding management education and the organization of the report. Section 2 presents the design specifications for the Executive Orientation Training Package. The basic assumption made in developing this package is that its fundamental purpose is to provide an orientation to the staff of the local educational agency after the decision has been made to implement a project management capability. Section 3 presents the design specifications for the Project Manager Training Package. The package includes a determination of entry level component as well as a case simulation component. Each of these instructional packages can stand alone. The final section presents an example lesson developed for the orientation package. (Author/IRT)

Identifiers—I GE, Individually Guides Instruction

Exploratory case study research, conducted in selected Individually Guided Instruction (IGE) elementary home-school environments, focused on four objectives: describe IGE implementation and home-school-community relations, explain objective one in political terms, generate hypotheses, and make recommendations. Approximately 50 interviews were taken in each of four elementary school-communities, chosen because the school-community fit an inert, dominated, factional or pluralist political category. Data analysis indicates that a political conceptualization of home-school-community relations is useful; elementary school-communities vary in political pressure, issue resolution, and acceptance of innovations that was conceptualized in differing zones of tolerance. Identifiers—Organizational Specialists, Washington (Kent)

A case history of organizational development in the Kent, Washington, school district from August 1967 to April 1972 is presented in 14 chapters and numerous appendixes. The first section contains a summary, the theoretical scheme, and the principles used in building the cadre of organizational specialists. Chapters 5, 6, and 7, concern interpersonal "first-level" skills; conditions facilitating interpersonal responsiveness among teachers, communication in schools with col-

laborative teaching structures, and preconditions necessary before training produced constructive adaptation. Chapters 8 and 9 concern "second-level" skills that serve to enhance the functioning of systems; collaborative decision-making among teachers, and power-sharing between principals and teachers. Chapters 10, 11, and 12, move to "third-level" skills—the capacity of the school for performing as an entire system; a substudy of the school as a processor of innovations, the work of the cadre as an agent of constructive adaptation, and the cadre as a system in itself. Chapter 13 probes the strengths and weaknesses of the data, research design, and analysis techniques used in the study. Chapter 14 contains a summary of the project and recommendations. (Author/MLF)

Identifiers—\*Planning Programming Budgeting System, PPBS

This book, written for the nonspecialist, concentrates on three issues that are likely to have major impact on the future of public elementary and secondary education. The first issue is the improvement of family choice in the selection of educational services. The issue here is essentially one of the structure of the financing of education. The second issue is whether and how the technological efficiency of schools can be enhanced. This issue deals with the question of how well the amount of money needed to run the schools can be determined. The third issue is how educational services are distributed to different client groups and how the money to buy those services can be raised. (Author/IRT)

Descriptors—Data Analysis, \*Educational Environment, Junior High Schools, Morale, \*Organizational Climate, School Environment, \*Student Attitudes, \*Student Opinion, Teacher Attitudes, \*Teacher Morale

The present study was designed to investigate the teacher and student morale in two schools, one with and one without obvious problems. The research focuses on (1) staff feelings about coworkers and supervisors, and staff satisfaction with the degree of participation and recognition received from work; (2) student feelings about teachers, student enthusiasm for school, and student self-esteem; and (3) the overall morale in each school. Although scores at both schools were lower than average, analysis of variance indicated some significant differences between the schools. The findings are discussed and a plan of action is proposed. A Feasibility Study of the Extended School Year for the Hartford Public Schools.

Pub Date 26 Jul 74

Note—156p.; Submitted in partial fulfillment of requirements for Doctor of Education, Nova University; Pages 126, 127, and 130-137 may reproduce poorly

EDRS Price MF-\$0.76 HC-\$8.24 Plus Postage

Descriptors—Cost Effectiveness, \*Curriculum Planning, Data Analysis, Educational Finance, Educational Planning, Elementary Secondary Education, \*Extended School Year, \*Feasibility Studies, Models, \*Program Descriptions, \*Year Round Schools

Identifiers—45 15 Plan, Connecticut (Hartford)

This feasibility study is divided into sections presenting a brief history of the extended school year concept, an extensive survey of recent efforts at implementing the concept, the planning and implementation of the Hartford study, reports of five committees, final recommendations, and an evaluation of the study. Also included are a number of appendixes that provide supplemental information. The committee reports cover the areas of curriculum and instruction, staff organization and development, administrative concerns, pupil personnel and special education, and the community. Three recommendations were given to the steering committee: that the district reject the extended school year idea, that a pilot program be created, and that a format allowing individual schools to decide for or against the concept be adopted. The third alternative was advocated. (IRT)

ED 111 111 EA 007 485  
Piatt, Robert S.

A Reorganized Elementary School Structure to Accommodate Declining Enrollment.

Pub Date 21 May 75

Note—147p; Submitted in partial fulfillment of requirements for Doctor of Education, Nova University

EDRS Price MF-\$0.76 HC-\$6.97 Plus Postage

Descriptors—Elementary Education, \*Enrollment Trends, \*School Organization, School Redistricting, \*Student Distribution, Student Enrollment, Student Transportation, \*Teacher Placement

Identifiers—Pennsylvania, South Allegheny School District

Declining enrollments in the seven elementary schools in the district caused a decrease in the number of classrooms per building and an unequal distribution of pupils with class sizes ranging from 13 to 32 students per classroom. Smaller classes and fewer teachers restricted the grouping of pupils for multilevel reading and mathematics instruction. The reorganization of the elementary schools into primary buildings and intermediate buildings was intended to equalize class loads, facilitate multilevel instruction, and provide better utilization of staff and other resources. Buildings were classified as primary for grades 1-3 and as intermediate for grades 4-6. With minimal additional busing, children were able to continue to attend the schools within their own communities. Parents, teachers, and administrators evaluated the effectiveness of the reorganized schools in terms of prestate objectives. (Author)

The Establishment of a Comprehensive High School Renewal Site in the Erie, Pa. Public Schools. Maxi II Practicum.

Pub Date 5 May 75

Note—427p; Submitted in partial fulfillment of requirements for Doctor of Education degree, Nova University

EDRS Price MF-\$0.76 HC-\$22.21 Plus Postage

Descriptors—Bibliographies, \*Change Strategies, Curriculum Planning, \*Demonstration Programs, Educational Innovation, Educational Planning, \*Experimental Schools, Organizational Change, \*Program Development, Program Effectiveness, \*Secondary Education, Teacher Role

Identifiers—Pennsylvania (Erie), Strong Vincent Comprehensive High School

This practicum report describes in detail the efforts of a High School Task Force made up of 21 teachers to establish and operate a model high school as part of a new 4-4-4 educational plan for the Erie, Pennsylvania, schools. The Strong Vincent Comprehensive High School Renewal Site utilized curriculum revision, quarter course offerings, and increased student choice in an effort to improve student learning. The report is organized into eight major sections that describe the Erie Schools and community, discuss the national need for educational reform, examine local educational problems in Erie, describe the High School Task Force and the model high school program, evaluate the impact of the model high school program, and summarize the most significant aspects of the program. The appendix contains a variety of supplementary materials, including a sample of the High School Task Force opinionnaire, the Erie 1972-75 transition plan, the preliminary budget for the High School Task

Force, and various planning documents and forms used in the model high school project. (JG)

Descriptors—Acoustical Environment, \*Architectural Elements, \*Building Design, \*Educational Facilities, Human Engineering, Occupational Surveys, School Buildings, \*School Environment, School Surveys, Teacher Attitudes, \*Thermal Environment, Ventilation, Windows

Identifiers—England

A survey of 914 teachers from 77 English schools was conducted to gather data on summer overheating of school classrooms. Teachers' reports were analyzed in terms of the structural and design characteristics of the rooms in order to isolate the factors responsible for thermal discomfort. The principal factors were found to be the orientation of the room, whether windows are provided in one side or more than one side of the room, the structural weight of the building, and the occurrence of external noise near the room. Discomfort assessments were correlated with these building features and with calculated peak temperatures that combine their effects. Significant relationships between the two were demonstrated. Document Not Available from EDRS

Descriptors—\*Classroom Environment, \*Climate Control, \*Clothing, Educational Facilities, Graphs, Human Engineering, School Buildings, Tables (Data), \*Temperature, \*Thermal Environment

Identifiers—England

This article describes a study of summertime classroom temperature and its relationship to the clothing worn by English secondary school children. Data on classroom temperatures and children's clothing were recorded during one summer for a total of 987 lessons. Analysis of the data showed that the strong clothing-temperature correlation could be used to deduce the proportion of children in thermal comfort. The clothing observations were supplemented by a more limited conventional comfort study. These subjective data agreed well with the results that had been deduced from the clothing observations. A comparison was also made with other subjective work and with predictions made on the basis of heat exchange theory. Consideration of the results suggests that for thermal comfort classroom temperatures should rarely exceed 26 degrees Centigrade and that departures from the prevailing mean temperature should not normally exceed 2 degrees Centigrade. For children in shirtsleeves or summer dresses, the optimum temperature was 24.5 degrees Centigrade, and for children wearing jumpers or blazers, it was 21.5 degrees Centigrade. (Author/JG)

The Relationship of Saccadic Eye Movements to Reading Disabilities. Final Report.

State Univ. of New York, Stony Brook.

Spons Agency—National Inst. of Education (DHEW), Washington, D.C. Office of Research Grants.

Pub Date Dec 73

Grant—OEG-2-2-2B024

Note—26p.

EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage

Descriptors—Childhood, Exceptional Child Research, \*Eye Movements, \*Eyes, Learning Disabilities, Program Effectiveness, \*Reading Difficulty, \*Remedial Reading, Tutoring, \*Visual Perception

Identifiers—\*Saccadic Eye Movements

Saccadic (small, rapid, and apparently involuntary) eye movements of 14 children (7- to 12-years-old) with reading difficulties and of 14 normal readers were compared before and after the problem readers underwent a 7-month individual tutoring program. At pretesting the problem readers showed a rate of eye movements that was markedly lower than that of the normal readers whose rate they attained and surpassed or surpassed at completion of the remedial reading program. Results suggested that saccadic eye movements are not involuntary and are susceptible to training for improved reading, attention, and information gathering. (Author/DB)

Mainstreaming: The Educable Mentally Retarded. National Education Association, Washington, D.C.

Pub Date 75

Note—55p.

Available from—National Education Association of the United States, 1201 16th Street, NW, Washington, D.C. 20036 (NEA Stock No. 1800-1-00, \$2.00)

EDRS Price MF-\$0.76 Plus Postage. HC Not Available from EDRS.

Descriptors—Behavior Patterns, \*Curriculum, Definitions, \*Educable Mentally Handicapped, Exceptional Child Education, Mentally Handicapped

dicapped, \*Regular Class Placement, Special Classes, \*Teaching Methods

Designed for teachers, the book discusses characteristics of retardation and suggests teaching strategies for retarded children in regular classes. Statistics and definitions of the levels of retardation are described, environmental influences are summarized, and diagnostic factors are reviewed. Discussed are physical, intellectual, and psychological characteristics of the retarded. It is explained that basic skills, social adjustment and occupational competence are the goals of education for the educable retarded. Reviewed is criticism of special class placement, and suggested are instructional methods (such as individualized work centers) for use with retarded children in regular classes. Possible problems for the teacher are seen to include poor student motivation and lack of participation in class. Described are aspects of program content, structure, and evaluation for the educable retarded child in regular elementary school classes. (CL)

Descriptors—Aurally Handicapped, \*Deaf, Exceptional Child Education, \*Guidelines, Historical Reviews, Post Secondary Education, \*Program Design, Program Development, Program Evaluation, Program Planning, \*Technical Education, \*Vocational Education

The last in a series of six monographs summarizes findings from a study of three postsecondary vocational technical programs for deaf students and provides guidelines for the development and monitoring of such programs. Introductory materials provide a historical perspective on the problems of vocational technical programs for the deaf, a review of the literature, and statistical data on the vocational status of the deaf. Outlined are the contents of each monograph in the series, and summarized are project findings (detailed in preceding monographs). Guidelines for establishing vocational technical programs for the deaf within existing facilities for students with normal hearing cover the following topics: organizational structure, program priorities, role definition, deaf staff members, key personnel (such as interpreters) other supportive personnel, and other supportive services (such as manual communication training). Descriptors—\*Academic Achievement, Aurally Handicapped, \*Deaf, Early Childhood Education, Exceptional Child Research, Expressive Language, \*Longitudinal Studies, Oral Communication, \*Preschool Education, \*Program Effectiveness, Program Evaluation, Receptive Language, Special Schools

Identifiers—Total Communication

Presented is the fourth year report of a 4-year longitudinal study comparing effectiveness of seven preschool programs for deaf children. Schools are seen to emphasize either an oral-aural, Rochester (Oral-aural plus finger spelling), or total communication method of instruction. In-

cluded in the report are a brief review of literature on educational programs for the deaf, summaries of earlier yearly reports, descriptions of the programs and subjects studied, project findings, and appendixes (such as a classroom observation schedule). Among findings reported are: that Ss' scores on the Illinois Test of Psycholinguistic Abilities (ITPA) were almost identical to the scores of normal hearing children; that Ss' scores on the Metropolitan Achievement Tests Primer Battery were equal to those of hearing children in reading and were lower in arithmetic; that scores on a Receptive Communication scale showed sound alone to be the least efficient communication mode (44 percent) rising to 88 percent when speechreading, fingerspelling, and signs were added; that improved scores on a test for understanding the printed word (76 percent as compared to 56 percent in 1973 and 38 percent in 1972) reflected increasing emphasis on the teaching of reading; and that deaf children who have been "mainstreamed" do not differ in intelligence, reading, arithmetic achievement, ITPA scores, or overall communication abilities. Case Studies of Two Down's Syndrome Children Functioning in a Montessori Environment. Research Project.

Pub Date Apr 74

Note—61p.; Master's Thesis, University of Dayton

EDRS Price MF-\$0.76 HC-\$3.32 Plus Postage

Descriptors—\*Case Studies, Child Development, \*Educational Methods, Exceptional Child Education, Females, Mentally Handicapped, \*Mongolism, Preschool Education, \*Program Effectiveness, \*Regular Class Placement, Teaching Methods

Identifiers—\*Montessori Method, Piaget (Jean)

Presented are case histories of two Down's Syndrome (Mosaic form) 6- and 10-year-old girls who attended regular Montessori classes. General characteristics of Down's Syndrome and other retarded children are reviewed and compared with the two girls' growth and development (according to Piaget's proposed stages). The Montessori emphasis on sensorial activities and on individual freedom to choose tasks is seen to enhance the retarded child's development. Analyzed are the girl's progress in such skill areas as language, reading, and math. The children are said to be functioning in Piaget's preconceptual and intuitive stages. Emphasized is the need for an approach which includes raised social and academic expectations along with instruction in independence and self-direction. An appendix lists suggested Montessori materials and activities for handicapped children. (CL)

Identifiers—New Jersey

The manual contains a survey of literature on the resource room approach to mainstreaming for educable mentally retarded children. Intended to facilitate educational planning in New Jersey, the manual reviews research on such topics as the historical development of special education services; admissions procedures; the impact of judicial decisions that reflect changing attitudes toward special education programming; and mainstreaming issues, including the efficacy of special class placement and the effects of labeling. The inconclusive nature of research findings concerning special placement is discussed, and the resource room as an alternative instructional model is explained. (LH)

Identifiers—Elementary Secondary Education Act Title III, ESEA Title III, Needs Assessment, New Jersey

The manual explains how to plan, implement, and evaluate an alternative learning resource center approach to mainstreaming for elementary school students classified as educable mentally retarded, perceptually impaired, or neurologically impaired. (It is noted that a 3-year learning center demonstration project, funded under Title III, was developed to serve 58 handicapped students attending the Winslow Township, New Jersey public schools.) Summarized in chart form is the Program Evaluation and Review Technique (PERT) for identifying and implementing steps in

developing a learning center program. Individual chapters are devoted to three major components: paving the way (including needs assessment and development of program acceptance); program planning and development (including goals, facilities, policies, and services); and program implementation and operation (including activities, screening and referral, and evaluation). Five appendixes include a statement of New Jersey's mainstream philosophy, guidelines for a resource room program, and a sample resource room observation form. (LH)

**Identifiers**—\*Maryland (Howard County), Needs Assessment

Reported are results from a needs assessment study on handicapped Howard County (Maryland) residents including information on basic population characteristics, inadequate community services for the handicapped, and recommendations for service improvement. Among findings discussed are that 4.3 percent of the population is handicapped; that the most common handicapping conditions are miscellaneous health impairments, special learning disabilities, and speech and orthopedic handicaps; and that 54 percent are school age, 40 percent are adults, and 5 percent are preschoolers. Also considered are identified needs such as inadequate availability and dissemination of information about services for handicapped residents, lack of supportive mental health services oriented to the needs of the handicapped and their families, and a need for group residential housing. Among recommendations presented are the establishment of a citizens' committee for the handicapped, the con-

sideration of new residential living approaches for handicapped persons, and coordination of a county-wide recreation program for the handicapped. Also provided are charts, tables, and diagrams on handicapped population statistics, types of handicapped services available, and architectural barriers; as well as appendixes which include a review of literature and a description of a peer counseling program. **Identifiers**—\*Finland

Described are the planning, organization, provision, availability, and different organizational solutions of special education in Finland. The philosophy of special education is reported to closely follow Finnish school reform which emphasizes meeting the individual child's needs. Discussed are the availability of special education and special teachers, and the future plan to include special education content in the training of regular teachers. It is noted that the number of special schools is decreasing and that present emphasis is on increasing and improving clinic-type special education, remedial instruction, pupil welfare services given in connection with normal schools, and prevention of difficulties. Reviewed are educational programs (municipal and state) for cerebral palsied children and children with aural and visual handicaps. Included are two charts: one on the number of teachers and pupils in special education in 1973-74, and the other showing special education organization in the Finnish school system. (SB)

**Descriptors**—\*Auditory Perception, \*Etiology, Exceptional Child Research, Genetics, Hyperactivity, Incidence, \*Learning Disabilities, Maturation, Memory, Perceptually Handicapped, Research Reviews (Publications), \*Space Orientation, \*Theories

Research is reviewed in support of the author's hypothesis that the majority (60 to 80 percent) of learning disabled children are not brain damaged but have above average spatial ability and major deficits in auditory-vocal memory processing which are genetic in nature. Research is reported to support other aspects of his hypothesis such as the lack of visual problems in the spatially competent learning disabled (SCLD) group, the frequent occurrence of a general maturational lag in SCLD males, and the common presence of hyperactivity is also due to an inherited maturational lag. Research is reviewed in the areas of birth order, sex of siblings, neurological impairment, pregnancy and perinatal factors, hyperactivity and brain damage, the nature of hyperactivity, the management of hyperactivity, the inheritance of specific abilities and disabilities, specific abilities underlying reading and other language processes, the good spatial ability but poor auditory-vocal memory skills in SCLD children, the incidence of SCLD children, and the effectiveness of remediation programs. **Identifiers**—\*Project PRIME, Texas

Described is the role of the Center for Innovation in Teaching the Handicapped (CITH) in Project PRIME (Programmed Reentry into Mainstream Education), which attempted to assess the efficacy of mainstreaming for 1,035 emotionally disturbed, educable mentally retarded, and language/learning disabled Texas pupils in grades 3-5. The behavior categories of four classroom observation systems used in the project to record types of behavior management, levels of cognitive demand, amount of pupil participation, and quality of classroom climate are outlined. Details are given on the development and contents of training packages for the observation systems (which include audio and video tapes). Procedures are explained for training 528 observers, for maintaining quality control, and for assessing reliability during observer training. Appendixes include time records of CITH personnel, and the observations of a workshop trainer. (LS)

**Descriptors**—Exceptional Child Education, \*Expectation, \*Games, \*Handicapped Children, Material Development, Student Teaching, \*Teacher Attitudes, \*Teacher Education

Discussed is the development of games which provide teacher-trainees with experience in anticipating the responses of different types of handicapped children to different tasks. It is explained that the games are inexpensive, that they permit the trainee to become a participatory observer in an interactional setting, and that they provide immediate feedback based on empirical data. Four sample games are described in which trainees anticipate responses from student populations such as foreigners or the emotionally disturbed. The process of developing anticipation games is outlined in the following steps: task analysis, preparing question cards and collecting notes, designing and developing the game, and constructing testing instruments and validating the game. Appended are specific instructions for two variations of anticipation games. (LS)

Provided are the rationale, content and strategy for an introductory course in instructional design for special education teachers. The teacher's need for varied competencies in instructional design, management and interaction are discussed. It is recommended that teacher training include development of such design skills as task analysis, learner analysis, specifying objectives, constructing criterion-referenced tests, using formative evaluation to modify materials, and validating instructional materials. The course content is seen to include development of a programed instructional unit and mastery of other instructional packaging formats such as multimedia packages, materials with psychomotor or affective objectives, and managerial materials. Described are basic strategies for training instructional designers (such as modeling and editorial guidance), resource materials, and application of the Keller method of individualized self-study instruction. Two appendixes contain lists of behavioral objectives for competencies in programed instruction and readings for the instructional design course. (LH)

**Identifiers**—Pennsylvania (Philadelphia), Philadelphia Open Classroom Project

As part of an ongoing study of handicapped children in the open classroom, 12 children (in grades K through 4) were observed who had been identified by their teachers as either benefiting most or least from open class instruction. The literature review of the entire study focused on the critical variables (teachers' roles, individual differences, and individualized instruction) involved in using the open classroom for special education. In the experiment reported, Ss behavior over 5 hours was classified as either academic vs. nonacademic; amount of time spent with teachers, peers, or alone; and positive vs. negative interactions. It was found that Ss spent more time in nonacademic activities than academic, alone and with peers than with teachers, and in positive interactions. Preliminary findings of the entire study suggested that, in comparison to instruction in traditional classrooms, considerably more peer helping takes place in the open classroom; younger or poor achieving children are learning incidentally considerable material in the open classroom that is presented to older children; younger children in the open classroom engage in activities usually associated with older children; and teachers seem to perceive less deviant behavior and less underachievement in the open classroom, leading to fewer referrals for psychological examinations, testing, and special class placement. (Graphs are provided to illustrate statistical data from the research project.) (SB)

Descriptors—Administrative Problems, \*Educational Trends, Exceptional Child Education, \*Handicapped Children, \*Inservice Teacher Education, \*Interagency Cooperation, \*Program Design, Program Development, Regular Class Placement, Teachers  
Identifiers—\*Project CHILD

Current trends in exceptional child education are discussed in relationship to the need for better inservice training (IT) to upgrade the readiness of regular teachers to include exceptional children in their classes. Noted are trends such as increasing numbers of exceptional children in regular classrooms, and fewer children institutionalized or exempt from public educational programs. Listed are common complaints of educators regarding most IT programs such as that programs are uninteresting. Offered for IT implementation are three guidelines: design the program to fit the need, insure cooperation between teacher training institutions and the public schools, and develop a National Inservice Teacher Education Program. Described as a model of a cooperative program is Project CHILD (Cross-discipline Help for Individual Learning and Development), which provides inservice training to regular teachers with learning disabled children in their classrooms. Descriptors—Criterion Referenced Tests, Effective Teaching, Exceptional Child Education, \*Handicapped Children, Material Development, \*Reading Diagnosis, Research Projects, Special Education, \*Student Evaluation, \*Teacher Education

Identifiers—\*Informal Assessment

Described is the development and evaluation of a module for teaching special education teacher trainees to determine a pupil's instructional reading level through the use of an informal reading inventory (IRI). Among the topics covered in Part I on developing the instructional module are needs assessment, a review of relevant literature, review and evaluation of existing modules, task and concept analyses used to formulate instructional objectives for the module, the design of criterion-referenced tests and prototype materials, and formative evaluation. Discussed in Part II is the project's summative evaluation phase, in which the module's effectiveness was tested with 62 university students enrolled in three special education methods classes. It was concluded that the module was an effective tool for helping trainees to determine the instructional reading levels of exceptional pupils. Included in the extensive appendixes are materials for the needs assessment study; detailed instructions for utilizing, coding, analyzing, scoring and interpreting an IRI; and a sample achievement test with scoring rules and answer key. Examined are several tests designed to measure language development in retarded children and possible options for research. Past attempts (such as Berko's Test of Morphology) to evaluate retarded children's linguistic development are criticized for inadequate language definitions and invalid testing methods. Suggestions for data-gathering options are explored which include the use of traditional linguistic analysis and the development of a scale to classify the spontaneous utterances of young children. Descriptors—Educable Mentally Handicapped, Elementary Education, Exceptional Child Research, Feedback, \*Handicapped Children, Interaction Process Analysis, Mentally Handicapped, \*Negative Reinforcement, \*Performance Factors, \*Positive Reinforcement, Student Teacher Relationship

Cited are two studies which analyzed the reinforcing effectiveness of verbal evaluative comments on educable retarded and handicapped elementary school children. In the first study, a two-choice push button discrimination, it is reported that Ss consistently chose a button which avoided the verbal comment "wrong", but made no significant distinction between "good" and a neutral nonsense word. In the second study, naturalistic observations of teachers' evaluative comments in six special education classes are said to indicate that positive comments were less informative than negative evaluation. It is explained that both studies supported the hypothesis that positive comments occur more frequently and serve more diverse functions than negative evaluations. (CL)

Descriptors—\*Attitudes, \*Cognitive Processes, \*Educable Mentally Handicapped, Exceptional Child Research, Games, Mentally Handicapped, Programmed Instruction, \*Teacher Education, \*Teaching Methods

Compared was the relative effectiveness of using games or programed instruction (PI) to transmit information about cognitive similarities between educable mentally retarded (EMR) and nonretarded children to 56 special education teacher trainees. Trainees were randomly assigned to one of two treatment groups (game or PI) or to an attitude control group; and their responses were analyzed to the treatment as well as to a criterion test and a questionnaire concerning attitudes toward handicapped children. Neither method resulted in changed general attitudes about handicapped children. However, PI seemed to be the better choice for Ss because the PI group made significantly fewer errors, took less time to complete the task, and had more members who could correctly state the generalization that EMR and nonretarded children would have the same response. Descriptors—Educable Mentally Handicapped, Exceptional Child Research, \*Games, \*Inservice Teacher Education, Mentally Handicapped, \*Prediction, Secondary Education, Teacher Characteristics

Described is the development and evaluation of an anticipation game for measuring the ability of 30 special class teachers to predict responses of 290 educable retarded secondary students. The game was based on normative data from the students' responses to a 70 item test. The evaluation phase is said to involve 15 teachers playing 30 rounds of the anticipation game and their subsequent predictions about 10 pupils' responses to 20 curriculum questions. Results are cited which suggest that the experimental teachers' prediction accuracy increases as a function of the number of rounds they played; that the anticipations of experimental and control group teachers were not significantly different; that teachers were more accurate predictors of higher IQ than lower IQ retarded students; and that teachers were more accurate in predicting responses for practical rather than academic questions. Seven appendixes include that test used in collecting normative data and two sample games. (CL)

Descriptors—Exceptional Child Research, Feedback, \*Interaction Process Analysis, Mentally Handicapped, Observation, \*Performance Factors, \*Precision Teaching, Teacher Education, \*Trainable Mentally Handicapped

Investigated was the effect of training in precision teaching and interaction analysis on the performance of eight moderately retarded 10- to 20-year-old pupils. Seven hypotheses were formulated regarding two questions: Do rates of teacher-selected teacher and pupil behavior differ before, during, and after feedback conditions? Do rates of three questioning patterns differ before, during, and after feedback conditions? Interaction analysis data were gathered for 30 teaching sessions under three conditions: tutoring before training and feedback, training and subsequent feedback regarding verbal interactions, and removal of feedback. Results suggested seven conclusions, including lack of correlation between selected pupil and teacher categories when amount of change was not specified, and the ability of the moderately retarded to produce broad responses. Five appendixes, including a description of the coding system, are provided. (CL)

Compared was the relative effectiveness of two teacher questioning styles on the motivation and learning of eight intermediate educable mentally retarded pupils. Interactive process data and pupil achievement on a recall posttest were examined for two different types of lessons: one utilizing "episodic" questions (that encouraged the child to relate his personal experiences to lesson content) and the other utilizing "semantic" questions (which emphasized only the recall and processing of factual material). Results revealed differences in teacher behavior, pupil responses, pupil language production, teacher-pupil interaction, and pupil recall. For example, greater self-initiated pupil response, individual pupil verbal output, and teacher probing of pupil responses occurred during episodic teaching; but teachers provided more positive feedback and students were more able to recall new information during semantic teaching. A study of 70 educable mentally retarded children (9- to 13-years-old) was conducted to examine the effects of special class teachers' use of an attentional cueing technique in response to oral reading errors. During oral reading lessons, errors were recorded under conditions in which the teacher was either instructed to make her normal responses to oral reading errors (control group) or use the five-step attentional cueing technique (experimental group). In comparison to controls using single- or multiple-cue responses to pupil errors, findings showed a significant error difference in favor of the experimental condition. Evidence suggested that mildly retarded children learn more new words from teacher responses to oral reading errors which provide a highly consistent, structured, attentional form of feedback than from teacher responses incorporating the normal variety of cueing behaviors. Study limitations included deviations from normal teaching patterns and the relatively small sample. (Provided are tables illustrating statistical data and appendices containing information on lesson materials and the five-step cueing technique.) (SB)

**Descriptors—Behavior Patterns, Early Childhood, Exceptional Child Research, Interaction Process Analysis, Literature Reviews, \*Mentally Handicapped, \*Mother Attitudes, \*Parent Child Relationship, Research Design, \*Teaching Methods, \*Trainable Mentally Handicapped**

Identifiers—\*Final Reports

A study was conducted to compare teaching and control patterns used by mothers of 4- to 6-year-old trainable mentally retarded (TMR) children to patterns used by mothers of nonretarded children, and to evaluate an analysis strategy identifying sequential behavior chains from observational data. Literature was explored on three topics: cognitive characteristics of TMR children, maternal attitudes toward handicapped children, and techniques for studying parent-child interaction. Ss were split into six groups consisting of the mother with the target child (either nonretarded, TMR, or older TMR) and a sibling of the target child; and each S group was given four experimental tasks (such as block stacking and sorting). Recorded were the proportion of time spent at each task and the number of transitions between each of six interaction patterns (such as elaborated explanation and residual patterns). Results did not support the major hypothesis that mothers teaching moderately retarded children would use more restricted patterns than mothers teaching nonretarded children (either of equal chronological age or of level of social competence). The negative finding may have been due to insufficient differentiation between elaborated and restricted interaction patterns. Analysis procedures demonstrated the value of the computer-based system for coding and processing data. (Tables, illustrations, pictures, and appendices are provided.) (SB)

**Descriptors—\*Academic Achievement, Childhood, \*Educable Mentally Handicapped, \*Effective Teaching, Exceptional Child Education, Interaction Process Analysis, Mentally Handicapped, \*Student Teaching, Teacher Characteristics, \*Teacher Evaluation**

Examined was the feasibility of using the achievement of 29 educable retarded 10- to 12-year-old students to measure teaching effectiveness of 12 special education teacher trainees, and investigated was the relationship of trainee characteristics, classroom process, and educable retarded pupil learning. The Individual Cognitive Demand Schedule and the Indiana Behavior Management Scale were used to record process variables during each 30-minute instructional period, and pupils were administered achievement tests covering the lesson's content area. Results of the study indicated that: the method developed was feasible; some generalizability of teaching ability existed across the content areas; there were differences between the beginning and student teacher groups in teaching methods and pupil achievement; almost no stable relationships between trainee characteristics and teaching ability were found; and although few consistent relationships between pupil learning and process variables were found, the group that obtained higher pupil achievement scores (beginning trainees) tended to use more informational and negative feedback and less positive feedback than did the group that obtained lower scores (student teacher trainees). **Identifiers—\*Indiana**  
 Described is a hierarchical model delivery system for educational services to children with learning disabilities which provides three types of interrelated centers: university based centralized centers in highly populated areas offering complete services (Type I), satellite centers in communities which focus on the dissemination of new techniques and materials (Type II), and centers serving small rural school systems with minimal resources (Type III). It is proposed that Indiana develop three Type I centers, 17 Type II centers, and 34 Type III centers. Listed are activities of each type of center such as the development of identification/diagnostic screening processes (Type I). The functional resources of the Child Service Demonstration Center (the present Type I center) are described as including an instructional development laboratory, an evaluation unit, a teacher education laboratory, and a dissemination and retrieval unit. It is stressed that the proposed model accounts for demographic variables which often limit services provided to learning disabled children. Also provided are a flow chart of type I center activities, an organizational chart, and a table detailing information needs. (DB)

**Descriptors—Blind, \*Body Image, Check Lists, \*Curriculum Guides, Elementary Education, Exceptional Child Education, Learning Modalities, Partially Sighted, Perceptual Motor Coordination, \*Sensory Training, Student Evaluation, Travel Training, \*Visually Handicapped, \*Visually Handicapped Mobility**

**Identifiers—Illinois, Informal Assessment, \*PreCane Skills**

Intended to help classroom teachers develop basic orientation and mobility skills in young visually impaired children, the curriculum guide contains five interrelated sections that deal with body image, basic sensory concepts and abilities, motor coordination, sensory modalities, and pre-cane skills. Each section contains a brief introduction and definitions of specific skills to be developed; checklists in chart form suitable for individual needs assessment and posttesting; and suggested activities, games, materials, and references. Noted are low vision and mobility aids kits and an orientation and mobility slide-

tape presentation that are obtainable from the Instructional Materials Center of the Illinois Office of Education. The section on pre-cane skills features a script of the slide-tape presentation and illustrations of basic skills to be taught. Also included in the guide are a glossary, a bibliography of 56 references, and extra copies of the needs assessment charts. (LH)

Descriptors—Conference Reports, \*Curriculum Design, Effective Teaching, Exceptional Child Education, \*Handicapped Children, \*Performance Based Teacher Education, Program Planning, \*Research Needs, \*Research Reviews (Publications), Special Education, Teacher Certification

Intended to supplement previously reported conference proceedings on the preparation of special educators, the paper presents an overview of the structure of performance-based teacher education (PBTE) and certification, reviews research on selecting relevant program options, and identifies future research needs. Briefly covered are the following structural phases: selection, training, certification, and process and product criteria for evaluating work success. The author points to limited research bases for selecting one PBTE program option over another and recommends using the "General Catalog of Teaching Skills" as one approach for identifying skills and knowledge that should be incorporated into teacher education programs. Katz, Lee

Analysis of Selected Social and Psychological Factors Related to Mental Retardation.

Pub Date Nov 70

Note—26p.

EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage

Descriptors—Classification, Disadvantaged Youth, \*Economically Disadvantaged, \*Environmental Influences, Exceptional Child Education, Intervention, \*Labeling (of Persons), \*Mentally Handicapped, Public Schools, Research Reviews (Publications), Self Concept, \*Socioeconomic Influences

Discussed is the impact of poverty, public education, and self-concept on the classification of persons as mentally retarded. Research relating to the effects of poverty on academic performance is reviewed, and intervention strategies such as improved housing and provision of a guaranteed minimum wage are suggested. Community control and decentralization are seen to be among the ways to make public education more responsive to the needs of lower income children. The effect of poor self-concept on behavior and intellectual functioning is considered, along with recommendations for new efforts (such as M. Fantini's "Identity Education") directed at the individual's affective experiences. (CL)

Mainstreaming: Idea and Actuality.

New York State Education Dept., Albany. Div. for Handicapped Children.

Pub Date [73]

Note—24p.

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—Bibliographies, \*Educational Alternatives, \*Educational Philosophy, Exceptional Child Education, \*Handicapped Children, Open Education, \*Program Planning, \*Regular Class Placement, Resource Centers, Resource Teachers, Role Perception

The importance of mainstreaming (helping handicapped children achieve maximum participation in regular school programs) is emphasized, and underlying concepts are explained. Methods for implementing mainstreaming in protected settings (such as hospitals) and in regular classrooms (through the use of helping teachers, resource rooms, a modified resource program, or open classrooms) are described. Noted are the following common elements of successful mainstreaming programs: preparation, pacing (selective integration), specificity (redefining the special educator's role), and flexible placement. Also included is an annotated bibliography of 14 references on mainstreaming in action. (LH)

Chronically Ill Children: A Psychologically and Emotionally Deviant Population?

Virginia Univ., Charlottesville.

Spons Agency—National Inst. of Mental Health (DHEW), Rockville, Md.; National Science Foundation, Washington, D.C.

Pub Date Apr 75

Note—22p.; Paper presented at the Annual Meeting of the Society for Research in Child Development (Denver, Colorado, April 1975)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—Adolescents, Asthma, \*Aurally Handicapped, Childhood, Diabetes, \*Emotional Adjustment, Exceptional Child Research, \*Personality Assessment, Social Adjustment, \*Special Health Problems, \*Stress Variables

Identifiers—Cystic Fibrosis

To investigate vulnerability to psychological and emotional stress among chronically ill children, a battery of personality tests was selectively administered to 144 children (5- to 19-years-old) afflicted with one of the following conditions: diabetes, asthma, cystic fibrosis, or hearing impairment. Analyses centered on comparisons of norms developed for each scale with overall sample scores and scores broken down by age, sex, and type of illness. While some differences from normal children were noted (such as the hearing impaired Ss deviated from established norms in terms of lowered self-concept and that adolescents tended toward introversion), results consistently demonstrated Ss' functional strengths and coping abilities rather than their deviance from the norm. Descriptors—Administration, Educational Technology, Exceptional Child Education, \*Handicapped Children, \*Instructional Materials, \*Instructional Media, Regional Programs, Special Education, State Programs

Presented is an elaboration of the workscope of the ALRC (Area Learning Resource Center) network which provides instructional media, materials, and technology services to special education programs. Focused on are the following three of six workscope areas: state program development; media, materials, and educational technology training; and project administration. Charts of the ALRC network and functions are provided. Discussed are seven functions of the ALRCs in the area of state program development, including assisting states in stimulating local or state materials centers and providing technical assistance to State Education Agencies in state planning of intrastate materials and services. Detailed are the following workscope elements in the area of media, materials, and educational technology training: helping trainers to identify

media, materials, and educational technology training needs; helping trainers to locate extant and usable training programs and materials; and classifying, describing, and encoding media-training materials for information base entry. The final area of project administration is covered by consideration of workscope elements which center on ALRC activities in project planning, monitoring, reporting, and other management functions. A Program Evaluation Manual for Project Initiators. Final Report.

Arizona Univ., Tucson. Dept. of Special Education.

Spons Agency—Bureau of Education for the Handicapped (DHEW/OE), Washington, D.C. Bureau No—BR-H-12-2145B

Pub Date Jun 74

Grant—OEG-0-714425

Note—54p.

EDRS Price MF-\$0.76 HC-\$3.32 Plus Postage

Descriptors—\*Administration, Demonstration Projects, \*Educational Accountability, \*Evaluation Methods, Exceptional Child Education, Guidelines, \*Handicapped Children, \*Program Evaluation

Intended for directors of special education projects, the manual provides guidelines for program evaluation. It is explained that the manual developed out of the experiences of the staff of the Leadership Training Institute in Learning Disabilities which provided technical assistance to 43 state projects. The manual's eight major sections focus on the following topics: alternative approaches to program evaluation and accountability; framework involving implementation, progress, and outcome aspects of evaluation; initial considerations in planning an evaluation; possible evaluation questions and priorities of various interested groups and agencies; selection of issues to be evaluated; 13 types of evaluation designs ranging from the simple to the more complex; suggestions for writing the evaluation plan including casting evaluation questions into behaviorally stated questions; and the transfer of responsibility to the on-site project director. Stressed for successful program evaluation are cooperation with all interested parties (such as educational administrators) and the use of evaluation results as feedback for modification of the program model. Descriptors—Definitions, \*Delivery Systems, Demonstration Projects, Exceptional Child Research, Intelligence Quotient, \*Learning Disabilities, \*National Surveys, Resource Centers, Slow Learners, \*Student Characteristics Identifiers—\*Child Demonstration Centers

The characteristics of the approximately 2,800 children (in 21 states) enrolled in 24 child ser-

vice demonstration centers for the learning disabled were evaluated. Focused on were questions such as ages of children, intellectual level, sex distribution, and methods used for the delivery of services. Among findings were that the median IQ was 93; that the children were retarded an average of 1.7 grades in reading, 1.2 grades in arithmetic, and 1.8 grades in spelling; that the median chronological age was 8 years 10 months; that there were approximately three boys to each girl receiving services; and that the resource room was the most commonly used method for delivery of services. Results suggested that children enrolled in child service demonstration centers frequently do not fit the federal definition of specific learning disabilities in that many children are equally retarded in reading, spelling, and arithmetic; are minor or moderate in their degree of underachievement; and have IQs below 90. At the North Carolina State Conference on the Gifted and Talented teachers and administrators explored new ideas, materials, and teaching techniques. Outlined are presentations on the following topics: a demonstration encouraging creative thinking; teaching the gifted using the theories of B. Bloom and D. Krathwohl; typical daily learning styles and techniques for the classroom; a lesson plan to encourage imagination through art; encounter-simulation activities; learning centers, individualized instruction, and learning activity packages; teaching values and decision-making techniques; and scientific and mathematical elaboration in the classroom. Focused on are a speech on trends in gifted education and a workshop on J. P. Guilford's Structure of Intellect (SI) model including its history and use; application to seven individual profiles; and its use in the development of instructional materials. Also included are appendixes detailing the SI model, illustrations, charts, and tables. (SB)

Descriptors—\*Annual Reports, \*Discovery Learning, Exceptional Child Education, \*Gifted, \*Institutes (Training Programs), Secondary Education, Student Participation, \*Summer Programs

Identifiers—North Carolina

Presented are summaries of 11 selected projects in the areas of language arts, instructional media, simulation, and the valuing process developed during the 1974 summer session of the Teacher Training Institute of the Governor's School (North Carolina) by institute teachers and gifted students. Outlined are language arts projects on the history of English and science fiction used to develop speech and writing skills. A film planned, organized, and illustrated by students from the art and music departments and a videotape correlating all subjects together are cited as instructional media designs. Recommended are the simulation activities of imagining schools in the future and role playing as related to transactional analysis. Discussed are projects which demonstrate the valuing process in the following issues: eugenics, drug use, freedom and authority, capital punishment, and the ideal school. (SB)

Identifiers—\*Austria

This curriculum guide details a 10-week German language course on Austria for advanced high school students. It is intended to help students develop skills of listening comprehension, reading, speaking, and writing German; to add to their knowledge of German grammar and vocabulary; to acquaint them with Austrian history and culture, and to have them read and discuss works of Austrian literature. The course focuses on five basic areas: (1) Cultural patterns in Austria, including geography, population, cities and states, ethnic patterns and folklore, sports and recreation, education, religion, politics and government, business and industry, theater, music and cinema; (2) Austrian literature; (3) Austrian music; (4) History; and (5) Austrian art. For each section the guide provides a list of resource texts, films, slides or maps, student learning activities and educational objectives. Lectures, seminars, field trips, reading, and written essays are some of the planned activities. Evaluation will include quizzes, tests, and individual conferences. A list of sources providing information, films, and maps on Austria is appended. (CHK)

Descriptors—\*Annotated Bibliographies, Business Education, \*English (Second Language), \*English for Special Purposes, \*Instructional Materials, Language Instruction, Languages for Special Purposes, Medical Education, Reference Materials, \*Second Language Learning, Social Sciences, Technical Education

The teaching and learning of English as a foreign language for special purposes is the focus of this annotated bibliography. The first section lists textbooks on English in social and physical sciences, general technology, engineering, transport and agriculture, medicine and various areas of commerce, including business correspondence. The books were published in a wide geographical area, including England, Europe, and the United States. A short list of simplified English readers follows. The rest of the bibliography concerns research and writing on the use of English for special purposes, in articles, books, and reports; current research in Britain; and theses and dissertations. Bordie, John G.

Direct and Indirect Measures of Language Proficiency.

Pub Date 1 Jan 73

Note—11p.; Paper presented at the meeting of the Linguistic Association of the Southwest (LASSO) (January 1, 1973); Best copy available

**EDRS Price MF-\$0.76 Plus Postage. HC Not Available from EDRS.**

Descriptors—Elementary Education, Evaluation, \*Language Ability, \*Language Proficiency, Language Skills, \*Language Tests, \*Measurement Instruments, \*Measurement Techniques, Test Reliability, Verbal Ability, Written Language

There is a lack of adequate measurement techniques for testing language proficiency. Researchers compose specific tests for a certain task, but these have only limited general applicability. Often multiple-choice, true-false or fill-in-the-blank tests are used, but these rely heavily on written language and are inadequate for those with poor written but good verbal skills. Such tests tend to compartmentalize learning into components and neglect the overall view, and they generally reflect academic language rather than current vernacular. Norm-referenced, criterion-referenced and non-formal tests involving listing of words following a language cue may be affected by the individual's attitude toward being tested. Indirect tests may solve some of these problems by examining language produced in a non-test situation. Factors studied are sentence

length, structural complexity, lexical choice and type-token ration. Occurrences of linguistic mazes and cula-de-sac may also be observed. Second-stage indirect measures such as body language may also be useful. It is possible, however, that proficiency may be a mark of social rather than linguistic status. (CHK)

Bitransitive Clauses. Working Papers on Language Universals, No. 13.

Stanford Univ., Calif. Committee on Linguistics.

Pub Date Dec 73

Note—27p.

**EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage**

Descriptors—\*Contrastive Linguistics, \*Form Classes (Languages), Language Patterns, \*Language Universals, Nominals, \*Semantics, Structural Analysis, Syntax, \*Tagmemic Analysis, Verbs

Identifiers—\*Bitransitive Clauses

In this paper the bitransitive clause is defined in terms of its nuclear tagmemes: subject, predicate, direct object, and indirect object. A semantic characterization is given of the prototype bitransitive clause with a correlation of situational roles and grammatical functions. The nine different dominant orders in bitransitive clauses which were found in the languages surveyed are discussed as well as some order variations. A tabulation is shown of the languages studied showing the dominant bitransitive order of each language. A set of criteria is proposed for determining the dominant order when different orders occur in the same language in differing grammatical situations. Additional functional values of indirect object markers are discussed. The paper concludes with a list of proposed language universals, and a bibliography with references for both general and specific works in the field, including grammatical descriptions of various languages. The Development of the Perception of Phonemic Differences in Initial Consonants by English-Speaking Children: A Pilot Study. Papers and Reports on Child Language Development, No. 3.

Stanford Univ., Calif. Committee on Linguistics.

Pub Date Dec 71

Note—31p.

**EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage**

Descriptors—\*Auditory Discrimination, Child Development, \*Child Language, \*Consonants, English, Language Ability, \*Language Development, \*Language Research, Phonemes, Phonemics, Russian, Verbal Development

Speech discrimination by 12 children aged about 1 1/2 to 3 1/2 years was tested, using the discrimination learning procedure of Shvachkin's 1948 Russian study. Recent work on the acquisition of syntax and semantics shows an ordered acquisition for linguistic items; this pilot study was to test whether the ability to discriminate between consonants proceeds in a similar order and discrimination of any particular pair implies the ability to discriminate all others in order before it. Objects were given nonsense names differing only in initial consonants, and when the experimenter called one name, the children were requested to perform an action with the proper object to prove they could discriminate the consonants. Selection of subjects, experiment materials, scoring and testing procedures are detailed. Results show that Shvachkin's method is valid with American children, and an ordered sequence similar to the Russian order of classes of oppositions emerged. The acquisition orders are charted. Findings appear to justify a full replication study for English. (CHK)

Descriptors—Child Development, \*Child Language, Comparative Analysis, Females, \*Language Development, \*Language Patterns,

\*Language Research, Longitudinal Studies, Males, Psycholinguistics, Research Methodology, \*Syntax

Identifiers—\*Language Acquisition

A longitudinal study investigated early syntactic forms in child language; this paper reports on findings dealing with differences in approach to syntactic acquisition. Seven children aged 16-20 months were the subjects, and audio or video tapes were made once every three weeks beginning prior to the development of syntax. Data collection continued until 20 percent of the utterances specified a combination of subject + verb + complement. Analysis showed that the greatest difference among children was the length of time required to develop from the single word utterance to the subject + verb + complement structure—varying from 2 1/2 to 9 months. This reinforces the notion that speed of language acquisition varies considerably among children. It is noted that girls' syntactic development was considerably more rapid than boys'. Differences in syntactic acquisition based on speed and gender may be related to style differences in language development. Style differences between slow and rapid developers are examined in terms of presyntactic utterances, simplicity and complexity of utterance, indeterminate constructions not meeting English word order constraints, and subject and predicate specification. All factors showed a definite pattern relating to speed of syntactic acquisition. (CHK)

Identifiers—\*Hawaii, Pima

In view of the fact that the teaching of Standard English has high educational priority in American schools, and that its use as the medium of instruction makes it a vital skill for nonstandard speakers, the present paper reports on an investigation of the Standard English performance of young children from minority groups in which Standard English is not a primary language. The investigation technique described is that of elicited imitation, whereby the child is simply asked to repeat sentences containing grammatical features observed to show variation. Previous use of this technique and its advantages and disadvantages are discussed. The test itself appears in two forms, each one containing 15 sentences taken from recordings of natural speech. It is administered individually to children whose mean age is 5.5 years, by an adult tester, and recorded. Native speakers of English should perform better on the test, and the scores should improve with age, that is, further exposure to Standard English. The results confirm these predictions, thus demonstrating the validity of the test. Specific results are given for tests given to Mexican-American and Pima children, and to Hawaiian-Creole speaking children, the results from the latter being the most detailed. (CLK)

**Identifiers**—Elementary Secondary Education Act Title VII, ESEA Title VII

This handbook for primary school teachers and aides incorporates a variety of classroom ideas and materials related to the instructional component of the bilingual program. Written in English and Spanish, the handbook is designed to supplement the Fort Worth Public Schools bilingual curriculum, but it can also be used for language enrichment purposes. The material is presented in nine broad areas: (1) days, months, seasons; (2) colors, letters, numbers; (3) plants, animals; (4) self, family, community; (5) food, clothing; (6) holidays, special events; (7) classroom terms and expressions; (8) biographies; and (9) games, stories. The material has been organized in a format that allows supplementary material to be added as it is compiled, produced, and published. Terminology for mathematics, science, social studies, and health and safety have been included to supplement each area of the curriculum. Although no grade-level limitations have been placed on the use of the material, it is suggested that teachers adapt the ideas and activities suitable for their grade level to the curriculum for that grade. This teaching manual is the sixth in a series of seven (accompanied by a manual of self-assessment units) that have been designed for use in bilingual/bicultural programs. The components of the series may be used either individually or together. The subject discussed in this manual is a frontier area of cultural democracy that has far-reaching implications: promoting "bicognitive" development, that is, addressing education to children's potentials for cognitive flexibility as well as linguistic and cultural flexibility. Bicognitive development is held to be an asset for all children, but a necessity for culturally different children in the U.S. public school system, especially Mexican-American children. (Author/AM)

**Identifiers**—Child Embedded Figures Test, Elementary Secondary Education Act Title VII, ESEA Title VII, Field Independence, Field Sensitivity, Portable Rod and Frame Test

This teaching manual is the fourth in a series of seven (accompanied by a manual of self-assessment units) that have been designed for use in bilingual/bicultural programs. The components of the series may be used either individually or together. This manual is intended to familiarize teachers with ways of measuring cognitive styles in children. The teacher's objective is to deter-

mine whether a particular child is field sensitive, field independent, or "bicognitive." Two techniques of measuring cognitive style in children, the Portable Rod and Frame Test and the Child Embedded Figures Test, are described, along with their shortcomings. The major part of the manual describes how teachers can determine cognitive styles by observing children in the school setting, with the aid of "Child Rating Forms." These observations are used in assigning children to one of three instructional groups, and a different teaching strategy is used with each group. (Author/AM)

**Identifiers**—Elementary Secondary Education Act Title VII, ESEA Title VII

This teaching manual is the first in a series of seven (accompanied by a manual of self-assessment units) that have been designed for use in bilingual/bicultural programs. The components of the series may be used either individually or together. This manual explores the many issues concerning the responsibilities of public education to the Mexican-American child. A critical examination is made of assumptions of compensatory education. The melting pot theory, or enforced acculturation, is contrasted to cultural democracy or acculturation assistance. This view goes beyond recognition and respect to use and reinforcement of culture as an integral part of the majority culture. (Author/AM)

**Identifiers**—Elementary Secondary Education Act Title VII, ESEA Title VII, Miccosukee

This compendium of over 250 evaluation instruments in use by project sites throughout the U.S. is designed to assist bilingual/bicultural educators in locating, developing, or adapting evaluation instruments suitable to local assessment needs. The titles and descriptions of instruments listed are those provided by staff in bilingual/bicultural programs throughout the country. They include commercial and noncommercial sources as well as ESEA Title VII sources. The

main arrangement is by topic, and the index provides crossreferencing by title, author, and publisher. Instruments in seven languages other than English are included. These are: French, Spanish, Portuguese, Hebrew, Navaho, Chinese, and Miccosukee. (Author/AM)

Identifiers—\*Medical English

This text was written to acquaint the non-native speaker of English with the pronunciation,

usage and comprehension of English medical terms. A good science background and a knowledge of English grammar and usage are assumed. The volume is divided into five units: (1) Review of Oral English, (2) Vocabulary Exercises and Review, (3) Medical Prefixes and Suffixes, (4) Formation of Medical Terms, and (5) Medical Abbreviations. Vocabulary is taught in medical contexts. In Unit I, English vocabulary is typically presented in lists, exercises involve filling in blanks with appropriate words, and comprehension is practiced in dialog situations with short answer comprehension checks. Unit II contains a set of multiple choice exercises. Units III, IV and V are comprised of matching and short-answer exercises. The text is designed to be used by the student at his own pace. Though an answer key is not furnished, copious review sections are provided throughout. (CHK)

Svartvik, Jan, Ed.

Errata: Papers in Error Analysis.

Pub Date 73

Note—173p.; Papers presented at the Symposium on Error Analysis (Lund, Sweden, September 26-27, 1972)

Available from—Jan Svartvik, Lund University, Lund, Sweden (ISBN 91-40-03223-X)

Document Not Available from EDRS

Descriptors—\*Applied Linguistics, Contrastive Linguistics, Educational Objectives, \*Error Patterns, \*Interference (Language Learning), \*Language Instruction, Linguistic Competence, Linguistic Difficulty (Inherent), Linguistic Performance, \*Second Language Learning, Sociolinguistics

Identifiers—\*Error Analysis

Papers presented at the symposium of error analysis in Lund, Sweden, in September 1972, approach error analysis specifically in its relation to foreign language teaching and second language learning. Error analysis is defined as having three major aspects: (1) the description of the errors, (2) the explanation of errors by means of contrastive analysis, (3) a linguistic evaluation and the implementation of the results within teaching methods. The papers are divided into two major groups. The first nine, by N. E. Enkvist, G. Nickel, B. Hammarberg, P. Corder, F. A. Johansson, S. Johansson, H. Rossipal, and E. Lindell, examine the role of error analysis as a means of gaining a better understanding of the general processes of second language learning, and the relation of error analysis to concepts of interlanguage and communicative competence, to the goals of language learning and to problems of methodology. For example, bearing in mind the importance of looking at the sociolinguistic aspects of language learning, including student attitudes, the question of whether the goal of foreign language teaching should be communicative competence or linguistic conformity is raised. The nature of error analysis, which is not simply a process of error collecting, is examined. The last six papers, by C. Stendahl, E. Edstrom, K. Hyldgaard-Jensen, E. Moller, M. Gorosch, and M. Olsson report on specific studies and the application of the results. A bibliography by J. Arabski concludes the collection. (CLK)

Deletion of QUE in Montreal French - a Syntactic Rule.

Pub Date 74

Note—20p.

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—Form Classes (Languages), \*French, Language Research, Linguistic Theory, Phonology, \*Pronouns, \*Regional Dialects, Sociolinguistics, \*Syntax, Transformational Generative Grammar

Identifiers—\*Quebec (Montreal), QUE Deletion

This article argues that QUE-deletion in Montreal French is a syntactic rule, rather than a phonological one, as earlier treatments had claimed. It is divided into five sections: (1) a discussion of why the rule accounting for the alternation of QUE with zero is a deletion, not an insertion rule, (2) a critique of the best known earlier (phonological) accounts of the rule, (3) a proposed lexico-syntactic solution, (4) an argument for the syntactic nature of the rule on the basis of its ordering among related rules, and (5) a limited survey of QUE-deletion in other popular dialects, with a view to finding indirect evidence

as to its phonological or syntactic nature in Montreal French. This external evidence supports neither the phonological nor the syntactic solution conclusively. (Author)

Extent and Use of Indigenous Vocabulary in Guatemalan Spanish.

Pub Date 75

Note—14p.

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*American Indian Languages, Area Studies, Bilingualism, Cakchiquel, \*Culture Contact, \*Descriptive Linguistics, Diachronic Linguistics, \*Lexicology, Mayan Languages, Native Speakers, Semantics, \*Spanish, Uto Aztec Languages, Vocabulary

Identifiers—\*Guatemala, Word Borrowing

This paper examines the actual content and use of Indian vocabulary in standard Guatemalan Spanish, as opposed to the numerous entries found in antiquated dictionaries. Over 600 Indian words were extracted from contemporary Guatemalan literature and Lisandro Sandoval's "Semantica guatemalense." Interviews were arranged with middle and upper class speakers of Guatemalan Spanish in Guatemala City and Xelaju, the second largest city. The subjects were divided into four age groups: (1) 14-21, (2) 22-35, (3) 36-50, and (4) 51 and over. Several usage patterns emerged. Approximately 225 words were not recognized by any group. These words are semantically divided into terms for trees, plants, animals, rare insects, fish, Indian clothing, expressions for sick children, kinship, agriculture procedures, chiefs or bosses, the devil, and extinct professions. The oldest group recognized the most Indian words, and each progressively younger group was acquainted with fewer. Vocabulary used by all groups was divided into three groups: (1) Fruits and vegetables: achiot, aguacatal, caimito, camote, piloy, and pozol, (2) Animals: cutete, coyote, pijiye, and tucacin, and (3) Utensils and clothing: caite, comal, guacal and paxte. Descriptors—\*Cultural Awareness, \*Cultural Education, Foreign Culture, Instructional Materials, Language Instruction, Language Teachers, Manuals, Mexicans, Second Language Learning, \*Spanish, \*Spanish Culture, Spanish Speaking, \*Teaching Guides

The hypothesis underlying this volume is that certain cultural facts are necessary to understand and use a language correctly. The book was prepared to instruct the language teacher on concepts of Spanish and Latin American (chiefly Mexican) culture to be taught in a beginning Spanish class. The concepts are cross-referenced to be used with five major Spanish texts. The first four chapters of the manual are devoted to defining culture and examining cultural phenomena, values of cultural study and methods of teaching culture. The rest of the book contains instructional essays for the teacher of 42 aspects of life in Spanish-speaking countries, from use of titles and nicknames through social amenities, restaurants and eating customs, sports, theater and movies, the Spanish calendar and use of certain vocabulary. Essays are followed by suggestions for class discussion and drill. A bibliography on teaching culture is appended. (CHK)

Cultural Understanding: French, Level One. Selected Cultural Concepts Which May Be Developed in French Level I.

Alameda County Superintendent of Schools, Hayward, Calif.

Pub Date 71

Note—97p.; For related document, see FL 007 065

Available from—Alameda County Education Center, Rm. 45, 685 A. St., Hayward, Calif. 94541 (\$3.50)

EDRS Price MF-\$0.76 Plus Postage. HC Not Available from EDRS.

Descriptors—\*Cultural Awareness, \*Cultural Education, Foreign Culture, \*French, Instructional Materials, Language Instruction, Language Teachers, Manuals, \*Second Language Learning, \*Teaching Guides

This manual was prepared to instruct the language teacher on concepts of French culture to be taught in a beginning French class to students of any age. The cultural concepts are cross-referenced and intended to be used with five of the most widely used French texts. Certain deeper cultural concepts are meant to be used for longer unit presentation or activities. The first four chapters are devoted to definition of culture and examination of some cultural phenomena and the values of cultural study. Culture is defined as "the individual's role in the unending kaleidoscope of life situations of every kind and the rules and models for attitude and conduct in them..." It is noted that a cultural study should examine all aspects and be simultaneous with the beginning of foreign language study. The rest of the manual contains instructional essays for the teacher on 38 aspects of French culture from use of "tu" and "vous" to family and social life, restaurants and food, business customs, money, art and music, French geography, politics and religion. Each essay is followed by suggested instructional activities. A list of references and information sources is appended. (CHK)

Wieman, Leslie A.

Stress Patterns of Early Child Language.

Spons Agency—National Institutes of Health (DHEW), Bethesda, Md.

Pub Date 74

Note—19p.; Abbreviated version of Ph.D. Dissertation, University of Washington

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—Child Development, \*Child Language, Early Childhood, \*Language Ability, \*Language Development, \*Language Patterns, Language Research, Phonemics, Semantics, Syntax, Transformation Generative Grammar, \*Verbal Development

Identifiers—\*Stress Patterns

A study was undertaken to determine whether children in early periods of language development use stress with any regular patterns, and if so, on what the patterns are based. The subjects were five children aged 21-29 months, MLU between 1.3 and 2.4. Tape recordings were made during play sessions with each child. Two-word utterances that could be clearly interpreted were extracted and grouped and their stress was determined. Analysis indicates that children have strong stress patterns and that semantic relations are more important to the child's stress than syntax. In use of locative phrases with verb-locative, the locative was stressed in every case. In modifier-noun use, the modifier was almost always stressed, in contrast to transformation generative theory. Other stress priorities are noted and arranged in a scale. It is proposed that children distinguish whether information in utterances is new or contrastive and apply stress accordingly, following a semantic hierarchy. The evidence showing that children early produce regular and significant patterns of stress is important for the syntax vs. semantics controversy in adult stress assignment. (CHK)

Contrastive Linguistics and Social Lectology.

Pub Date Nov 73

Note—33p.

EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage

Descriptors—\*Contrastive Linguistics, Cross Cultural Studies, Dialects, \*Dialect Studies, \*Linguistic Theory, Morphemes, Morphology (Languages), Nonstandard Dialects, Puerto Ricans, \*Social Dialects, \*Sociolinguistics, Standard Spoken Usage

Identifiers—\*Social Lectology

In the past, social lectologists have not considered their work as contrastive linguistics. One reason is that sociolects of a language differ quantitatively; differences lie in the frequency

patterns with which certain forms occur in each lect. Contrastive linguistics deals with standard or idealized languages, while sociolects are often nonstandard or socially stigmatized. Contrastive social lectology began in the 1960s to study vernacular Black English to aid in teaching standard English to minorities. Quantitative measurement of variable linguistic forms aids in examination of speech differences as related to extralinguistic factors. It is necessary to identify social and linguistic environments affecting use of variants. This article charts the occurrence of several variants by social class; analysis reveals the operation of rules governing variable appearance. Optimal use of variables is controlled by a hierarchy of constraints, but a correct theory as to how this system works has not yet been formulated. This notion of structured variability provides a model for variation in interlanguage contrastive studies. In any contrastive study it is important to examine the actual lects contacted rather than idealized norms, as illustrated in a recent study of Puerto Rican English in East Harlem. (CHK)

Some Characteristics of an Effective Language Learning Program. CATESOL Occasional Papers, No. 1.

California Association of Teachers of English to Speakers of Other Languages.

Pub Date Aug 74

Note—12p.; Paper presented at the Annual Meeting of the California Association of Teachers of English to Speakers of Other Languages (San Francisco, California, April 26-28, 1974)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

Descriptors—Adult Education, Bilingual Education, Child Development, \*English (Second Language), English Instruction, \*Language Instruction, Language Teachers, Learning Characteristics, \*Learning Processes, \*Learning Theories, \*Second Language Learning

Children learn a second language quickly and easily simply by being exposed to it. Adults generally learn more slowly and less well. It is hypothesized that the brain in youth is extremely plastic, but hardens with adolescence and adulthood and becomes less receptive. Children learn in an active way, during play, and the language is reinforced by pleasure and by corresponding activities. Adults usually learn passively in a classroom involving only audiovisual methods and memory. Accordingly, the following characteristics of effective language learning programs are suggested. For children: Native-speaking teachers, several hours of instruction or exposure daily, linguistically unstructured activities, no corrections until the child is fluent, cultural lessons may or may not be used, supportive home-school environment. For adults: A well-trained, dynamic and patient teacher, students with expressed goals, daily or frequent classes that are both small and homogeneous, linguistically and methodologically sound textbooks, acting out situations in the language, varied modalities of presentation, minimum of correction, outside practice, availability of tutors, individualized instruction, explication of purposes and goals of a learning activity. Descriptors—\*Comparative Analysis, \*Computational Linguistics, Contrastive Linguistics, \*Data Collection, Descriptive Linguistics, Language Research, Linguistic Competence, Linguistic Performance, \*Research Tools, Semantics, \*Word Frequency, Word Lists

Identifiers—\*Brown Standard Corpus  
The paper investigates the problems of assembling, describing and computerizing corpora, defined as collections of "texts assumed to be representative of a given language, dialect or other subject of a language, to be used for linguistic analysis." Specific reference is made to the formation of the Brown Standard Corpus.

The formation of a corpus is justified in terms of saving effort and in providing a compilation of data that will serve as a research tool in comparative studies. Important questions in the process concern the body of language from which the sample will be drawn, the size of the sample, and its structure. These, in turn, are dependent on the purpose for which the corpus is assembled: graphic analysis will require a different corpus than will phonological or grammatical analysis, for example, the latter presenting the most problems. Practical constraints on the size of the corpus, including time, energy and money are mentioned. The organization of the corpus is discussed, underlining such factors as the size of the base units, mode of selection and collection, assembly of the corpus and computerization. The question of how much additional explanatory material should accompany the corpus is raised, with particular reference to lexical and semantic analyses. (CLK)

Cognitive Processes and Linguistic Forms of Factory Workers.

Pub Date 75

Note—18p.; Paper presented at the summer meeting of the Linguistic Society of America (37th, Tampa, Florida, July 25-27, 1975)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

Descriptors—\*Cognitive Processes, Concept Formation, Language Styles, Language Variation, \*Social Factors, Socioeconomic Influences, \*Sociolinguistics, Verbal Communication, \*Vocabulary, \*Work Environment

This paper examines language in a factory setting and focuses on: (1) identical terms which workers use in different contexts, (2) terms that are discarded or changed, (3) different terms that express opposite units in a conceptual category but are labels for identical objects, and (4) terms which represent finer discriminations within conceptual categories. The paper shows that: (1) the manner in which some workers discriminate between categories reveals their position in the production flow, (2) terms are lost if ideas relating to them are lost to the group, and some undergo a psychological regrouping if there is competition between homophonous forms in overlapping work environments, (3) operational links determine the extent to which workers share conceptual categories and linguistic terms referring to those categories, and (4) workers who are closely associated with particular operations are capable of making precise distinctions between conceptual units. The discussion shows that studying language in a work setting contributes to a better understanding of the relationship between social forces, cognitive processes and communicative behavior. Ross, John

Sociolects, Codes and Language Teaching.

Pub Date Sep 74

Note—23p.; Paper presented at the Annual Congress of the British Association for Applied Linguistics (Edinburgh, Scotland, September 1974)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

Descriptors—Language Classification, \*Language Instruction, \*Language Styles, Language Usage, \*Language Variation, Models, Second Language Learning, \*Social Dialects, Social Factors, \*Sociolinguistics

Identifiers—Bernstein (Basil), Codes, Registers, \*Sociolects

The aim of this paper is to clear up some of the confusion that has developed around interpretations of Bernstein's concept of code-distribution. After a rapid review of the main dimensions of linguistic variation within a given society, with particular attention to sociolectal and register variation, 'codes' are examined and compared with registers and sociolects. There follows a more detailed investigation of the nature and implications of codes in the Bernsteinian sense, relating to the social and, more precisely the educational context. The conclusions are that 'code' and 'lect' correspond to radically different types of variation, and that code-variation is by no means as socially exclusive or inherently so politically charged as many writers claim. Two points should be borne in mind while reading this paper; it represents work in progress towards a fuller treatment of the subject, and the final presenta-

tion of "restricted code" is exaggerated deliberately to provide a counter-argument to polemic current in Europe in 1974. (Author)

Identifiers—\*American Indian English, Black English, Southwest English

Several focal points for southwestern American Indian English research are proposed. This variation is used on reservations or in urban Indian enclaves when the "Indianness" of the discussion or participants needs formal linguistic marking. One research goal is to demonstrate that tribal varieties of Indian English actually exist. Analysis shows that Indian English grammatical and phonological structures are often replications of the Indian language detail. American Indian English may have had a fairly recent origin in federal boarding schools where only English could be spoken in classrooms and dormitories by the Indian students of various tribes. A second area for research is the idea that current American Indian English dialects vary predictably according to the native language rules. Dialects of American Indian English contain grammatical features common to other nonstandard dialects, such as Black English. Testing is underway to determine whether the dialect factors arise from similar motivations. Another research project is a study of the Indian English patterns within a given community to yield information about both grammatical structures in the Indian language and first-language interference in learning standard English. A final research area is the need for educational techniques and policy to develop diglossic fluency in both standard and American Indian English. (CHK)

Descriptors—Bilingualism, \*Dialect Studies, Geographic Regions, \*Language Research, Language Variation, Linguistic Theory, Mexican Americans, \*Nonstandard Dialects, \*Regional Dialects, \*Sociolinguistics, Spanish, Spanish Speaking, Standard Spoken Usage

Identifiers—Southwest English

The term "Regional Standard English" should refer to any kind of English spoken by educated individuals in a particular region. Vernacular is spoken by individuals with little education. Sociolinguistics as a field embraces ethnography of communication, social coding, societal analysis, social-psychological analysis and anthropology, all of which avenues of research are pursued by noted linguistic theorists. These strands may be unified into a "pandialectical model of sociolinguistic research." Early work in the field isolated vernaculars, identified patterns of language choices, and constructed rules governing variability. Variation within a language or between languages can be understood as a continuum within which a speaker moves and chooses. Notions of language restrictiveness and elaborateness were seen to be independent of intellectual capacity. Research into southwest En-

glish must consider Mexican-American English, Spanish, and bilingualism. Research should study sociolinguistic perspectives investigated elsewhere and identify pandialectal elements that may be applied to the southwest to construct a pandialectal model to trigger research. Issues to be examined include: (1) identification of vernaculars, (2) the nature of stylistic shifting, (3) description of speech communities, (4) description of variability features through variable rules, and (5) the presence of cross-cultural biases. Identifiers—\*Error Analysis, Southwest English  
Dialect analysis should follow the procedure for analysis of a new language: collection of a corpus of words, stories, and sentences and identifying structural features of phonology, morphology, syntax, and lexicon. Contrastive analysis between standard English and the native language is used and the ethnic dialect of English is described and compared with standard English. Variation study of the Mexican-American dialect is important to identify grammatical errors that can be corrected. Contrastive analysis explains and predicts first-language interference from maximal to minimal as the second language is learned. Error analysis compiles deviations caused by language interference, dialect differences, lack of knowledge of grammar, etc., and provides a teaching tool. Language acquisition and probably second language learning follows set stages and the types of errors appropriate to each stage are in a well-defined series. The notion of irreversible solidarity states that when E3, E2, and E1 are grammar rules of descending difficulty, if E3 is learned and used correctly by an individual, then E2 and E1 will be also. The rules are learned in order from simple to complex. Knowledge and understanding of language acquisition and error patterns are powerful diagnostic tools for the teacher of English. (CHK)

Document Not Available from EDRS

Descriptors—\*Anthologies, \*Hindi, \*Indians, Instructional Materials, Literature, \*Reading Materials, Second Language Learning, \*Short Stories, Tales

Identifiers—\*India, NDEA Title VI

The translator selected six short stories by modern Indian writers and compiled them as a reader for advanced students of Hindi and Area Studies. The Hindi text on the right-hand page is translated into English on the left. The stories were selected to include vignettes of urban and rural life and characters from both middle and lower class backgrounds with varying occupations. The tales reflect cultural problems in modern India where there is often a conflict between old world ideas and modern changes. The contents are: (1) "Paper Flowers" by Usha Priyamvada; (2) "A Difference" by Nirmal Verma; (3) "Dinner for the Boss" by Bhisham Sahni; (4) "Idgah" by Prem Chand; (5) "Married Women" by Mohan Rakesh; and (6) "The Third

Vow or 'Gulfam is Slain'" by Phanishwar Nath 'Renu'. A glossary of obscure terms and a long list of vocabulary and definitions are included, along with a biographical sketch of each author. (CHK)

Identifiers—\*Haiti

This is a progress report on the first year of an experimental bilingual education project for primary education in Haiti, sponsored by the Centre Haitien d'Investigation en Sciences Sociales (CHISS). The center's goal was to carry out a scientific project, to secure the facts from emotional and political prejudice. The point is to show the effect of the use of the vernacular in the learning of subjects in the curriculum. A socioeconomic investigation which preceded the project selected 150 6-year-old children from rural backgrounds, from three communities: Flon, Darbonne, and Dessources. Factors such as the degree of literacy and education of the parents, their professional status or lack thereof, and the amount of land that they worked were taken into account. The experimental group used Creole as a medium of instruction, while French was taught as a foreign language. Control Group 1 used exclusively French and the methods of the Mission Pedagogique Francaise, while Control Group 2 used those of the Department of Rural Education and was independent of CHISS. Testing of intelligence, oral language, achievement, and attitudes was conducted at given intervals. The tabulated results show bilingual education to be preferable to traditional methods. (CLK)

Identifiers—\*Belgium

This is a report on the different types of studies of the regional varieties of French that have been carried out in Belgium from 1945 to the present. The majority of the studies have been done by Belgians, and have to do with regional varieties of French spoken in Belgium. Some, however, examine African or American varieties. Chapter 1 deals with the normative or prescriptive studies. These include investigations of lexical and semantic items and have chiefly concentrated on measuring the difference between "Belgian" usage and "correct" French as judged primarily by the literary language. Chapters 2 and 3 discuss the descriptive studies which deal with lexical and semantic problems, or with grammatical and phonetic problems. Chapter 4 is dedicated to the studies that are indirectly related to Belgian varieties of French, including historical investigations and relevant literary studies. Chapter 5 refers to studies that are of a more sociological nature. In each chapter, brief discussions of the material accompany the listing of the works. The author's name and the date of publication are included. An extensive bibliography concludes the report. (CLK)

Motivating Students in the Foreign Language Classroom.

Pub Date Oct 74

Note—26p.; Speech given at the Southern Conference of Language Teaching (10th, Atlanta, Georgia, October 11, 1974)

EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage

Descriptors—Classroom Environment, \*Classroom Techniques, \*Language Instruction, Language Skills, Language Teachers, Modern Language Curriculum, \*Motivation Techniques, \*Second Language Learning, Student Attitudes, Student Interests, \*Student Motivation, Teacher Influence

Motivating students to study foreign languages is a unique problem within American culture. Experience suggests that Americans are psychologically inhibited from identifying with other people because of sensitiveness to their immigrant past. Some foreign language educators have concluded that, because of this past, teaching of foreign languages will always be difficult, if not impossible, in most American schools. Others feel that this factor merely makes foreign language instruction more difficult, but not impossible. According to the latter view, the key to motivating American students lies in getting them intrinsically motivated. The problem is that foreign language acquisition requires the learning of a great deal of material which, in itself, is not intrinsically motivating. As a result, many teachers attempt to force-feed the material into students. This tends to drive them out of foreign language study and to reduce enrollment levels to the point where the program is financially questionable. Thus, the key to success in the American foreign language classroom lies in making the necessary drill material palatable without having the classroom deteriorate into "fun and games." The article discusses the above-mentioned problem and suggests techniques for motivating students in the context of American education. (Author)

**Identifiers**—Foreign Language Careers

This guide to careers requiring knowledge of a foreign language details a wide range of positions. It begins with a general survey of the field of foreign languages—historical background, need for trained personnel, attributes necessary for success, comments of business and professional people. Educational preparation in high school, college, and special training is outlined, followed by a chapter on finding a suitable job—applications, interviews, employment agencies, employment abroad, analyzing the job. A section on foreign trade covers advertising, export, salaries, and opportunities for women. One chapter surveys various vocations from airlines to architecture, banking, library work, scientific research, and translation. Opportunities in government service include Civil Service, Department of State, USIA, Voice of America, and the United Nations. The teaching profession is surveyed. Lists of recommended reading and of language associations and journals are included. (CHK)

**Identifiers**—\*Keyword Method

This study evaluates the effectiveness of a mnemonic procedure, called the keyword method, for teaching a large Russian language vocabulary to college students. The method divides the study of a vocabulary item into two stages. The first stage requires the student to associate the spoken Russian word to an English word (the keyword) that sounds like some part of the foreign word; the second stage requires the student to form a mental image of the keyword "interacting" with the English translation. Thus, the keyword method can be described as a chain of two links connecting a foreign word to its English translation through the mediation of a keyword: the foreign word is linked to a keyword by a similarity in sound (acoustic link), and the keyword is linked to the English translation by a mental image (imagery link). A computer controlled curriculum using the keyword method served as a supplement to the second-year Russian language course at Stanford University. Students studied a large basic vocabulary over an 8- to 10-week period. Data obtained during the study and student reports indicate that the keyword method was highly effective. (Author)

**Identifiers**—English History

This annotated bibliography lists books useful for teaching or learning English as a second language. Most of the books were published since 1965, and the majority were published in England. Prices are listed. The contents include sections on reference books and dictionaries; linguistics; grammar of English; vocabulary; language learning and teaching; aids to learning; testing; spoken English; reading; writing; general courses; English for special purposes; literature, and background studies of English history and sociology. An alphabetical index of authors is included. (CHK)

**Identifiers**—\*Great Britain

This is an annotated guide to English language instructional materials useful for both native and non-native speakers of English at primary and secondary levels. Materials relate to and are available in Great Britain; prices and addresses of publishers and suppliers are included. The sections cover: (1) Visual aids specifically designed for English-language teaching—charts, films, cartoons, flashcards, magazines, audiovisual courses; (2) Mother tongue educational materials which could be applied to English-language teaching—recordings, pictures, games, slides, cassettes, all aimed primarily at young children; (3) Children's magazines; (4) Audiovisual materials on British life and institutions; (5) A select list of catalogues of resource materials; (6) A select list of books on methods of producing and using audiovisual aids in language teaching; (7) A guide to materials for making visual aids—instant letters, flannel-graphs in shapes and pictures, hook and loop or plastic display boards, magnet boards and sound effects; and (8) A guide to sources of supplementary display materials on topics ranging from arts and banking to food, fuel, transportation, pets, etc. (CHK)

*Phillips, Jean McCabe*

**Code-Switching in Bilingual Classrooms.**

Pub Date May 75

Note—77p.; Masters Thesis, California State University, Northridge

**EDRS Price MF-\$0.76 HC-\$4.43 Plus Postage**

**Descriptors**—\*Bilingual Education, Bilingual Students, \*Classroom Environment, \*Elementary Education, English, Language Enrichment, Language Instruction, Language Variation, Maintenance, Second Language Learning, Sociolinguistics, \*Spanish, \*Teaching Methods, Teaching Techniques

**Identifiers**—California (Los Angeles), \*Code Switching

This thesis presents the results of a field study of code-switching in K-3 level classrooms of an experimental Spanish-English bilingual education project in Los Angeles. The goal of the project, based on a pluralistic model of bilingual education, was the maintenance of Spanish by means of continued language-development in both the students' native and second languages. The thesis shows that the means of implementation contradict the project's goals. Data was collected on code-switching in 12 different setting-participant

combinations during language-development lessons. A quantitative measure related code-switching by teachers and students to specific setting-participant combinations. An analysis of the functions of teacher code-switching indicates that it is a communicative strategy. The study concludes that: (1) English is more intrusive in the classroom than Spanish; (2) the contrast in the amount of code-switching by teachers may be based on their expectations of students to communicate in the target language; and (3) the contrast between the patterns of teacher code-switching during the language lessons may be signaling to students that English functions more efficiently than Spanish for "important" messages in the classroom. Demotion of Spanish may be an attitude-motivation factor in both the maintenance of Spanish for native speakers and the acquisition of Spanish for native speakers of English. (Author/CLK)

**Identifiers**—\*Louisiana

This report presents an evaluation of the Louisiana state-wide program of French instruction at the primary level for the academic year 1972-73. The aims of the program were to show that second language learning is feasible and beneficial, can fit within the educational priorities of the Louisiana school system, and is valuable for both anglophone and, particularly, French-speaking children, who are at a linguistic disadvantage in the educational system. The performance and operational objectives used to measure achievement of these aims demonstrated that: (1) children are not harmed in promotional subjects by the program; (2) students throughout the state are affected similarly by the program; and (3) students in the program noticeably improve listening and comprehension skills in French. The relationship between oral proficiency and mastery of structure and lexical items was determined, as were the attitudes of parents and the educational community. Detailed information regarding the evaluation of each objective constitutes the body of the report. Appendices provide sample surveys and related illustrative data. A final section consists of an educational accomplishment audit for the program. (CLK)

**Identifiers**—\*Louisiana

This report presents an evaluation of the Louisiana state-wide program of French instruction at the primary level during the academic year 1973-74. Aims of the program were to show that: (1) a second language learning program is feasible, educationally sound, and can fit within the existing educational program while utilizing the present staff; and (2) the program will also develop communication skills in the individual's primary or native language. Further aims were to

train elementary teachers to provide basic and uniform competency in French, and to provide opportunities for community members to participate in French classes. Measurable performance and operational objectives used to measure achievement of these aims demonstrated that language instruction contributes to learning of curriculum subjects and that listening and comprehension skills in French are improved along with oral proficiency and mastery of structural and lexical items. The inservice teacher training, community response to adult French classes, and various attitudes regarding the program were also evaluated. The impact of the program and its implementation were examined. Detailed information regarding the evaluation of each objective constitutes the body of the report. Illustrative data are supplied in the body and appendices. An educational accomplishment audit for the program concludes the report. (CLK)

**Identifiers**—\*Louisiana

This report presents an evaluation of the Louisiana state-wide program of French instruction at the primary level for the academic year 1974-75, the third year of the program's implementation. The focus of the evaluation is on the attainment of linguistic objectives and the measurement of the community's support of the program. The program consists of four major components: instruction of French as a second language in elementary schools, career education, an inservice teacher training program, and adult night classes. The linguistic progress findings in the report, which follow a summary of findings and demographic statistics, apply to the first two components. Samples and results of the surveys of attitudes of parish superintendents, supervisors, principals, parents, and adult French students constitute the body of the report, along with a summary of the inservice teacher training program. Comments and recommendations conclude the report. Following the report is a copy of Louisiana Senate Bill No. 639, the act which authorizes the teaching of second languages in grades 1-12 in Louisiana schools. (CLK)

**Descriptors**—Educational Demand, Educational Supply, \*Enrollment, Enrollment Influences, Enrollment Projections, Enrollment Rate, \*Enrollment Trends, \*Financial Support, \*Higher Education, Nonresidential Schools, Private Financial Support, Private Schools, Public Support, School Demography, State Colleges, State Universities, \*Student Enrollment

How can either private or public colleges and universities compete for students? Through what kinds of policies would they be most likely to encourage enrollment in their institutions? This study was designed to answer these questions, which have become relevant because of the near

certainty that the majority of institutions will have a plethora of space and a shortage of applicants by 1985. To reflect the competitive strengths of different schools in both the private and public sector during the next ten years, post-secondary institutions were classified by selectivity and geographical recruitment areas. Various strategies for increasing enrollments are discussed and evaluated. The study concludes that the size of the private sector depends upon policies in the public sector. It is quite possible, with generous state funding, that public schools will maintain past levels of enrollment and impact enrollments in the private sector quite drastically. Private institutions will have no choice but to lower admission requirements to attract students who can afford to pay the high tuition fees they charge. The lesser private schools (except those catering to commuters, which presumably have the monopoly of location) will lose a considerable portion of their enrollment and may be forced to close. **Guidelines for the Interpretation and Implementation of the Rules and Standards for Licensing Non-Public Educational Institutions to Confer Degrees.***North Carolina Univ., Chapel Hill.*

Pub Date Mar 74

Note—21p.

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

**Descriptors**—Academic Standards, Administrative Organization, Admission Criteria, \*Certification, Educational Objectives, Faculty Evaluation, \*Guidelines, \*Higher Education, Library Programs, \*Private Schools, School Libraries, State Licensing Boards, \*State Standards

**Identifiers**—\*North Carolina

These guidelines are provided to assist in meeting the necessary rules and minimum standards and in making judgments on licensing. Suggestions are offered for evaluating an institution's statement of purpose as well as specific aspects of its program. The educational program is assessed with regard to its courses, duration and intensity (associate degree, baccalaureate degree, graduate degree offerings), general education, residence, certification, summer, evening and extension work, and out-of-state extension work. Its organization and administration is judged according to charter, period of operation, governing board, administration, qualification of personnel, safety and health provisions, unethical practices, cancellation and refund policy, agent, catalog, and discrimination. The faculty is defined in terms of educational credentials, size, workload; definition of responsibilities, professional growth, appointment, and stability. The library is evaluated as to policy, direction and supervision, space, holdings, annual budget, use of other resources, classification system, and records. Admissions, counseling and guidance, health services, placement, financial aid, and records are examined for student assessment, and facilities and general finances are also examined. (LBH)

**Identifiers**—\*University of Minnesota

A mailed survey was conducted of Minnesota citizens' views of goals and priorities for the University of Minnesota, their satisfaction with various aspects of the university and their familiarity with it. Responses were received from 409 of the 620 randomly selected citizens of Minnesota who were contacted. Key findings include: Most respondents tended to endorse a broad, multifaceted mission for the university. Within that broad mission, the most support was given to graduate and undergraduate programs oriented toward career preparation. Least support was offered for the provision of social events for stu-

dents and athletic events for the public. Although large numbers of respondents felt inadequately informed to make judgments about the university, majorities of those who did answer reported being satisfied with the university system as a whole and with university students and faculty. (Author)

**Identifiers**—\*University of Minnesota

The University Poll conducted a survey of the opinions of 740 randomly selected Twin Cities campus students toward 14 student services fees required by the University of Minnesota. Results from 624 students, 84 percent of the sample, are reported here. Key findings include: For no fee did a majority of students endorse an immediate reduction or elimination, but for only four fees (health service inpatient and outpatient care, Student Ombudsman Service, and Regents' Aid Fund) did a majority advocate an increase to maintain present programs in the face of inflation. Over 75 percent of the respondents were against having a regular telecommunications fee, although over 40 percent felt that they might be interested in using student telecommunications services in some fashion. Respondents were nearly evenly divided over a proposal to replace the health service inpatient fee with a health insurance requirement. (Author)

**Descriptors**—Data Collection, Educational Finance, \*Educational Innovation, \*Educational Legislation, \*Experimental Programs, Financial Policy, \*Higher Education, Instructional Innovation, Legislators, State Aid, \*State Colleges, State Legislation, State Universities

**Identifiers**—\*Washington

The progressively greater institutional commitment to the development and continuing support of new and innovative educational programs is demonstrated. Data were gathered from each institution (University of Washington, Washington State University, Western Washington State College, Central Washington State College, Eastern Washington State College, and the Evergreen State College), as well as the State Board for Community College Education, on their uncommon and non-traditional educational programs. The programs included those initiated by the 1971 appropriations bill (ESHB 151). A proviso was attached stating that 1/2 of 1 percent of the funds provided under the instructional budget for higher education institutions should be expended to develop new and innovative programs. With one exception, no general fund appropriations were specifically earmarked for new and innovative programs during the 1973-75 biennium. Focus in this report is on stimulating interest in the cooperative development of these and similar programs, and toward recognizing the time, effort and financial resources expended by each of the institutions of higher education to develop, review, implement, and support innovative programs. **Study of an "Experiment": Old Westbury College. An Analysis of the Failure of a State Supported Experimental College.**

Note—63p.

**EDRS Price MF-\$0.76 HC-\$3.32 Plus Postage**

**Descriptors**—Administration, \*College Environment, College Planning, Conflict, \*Educational Innovation, Educational Objectives, Educational Planning, \*Experimental Colleges, Faculty, \*Higher Education, Political Influences, \*State Colleges, Students

**Identifiers**—\*Old Westbury College

The 1966 Master Plan of the State University of New York decreed the establishment of the State University College of Old Westbury. This new college was to be known as the "experimental" college of S.U.N.Y. The goals expressed by this new college are exciting, inspiring, and due to the system which promulgated them, inherently unrealizable. Due to the needs of the "parent" systems, the "child" could not survive in any form very different from any other state college. The first academic year ended in a sit-in during which most of the students, faculty, and administration found themselves involved in a bitter fight around every issue but the central one—the built-in contradictions inherent in a state supported "experimental" college. The steadily escalating tension arose as a result of the conflict between Old Westbury's college heredity and Old Westbury's college environment (which was both "inherited" and created), plus the environment that is out of its control entirely, the American political scene. **Some Thoughts on the Cost Effectiveness of Graduate Education Subsidies. ISP Discussion Papers No. 245-74.**

Wisconsin Univ., Madison. Inst. for Research on Poverty.

Report No—ISP-DP-245-74

Pub Date Dec 74

Note—41p.

**EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage**

**Descriptors**—\*Cost Effectiveness, \*Doctoral Degrees, Engineers, \*Financial Support, Graduate Study, \*Higher Education, Mathematical Models, Scientific Research, \*Scientists, Wages

A mathematical model of the Ph.D. scientist labor market demonstrates that subsidies of graduate training can be more cost effective than higher wages if the supply of doctorates is substantially more responsive to \$1000 of early subsidy than to higher future wages with a present discounted value of \$1000. Whether this is true is an unsettled empirical matter. There are three reasons for targeting subsidies at Ph.D. scientists: (1) As a condition of taking a job they demand freedom to do basic research and publish their results. (2) Because of their special knowledge and loyalty to professional values, hiring scientists and engineers contains an extra risk that trade secrets will be stolen or that one of them will be a "whistle blower." (3) From the firm's point of view these factors reduce the scientist's productivity. They do not from society's point of view, so an externality is created by the employment of scientists. The extent of legislative activity in the area of postsecondary collective bargaining throughout the states is outlined. Specific legislative document numbers needed to request copies from the various legislative houses are included. The states are grouped in three categories: (1) those not having educational employee public sector collective negotiations coverage that in 1975 legislative sessions have legislation introduced (20 states, 13 active to some extent); (2) those with public employee laws for some educational employees that are considering added coverage to include postsecondary personnel (11 states are active); and (3) those with existing public employee laws that cover educational employees that are considering amending legislation of major interest to postsecondary education (six states active). It is concluded that collective negotiations in education is now a vital legislative topic. (LBH)

**Descriptors—**\*Arbitration, \*Collective Bargaining, Contracts, Decision Making, \*Grievance Procedures, \*Higher Education, Job Tenure, Labor Demands, \*Negotiation Agreements, Promotion (Occupational), Strikes, Teacher Associations, Teacher Welfare

**Identifiers—**New York, Pennsylvania, \*State University of New York

The first known analysis of a substantial number of arbitration awards in higher education is presented in an effort to determine whether arbitrators have confined their awards within the contract limitations. All of the arbitration awards generated by the four-year colleges of the State University of New York as well as the awards of the Pennsylvania state colleges were reviewed. Twelve two-year SUNY colleges also responded to a letter requesting arbitration decisions, and additional cases were found in back issues of "Arbitration in the Schools." Less than half of the awards surveyed involved academic judgment issues. The majority concerned traditional contract interpretation questions such as the length of contract-mandated paid vacations, eligibility for pension benefits, and the necessity of paying for overtime work. Cases where academic consequences grew out of basically non-academic grievances are reported briefly. It is shown that the very presence of arbitration has had direct impact on academic decisions, some of which have been beneficial. Tenure and promotion decisions have been affected by the introduction of due process elements into academic personnel decisions. If the traditional system of faculty participation in decision making is to be maintained, steps must be taken to establish appropriate boundaries between academic officials' and arbitrators' authority. The development of a methodological framework for planning, programming, and budgeting which is specific to graduate training and research activities at the Chalmers University of Technology in Sweden is described. This pilot project is regarded as a step towards developing and implementing a generalized approach to an output-oriented finance system for graduate training and research at the university level. In the first three chapters of this report, the present status of the PPBS is described. They are devoted to an overview of program budgeting, an analysis of the national and local organization for higher education and research, and an economic review of the program activities. Basic concepts of program budget theory, such as productivity and effectiveness, are defined. The survey for the pilot study is divided into time utilization, cost accounting, space and equipment, and output measures. The proposed PPB-model to be applied to higher education and research is given along with the consequences of its introduction in the university system. Extensive appendices are included. (LBH)

As we face reconsideration and possible extension of the Education Amendments of 1972 and reconsideration and new legislation in connection with the Vocational Education Act of 1963, as amended in 1968, it is important to look at the legislative history, implementation and current status of Sections 1202 and 1203 including the current impact of establishing state postsecondary commissions. It is to such review and assessment that this report is directed. The first section is devoted to an analysis of the legislative history and implementation of Section 1202 up to the point at which the states responded to the invitation of the Commissioner of Education to designate or establish commissions. The second section deals with response of the states, the establishment of commissions, their structures and their proposals for planning as reported to the Office of Education. Special notation is included in relation to the involvement of the commissions with vocational education and manpower planning. The third section is concerned with some of the impact, continuity and problems related both to the legislation and to the establishment of state commissions. (Author)

The conference papers provide an overview of some of the main issues and perspectives in the granting of credit for experience by covering the transition from the construction of educational experiences for and with students for the future to the accreditation of experiences of the past. This also includes the problem of translation or transportation of field experiences into identifiable quantity and quality. In addition they present proposals for defining what a student must present for prior learning and an in-depth discussion of evaluation of experience. Contributed papers present data and an evaluation of a four-year study of CLEP at the University of Iowa and a report on the Continuing Education Unit (CEU) by the CEU Task Force of the Iowa State Coordinating Committee for Continuing Education. Also presented is an overview of current national activities by some institutions. Finally, a charge to continual searching for innovation with quality is given. (Author/JMF)

Data on funding and manpower are gathered by means of a series of surveys that cover the different performance sectors. This study combines data for 1973 from reports covering state agency

expenditures for research and development and a series covering all institutions of higher education expenditures. This joint consideration of state agency and state university R and D efforts can be useful in assessing the factors that contribute to economic and social change within the States. These combined expenditures, representing funds that were disbursed by the budget offices of state agencies and universities, amounted to \$1,990 million in 1973. The report compares and contrasts the R and D emphases of the state universities and agencies noting the sources of the funds as well as the areas of distribution: life sciences, engineering, social sciences, physical sciences, and others. The ranking of states by expenditures shows a strong correlation between the leadership of states in public R and D expenditures and their relative rankings in state population, total personal income, and total state government general expenditures. Finally, the report shows the growing recognition in both government and university circles that university expertise could be further extended into the public sphere with benefit to both groups. **Identifiers—**\*North Carolina State Board of Education

Advance placement policies are identified in this booklet designed to aid persons who are potentially qualified by prior training or experience for advance placement in programs leading to graduation in nursing or practical nursing. The information was gathered from all 82 programs approved by the state board for 1975. The trend toward improving educational opportunities for experienced students with a minimum loss of time and effort is found to be gaining momentum. Methods include: credit without examination for previous experience in a formal educational program, credit by written examination for theoretical nursing courses, credit by practical examination for clinical courses, credit by transfer, and credit by passing standardized or departmental examinations. Specific data are tabulated for nursing programs leading to certificates, associate degrees, diplomas, and baccalaureate degrees with regard to admissions policies and credit policies for nursing. **EDRS Price MF-\$0.76 HC-\$3.32 Plus Postage**

**Descriptors—**\*Administration, \*Annotated Bibliographies, College Administration, Decision Making, \*Governance, \*Higher Education, \*Student Participation, Trustees, University Administration

This bibliography represents a survey of selected works on student participation in academic decision making published between 1968 and 1974. It is divided into three major areas. The first section, 81 items, is concerned exclusively with student participation in academic decision making, focusing on models, justifications, attitudes, and current practices. The 39 items in the second section examine the student role in the broader context of campus and institutional governance, including alternative governance structures, goals and objectives of governance, and the distribution of power within various institutions. The 17 items in the third section deal with literature devoted to unicameral, or broadly-based, decision-making bodies which incorporate all campus constituencies into a single policy making structure. Descriptors—\*Financial Support, \*Higher Education, Part Time Jobs, \*Student Employment, \*Work Experience Programs, \*Work Study Programs

Identifiers—\*Student Financial Aid

Off-campus work-learning programs have developed because of a demand by students and the education community for a more relevant postsecondary education experience. The purpose of this guide is to provide information, ideas, and suggestions to enable the financial aid officer to better meet the demands of an off-campus College Work-Study Program (CWSP). There is an effort to clarify procedures in areas such as insurance, social security, payroll, and contracts, which have created a reluctance on the part of many administrators to develop or expand their off-campus program. The intent is to provide a broad sampling of methods and forms for development and improvement of programs. The models or alternatives discussed are broad and general so as to be adaptable to the variety of situations and environments found in postsecondary programs. The guide contains materials on ways to find jobs, student placement procedures, program-administration tips, issues and policy, academic credit, evaluation. Included are examples of forms which can be used for off-campus work-study, and a sampling of different types of off-campus placement that are both acceptable and unacceptable according to the federal regulations. The guide has been produced to accompany the Office of Education's CWSP Manual. (Author/JMF)

Descriptors—Construction Programs, Enrollment Influences, Expenditure Per Student, Federal Aid, \*Federal Legislation, \*Financial Support, \*Health Occupations Education, Health Personnel, \*Higher Education, Historical Reviews, \*Incentive Grants, Medical Schools, School Support, Student Loan Programs

Identifiers—Health Manpower Act of 1968, \*Health Professions Educational Assistance Act

The legislative history of the formula-grant program is surveyed. Testimony at congressional hearings is examined to ascertain the positions of government and health professions organizations regarding the purposes and use of formula grants over time. It is shown how changes in the successive laws reflect changing goals of the program. The actual uses of the funds and the relationship between purposes and accomplishments are studied with focus on dental schools only. Two trends are noted: (1) Schools and professional organizations have regarded the funds as subsidies to existing programs rather than as incentives to increase enrollment, and (2) in each renewal of the legislation, Congress has attempted to create stronger incentives to increasing enrollments and graduates and to make more explicit its intentions that the number of health professionals increase. It is also noted that the first-year enrollment increases in medical and dental schools between 1965-1971 were approximately equal to the number of federally-funded new school spaces built in that period, indicating minimal enrollment increases coming from the formula-grant program alone. This is concluded to raise the question: Can per-student grants to schools be ef-

fective to increase enrollments without also giving the schools substantial construction assistance? (LBH)

Descriptors—Construction Federal assistance, \*Educational Legislation, Federal Legislation, Financial Support, \*Health Occupations Education, Health Services, \*Higher Education, \*Medical Schools, Medical Students, Nurses, Physicians, Student Enrollment, \*Student Loan Programs, Tables (Data)

Identifiers—Comprehensive Health Manpower Training Act, Health Manpower Act, \*Health Professions Educational Assistance Act

Legislation regarding federal assistance to health professionals is reviewed with tables included on specific expenditures and enrollments. The 1963 Health Professions Educational Assistance Act provided financial assistance for schools in two areas: subsidies for construction of new capacity and loans to students. Amendments to the act in 1965 continued those two programs and added three new ones for financial assistance. They added basic improvement grant, special improvement grant, and scholarship programs, as well as new appropriations for student loans. The Health Manpower Act of 1968 continued with modifications the earlier legislation and also covered nurse training, allied health professions and public health training, and health research facilities. Details are given on Title I, Health Professions Training. The Comprehensive Health Manpower Training Act of 1971 made extensive additions and modifications to the H.P.E.A. program, with programs more explicitly defined, requirements for receiving federal funds raised, and incentives for increasing enrollments and graduates increased. The most extensive changes came in the area of institutional support to schools. (LBH)

Descriptors—Developing Nations, Employment Qualifications, Foreign Nationals, \*Foreign Workers, Health Personnel, \*Higher Education, Medical Evaluation, \*Medical Services, \*Physicians, Political Influences, Primary Health Care, \*Public Policy

The large inflow of Foreign Medical Graduates (FMGs) into the U.S. is cited and four issues discussed. They are: (1) the belief that the FMG is less qualified than the U.S. medical graduate and thus contributes to the decline in quality of medical care; (2) the loss of scarce manpower from less developed countries that have greater needs than the U.S. for medical care and for physicians; (3) the lessening of opportunity for large numbers of U.S. citizens to become physicians; and (4) if trends continue, then together with the recently increased capacity of U.S. medical schools, there will be an oversupply of physicians in the U.S. which could lead to adverse competitive behavior, unnecessary care, and higher costs. Each of these concerns is examined together with several alternatives for alleviating each concern and the probable consequences of each alternative. It is concluded that the differential effects of a reduction in FMGs alone does not appear to be the solution to any of the issues, nor is it realistic. The differential effects of a reduction in FMGs on the population they serve may more than outweigh any benefits from such arbitrary reductions. (LBH)

**Inflation: Its Impact on Medical Training Programs. Report No. A9.**

Michigan Univ., Ann Arbor. School of Public Health.

Spons Agency—Robert Wood Johnson Foundation, New Brunswick, N.J.

Pub Date Jan 75

Note—46p.; To be published in Michael Zubkoff (ed.), *Health: A Victim and Cause of Inflation***EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage**

Descriptors—Business Cycles, Dental Schools, \*Economic Factors, \*Educational Finance, Federal Aid, Financial Policy, \*Fiscal Capacity, Health Occupations Education, \*Higher Education, \*Medical Schools, Operating Expenses, Program Costs, Socioeconomic Influences, Student Costs

The unusually high rate of inflation has produced a clear demand for more vigorous government action to lower the rate of price increase, including increases for health professional schools. The concern coincides with Congressional debate surrounding the renewal of the entire structure of federal support for the education of physicians, dentists, optometrists, and others. Two issues are addressed: (1) what has been the impact of inflation on the costs of health professional education, and (2) how will schools meet the growing burden? A brief overview is presented of both the structure of school costs and estimates of how they have been changing. Attention is paid not only to what has been happening but also to what is likely to occur. These estimates are balanced by a discussion of what has been and is likely to be the school response to cost pressures. Methods of cutting costs as well as increasing revenues are examined. The discussion offers a background for analyzing the impact on school financing of anti-inflationary policies; i.e., a tight monetary policy and expenditure reducing fiscal policy which includes cuts in federal support. Emphasis throughout the paper is on medical and dental schools. (LBH)

**Expanding Opportunities for Equal Access to Higher Education for Ohioans: A Report on the Ohio Instructional Grants Program.**

Ohio Board of Regents, Columbus.

Pub Date Mar 75

Note—90p.; Report of the Ohio Board of Regents' Advisory Committee on Student Financial Aid

**EDRS Price MF-\$0.76 HC-\$4.43 Plus Postage**

Descriptors—\*Educational Finance, Emancipated Students, Equal Education, Family Income, \*Financial Needs, \*Financial Support, \*Grants, \*Higher Education, Low Income

Identifiers—Ohio, \*Student Financial Aid

The need for the Ohio Instructional Grants (OIG) Program was significant at its creation and has grown in the initial five years of the program. The report provides background on the need for the program that has been responding to the need of students from low and moderate income families, but has been serving proportionately and absolutely fewer low-income families in recent years. The overall conclusion of the review is that the OIG program continues to merit the highest public priority but requires modification if it is effectively to provide access to higher education for students from low and moderate income families and choice among Ohio's higher education institutions. The overall priority for modifying the OIG program would be to provide increased aid to reduce financial barriers for existing eligible students before extending eligibility to new groups of students. To further improve the administration of the program, the recommendations are made in four major areas: communications, processing, flexibility, and equity. The projected costs for implementing the recommendations are detailed. (Author/JMF)

**The Background and Interests of the Typical Cadet. A Summary of Responses to the Environment and Interest Inventory, Class of 1968.**

Military Academy, West Point, N.Y. Office of Institutional Research.

Report No—IA3.03-67-002

Pub Date Sep 68

Note—27p.

**EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage**

**Descriptors**—Academic Achievement, Academic Aptitude, \*Environmental Influences, Family Income, Higher Education, \*Leadership Qualities, \*Military Schools, Student Interests, \*Vocational Aptitude

**Identifiers**—Environment and Interest Inventory, \*United States Military Academy

By using environmental data, possibly as predictors in their own right, but most probably as moderator variables, it was intended to evaluate available and currently used predictors of leadership potential and academic success. The Environment and Interest Inventory was administered to nearly every candidate for admission to the academy. Over 2,000 completed inventories were accumulated, from which 791 of those who actually entered in July 1964 were obtained. The results of the inventory were to be used for the identification of those environment and interest characteristics which were significantly related to any of three criteria: academic standing, aptitude for the service standing, and resignation versus active status. It is found that the typical entrant to the Class of 1968 comes from a family of comfortable means, not wealthy but economically secure. With respect to specific, available artifacts, such as books, cars, etc., there seems to be a high correlation between the availability of such items and the frequency with which they are used. The relationship between availability and utilization is less obvious regarding general facilities and opportunities, such as libraries or community teams. Questions are unresolved regarding "from whom one seeks help with various kinds of problems," since a majority responded "does not apply." (Author/LBH)

A Survey of Experiences with the Three Year Curriculum.

Pub Date 1 Apr 75

Note—27p.; Presented at the Annual Meeting of the American Educational Research Association, Washington, D.C., April 1, 1975

EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage

**Descriptors**—\*Accelerated Programs, Clinical Experience, \*Curriculum Development, Curriculum Evaluation, Educational Assessment, Flexible Scheduling, \*Health Occupations Education, Higher Education, \*Medical Schools, Program Evaluation, Program Length, \*School Surveys, Time Factors (Learning)

A survey of 12 medical and other health sciences schools which have implemented a standard three-year curriculum in the past few years revealed that only one of these schools is planning to revert to a standard four-year program. Some are introducing more attractive four-year curriculum options. The schools' self-ratings of the success of the three-year curriculum were generally favorable. Three- and four-year students were found to be comparable in cognitive knowledge and clinical skills, although comparison of three- and four-year students at one school showed that the four-year class rated itself far superior to the three-year class in knowledge. Faculties appeared to be somewhat dissatisfied with the three-year curriculum, but students enrolled in this program appeared generally favorable toward it. Overwork and overcrowding were cited as problems. Implementation of the three-year program provided the impetus for intensive preliminary review and reorganization of the educational program, a beneficial side effect. Because of apparent discrepancy between the schools' reported success with the three-year program and extreme caution in discussing it, as well as between reported success and general faculty dissatisfaction, clearer delineation of the impact of a three-year program is advocated. **Descriptors**—Doctoral Degrees, \*Doctoral Programs, \*Enrollment Trends, \*Graduate Study,

\*Higher Education, Physical Sciences, \*Prediction, Private Colleges, Public Schools, Tables (Data)

On the basis of information available to them in April 1973, representatives for the Higher Education Panel at 209 institutions gave estimates of the number of doctorates that would be awarded within each field of study during the academic years of July 1972-June 1973 and July 1974-June 1975. The figures reported afford a picture of the possible impact of the collective expectations. In general, doctorate production is expected to increase moderately, and most fields of study will have a share in this increased output. Only in physical sciences did representatives expect to see a somewhat lowered rate of doctoral output by 1975. If their estimates prove reliable, the relative proportion of doctorates contributed by each field of study will remain fairly stable. Only minor shifts will occur in the relative proportion of degrees granted in a given field of study by public and private institutions or by top 20, developing, or other institutions. Tabulated data are included to support the predictions. (Author/LBH)

The Effects of College and University Residential Programs on Students.

State Univ. of New York, Saratoga Springs. Empire State Coll.

Pub Date May 75

Note—15p.

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

**Descriptors**—\*College Housing, Dormitories, \*Higher Education, \*Residential Colleges, \*Residential Programs, \*Resident Students

Several Institutions are investigating appropriate ways to meet the needs of those traditional aged (17 through 22 years) students who desire the experience of residential living. The purpose of this paper is to identify those elements of residential living that have proven beneficial in creating a meaningful college experience for students. The literature on the impact of residential living on students is reviewed. It is concluded that the variables of the goals and values of the institution and the needs and desires of the particular students are the most important determinants of the impact of residential programs on students. It is suggested that a variety of residential programs focusing on the variable of time and the needs of different student populations, i.e., minority students, have yet to be tested. (Author/JMF)

Because of the comprehensiveness and complexity of the numerous reports on financing postsecondary education, appropriate dissemination to decisionmakers and educators at all levels was crucial. To assist in the dissemination process, the Education Commission of the States (ECS) conducted a series of regional conferences, concluding with a national conference, on the general theme of postsecondary financing. This report summarizes and highlights that conference series. Participants discussed modes of financing which would expand resources for delivering education, ways of providing education within existing budgets, possibly even shrinking budgets. The discussions focused, in part, on accountability, greater efficiency and productivity standards, and the relative fiscal health of the levels of government. At the national conference several analysts and planners offered new insights and directions for postsecondary financing. (Author/JMF)

An Examination of the Political Processes Involved in the Development of the Student Class Attendance Policy at Trenton State College.

Pub Date 31 Mar 75

Note—27p.

EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage

**Descriptors**—Activism, Attendance Patterns, \*Class Attendance, College Students, \*Educational Policy, \*Higher Education, \*Policy Formation, Student Participation

**Identifiers**—Baldridge Political Model, \*Trenton State College

The political processes involved in the policy system of the college are examined and are considered important because the students have become legitimately involved in the policy-making process. The student class attendance policy was studied, based on interviews and study of documents related to the development of the policy. Sixteen major figures involved in the policy development were interviewed according to an interview instrument designed through the use of Baldridge's Political Model. The model concerned five areas of policy development analysis: (1) Social Structure Features, (2) Interest Articulation Processes, (3) Legislative Phases, (4) Policy Outcomes, and (5) Policy Execution. Results of the interviews and the examination of the documents were analyzed through the use of the Baldridge Model. The findings revealed the major reasons for the development of the policy, the conflicts that occurred between the constituencies, the compromises that were made, and the legislative processes involved in the development of the policy. The results also support various recommendations for the improvement of student involvement in the policy-making process and the improvement of the total policy system of the college. (Author/LBH)

**Identifiers**—New York

A random sample of 716 seniors at the State University of New York at Buffalo (SUNY/B) expecting to graduate in June 1974 were sent a questionnaire concerning their college experiences, perceptions, and future plans. The sample was composed of nearly equivalent numbers of men and women. Statistical comparisons were made, where appropriate, between men's and women's responses. Thirty-eight percent of those sampled responded listing areas of concern that had given them the most difficulty during college; they indicated the importance of goals of personal, social, intellectual, or professional development during college. The seniors ranked the functions of SUNY/B and expressed their concern for the discrepancies between ideal and actual importance of experiences. Among the other areas surveyed are the students' educational plans comparing initial and current degree plans, choice of major, and plans for future formal education; career choice and job expectations; and anticipated life styles. **Descriptors**—Age, Degree Requirements, \*Discriminatory Attitudes (Social), Feminism, \*Higher Education, \*Literature Reviews,

Motivation, Post Secondary Education, \*Sex Discrimination, Social Psychology, Social Reinforcement, \*Womens Education

This review of the literature was undertaken as background preparatory to the design of a survey program to ascertain the extent of women's non-participation in postsecondary education and apparent reasons for it. The proportions of women who participate in degree programs have changed very little in the past 40 years. Institutional barriers are found to be in admissions practices such as sex quotas and age restrictions, financial aid practices, institutional regulations (e.g., credit for nonclassroom learning, housing policies), curriculum planning and student personnel services, and faculty and staffing attitudes. Situational barriers, or social constraints, are seen as those effects of class, ethnic or racial group membership, family attitudes, domestic responsibilities, place of residence, and community attitudes. Psychological factors include the current status of theories regarding the psychology of women, sex differences in intellectual functioning, attitudes of women toward themselves and in relation to others, motivation for achievement, and psychological correlates of socialization practices. Descriptors—Academic Achievement, Achievement Rating, \*Admission Criteria, Comparative Analysis, \*Faculty Evaluation, Grade Point Average, \*Higher Education, High School Graduates, \*Military Schools, Predictive Measurement, Rating Scales, \*Student Characteristics, Success Factors

Identifiers—\*United States Military Academy

The potential use of High School Faculty Ratings for admission purposes is investigated. The ratings include the evaluations of a candidate on 10 traits and three overall characteristics. The rating forms are given to a mathematics, English, and physical education teacher, a counselor or high school principal, and one other faculty member by the applicant, prior to his evaluation by USMA admissions officers. The sample of applicants studied included 697 candidates to the

Class of 1972, 542 of whom were admitted. The 10 traits were combined into four for each of the five raters by factor analysis. Integer weights for raters were developed for each trait and then for the combined traits to best predict Fourth Class Aptitude for the Service and Fourth Class Grade Point Average. It was found that combinations of the ratings had significant validity for predicting both Fourth Class ASR and GPA. This was especially true with ASR for the group of cadets having ratings from at least a mathematics teacher, an English teacher, and a physical education teacher or coach. (Author/LBH)

The USMA uses the Whole Man concept in the selection of candidates for admission. This concept encompasses three broad ability areas: scholastic, leadership potential, and physical condition and aptitude. The entrance scores for each area are compared with previous classes, and it is shown that the Class of 1973 has decreased in its academic potential from the Class of 1972. The mean Leadership Potential Score has decreased slightly for the Class of 1973 as compared to the Class of 1972, but is the same for the Class of 1971 and higher than for the Classes of 1969 and 1970. The mean Physical Aptitude Examination Scores are also slightly lower than for the Class of 1972, but approximately equal to that of the Classes of 1969, 1970, and 1971. Comparison information is also given between the Classes of 1973 and 1972 as well as with previous classes. Trend data for the Classes of 1965 to 1973 are included in the appendix in tabular form. Over all, tabular and graphical data are given on academic qualifications, potential for success at USMA, trends in admission scores, honors and awards, participation and attainments in high school athletics, high school background, non-athletic activities during high school, military experience or service, parents' military background, and college background. Identifiers—\*United States Military Academy

The biographical characteristics and achievements of the 1373 cadets who entered the Class of 1974 are presented. A separate report compares selected characteristics of this class with previous classes. In order to obtain data on the American College Testing Program, the ACT was administered to 1336 members of the Class of 1974 in July 1970. Tabulated data are presented on: distribution of scores on academic qualification measures, whole man score measures, and height, weight and age; high school characteristics; subject exposure; preparatory school attendance; awards and scholarships; clubs and positions held or awarded; nominations and appointments; ROTC; military service; fathers' military status, rank, and component; fathers who are graduates of Federal academies; class year of fathers who are USMA graduates; sport participation; number of non-varsity sports or activities in which participated; number of varsity sports in

which participated; non-varsity sports and physical activities; varsity sport and type participation; miscellaneous; representation by state of birth; and American College Testing Program class profile. (LBH)

Identifiers—\*United States Military Academy

The responses of USMA graduates from the Class of 1950 are compared with those of graduates from civilian colleges on a number of topics of current interest. Most of the topics dealt with many of the goals of education which are obtainable and observable only in adult life. The questionnaire that was used consisted of seven major sections: background information, activities, changing society, viewpoints, educational benefits, memory of college experiences, and personal traits. The respondents to the mailed questionnaire were divided into five groups: USMA graduates still on active duty; USMA graduates not on active duty; the total number of USMA graduates responding; graduates from eight civilian engineering and science schools; and graduates from 74 civilian colleges and universities. In general, it appears that the USMA graduate compares favorably, if not more favorably, with graduates from civilian colleges and universities on most of the topics analyzed. It is noted that the typical USMA graduate feels that he has benefited more by going to college than does the graduate from a civilian institution of higher education. It is cautioned that any interpretations of these results must be made in conjunction with the goals, philosophies, values, and beliefs of USMA and the other colleges, since they may vary from institution to institution. Student Affairs Research. A National Survey Report on University Programs.

New Hampshire Univ., Durham.

Pub Date 75

Note—56p.

EDRS Price MF-\$0.76 HC-\$3.32 Plus Postage

Descriptors—\*Higher Education, \*Management Systems, \*National Surveys, \*Program Evaluation, Questionnaires, Research Projects, Student Organizations, \*Student Role

The current status of student affairs research programs at universities throughout the U.S. is examined in a survey project. The need for the development of student affairs management systems is cited. The questionnaire used in the survey covered four broad areas: (1) background information on responding institutions; (2) information about the organization and operation of research programs at responding institutions; (3) information about the nature of student affairs research and kinds of research projects being conducted; and (4) questionnaire assessment by the respondents. Of the 291 university campuses surveyed, 51 or 17.5 percent indicated that they were conducting student affairs research on a programmatic basis. Forty-six others had such research but without research project coordination by a specially delegated individual. The regional distributions of the programs were almost identical to those of the total population of institutions that were surveyed. The distributions by size and type of control of parent institutions were almost identical to the size and control type distributions of the 151 institutions that responded. More than 50 percent of the programs were located at institutions with total student enrollments of 15,000 or more and the majority of programs were at public institutions. Most programs had been in existence for more

than one year and almost 50 percent for more than five. (LBH)

Descriptors—\*Administrative Personnel, \*Administrator Guides, \*Educational Administration, Educational Objectives, \*Higher Education, Institutional Role, Planning, \*University Administration

Written for presidents and other academic and administrative leaders of American colleges and universities, this report presents both a philosophy and a practical format for the management of change. Theories of planned change and organizational development are discussed and applied to the structure of higher education. Planning guidelines offered are concerned with how to identify one's goals and objectives, how to anticipate change both within and outside the institution, and how to implement mechanisms which allow institutions to both attain their goals and respond to the constant flux in higher education. They encourage institutions to implement a systematic and futuristic approach to university management. The prime purpose of the paper is to diffuse information about the planned change managerial approach and to stimulate use of the mechanisms of planned change within American colleges and universities. Identifiers—\*Open University, United Kingdom  
The Open University is described as an independent, autonomous university which offers an opportunity for higher education to adults who could not or did not take advantage of the limited opportunity in England to enter an institution of higher education immediately on or shortly after leaving secondary school. It provides a basis for continuing higher education throughout an adult's life. Most students are 21 years of age or over and study in their spare time. Its origins, administration, financing, facilities, students, and staff are described. The learning system employed is designed for teaching at a distance with course materials prepared by course teams and mailed to students. Television and radio broadcasts supplement the material. The university is viewed as a self-improving system available to all students without qualification. Its materials can be used by other institutions who can benefit from the course materials themselves along with systems for producing course materials, and systems which combine to deliver the courses. Descriptors—\*Clinical Experience, \*Curriculum Guides, \*Higher Education, Instructional Programs, Manuals, \*Medical Students, Pediatrics Training, Physicians, Science Education, \*Teaching Guides, Teaching Procedures

Identifiers—\*University of Texas Medical Branch  
Methods of improving the pediatric clerkship are used to develop procedures for educating stu-

dents in basic science and clinical education programs. The model of instruction first lists the instructional objectives, then defines what the learner knows prior to instruction, plans instructional procedures to supply the missing abilities and skills, and institutes evaluation procedures. Evaluation data can alter the objectives, preassessment, and instructional procedures. Performance requirements are analyzed in this handbook regarding skill in gathering and recording information, competence in defining the patient's problems, judgment on physician intervention and treatment, accepting responsibility for health maintenance, and effectiveness of attitudes toward one's role as a physician. Described are effects of the development of the handbook on faculty attitudes, pediatric instruction, pediatric evaluation, and prerequisite courses. Extensive appendices are included on rating forms, self-instructional units, core seminars, and objectives. (LBH)

With some justification, the inability to answer most of the important questions in higher education is due to the lack of necessary information. But careful examination of our many faceted questions suggests that more information may not be the only answer. The National Center for Higher Education Management Systems (NCHEMS) has found other aspects to the postsecondary information problem. First, a huge communication gap often looms between those asking the fundamental questions and those in the best position to answer them. Second, information resources do exist, collected either by individual researchers for purposes of investigating a relatively narrow specific aspect of postsecondary education or for purposes not directly related to postsecondary education. The NCHEMS believes these data can be used in postsecondary education decision-making much more extensively than they have been used in the past. In pursuit of this hypothesis, NCHEMS called together people with unique knowledge of information needs and information availability at all levels: federal, state, and institutional both inside and outside the postsecondary education community. This document presents seven major papers

delivered by these people at a seminar, and includes responses to each paper. (Author)

Identifiers—\*University of San Francisco

The importance of knowing more about the nature of American college and university students became highlighted in the 1960's. To this end, the University of San Francisco developed a two-page questionnaire focusing on the needs of a religiously affiliated university with concerns for the quality of life on campus. The questionnaire centered on the following topics: (1) finances; (2) personal earnings; (3) religious views; (4) personal values; and (5) personal concerns about college life. The demographic characteristics of school/college enrollment, current religious preference, sex, legal status, federal government, ethnic categories, residence, and parental income were included. Of all questions on the survey document, only the parental income question was generally not answered. Hence, no significant data in this area was collected. In its present form this study presents one thing only. It provides a description of the fall 1974 freshman at the University of San Francisco in terms of certain demographic characteristics, attitudes, values, and concerns. There are no theoretical or generalized notions to tie these various elements together. In particular, the ethnic groups' data are not organized according to any theory of human relations. (Author)

**Identifiers**—\*State University of New York, SUNY

While the agenda of the 1960's was one of expansion at maximum feasible speed, the by-words of the 1970's are accountability and its correlates: effectiveness, efficiency, and quality. In statewide university systems accountability is a formidable task. A major difficulty comes from the diversity of goals and disagreement or confusion over measuring the achievement of those goals. Two major aspects of the problem are contradictory perceptions of "who is accountable for what" and actual operation of a system of accountability. There has been a failure in measuring performance and to distinguish and relate input variables, process variables, and output variables. Many previous evaluations by accrediting agencies and external reviewers have tended to focus of the input variables of quality and reputation of faculty, quality of students, and adequacy of resources. This orientation overlooks the impact of a program upon the ultimate success of its students and, of equal importance, it tends to neglect the manner in which teachers and learners interact for some purpose. By delineating and clarifying the evaluation process through the use of a specific checklist confusion can be minimized and areas of agreement can be enlarged. (Author/KE)

**Identifiers**—\*Great Britain

It was not until the 1960's that the subject of higher education started to disturb governments, or the issue of government policy on higher education became a topic of national debate. Some thoughts on the likely evolution of British higher education to the 1980's and beyond are apparent after looking to: the Robbins Report of 1963, which proposed massive expansion of student numbers and "that courses of higher education be available for all those who are qualified by ability and attainment to pursue them and who wish to do so;" to the system as it is now; and finally to issues in North America and Europe. Since there is no agreement about the Good Society, and thus about aims and content, the mandate for the pragmatist is to create a variety of higher education institutions that can fulfill a variety of functions. The direction in which higher education should move is toward greater diversity and greater fairness between the sectors as well as more social justice. What we shall be talking about in 1985 is a system of post-school education in which systems of higher education throughout the world are already moving, and British higher education is set in the same direction. **Descriptors**—Health, \*Health Education, Health Occupations, Health Personnel, Health Services, \*Higher Education, Nurses, \*Nursing, \*Nutrition, \*Nutrition Instruction, Performance Based Education

**Identifiers**—Georgia, \*Nursing Education

Faculty of nursing education programs within the Georgia university system were surveyed to ascertain their opinions about the nutrition competencies they consider essential for comprehensive nursing practice and the level of nursing education program(s) to which these

competencies are best suited. The survey instrument, 56 competency statements, was divided into three sections: (1) nutrition competencies basic to nursing practice in institutions and in the community; (2) items specific to institutional nursing; and (3) items specific to community health nursing. Analysis of the data showed the predominance of respondents favor inclusion of the majority of essential nutrition competencies in both levels of nursing education over inclusion in either the baccalaureate or associate degree program. When respondents indicated a preference for a single program, the baccalaureate program was more strongly preferred for all but four competencies. These four, specific to institutional nutrition, were more strongly preferred for associate degree programs. Correlations between information on the Data Sheet for Respondents and responses on the survey instrument indicated that neither the level of program with which faculty were associated nor respondents' level of academic preparation significantly influenced their responses. **Identifiers**—ACAP, Advisory Committee on Academic Planning, COU, Council of Ontario Universities, Ontario (Ottawa)

In March, 1973, after a review of the Ontario universities' three-year plans, a provisional embargo was placed on doctoral work in biophysics. A full-scale assessment with outside consultants was not necessary in the case of a provisional embargo. Instead, the method used to remove the embargo was self-study by the discipline group leading to a report to the Advisory Committee on Academic Planning (ACAP), which, in turn, makes recommendations to the Council of Ontario Universities (COU). The report is one of a series of disciplinary studies whose emphasis is on forward planning, and it is hoped that the implementation of COU's recommendation will help to ensure the more ordered growth and development of graduate studies in Ontario's universities. The monograph includes the "Biophysics Planning Study" containing specific recommendations concerning biophysics graduate studies; the graduate programs established and proposed in Ontario prepared by the discipline group; and the universities' comments. **Descriptors**—Caucasian Students, Colleges, College Students, Costs, \*Expenditures, Family Income, Family Resources, \*Financial Support, Grants, \*Higher Education, \*Income, Junior Colleges, Negro Students, \*Post Secondary Education, Scholarships, Student Loan Programs, Surveys, Tables (Data)

This report presents data on the income and expenses of students enrolled in colleges, universities and vocational schools providing training beyond the high school level based on a supplement to the October 1973 Current Population Survey (CPS). The tables present data for students enrolled in October 1973 based on family income, expected educational expenses, sources on income, type of school attended, full-

time/part-time attendance status, marital status, and financial dependence on parents. Some major findings are: (1) The median expected educational expenses for full-time college students varied from about \$620 for those in public junior colleges to \$2,640 for students in private universities, and to about \$890 for full-time students in vocational schools. (2) Student's yearly earning and aid from parents were the most common sources of income for undergraduates. Forty-four percent of postsecondary students (excluding graduate students) worked while attending school to pay for the costs of their education. Forty-two percent of students were aided by their parents, 8 percent of students received state scholarships or grants, and about 7 percent received local scholarships. (3) Blacks made up about 8 percent of the total postsecondary school enrollment in October 1973. While a slightly lower proportion of blacks than whites was attending 4-year colleges and universities, the proportion of blacks attending 2-year and vocational schools was somewhat higher than that for white students. The appendix reproduces the survey form used to collect data. (Author/KE)

**Identifiers**—\*Management Systems Inventory, MSI

There is a crucial need in the field of higher education for a methodology of self-study and self-evaluation of the effective and efficient management of postsecondary institutions that deals with facts as well as perceptions as they relate to institutional management. The Management Systems Inventory (MSI) addresses itself to this need. MSI is a management tool designed to permit an institution to evaluate itself through objective and subjective observations made on the basis of both facts and perception of those facts by various internal and external organizational units and constituencies. MSI bridges the gap between being an audit and a strategy prompting the type of introspection that identifies the various perceptions that act as a catalytic agent for management behavior. It establishes five areas of concentration: institutional mission, goals, and direction; applicability of organizational structure to mission; organizational responsibility; the extent to which feedback and evaluation mechanisms assure that responsibilities are carried out and that desired results are achieved; and appropriateness of fiscal operations for sustaining institutional continuity and direction. **Identifiers**—Concordia University (Sir George Williams Campus), \*Mature Students Qualifying Program

In discussing part-time university students, one of the first questions one must ask is, What precisely are the demographic features of this kind of student? The social and demographic characteristics of the part-time student population, including educational background, employment characteristics, residence, travel, parental background, financial support, and marital and family status, indicates a relationship between these variables, academic aspiration, and achievement. Adult students are higher achievers than representative college-age groups. The sample consisted of all new students who registered in the Mature Students Qualifying Program with a 67.6 percent rate of response to a questionnaire. Three dependent variables—credits were used as criteria of educational outcomes for part-time university students. Desire to learn and become educated emerged as the prime reason for taking university courses among over 70 percent of the students tested, while job-related reasons were given first priority by about 20 percent. Family pressures and social reasons received the lowest priority by an overwhelming proportion of respondents. (Author/KE)

Identifiers—Concordia University (Sir George Williams Campus), \*Mature Students Qualifying Program

During the last decade the growth in part-time enrollment of Canadian universities has been greater than growth in full-time enrollment, and the trend is expected to accelerate. Focusing on the dropout, a phenomenon of major concern in part-time university education, survey was made of all new students registered in the Mature Students Qualifying Program at Sir George Williams University. The survey covers demographic variables, educational background, employment characteristics, residence, travel, parental background, financial support, and marital and family status. The dropout is a multidimensional phenomenon. No single factor could explain dropout from higher education. The need for further multidimensional analysis is apparent. The dynamics of dropout behavior might well turn out to be different among full- and part-time student populations. Results obtained here would tend to suggest that they are. (Author/KE)

A law passed by the 1973 Minnesota Legislature required the development and implementation of an on-going budgeting process and standardized reporting format that is compatible among the University of Minnesota, The state colleges, the junior colleges, and the public vocational-technical schools. This report is divided into an introduction, a review of the process of developing a program budget for postsecondary education, a description of the program budgeting model and classification system, the data, and a statewide summary and commentary. This report provides a comparative examination of each

Minnesota public postsecondary education system of proposed resource expenditures and outputs for the biennium with each system's estimated current expenditures and outputs and presents a method of examining postsecondary education data that, until now, has been unavailable to the public and their elevated officials. It shows system and statewide budgets, participation, and appropriations in a program budgeting format. (Author/KE)

The history of the racial problem in the United States is discussed as it affects higher education. The role several universities are playing to ease the problem is considered, including efforts at the U.S. Military Academy to admit larger numbers of minority students. The impact of higher education for minority students on the Army is also assessed. (Author)

**Expanding Opportunity Through Sharing Faculty Resources.**

Southern Regional Education Board, Atlanta, Ga. Inst. for Higher Educational Opportunity.

Pub Date 75

Note—24p.

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*Consortia, \*Cooperative Planning, Cooperative Programs, Coordination, \*Educational Facilities, Facilities, Faculty, \*Higher Education, \*Interinstitutional Cooperation, Resources, Shared Services

The practice of utilizing faculty resources across institutional lines is not new. At the present time there is an increasing awareness of the opportunity for expanding the interinstitutional utilization of faculty between the historically black campuses and the historically white campuses that are located in proximity to each other. In the process of state planning to eliminate dualism in public higher education, the geographic proximity is often regarded as constituting a difficult problem calling for the review of institutional roles and responsibilities. On the other hand, their proximity offers an opportunity for providing, through cooperation and joint planning, a combined resource for serving the total community in its increasing efforts to serve all ethnic groups without discrimination. This report is a compilation of discussions with administrators and faculty from locations where steps to initiate joint planning have been taken. The materials from these discussions are presented under four headings: the potential benefits which may result from interinstitutional utilization of faculty resources; barriers to achieving cooperative programs; types of arrangements that may be developed between institutions; and suggestions for planning procedures. Descriptors—Administrative Problems, \*Collective Bargaining, \*Educational Planning, Educational Problems, Employer Employee Relationship, \*Faculty, Governance, \*Higher Education, Junior Colleges, National Organizations, Organizational Effectiveness, Political Issues, Teacher Administrator Relationship, \*Unions Identifiers—Great Britain, United States

Why do the faculty of colleges and universities organize? Is faculty unionism inevitable? Is facul-

ty unionism irreversible? What is the impact of faculty unionism? These four questions are central to this comprehensive review of experience to date with collective bargaining. Collective bargaining is viewed in the context of rapid changes in colleges and universities in the 1960's and 1970's that have threatened traditional relationships among professors, their institutions, and other sectors of society. Among the subjects discussed are traditional forms of faculty participation in institutional governance; the development, strengths, and weaknesses of some of the national organizations that now represent faculty members as bargaining agents; the changes in faculty relationships to their institutions that have occurred with the development of collective bargaining; and some of the educational, political and administrative issues that are raised by the new bargaining procedures. One chapter focuses attention on faculty bargaining at American's 2-year colleges. Another chapter reviews the British experience with collective bargaining. The author concludes, among other things, that collective bargaining will be a feature of higher education for the foreseeable future. (Author)

Descriptors—Administrative Personnel, College Deans, Committees, \*Evaluation Criteria, \*Evaluation Methods, Faculty Evaluation, \*Higher Education, \*Performance Based Teacher Education, \*Private Colleges, Questionnaires, Student Opinion, Teaching Methods

Much has occurred in higher education to lead to expectation for change in the process of evaluation. The academic deans of all accredited private liberal arts colleges were asked to report on the procedures used in rating both overall and teaching performance, with 83.5 percent replying. Purposes of the questionnaire were to: (1) determine the relative level of importance placed on classroom teaching in the evaluation of overall performance of faculty members; (2) determine the types of information upon which evaluation of teaching performance is based; and (3) compare faculty evaluation policies and procedures during the contractions of the 1970's with the expansion of the mid-1960's. Important findings included: (1) significant declines in importance between 1966 and 1973 were recorded for research and publication; (2) campus committee work and student advising increased sharply as "major factors" in faculty evaluations; (3) in evaluating teaching performance, the deans' reliance on "systematic student ratings" increased significantly; and (4) whereas the importance of chairman's and dean's evaluations retained a prominent position in teaching evaluation, committee evaluation increased in prominence. Specific recommendations and an extensive bibliography are included in the publication. (Author)

This final report of a research project on planning and development lists the most important conclusions drawn from the research dealing with the methodological problems of planning and development of universities. One conclusion is that in the coming decade the qualitative aspects of university activities are likely to be the major concern of those responsible for higher education. Another is that planning at the university level must be considered as part of the planning and management of the whole system of higher education and as dependent on social, economic and political conditions. Recommendations are made concerning: methods and tools for university planning and management; indices and criteria to be used for planning purposes; university information systems for planning; and university planning mechanisms. The experience of different universities is referred to in generalized form, but some details of particular experiences are given in the case studies, summaries of which are included in part three. Case studies carried out for the project are organized in order to study the five important areas: (1) planning access to the university and employment of graduates; (2) planning teaching staff formation; (3) planning of the teaching work; (4) planning of research work; and (5) development of the university information system for planning and management. Identifiers—GSLP, \*Guaranteed Student Loan Programs

This document addresses two separate, though related aspects of the operation of the Guaranteed Student Loan Program (GSLP): (1) the mechanism for setting the special rate allowance (SRA); and (2) the effect of the operating requirements of the program on lender servicing costs. The study develops recommendations for improving both aspects of the program to ensure continuing lender interest in making funds available to eligible students. To develop lender-related data to support the analysis, 16 institutions were surveyed to establish: (1) attitudes toward the program; (2) profitability objectives and expectations; (3) practices for determining the amount of GSL funds made available; (4) operating policies and practices; (5) profitability measurement and comparison criteria; (5) cost of obtaining lendable funds; and (6) costs of operating under the GSL program. Of the institutions either surveyed or for which data were obtained, 13 were lenders. The remaining three contributors were servicing firms. (Author)

Identifiers—\*USSR

Soviet education is designed not only to produce specialists whose skills will be more useful to the State, but also to reshape the character of the person so that it is compatible with Communist ideology. The study attempts to investigate and describe the development of higher education correspondence study in the U.S.S.R. Subproblems investigated involve the relationship between Soviet education and the Central Committee of the Communist Party which actually determines the direction of education, and the

relationship between the Soviet higher correspondence education and the economic requirements of national economy. A review of the existing literature from the pre-Soviet period to the present indicates that although there has been a decline in the number of higher correspondence students since 1965, this form of instruction still plays a significant role in supplying the Soviet economy with a great number of specialists. Correspondence students represent over 1.6 million students, one-third of the total higher education students in the U.S.S.R. (Author/JMF)

 Identifiers—\*Ethnic Student Services, Texas (Austin)

The Ethnic Student Services coordinated and assisted the Minority Graduate Recruiter Visitation Program which was conducted during the Fall Semester, 1974 at the University of Texas at Austin. The major purpose of the program was to assist minority students in expanding their awareness of graduate and professional school opportunities as part of their career options. Twenty-two graduate and professional school recruiters visited the campus to interview and provide information on graduate and professional school opportunities to minority students. A comprehensive program of campus coordination, scheduling of recruiting dates, advertisement to students, and counseling and assistance to students was conducted. Students were able to speak to recruiters concerning such issues as programs offered, application procedures, admissions criteria, campus life, financial aid, and available opportunities for minority students. The program was evaluated by means of two questionnaires, one for recruiters and one for students, from which specific recommendations for improvement of the program were drawn. (Author/JMF)

Identifiers—\*Catholic University of Nijmegen, Netherlands

A method to calculate the need for academic staff per faculty, based on educational programs and numbers of students, is described which is based on quantitative relations between programs, student enrollment, and total budget. The model is described schematically and presented in a mathematical form adapted to computer processing. Its application for the department of psychology at the University of Nijmegen is given. Field research is reported. A concept of education is formulated as a starting point for the construction of a model, and the university is described in terms of systems theory. Proposals are made for: (1) the development of an information model by means of fundamental research on elements and variables that are of special importance to a university policy on education and research, relevant to the type of management that a university requires; and (2) the extension and refinement of the model, relating programs, student numbers and means. Identifiers—\*Chalmers University of Technology

In CER's program on institutional management in higher education, eight universities were brought together to set up teams within their institutions to work on their respective pre-selected problem areas. The planning, programming and budgeting system (PPBS) was developed as a management tool which would improve effectiveness by increasing the requirements of economic thinking and economic responsibility at all levels. The system devised at Chalmers University of Technology has three main objectives: developing an output-oriented finance methodology applicable to the Swedish university system; developing a modern management methodology applicable to a PB university; and obtaining possibilities for changing the decision-making structure outside and inside the universities in a decentralized and democratic direction. The application of program budgeting at Chalmers for higher education and research is devised for undergraduate engineering, undergraduate science and social science, technical research and graduate training courses, and external services such as building maintenance and library services. Identifiers—Denmark, \*University of Copenhagen

Viewpoints on the university organization are represented which arose from study of the situation in the University of Denmark and the University of Copenhagen in particular. The question addressed is whether it is possible, by way of a simple set of rules to create a system of governance for higher education that will satisfy the demands of society. Emphasis is on building a close democracy with decentralized planning and coupled relations between all parts of the university and society. The process of designing alternative structures for the University of Copenhagen is clarified, as are the possible uses and problems to be considered with professional management in a university setting. Comparison with the University of California is made. Differences in the structure of the organizations and in particular the process of decision making in the budget planning are shown to result in differences in the research activity around the management and administration of the two institutions. Ideal university organization and working conditions are considered. (LBH)

Identifiers—England, Netherlands, Norway, Switzerland, Yugoslavia

Based on the data obtained from a specially conducted survey of universities in CERI member countries, this report gives a descriptive analysis of interdepartmental and interregional variations in the quantitative aspects of university operations. The data and findings are of a tentative nature since the survey on which the analysis was based suffered from the lack of standard definitions of concepts as well as the paucity of available information at the institutional level. Data were obtained for 32 different departments grouped into six major subject fields, pure sciences, technology, medical sciences, humanities, law, and social sciences. The ratio between student enrollment and academic staff is discussed as an indicator of the need for academic staff. The importance of non-academic staff is also emphasized, and ratios between students and administrative staff indicate distinct differences between pure sciences, technology and medical sciences, as compared with the other fields. Technology provides the highest number of teaching hours per week. Data show that these three fields also spend more of the total annual recurrent expenditure on non-remunerative items. A tabulation is given of average recurrent expenditure per student enrolled by department for England, Netherlands, Norway, Switzerland, and Yugoslavia. The data show substantial cost differences between fields within the same country. (LBH)

Identifiers—\*Great Britain

University management is examined with regard to six major areas: decision and participation, finance, information, human flows, physical plant and equipment, and academic planning. Comprehensive long and medium term planning is proposed with the special feature of decentralized decision making. The issue of information requirements for managerial decision making must be considered in view of socio-political conflicts within and outside the university. Possibilities of substantially decreasing unit costs in British universities are explored. Justification for a research collaboration among universities and its continuance into the future on a wider scale is apparent when the wider experience is considered. Latent problems of management can be discussed explicitly within and among university communities in the sense of a continuing dialogue on issues and problems. The demonstration and diffusion of promising techniques can be carried out efficiently if a clearinghouse facility is made available to which a large number of universities have access. (LBH)

Descriptors—\*Administrative Personnel, \*Administrative Policy, Administrator Responsibility, Administrator Role, Agency Role, Data Processing, Higher Education, \*Information Systems, \*Management Systems, Organizational Effectiveness, Planning, \*Post Secondary Education

Most efforts to achieve more effective administrative computing in higher education have focused on technical questions or on isolated applications required by middle management. Much less attention has been paid to the question of the proper role of administrative computing in the accomplishment of overall institutional objectives. The enormous variety of environments, missions, and goals found among institutions in postsecondary education precludes easy, all-inclusive answers. But answers must be found if institutions are to make major improvements in their information systems and administrative computing functions. Improvements will occur only if top-level management takes an active role in finding those answers. After defining the alternative roles that administrative computing can play in an institution, and after the various stages by which administrative computing is developed, an institution should be able to assess where its administrative computing effort stands. The next step is the involvement of top-level management by identifying the roles and responsibilities of users, the administrative computing organization, and external agencies. (Author/KE)

Descriptors—Biological Sciences, Doctoral Degrees, Educational Finance, Federal Aid, Financial Support, \*Higher Education, \*Medical Research, Medical Schools, \*Private Financial Support, \*Public Support, Research, \*Research and Development Centers, State Aid

This survey is intended as an aid in assessing the magnitude and character of the nonfederal contribution to health research, in particular the present availability of alternative nonfederal funding sources at doctoral institutions (the prime locus of the nation's biomedical research effort), and to elicit from institutional representatives their judgments about the prospects for increased participation by state/local governments and the private sector in support of health related research. Usable data was returned by 73 percent of the institutions surveyed offering biomedical research and development activity. The data supplied was analysed in relation to selected institutional characteristics: (1) control of institution (public/private), (2) relative size of biomedical research enterprise (Top 20/Bottom 20), and (3) whether respondent institutions possessed a medical school or not. Respondents also rated their institutions' effectiveness in finding new nonfederal funds for biomedical research and their projected nonfederal funds for the next five years. Finally, the respondents commented on anticipated changes in nonfederal funding, including the nature, magnitude, and implications of these changes. (Author/JMF)

Steady State Staff Planning: The Experience of a "Mature" Liberal Arts College and Its Implications.

Carleton Coll., Northfield, Minn.

Report No.—X-03-73

Pub Date Mar 74

Note—138p.

EDRS Price MF-\$0.76 HC-\$6.97 Plus Postage

Descriptors—College Faculty, \*Faculty, Faculty Evaluation, \*Faculty Mobility, Faculty Promotion, Faculty Recruitment, \*Higher Education, \*Instructional Staff, Salaries, \*Tenure

Identifiers—\*Steady State

The end of faculty growth in higher education has led to near panic predictions of aging, highly tenured, more costly, steady-state faculties as the "growth bulge" hired in the 1960's age. This study discusses two models for simulating the behavior over time of indices of faculty health such as average age and salary, annual new hires, and percent tenured. These models are then applied to a specific faculty to demonstrate their usefulness and to provide recommendations. Each school should explore the future implications of its current faculty distribution by age and tenure status and of current hiring and attrition behavior before accepting predictions based on national data. Schools should not overlook "natural" attrition which accounts for much of the difference between annual new hires and retirements. A time perspective is important, and the behavior of indices of faculty health is cyclical. The young, regularly rejuvenated faculty of the 1960's was somewhat artificial since it was based on permanent growth, and the current deterioration of faculty health indices is in part a return to pre-growth normalcy and will be eventually reversed. The study concludes with a discussion of options for avoiding the aging, more costly faculty approach to steady-state and experiment with the impact of variations in tenure standards on faculty health indices. Document Not Available from EDRS

Descriptors—Child Care, \*Costs, \*Educational Finance, \*Females, Financial Needs, Financial Support, Mothers, \*Post Secondary Education, \*Student Loan Programs, Womens Education

Historically, proportionately fewer women than men enter college and those that enter are faced with higher out-of-pocket expenses. Often they depend on borrowing to meet college costs. This document examines the suitability of existing loan arrangements for financing the postsecondary education of women. It also evaluates other, alternative, loan repayment rules and arrangements that would make debt financing more suitable to female earning patterns. The document concludes that in certain circumstances it may be worthwhile to make loans more suitable to women who wish to finance their postsecondary education. It is suggested that the following steps be taken to modify repayment terms of such loans: (1) the minimum repayment amount of \$30 a month be reduced; (2) the term of guaranteed loans be extended to 20 years; (3) special loan options to defer repayment of interest and principal be extended to households with children under six; and (4) a \$2,000 special allowance for child care in determining eligibility for interest subsidy. Descriptors—\*Cost Effectiveness, \*Costs, \*Educational Finance, \*Educational Objectives,

Financial Support, \*Medical Education, Medical Schools, Tables (Data)

In order to consider how medical education is financed guidelines have to be developed that accurately estimate the costs of the resources required for contemporary medical education. It is then necessary to estimate the cost of undergraduate medical education within the perspective of the total education and training of the physician and the other programs and activities of the complex modern medical school. To accomplish this goal, the institutional setting in which this education takes place and the elements and objectives of the undergraduate medical education program are described. The elements and objectives of undergraduate medical education also are defined. Quantitative cost measurements are then presented and the committee's views on the issues surrounding cost measurement are discussed. Suggestions are that future levels of such support be determined by estimates of the costs of the educational program leading to the M.D. degree. (Author/KE)

Joint action by academic staff, students, and business concerns in the Paris region is reported in which the attitudes and preferences toward prospective improvements in the University of Paris' Higher Economic Degree (DES) are determined. The report is in six chapters and shows the stage the investigation had reached by September 1971. Course organization during 1970-71 and general study background are given, followed by reports of individual surveys by the three groups, and future prospects and further stages in the analysis. Obstacles to future decision-making procedures are reviewed. (LBH)

Identifiers—\*Free University of Berlin

Major reforms brought about in July 1969 at the Free University of Berlin in its organization, planning, and decision making are reviewed. Specific problems are addressed, such as plans for introducing an information system on technical data and space use, plans for an information system on personnel employed by the university, and plans for an information system on students in connection with a new student registration procedure. The utilization of capacity models in these areas is discussed. It is concluded that universities will more often have to be measured in terms of objectives and the degree to which they are met. The size of groups, teaching techniques, rules concerning teaching obligations, proportions of time spent in different activities, area ratio factors, etc. must be considered. There is also the problem of deviations from normal

practices of study and the popularity of different establishments, which is difficult to define statistically. (LBH)

Descriptors—Administrator Role, Admissions Counselors, Adult Education, \*Consortia, \*Cooperative Planning, Curriculum Development, \*Educational Development, Facility Planning, Governing Boards, Grants, \*Higher Education, Law Enforcement, Library Facilities, Management Information Systems, \*Program Planning, School Newspapers

Identifiers—\*Associated Colleges of the St. Lawrence Valley

The Associated Colleges of the St. Lawrence Valley were chartered by the Board of Regents of the University of the State of New York to facilitate and stimulate cooperative relationships among four distinctive institutions of higher education to enable them to improve their ability to achieve their chosen goals without a loss of their unique identities. To accommodate the organization of the consortium it was necessary to restructure the Board of Trustees. Meetings of administrators with comparable responsibilities are held throughout the year. Joint activities among admissions officers have been successful. Grants have been established that focus on continuing education, law enforcement education, and library facilities planning. Advances such as student registration at member colleges have been made in the construction of curriculum. Shared ticket sales, equalization of rates, cosponsored events, and block bookings have regularly been used in cultural affairs planning. Facilities managers meet to discuss potential areas of cooperation. Faculty has the opportunity to teach at other campuses. Exploration of the utilization of management information systems has been an interest of the consortium. An interinstitutional newspaper has been established. Some student services and student programs are also shared. (Author/KE)

First Annual Report. 1974-75 Ontario Council on University Affairs.

Ontario Ministry of Colleges and Universities, Toronto.

Pub Date 30 Apr 75

Note—39p.

EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage

Descriptors—\*Advisory Committees, Annual Reports, \*Educational Finance, \*Educational Objectives, Fees, Females, Graduate Study, \*Postsecondary Education, Tuition, \*Universities

Identifiers—\*Canada (Ontario)

The first annual report of the Ontario Council on University Affairs was a prelude to a regular annual cycle that henceforth begins every March 1, and is intended to ensure that the Council, as Ontario's independent advisory body with respect to universities and certain other postsecondary educational institutions, is closely in step with the decision making processes of government. Its principal innovation was a memorandum to generate an agenda of important matters to which close attention will be given in the coming year. The matters include the further refinement of equity in institutional financing, the clarification of objectives designed to ensure adequate funding of bilingualism, and a thorough review of the financial and institutional dimensions of university education in Northern Ontario. Broader questions of particular import were outlined by the Council at the close of its inaugural. It raised questions with respect to such major topics as formula revision, tuition fees, accessibility, graduate studies, and the status of women. (Author/KE)

**Identifiers**—\*Empire State College

Empire State College (ESC) has an interest in following the progress of its recent graduates in the world of work as well as discovering what happens to those graduates wishing to continue their education. To obtain this information a survey was conducted of all graduates and additional data analyzed that was contained in each graduate's file. Findings are presented in three parts -- the educational experiences of the graduates while attending the college; the graduate school admissions experiences of these students applying to graduate school; the work experiences of those graduates not attending graduate school. An appendix contains the methodology of the study, the general background characteristics of the graduates, and selected tables of interest. Some college experiences that provide useful background information on the graduates are also included. ESC graduates were found successful in their postgraduate experiences. (Author/KE)

**Descriptors**—Civil Rights, Colleges, \*Higher Education, \*Racial Segregation, University Extension, Urban Culture, \*Urban Education, Urban Environment, Urban Schools, \*Urban Studies, \*Urban Universities

Texas Southern University was created in a decisive period of racial turmoil in national affairs, a period which eventually resulted in dramatic and far reaching changes in legal and societal accommodations of the ambitions and aspirations of minority people. Higher education was an arena of conflict in the forefront of civil rights struggles, and the establishment of Texas Southern in 1947 was an historic stratagem in the legal effort to determine the future of racial segregation in American higher education. The monograph is a summary and analysis of the history and functions of Texas Southern as a predominantly Black college emerging as a "special purpose institution of higher education education for urban programming," an enterprise in cultural pluralism. Consideration is given to the social and political implications of the founding of the institution and to its changing role as well as the dynamics of the "urban university" status. (JMF)

**Educational Outcomes from Contract Learning at Empire State College.**

Pub Date Mar 75

Note—42p.; Paper presented at National Conference on Higher Education (30th, Chicago, Illinois, March 23-26, 1975)

**EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage**

**Descriptors**—Academic Ability, Adult Students, Educational Benefits, \*Educational Objectives, \*External Degree Programs, \*Higher Education, Independent Study, Married Students, \*Performance Based Education, Student Attitudes, \*Student Characteristics, Teacher Role

**Identifiers**—\*Empire State College

The Empire State College does not have a traditional campus but operates from a variety of leased facilities located in major population centers and in smaller communities where there appeared to be a clear need for such a college. Who are the students attracted to an individualized, contract learning type of program and why do they seek out Empire? What are the components of contract learning, how do students carry it out, and how do they evaluate it? What are the educational outcomes from contract learning and how satisfied are students with this approach to learning? Answers to these questions imply: contract learning seems a particularly well-suited format for the older, working, married adult who may have attended several colleges

some years ago. Students differ at entry and throughout the degree program in their ability to handle independent study. The role of mentor becomes crucial if the college is to foster self-learning. An experienced, resourceful, and mature group of faculty committed to the ideal of independent learning is needed to effectively work with students having different styles of learning. The contracting process itself has substantial educational benefits apart from the subject matter the contract addresses. (Author/KE)

**A Role For Faculty in Contract Learning: Toward A Theory of Nontraditional Faculty Development.**

Pub Date Mar 75

Note—17p.; Paper presented at National Conference on Higher Education (30th, Chicago, Illinois, March 23-26, 1975)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

**Descriptors**—\*External Degree Programs, Faculty Evaluation, \*Higher Education, \*Instructional Innovation, \*Performance Based Education, \*Skill Development, Teacher Role

**Identifiers**—\*Empire State College

Empire State College (ESC), a statewide college without a campus, requires Nontraditional concepts of faculty, since their role as mentor in a contractual learning situation is more diverse than that of a traditional faculty member. The ESC mentor role involves several activities: advisement, intellectual development, evaluation, college development, and personal career development. In the faculty's attempt to carry out those functions five stages of development generally evolve -- antitraditionalism, estrangement, confrontation, turnaround and commitment, and renewal. The importance of identifying these five stages of innovative faculty development is that in knowing about them steps can be taken to accelerate their completion. New and prospective mentors can profit from an understanding of these stages and of the problems they are likely to encounter. (Author/KE)

**Identifiers**—\*Empire State College

Some of the reasons for adopting contract learning and some strategies used at Empire State College, the University of South Carolina, and Wilmington College, are useful in aiding the adoption of new ways of teaching and learning. Several useful strategies are: (1) launch a committee to study local goals and needs; (2) connect the group and concerned outsiders to evidence about local conditions and to external knowledge resources; (3) seek and sustain support at the top of the institution but broadly involve faculty; (4) persuade persons whose support is needed by personal interaction; (5) develop advisory groups; (6) seek external funding to get things started, but switch to stable internal support as quickly as possible; (7) recruit leaders and faculty who understand the program; (8) carefully evaluate contract learning experiences, outcomes and related costs; (9) provide orientation and professional development opportunities for those who must assume the new roles; (10) provide reasonable workload and suitable rewards for mentoring functions; (11) set up mechanisms to disseminate innovation; (12) establish renewal units such as planning committees, research officers, faculty development centers, policy analysis and planning officers. **Cost Analysis for Contract Learning.**

Pub Date Mar 75

Note—17p.; Paper presented at National Conference on Higher Education (30th, Chicago, Illinois, March 23-26, 1975)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

**Descriptors**—\*Cost Effectiveness, Costs, Educational Innovation, Evaluation Criteria, \*External Degree Programs, \*Higher Education, \*Management Information Systems, \*Performance Contracts

**Identifiers**—\*Empire State College

Empire State College educational evaluation is oriented to the individual student and in the learning experiences mediated by the institutional arrangements it is essential that cost information be on an individual student basis. Therefore the basic unit of analysis chosen is the individual student contract. The costing model developed assigns to each student contract its share of all costs -- both direct and indirect. Most elements of cost are gathered in cost centers by the commonly accepted definitions. A hypothesis that "high-impact" students would be more costly because they made greater use of tutors and engaged in a longer contract experience was correct. However, the high-impact students at one location, while taking work that lasted almost one month longer than those at another location, used substantially less tutor services than did those at the other location. An analysis of high-impact students' contracts and their relation to actual facility and cost was made. As is found with everything that develops from this cost/effectiveness system, however, more questions are raised than answered. (Author/KE)

**Administering Individualized Education.**

Questions, Issues, Suggestions.

Pub Date Mar 75

Note—24p.; Paper presented at National Conference on Higher Education (30th, Chicago, Illinois, March 23-26, 1975)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

**Descriptors**—Administrator Responsibility, Curriculum Development, \*Educational Administration, Educational Innovation, \*External Degree Programs, Faculty, Faculty Evaluation, \*Higher Education, Individualized Instruction, \*Performance Contracts, \*Planning, Student Characteristics, Student Development, Students, Success Factors

**Identifiers**—\*Empire State College

Individualized education works well for a particular type of student and faculty member. If you go beyond this type of student and faculty member, you run head-on into serious administrative and planning problems. In short, students are unsure and often confused about their role in individualized education. It seems that (1) students need thorough introductions to individualized programs -- what it's like to be a student in such a program, and maybe opportunities to practice before the program actually begins; (2) faculty need more varied and creative ways, beyond sink-or-swim, to learn their roles, responsibilities, and opportunities; and (3) individualized education programs need clarification as to content, structure, and process. Fundamentally, these findings suggest that if institutions want to work with a wide range of student types and backgrounds, it may require substantial investment of time and energy in faculty development and student preparation. The effect of the women's movement on the lives of academic women potentially has a major impact on college and university campuses. Although the movement has already reached thousands of students, chiefly through women's

studies programs, it has not yet begun to change the institutions of higher education. The four women who are the authors of this book like other academic women have seen their lives off campus change over the past four or five years. Their experiences led each of these women in different academic organizations to press for women's studies courses, for child care, or other institutional changes. In this document, the four women chart the histories of their lives as feminists in the world of higher education. And as they do so, they inevitably approach the issue of institutional reform. No consensus is reached on the manner or extent of desirable reform, and though these women of dissimilar backgrounds and personalities agree on much, they make no attempt to disguise their differences. All are torn between the awareness of the "formidable power of male-conceived and male-controlled law" and their intense desire to see feminism "overthrow the empire -- not in exchange for an equally oppressive patriarchy, but rather to achieve the equalization of power." **Identifiers**—Australia, Belgium, German Democratic Republic, United States, USSR

These five case studies cover different aspects of university planning. Two case studies analyse university planning in two countries, the USSR and the German Democratic Republic, where overall national social and economic planning exists and where planning of higher education forms part of the developed planning system. The other three case studies -- University of New York at Buffalo, Western Australian Institute, and University of Louvain in Belgium -- analyse some aspects of university planning, management, and the information systems in countries where there is no national socioeconomic planning system. The five different case studies collected together constitute an interesting comparative survey of how universities plan their activities within different socioeconomic contexts. However, all of them substantiate that the use of modern methods of planning and management, supported by an adequate information system of criteria for the evaluation of university activities, can make a very important contribution toward improving university planning and management and toward a better orientation of university activities to the socioeconomic needs of their respective countries. **Descriptors**—Coordination, \*Educational Planning, \*Federal Legislation, \*Higher Education, Organization, \*Post Secondary Education, \*Statewide Planning

**Identifiers**—\*1202 Commissions

With the passage of the Education Amendments of 1972, the Congress of the United States introduced to the nation's educators a new academic and educational environment. Included in those amendments, under Title XII, General Provisions, was Section 1202 pertaining to the establishment of state postsecondary education commissions, signifying an expanded awareness of the new multifaceted environment of postsecondary education. Four constituencies interested in statewide coordination of higher education and 1202 commissions were brought together in the conference. The constituencies were the executive directors (or their representatives) of state 1202 commissions, officials of the U.S. Office of Education representing the executive or administrative interests in the federal government, and scholars from the higher education community who have been engaged in research on 1202 commissions. Formal papers and informal discussions from that meeting are presented. The papers discuss (1) information related to how states have proceeded in establishing the state postsecondary education commissions required by 1202 in the Education Amendments of 1972, including information about membership by states and provisions for coordination of postsecondary planning with vocational education and manpower planning; (2) problems facing 1202 commissions; and (3) whether or not the 1202 commissions should be dissolved, and, if not, how they can be improved. **Identifiers**—\*Pennsylvania

The strategic deployment of state funds is suggested to support changes in higher education to increase faculty productivity and to promote such changes as the adoption of the Carnegie Commis-

sion on Higher Education suggestions for less time for degrees (e.g., the three-year bachelor's degree). The use of contracts for services from private higher education institutions in the various states is reviewed as a more feasible procedure than the continuous expansion of public higher education facilities. A correlation is shown between mounting tuition and fees in the private sector and its declining proportion of the total college enrollment. A system for eliminating tuition subsidies and the effects of below cost tuition is examined. The study suggests that an alternative to per student aid in the New York system of aid on the basis of earned degrees produced by the institution. Assisting colleges in forming consortia not only by state leadership but by providing full-time coordinators to promote maximum utilization of resources within each consortium is suggested by the study as another alternative in financing higher education. In the last 10 years student financial aid has been characterized by a surge of enormous growth that has been both rapid and largely uncoordinated. The current situation is classified into four major headings: student confusion; serious managerial problems; lack of conceptual clarity; and special problems in need analysis. The implications of the findings are concluded to be serious. The multiple programs, apparent inconsistencies, and managerial problems create a poor delivery system for student financial aid, which will continue to increase the amount of confusion and uncertainty among the applicants, recipients, and the personnel who advise them. Funds are likely to be used inefficiently. The poor delivery system could cause inefficient management to the extent that Congressional and state legislative enthusiasm for student financial aid programs could be depressed. Developments and changes in the State Scholarship Program, the College Opportunity Grant Program, the State Guaranteed Loan Program, the Supervised

Clinical Training Program, the Medical Student Contract Program, the Law Enforcement Personnel Dependents Scholarship Program, and the Research Program are reviewed with statistical data included. (Author/LBH)

Descriptors—College Students, Cooperative Education, \*Educational Experiments, Educational Objectives, Educational Strategies, \*Field Experience Programs, \*Higher Education, Instructional Design, Internship Programs, \*Learning Experience, Literature Reviews, Practicums, \*Teaching Procedures, Work Experience Programs

The concept of experiential education, defined as learning outside the normal classroom environment that has been planned for prior to the experience, is reviewed. This includes internships, field experience, practicums, and cooperative education. Topics covered deal with the liberal arts, professional training, institutional reform and the community, new goals of education, the transition from school to work, career exploration and issues of employment, work and service. Taken as a whole, the literature of experiential education is concluded to call for a new interpretation of the relationships of the individual to those institutions that affect him, including education, the workplace, and citizenship. It is suggested that to create an environment hospitable to true life-long learning, the relationships between learning and working and serving must be redrawn in such a way that the individual can gain more from all three activities and see that the three activities are not necessarily unrelated. The need is also cited to rethink the methods of teaching general or liberal arts education and to relate this type of learning to the acquisition of specific competencies or skills. (LBH)

Assessment of Outcomes from the Academic Administration Internship Program: 1965-1975.

American Council on Education, Washington, D.C. Academic Administration Internship Program.

Pub Date Jun 75

Note—26p.

EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage

Descriptors—\*Administrative Personnel, \*Administrator Education, Administrator Evaluation, Administrator Qualifications, Career Education, Comparative Statistics, Educational Administration, Graduate Surveys, \*Higher Education, \*Internship Programs, \*Program Evaluation, Questionnaires, Trainees

Of 391 living participants in the 10-year-old Academic Administration Internship Program (AAIP), 320 or 82 percent completed the questionnaire, which became the basis of this evaluation study. Survey data were used to determine the current status of the AAIP alumni and fellows, the usefulness of the AAIP experience in their careers, the national reputation of the program, the participants' career expectations, and the justification for the AAIP's continuance. Professional positions held by 353 Fellows in the first nine AAIP classes during the 1974-75 academic year are classified: 33 presidents or chancellors; 50 chief academic officers; 46 associate chief academic officers; 40 vice-presidents in non-academic (e.g., planning) areas; 29 deans; 18 directors of educational programs; 20 assistants; 8 executives in governmental agencies or associations concerned with postsecondary education; 32 departmental chairpersons; 7 miscellaneous postsecondary education involvement; 48 full-time faculty members or researchers; 19 business, governmental, or religious executives. Sixty percent rated the AAIP

national reputation as "outstanding." (Author/LBH)

Identifiers—\*Washington

The Graduate Information Survey instrument was designed to gather a variety of biographic and demographic data, as well as data on the students' college experiences, career plans, and attitudes. Data are presented on the characteristics of 1972 graduates from public and private universities. Seventeen four-year colleges and universities provided lists of 1972 baccalaureate degree recipients. From these lists a stratified random sample of 1588 graduates was drawn; stratification involved selecting a representative sample of nonresident students appropriate to individual institutional enrollments. Approximately 48 percent of the questionnaires were returned and usable. Statistical data are provided: survey respondents by major, age, and sex; factors influencing decisions to attend college; time for degree completion; transfers; learning options; occupational aspirations; relationships between educational program and employment. The vast majority of graduates believe their most important objective in going to college was to continue to learn; the second, to satisfy job requirements. More than 50 percent felt they could not yet judge whether their undergraduate program prepared them for employment. (LBH)

An Evaluation of Mastery Instruction Courses by Use of Student Ratings.

Washington Univ., Seattle. Educational Assessment Center.

Report No.—EAC-R-76-3

Pub Date Jul 75

Note—33p.

EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage

Descriptors—Achievement Rating, \*College Students, Educational Experiments, Educational Strategies, \*Higher Education, Instructional Design, Learning Experience, Learning Theories, Lecture, \*Rating Scales, \*Student Evaluation, \*Teaching Methods, Teaching Procedures

Identifiers—\*University of Washington

Seven mastery instruction courses offered in different quarters at the University of Washington are examined. The study method involved obtaining student ratings of these courses for comparison among themselves and with student ratings of traditional lecture method courses in the same subject field. For this purpose a Mastery Instruction Student Rating (MISR) Form was devised. It was found that: (1) mastery instruction courses received stable student ratings from different student samples, Fall and Winter Quarter; (2) a majority of items (18 out of 30) on the MISR Form discriminated among the mastery instruction courses at significant levels; (3) no systematic differences in mastery instruction and traditional lecture courses in the same subject field were observed; (4) mastery instruction courses received significantly more favorable ratings on 12 of 17 student rating items when their ratings were compared to the population of University of Washington Form D student ratings. Brehman, George E., Jr.

A Study of Baccalaureate Engineering Demand and Supply in Pennsylvania: Methodology and Findings.

Pennsylvania State Dept. of Education, Harrisburg. Bureau of Information Systems.

Pub Date Jul 75

Note—116p.

EDRS Price MF-\$0.76 HC-\$5.70 Plus Postage

Descriptors—Bachelors Degrees, Birth Rate, \*College Graduates, Educational Finance, Energy Conservation, Engineering Technology, \*Engineers, Financial Policy, \*Higher Education, \*Labor Market, Minority Groups, Population Trends, Scientific Personnel, \*Skill Obsolescence, Working Women

Identifiers—\*Pennsylvania

The demand and supply of baccalaureate degree engineers from 1975 to 1983 are assessed, with some analysis of the implications the declining birth rate will have beyond 1983. The study reveals a current (1975) shortage for all types of engineers as well as a considerable long-term shortage to 1983 because of the probable response to the energy crisis. The greatest need, numerically, will be for electric-electronics engineers, mechanical engineers, industrial engineers, and chemical engineers. There will also be a marked increase in demand for highly specialized types, such as energy production, biomedical, health systems, and aquaculture. The long-term decline in the number of college-age youth projected here indicates a severe and deepening shortage of trained engineers unless currently untapped populations, such as women and minorities, are recruited. Some consideration is also given to the problem of obsolescence and the possible role that industry and the schools of engineering may play in reducing it. Recommendations are made for (1) encouraging more students to major in engineering, (2) placing more emphasis on in-service and continuing education to avoid obsolescence and upgrade personnel quality, and (3) not building more classrooms but making more funds available to upgrade teaching and lab equipment. (Author/LBH)

The Status of Women in the Ontario Universities.

Pub Date Jun 75

Note—24p.

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—Comparative Statistics, Day Care Services, Educational Policy, Faculty Evaluation, \*Feminism, \*Higher Education, Job Tenure, Promotion (Occupational), Sex Differences, \*Sex Discrimination, Statistical Surveys, \*Women Professors, \*Womens Education, Working Women

Identifiers—\*Ontario

Existing data on the status of women, both as students and as members of the full-time teaching staff, are examined. Actions taken, being taken, and being planned by the Ontario universities are also reviewed. It is shown that, in general, women do not participate as fully as students as do men, but there is no evidence at the system level to suggest that this situation results from discriminatory practices in the universities. Women also generally do not have equality of representation on the teaching staffs. The percentage of female teaching staff does not differ substantially from the percentage of women in doctoral programs, which leads to the conclusion that the situation will not change in the next few years. Women on the teaching staff have not been promoted into the higher academic ranks to the same extent as their male counterparts nor are their average salaries as high. Universities are re-examining their policies and procedures with regard to such concerns as recruiting, hiring, remuneration, promotion, and granting of tenure, pension and fringe benefits, and day care facilities. Tabular data are included. (LBH)

The Use of Financial Analysis in Decision Making: Cable Economics Section 4.

Cable Television Information Center, Washington, D.C.

Spons Agency—Ford Foundation, New York, N.Y.; John and Mary R. Markle Foundation, New York, N.Y.

Pub Date 75

Note—40p.; For a related document see ED 071 399

Available from—Cable Television Information Center, The Urban Institute, 2100 M Street, N.W., Washington, D.C. 20037

**EDRS Price MF-\$0.76 Plus Postage. HC Not Available from EDRS.**

**Descriptors—Administration, \*Cable Television, \*Cost Effectiveness, \*Decision Making, Financial Services, Flow Charts, Guidelines, \*Mass Media, Planning, Policy Formation, Telecommunication**

**Identifiers—\*Cable Economics**

A procedure for the use of financial analysis in decision making about implementing cable television and securing all possible services is outlined. A six-stage decision making flow chart is provided; the six stages then explained and elaborated. The six stages are: define all realistic options; eliminate certain options because of lack of interest; define financial pass-fail criteria; determine financial feasibility of all remaining options; test sensitivity of results to basic assumptions. A financial flow chart is also included. It is suggested that similar flow charts be constructed for other decision making areas related to cable television, such as who shall operate the system. This procedure replaces the recommendations contained in the "Cable Economics" report conclusion. (SK)

**Satellite and Cable: No Highway in the Sky for Conventional Teaching and Learning.**

Pub Date 3 Jun 75

Note—17p.; Paper presented at the Conference on University Applications of Satellite to Cable Technology (Madison, Wisconsin, June 3, 1975)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

**Descriptors—\*Adult Education, \*Cable Television, Communications, \*Communication Satellites, Conventional Instruction, Educational Innovation, \*Educational Technology, Extension Education, \*Instructional Media, Media Technology, Speeches, Telecommunication**

In examining the potential role of satellites and cable in classroom use, technological developments have been seen as extensions of schooling, rather than education in the broader sense. It is said that most education actually occurs in the school format, however, more progress in media development is predicted in non-school contexts, especially in adult and continuing education. Effective use of satellites and cable might additionally help to restore the balance in cultural offerings and to create areas of understanding across the "global village." The universities should take an active role in developing the educational function of media apart from the classroom. (SK)

Identifiers—Computer Equipment, Data Management, IMS, \*Instructional Management System

An approach to a cost analysis of pilot, prototype, model and operational versions of the Southwest Regional Laboratory's (SWRL) Instructional Management System (IMS) is described. Five classes of systems (conceptual, pilot, prototype, model and operational) are defined, and a system development process relating classes of systems is presented. IMS functions are discussed in terms of five subsystems: data generating, communications, data processing, information storage, and report generation. Cost estimates for the communications subsystem are included. (Author/DGC)

Identifiers—\*CHARGE, Color Halftone Area Graphics Environment

The image generator function and author language software support for the CHARGE (Color Halftone Area Graphics Environment) Interactive Graphics System are described. Designed initially for use in computer-assisted instruction (CAI) systems, the CHARGE Interactive Graphics System can provide graphic displays for various applications including equipment design, troubleshooting, and mathematics. It can achieve color, gray level, and three-dimensional (3-D) perspectives. This report describes the system's procedure for representing a complex 3-D world, forming a colored perspective of that world, and then encoding the perspective in a format for transmission to and display on a CHARGE terminal. Examples of CHARGE inputs and the system's resulting graphic displays together with flowcharts of the process are provided. (Author/DGC)

Approval Plans and Departmental Fair Share.

Purdue Univ., Lafayette, Ind. Libraries.

Pub Date Apr 75

Note—34p.

EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage

Descriptors—Departments, \*Library Acquisition, Library Collections, Library Expenditures, \*Library Material Selection, Library Research, Library Technical Processes, Program Evaluation, \*University Libraries

Identifiers—\*Approval Plans, Purdue University

Some university academic departments contend that they do not receive a fair share of approval-plan books. The study attempts to measure the proportion of books for each departmental subject in general publishing and to compare those ratios to their proportion in approval plan receipts. It also sought to determine whether, and to what extent, book receipts that are low in some areas are also proportionately higher in cost. The study compares both books and costs for 47 Purdue academic departments in three ways: (1) general publishing (Publishers Weekly figures), (2) publishing after selection for academic level (Baker and Taylor data), and (3) specific approval-plan receipts (Purdue). Results indicate that approval-plan selection closely follows proportions in general publishing and that some departments with small shares of books may require disproportionately larger shares of the book budget. Identifiers—ALA 75, Colorado (Sheridan), Library Services and Construction Act, Multitype Library Networks

The Arapahoe Regional Library District and the Sheridan School District, in Colorado, cooperated in developing a library to serve both high school students and the general community. Initially funded by a Library Services and Construction Act grant, this cooperative venture succeeded because of the intense preplanning done by school and library personnel closely associated

with the project, the commitment on both sides to the idea that the operation was beneficial to both parties, the shared staffing responsibilities, the written statement of procedures and assignment of responsibility, and library personnel who understood each other's philosophies and duties. (LS)

In Touch With Tomorrow. Inaugural Address.

Pub Date 4 Jul 75

Note—17p.; Paper presented at the American Library Association Annual Conference (94th, San Francisco, California, July 4, 1975)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—Futures (of Society), Information Dissemination, Librarians, \*Library Associations, Library Cooperation, \*Library Role, National Organizations, Objectives, Professional Associations, Speeches

Identifiers—ALA, ALA 75, \*American Library Association

In her inaugural address in San Francisco, July 4, 1975, the new president of the American Library Association (ALA) poses some questions about the library's future, its place in the community, its relationship to governing bodies, its role, functions, and responsibilities. She points out ALA's concern with these questions as reflected in the new association goals and objectives passed at the January, 1975, meeting. These goals call for ALA's commitment to user oriented services for everybody; inter-library cooperation, a nationwide information delivery system, and equal information access for all; international cooperation; intellectual freedom; and improved treatment and training of library personnel. The new president encourages the participation of ALA and its chapters in pursuing these goals and in evaluating the association's effectiveness in so doing. (LS)

Do You Need a Film?

Naval Weapons Center, China Lake, Calif.

Pub Date 15 May 75

Note—7p.; Paper presented at the International Technical Communications Conference Society for Technical Communications (22nd, Anaheim, California, May 15-17, 1975)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—Communication (Thought Transfer), \*Films, Film Study, Information Theory, Instructional Media, Mass Media, \*Media Selection

Advantages and disadvantages of film as a communications medium are examined and discussed. Advantages are said to be that it appeals to several senses, is a mass medium, makes for a captive and passive audience and one which is visually oriented, arouses empathy and can take audiences to remote locations and other times. Disadvantages are that it is transitory, inflexible, often presents an alien perspective, is structured linearly, is expensive and is limited by its logistics. It is concluded that film is best for

general information, motivation, orientation, and some kinds of teaching, and less satisfactory for messages that require detailed, long-term retention of specific facts or procedures. It is also stated that film should not be used without a group leader or teacher. (SK)

The Effectiveness of a Computer-Assisted Teacher Training System (CATTs) in Generating Specific Teacher Behaviors in a Preservice College Teaching Environment.

Pub Date Nov 74

Note—23p.; Paper presented at the Conference on Research and Technology in College Teaching (Atlanta, Georgia, November 1974)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—Classroom Observation Techniques, \*Computer Assisted Instruction, Computer Oriented Programs, Data Collection, Delivery Systems, \*Feedback, Preservice Education, Program Effectiveness, Special Education, \*Student Teacher Relationship, \*Teacher Behavior, \*Teacher Education

Identifiers—CATTs, Computer Assisted Teaching Training System

A prototype computer-assisted teaching training system (CATTs) was developed to help train special education personnel. CATTs is a comprehensive system which produces systematic observation, real-time analysis, storage, and feedback of specific observation coding data relevant to special education classroom teacher-pupil interactions. An investigation demonstrated the relative effectiveness of CATTs instantaneous (visual) and delayed (printout) feedback in increasing various cognitive and management behaviors of preservice teacher-trainees in a controlled classroom setting. It was found that CATTs is a versatile and comprehensive delivery system which can be applied in many ways to analyze real-time process variables within behavior training fields. Two statistical tables and three graphs include a schematic diagram of the arrangement of a CATTs station. (Author/JY)

Children Learning Computer Programming: Experiments with Languages, Curricula and Programmable Devices. Technical Report No. 250.

Stanford Univ., Calif. Inst. for Mathematical Studies in Social Science.

Spons Agency—National Science Foundation, Washington, D.C.

Report No—SU-IMSSS-TR-250

Pub Date 27 Jan 75

Note—228p.

EDRS Price MF-\$0.76 HC-\$12.05 Plus Postage

Descriptors—Children, \*Computer Programs, Computers, Computer Science, \*Computer Science Education, \*Curriculum Design, Experimental Curriculum, Intermediate Grades, Junior High Schools, Program Descriptions, \*Programming Languages

Identifiers—LOGO, Machine Language, Simper

An experiment was conducted to study how children, aged 10-15 years, learn concepts relevant to computer programming and how they learn modern programming languages. The implicit educational goal was to teach thinking strategies through the medium of programming concepts and their applications. The computer languages Simper and Logo were chosen because they are computationally general, relatively easy to learn, interactive with powerful editing features, and are highly dissimilar. The experiment included significant tutoring, curriculum design, and various special output devices such as graphic displays, robots, electric trains, and sound synthesizers. The report is divided into six major sections: (1) introduction: background and motivation; (2) programming facilities; (3) student selection, grouping and tutoring; (4) curricula; (5) data acquisition and analysis; and (6) results. Among the results were suggested modifications to both the Simper and Logo languages and to the curriculum designed to teach them. (KKC)

Effects of Television on Children: What is the Evidence?

Rand Corp., Santa Monica, Calif.

Report No—RAND-P-5412

Pub Date Apr 75

Note—20p.; Paper presented at the Telecommunications Policy Research Conference (Airlie, Virginia, April 16-19, 1975)

Available from—The Rand Corporation, 1700 Main Street, Santa Monica, California 90406 (\$1.50)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—Aggression, \*Anti Social Behavior, Attitudes, \*Children, Commercial Television, Mass Media, Programing (Broadcast), Telecommunication, \*Television, \*Television Research, \*Violence

Studies and writings on the effects of television on children are reviewed and summarized. Topics are the young people's pattern of exposure to television, the nature of their viewing experience, the way they respond to television, and the direct effects on their values, attitudes and behavior. Research on the influence of television violence on aggressive and anti-social behavior is discussed at length; it is concluded that violent television entertainment increases the probability of subsequent aggressive behavior on the part of children and youth. The question of what, if any, action should be based on these findings is also discussed. (SK)

Measurement and Evaluation of Public Library Services.

Illinois Univ., Urbana. Graduate School of Library Science.

Pub Date Jul 75

Note—11p.; Paper presented at the American Library Association Annual Conference (94th, San Francisco, California, June 29 through July 5, 1975)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*Data Collection, \*Evaluation Methods, Librarians, Library Administration, Library Collections, Library Networks, \*Library Services, Program Evaluation, \*Public Libraries, \*State Programs, State Surveys, Statistical Data, Tax Support, \*Workshops

Identifiers—ALA 75, \*Illinois, Library Services and Construction Act Title I, Public Library Association

The Illinois project entitled Measurement and Evaluation of Public Library Services is being conducted by the Library Research Center (LRC) at the University of Illinois. The long range goal of the project is to make available meaningful information for the evaluation and improvement of local public libraries. Two immediate objectives are to test the Public Library Association (PLA) performance measures manual in a representative sample of Illinois public libraries of various sizes and to teach a sample of library personnel the data collection techniques necessary for applying the PLA performance measures. Since operating expenditures proved to be the significant variable related to library size, public libraries were stratified by operating budget for the four areas of the state, and a random sample drawn. The LRC staff held six workshops to teach the PLA procedures to staff from the library systems and from the selected public libraries. Trainees were then asked to conduct a three-day performance measures study in their own library, tabulate their data, and send the results to the LRC, along with comments on the manual. When all of the data is received, the LRC will create individual library profiles and establish performance levels for libraries of each budget level. (Author/SL)

A Technique for Choosing Cost-Effective Instructional Delivery Systems. Final Report.

Naval Training Equipment Center, Orlando, Fla. Training Analysis and Evaluation Group.

Report No—TAEG-R-16

Pub Date Apr 75

Note—125p.

EDRS Price MF-\$0.76 HC-\$5.70 Plus Postage

Descriptors—\*Algorithms, Audiovisual Aids, \*Cost Effectiveness, \*Delivery Systems, Educational Programs, Instructional Design, Instructional Media, \*Instructional Systems, Learning Activities, Learning Processes, Mathematics, Teaching Methods, \*Training Techniques

Identifiers—\*Fortran IV Program  
The Training Effectiveness, Cost Effectiveness Technique for choosing instructional delivery systems for proposed training programs during

conceptual design phase is outlined, in three steps. Training objectives are classified and organized into groups, appropriate learning strategies are identified, and the costs of alternative forms of training are projected. Reference materials for carrying out the process are provided, including a list of 12 types of learning algorithms and the class of learning objectives each supports, separate tables for choosing instructional delivery systems for each algorithm, and a cost model for comparing the value of resources required by alternative delivery systems. A Fortran IV program listing of the cost model is included. (SK)

**Identifiers**—CSMP 360, FORTRAN IV, Stochastic Analysis

A university level course in systems analysis with close contact and massive use of computer time was designed. The objectives of the course were primarily to teach social science graduate students, mostly from economics and agricultural economics, the basic methodological and quantitative tools of systems analysis and design. It was designed to show that the task of teaching principles of systems analysis and its applications to students with no programming background can be achieved using high level simulation language like CSMP/360. Stochastic situations represented by Monte-Carlo simulation were designed in FORTRAN with some preprogramed segments given to the students. An example of such an assignment is provided. (Author/KKC)

**Identifiers**—BASIC, DOG, FORTRAN IV

A brief case study of the resistance to technological change is presented using DOG, a small scale deterministic business game, as the example of technology. DOG, a decision mathematics game for the purpose of providing an environment for application of mathematical concepts, consists of assignments mostly utilizing matrix algebra but also some calculus, linear programming or free form modeling. It is a simulated environment originally written in BASIC, and now also available in FORTRAN IV. The problems involved in implementing DOG into the undergraduate curricula of the Georgia State University School of Business are discussed. It is concluded that it is possible to successfully introduce computer applications into large multi-section undergraduate courses, but not painlessly. If only the physical and technical aspects of the problem receive serious attention, then the likely outcome is disaster. Only careful coordination, much support, some sugar coating of the pill, and occasional gentle bullying will assure success. (Author/KKC)

Briefly described is a numerical calculus course which provides (1) experience and practice in programming and the use of the computer in problem solving, (2) intermediate and/or advanced techniques in FORTRAN IV programming, (3) elementary error analysis, (4) programming efficiency, and (5) documentation of programs. The course, designed to fulfill the needs of several departments at Texas Christian University—background for physics, chemistry, and accounting majors, as well as for students who plan to enter graduate study in mathematics—enables the student to experience, early in his training, some of the ways in which computers can be used, and to see some of the considerations which must be taken in using the computer as a problem solving tool. **Identifiers**—Duke University, Minicomputers

In order to obtain student feedback in computer programming courses at Duke University, a computer-based anonymous audience response system was used. This system consisted of a minicomputer, voting consoles, and a large electronic display. Students set their voting consoles in response to the question and the minicomputer interrogated the consoles. The cumulative responses in each category were flashed on an electronic display board to provide immediate feedback. The objective of the project was to acquaint the students with a unique application of the computers. The system was well-received by the students and proved to be very effective as a feedback device in promoting free and open dialog. (Author/DS)

The University of Iowa has been involved with the development, implementation, and operation of computer-based test-item pools and a test construction and course management system titled IPSIM (Iowa's Item Pool System for Instructional Management), originally devised for a freshman medical course in the Pathology Department of the College of Medicine. The IPSIM system provides the user with the ability to: (1) create and manage item pools; (2) produce "paper-and-pencil" tests, including computer-generated forms; (3) provide Coursewriter III code for interactive test administration; (4) construct multiple-choice questions from a prototype statement; (5) score tests; (6) analyze student performance data; and (7) compose student progress reports. The system appears to have wide ranging potential for other subject matter areas. (Author/KKC)

**Identifiers**—Flanders Interaction Analysis

A series of computer-assisted instruction (CAI) lessons were written for use by students enrolled in a methods course in social studies education at the University of Iowa. Lessons provide instruction in the Flanders Interaction Analysis method which makes classroom verbal communication more effective. An interaction module was designed to help prospective teachers examine their own classroom behavior in terms of factors such as how much they talk versus student participation in discussion. Both authoritative and permissive behavior were explored. Lessons were written using the Instructional Dialogue Facility (IDF) on a Hewlett Packard 2000. An experiment compared the CAI method with traditional

instruction. The results indicated that the CAI module proved to be the most effective. (Author/DS)

**Descriptors**—\*Computer Assisted Instruction, Computer Programs, Criterion Referenced Tests, Individualized Instruction, Multiple Choice Tests, \*Test Construction, Testing

**Identifiers**—Computer Based Test Development, Computer Managed Instruction, Domain Referenced Testing, \*Totally Interactive Testing and Analysis System

The TITA (Totally Interactive Testing and Analysis) System algorithm for the repetitive construction of domain-referenced tests utilizes a compact data bank, is highly portable, is useful in any discipline, requires modest computer hardware, and does not present a security problem. Clusters of related keyphrases, statement phrases, and distractors form minipools from which the computer generates items for a domain-referenced unit of instruction. Test items can take the form of multiple-choice, true-false, matching, and fill-in questions. A random number generator produces data for test items requiring numerical solutions, and the correct answer is computed from a coded formula so computational subroutines are not required for each test item. This component of computer managed instruction allows the instructor to key related items in the data minipool to learning resources and to code the resources themselves for inclusion in the data bank. Use of this system for elementary, secondary, or undergraduate courses can facilitate instructional management and result in positive effects on student morale. (CH)

**Identifiers**—BASIC, Digital Analog Logic Modules, Minicomputers, Texas Christian University

A university level course which uses minicomputers in laboratory data acquisition and experimental control is described. The majority of the students are chemistry seniors and graduate students; prerequisites are general physics and one semester of computer science or programming experience. The goals of the course, which is divided into 3 5-week parts, are to develop a systematic technique for data acquisition and control of an analytical instrument using a digital computer. The first part of the course deals with the electronics involved in interfacing; the second part concentrates on programming the computer to do an analysis of the data and the assembler language subroutines; the third part is devoted to individual student projects. The majority of the programming is done in BASIC which was chosen for its ease in learning, its immediate debugging capabilities and its comparability with previous teaching experience. A list of projects performed by students at Texas Christian University during

the past two years is included, as is a course schedule. (Author/KKC)

In order to optimize the use of available bibliographic data in machine-readable form by Canadian Libraries, the National Library of Canada is developing new automated systems. Implementation priorities are related to the development of national and international standards, systems, and networks. One major project is the design of a system, using MARC (Machine-Readable Cataloging) formats, for cataloging and for compiling "Canadiana," the national bibliography. Development of Canadian MARC tapes is another major project. A third project will be the establishment and coordination of an automated Canadian union catalog system. (PF)

Note—53p.

Available from—National Committee for Audio-Visual Aids in Education, Educational Foundation for Visual Aids, 33 Queen Anne Street, London W1M 0AL, England

**Document Not Available from EDRS**

Descriptors—Acoustical Environment, Audiovisual Aids, Broadcast Reception Equipment, Building Design, \*Classroom Design, Educational Specifications, Electrical Systems, \*Electronic Classrooms, \*Electronic Equipment, Elementary Secondary Education, \*Facility Requirements, Independent Study, Instructional Materials Centers, Large Group Instruction, Lighting Design, \*Multimedia Instruction, Physical Design Needs, School Design, Small Group Instruction

The design of new schools should facilitate the use of audiovisual resources by ensuring that the materials used in the construction of the buildings provide adequate sound insulation and acoustical and viewing conditions in all learning spaces. The facilities to be considered are: electrical services; electronic services; light control and ventilation; and sound insulation, acoustic properties and treatment of spaces. General learning areas will vary in design specifications according to the number of students they are to serve: individual learners, small groups of less than 12 students, large groups, and very large groups of more than 40. Additional requirements must be considered for special areas: music, art, drama, business and vocational classrooms; science and language laboratories; and the library and media production center. In the appendix of this booklet, diagrams and floorplans are used to chart reception

and antenna patterns for various broadcast equipment. (Author/SL)

Research, teaching and communications activities of the Program on Information Technologies and Public Policy from September 1973 through September 1974 are reported and summarized. Background information on the program's structure, operating procedure, administration and finances also are provided. Research reports are subdivided by basic information on the information industries; individuals, institutions, and information technologies; jockeying for markets among information systems; regulation of information systems; and background information studies. Appendixes include a list of faculty seminars, program review procedures and guidelines, and an order form for program papers. (SK)

Descriptors—Annual Reports, \*Industrial Technology, Information Centers, Information Needs, Information Networks, \*Information Services, Information Sources, Information Systems, \*Public Policy, Research Projects, \*Telecommunication, Telephone Communications Industry

Identifiers—Harvard University, Information Industry, \*Program on Information Technologies Public Policy

The growing need for an understanding of the information industries in the United States led to the Program on Information Technologies and

Public Policy. The public has a vital interest in the rapid and fundamental changes occurring in how information systems perform, who controls information flow, and on what terms what information is made available to users to meet their needs for the knowledge and understanding required to participate fully in our society. The program's aim is to develop an understanding of information systems and information technologies and to use that understanding to illuminate public discussions of information policy and the information industries. The scope of the program includes services that private firms or government now perform; interaction among these services; and social and technological changes taking place and the basic questions they raise. Broad program strategies are also discussed. (SK)

Identifiers—ALA 75

In public library program planning, emphasis should be placed on the linkage of measurement to evaluation. Three basic assumptions underlie program planning and evaluation: (1) a basic commitment must be made to develop goals and objectives, (2) measurement must be taken in regard to specific criteria, (3) a final evaluation must be implemented. Performance or program targets provide a comparison between what is intended and what is achieved and the data obtained must be used to alert management to differences in staff philosophies and to determine if the service is effective. Identifiers—ALA 75, California (San Mateo County), California (Santa Clara County), DIALOG, \*Project DIALIB

Lockheed has undertaken Project DIALIB to determine whether online retrieval services could be useful to the general public, and if the public library could serve as the linking agent for these services. As part of the study, DIALOG, Lockheed's online reference retrieval system, has been made available to the public through four public libraries in San Mateo and Santa Clara counties in California. The project was inaugurated in August, 1974. For the first year, both terminals and staff training were provided free to participating libraries. Results of an evaluation of the first year of the project indicate that DIALIB users were for the most part highly educated and asked technical questions relating to their work or study. While the service is fairly expensive, it is reaching a segment of the population that does not normally use public library reference services. The public has shown a great deal of enthusiasm for DIALIB service. In the second year of the project, users will be billed; the effects of this factor on the use of the system will be studied. The Metro-Teachers College project—a similar effort in New York City is also being studied. (Author/SL)

**[Librarians and the Legislative Process.]**  
 Pub Date Jul 75

Note—10p.; Paper presented at the Annual Meeting of the American Library Association (94th, San Francisco, California, June 29-July 5, 1975)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**  
**Descriptors**—Accountability, \*Community Support, County Libraries, County Officials, \*Financial Problems, Financial Support, Library Planning, Library Services, Local Government, Performance Specifications, \*Public Libraries, Public Officials, Public Relations, Speeches, \*Tax Allocation, Tax Support  
**Identifiers**—ALA 75

Librarians' interest in and concern with the legislative process and with their relationship with elected officials is accelerating. The obvious reason for this is the deteriorating financial situation facing libraries of all types. It has become critically important for the future of libraries that librarians become knowledgeable in the contest for the diminishing tax dollar. Although most libraries have seldom been able to claim affluence, their financial situation over the past 10 or 15 years could be characterized as relatively stable and, in some sense, on the ascendance. The situation has now changed. Even library systems like that of Contra Costa County, California, which enjoy community and local government support, are now faced with potential budget reductions. Like other public agencies, the library must now concretely demonstrate the value of its public services. First, attention must be given to maintaining good relations with the community and with local government officials, while providing the best possible library service. It is also necessary to develop specific performance measures—hard data which will help to prove that the library deserves the tax dollars it receives. (Author/SL)

 California State Univ. and Colleges, Los Angeles. Office of the Chancellor.  
 Pub Date 3 Jul 75

Note—7p.; Paper presented at the Annual Meeting of the American Library Association (94th, San Francisco, California, June 29-July 5, 1975)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**  
**Descriptors**—College Libraries, Equipment Evaluation, Equipment Manufacturers, \*Equipment Standards, Higher Education, Library Equipment, \*Library Networks, \*Library Standards, Microform Reader Printers, \*Multicampus Districts, Speeches, \*University Libraries  
**Identifiers**—ALA 75, \*California State University and Colleges

In setting standards for a large and geographically dispersed library system, one must reconcile the many varying practices that affect what is being measured or discussed. The California State University and Colleges (CSUC) consists of 19 very distinct campuses. The problems and solutions of one type of CSUC library are not likely to be those of all CSUC libraries. For example a 1974 survey of microform equipment on all the campuses showed widely different experiences with the same brand of equipment. If one looks at the interval from the time a standard is first suggested until it is approved, one finds that it usually goes through several revisions. For example, in 1969, representatives of the recording industry suggested that there be a uniform coding system for all products of the music industry; but today, in 1975, the standards have still not been totally accepted. The process of developing standards is necessarily one of compromise; so perhaps the most tangible way librarians can influence the evolution of standards is simply to meet to decide what their needs are, examine what solutions are available, and get whatever consensus is possible. (Author/SL)

**Identifiers**—OCLC, \*Ohio College Library Center

The Ohio College Library Center (OCLC) is a nonprofit computerized library processing center operating out of Columbus, Ohio. Six years after its incorporation, OCLC is now mainly in the business of operating a shared cataloging system and producing catalog cards designed to meet the needs of each of its member libraries. OCLC also maintains a union catalog of its member libraries as a byproduct of this service. Its data base grows at the rate of about 1,000 records per day, both Library of Congress (LC) MARC records and the original cataloging done by member libraries. Catalogers in OCLC's member libraries, using their computer display terminals, can call up records in catalog card format by inputting LC number, author, or title. Records can be modified online to meet local needs. This report further describes OCLC in terms of the basic cataloging process, the system's advantages and disadvantages, and the costs to and responsibilities of participating libraries. Appendixes outline planned OCLC subsystems and LC's MARC and RECON projects. Sample OCLC printouts are included. (Author/SL)

**Identifiers**—\*Michigan Library Consortium, MLC, OCLC, Ohio College Library Center

Since the formal organization of the Michigan Library Consortium, its financial support has come through membership fees and a grant from the Michigan State Library from Title III funds.

The financing of the consortium is already a complex operation and will become even more complex as new programs are undertaken, since funds have been accepted for specific purposes which must be respected. Another method of financing the consortium is proposed here with the specific example of participation in the Ohio College Library Center (OCLC). OCLC in its financing arrangement has set up an organization to reduce overhead costs and to avoid cash flow problems. The former must be assumed by the consortium. The consortium should follow the wisdom of OCLC in the latter. (Author/SL)

**Identifiers**—\*Michigan Library Consortium, OCLC, Ohio College Library Center

The Michigan Library Consortium (MLC) is studying the problems and possibilities of networking, with the Ohio College Library Center (OCLC) as a model and possible data base for the MLC. Standards on an international scale must be developed, and the need for constantly improving technology, particularly computers, must be recognized. Since the needs of individuals, institutions, and consortia may differ from one another, and from those of the makers of the data base, administrative and communication structures must be created to provide interface between the various network components. As the scope and range of networks increase, library and information network personnel will need to devote increasingly larger portions of their time to such communication. (LS)

Identifiers—Oklahoma, \*South Western Oklahoma Development Authority, SWODA

This report takes a look at libraries, their facilities and services in the South Western Oklahoma Development Authority (SWODA) district. To provide additional planning data, the population of the SWODA area is analyzed in terms of age, ethnicity, employment, income, education and growth trends. The results of inventory of all existing libraries are presented, along with recommendations. Library statistics are tabulated according to the library systems which cover the SWODA area. Data on collections, services, revenues, and expenditures are presented for each library, and totaled for each library system. The library system statistics are compared to Oklahoma's minimum guidelines for full service libraries. (Author/SL)

Identifiers—NODA, \*Northern Oklahoma Development Association, Oklahoma

To provide a planning tool for library improvement, the staff of the Northern Oklahoma Development Association (NODA) conducted a survey of the public libraries in its area. NODA gathered information from librarians and library boards on the development and status of their library, its problems and needs, and future plans and programs that might be used to meet these problems and needs. The NODA staff found that these libraries were attempting to upgrade and expand services to the public, but that they were hampered by financial constraints. Recommendations were made for increased financial and political support of libraries, increased resource sharing among libraries, continuing education for library staff, and the provision of adequate facilities. This report includes narrative descriptions of each library, arranged by county. Circulation and collection statistics, a list of library board members, and floorplans are included in most cases. Appendixes contain standards for library space and expenditures, plus Oklahoma library legislation. (SL)

Identifiers—\*Eastern Oklahoma Development District, EODD, Oklahoma

The Eastern Oklahoma Development District (EODD) is a multifaceted planning organization, broadly concerned with the overall welfare of the residents in seven Oklahoma counties. One of its goals is to assure adequate library services to all persons desiring to use them. To assure these services, a plan was initiated to coordinate the library planning of the state, the Department of Libraries and the district library with the social ser-

vices planning of EODD. Functional activities were initially categorized as preliminary studies, reviews, and analyses to determine (1) which library planning efforts were relevant to those of EODD in providing for a range of social services; (2) the data needs and deficiencies of the district library with the object of sharing common socioeconomic data useful in planning; and (3) economical and effective ways in which EODD can assist the district library in extending services to unserved areas. The initial working period showed that cooperation was successful. Further coordination was strongly recommended, especially with regard to disadvantaged groups, elderly, youth, and poor. Descriptors—\*Census Figures, Demography, Employment Patterns, Library Networks, \*Library Planning, Library Services, Library Standards, \*Library Surveys, Needs, \*Public Libraries, Regional Cooperation, \*Rural Areas, Statistical Data, Tables (Data)

Identifiers—ASCOG, \*Association of South Central Oklahoma Governments, Multicounty Library Systems, Oklahoma

An in-depth study was made of each of the 16 libraries in the Association of South Central Oklahoma Governments (ASCOG) region. As an essential aid to library planning, census data was analyzed to determine the social, economic, educational characteristics, and the geographic distribution of the population to be served. The library survey looked at each library's facilities and services and how each compared to the minimum standards established by the Oklahoma Department of Libraries in its goals for 1975. The needs and special service characteristics of each library were also detailed. The study concluded that the major problem of libraries in the ASCOG region was lack of space for books and services. Finances were also difficult. Multicounty library systems were recommended as the solution. Specific suggestions were made for the development of such systems in each ASCOG county. (Author/SL)

Identifiers—Connecticut (Waterbury), Library Services and Construction Act Title I, \*Project FREDD

Project FREDD was initiated in 1974 as a cooperative effort by library and mental retardation agencies in the Waterbury, Connecticut area. The project utilized a bookmobile to route a special collection of books, media, and games to the mentally handicapped and information on mental retardation to their parents and teachers and to the community. Bookmobile stops were scheduled at special schools, sheltered workshops, and programs sponsored by area associations for the retarded in many local towns. Patrons were allowed to return borrowed materials to their local library. Publicity was provided by letters to the community, by media and magazine coverage, and by the mobility of the project van itself. From the experiences gained during the project period, several recommendations were made for the continuation of this pro-

gram or one of similar intent, including types of material which proved to be most popular, the use of the Connecticut system for returning borrowed materials, the scheduling of stops, and the type and size of bookmobile to use. It was concluded that Project FREDD had positive effects in this specialized area of library service. (Author/SL)

Descriptors—Communication (Thought Transfer), \*Information Science, \*Information Theory, Models, Objectives, Research, \*Semiotics

Identifiers—Georgia Institute of Technology, Peirce (Charles Sanders)

In order to discuss the research goals of information science (IS), both its logical and its specific nature must be determined. Peircean logical analysis shows that IS may be classified in three parts: pure science, applied science, and technology. The deficiency in the present state of the art is in the pure science, or theoretical portion, of IS which must be developed in order to fully and properly apply the existing technology. The specific nature of the science underlying information technology is semiotics, the science of signs and sign processes, their structure, and their applications to the communication process and information transfer. Long-range research goals should therefore be formed in order to (1) develop a theory of the structure of all categories of signs, sign systems, and sign processes; (2) investigate the measurable properties of all sign components; (3) explore the basic regularities existing between the measurable properties; (4) develop theories which explain these regularities; (5) investigate the relationship between various information processes and semiotic processes; and (6) develop lab instrumentation with which to carry out the critical experiments in the above areas. Descriptors—\*Audiovisual Aids, \*College Libraries, Financial Support, Instructional Materials Centers, Instructional Media, Librarians, Library Collections, Library Cooperation, Library Research, \*Library Surveys, Media Research, Media Specialists, Organizational Effectiveness, Questionnaires, State Colleges, State Universities, Statistical Data, Tables (Data), \*University Libraries

Identifiers—California, \*California State University and Colleges, Nonprint Media

In order to investigate current campus utilization of media, a learning resources survey questionnaire was sent to all California State University and College (CSUC) library directors. Library media was identified as audio, projected material, video tapes, and multimedia such as kits, games, and simulations. The survey was divided into six parts: (1) nonprint material, (2) audiovisual equipment, (3) space and staff, (4) organizational relationships, (5) budgetary support for nonprint materials and equipment, (6) library cooperation involving nonprint material. Results indicated that nonprint holdings in the CSUC libraries are marginal and mostly uncataloged, that equipment was meager, and that there are stronger ties between the audiovisual department and the library than between the audiovisual department and instructional television or computer centers. Descriptors—Audiovisual Aids, Educational Development, Educational Technology, \*Instructional Design, Instructional Materials, Instructional Media, Instructional Systems, Material Development, \*Media Selection, Multimedia Instruction, Teaching Methods, \*Workbooks

A five-step process of selecting instructional strategies and media is provided in workbook form. Nine instructional strategies—four in the cognitive domain, three in the psychomotor domain, and two in the affective domain—are included, with two sample media prescriptions for each. A special flow chart table of contents shows the route through the five steps, defined as: (1) write an objective; (2) determine the domain; (3) select strategy; (4) write strategy prescription; and (5) select appropriate media. Illustrative examples are provided for each strategy. Appendixes include suggestions for the use of instructional media, and an instructional media resources inventory. (SK)

Evolving a Model Learning Resource Center for a Developing Country (Zambia).

Pub Date 72

Note—177p.; Ph.D. Dissertation, Wayne State University

EDRS Price MF-\$0.76 HC-\$9.51 Plus Postage

Descriptors—\*Developing Nations, Educational Resources, Educational Specifications, Educational Technology, Educational Television, Facility Planning, Information Dissemination, \*Instructional Materials Centers, Instructional Media, Media Research, Models, National Programs, Personnel Needs, Resource Centers, School Libraries

Identifiers—Zambia

For a developing nation such as Zambia, quality education, utilization of manpower, and proper training are priority problems. Therefore a study was conducted to establish and document the need for a well-planned, staffed and executed learning resource center to solve some of that country's learning problems. Basic facts about the country of Zambia were collected. A review of the literature and a survey of learning resources center organization and development in developed countries was conducted. Based on the identified needs of the country of Zambia, a basic philosophy gathered from the literature, and the experiences of developed countries, a detailed plan for a phased program to establish a learning resource center for Zambia was prepared. Recommendations included means of developing a philosophic base, purpose, organizational structure, plan, program, personnel, physical facilities, and time line of events. A bibliography is appended. Identifiers—CATV, \*Public Cable, Public Access  
Public-Cable is a nonprofit consortium of individuals and civic groups which is dedicated to furthering the social, civic, educational, cultural, and community uses of cable television technology. To fulfill its information sharing function, Public-Cable has collected a series of 16 papers into a handbook. The first section provides general background on cable and new technologies to serve as a setting for activities and decision making. The second section describes activities in a wide range of actual uses, including chapters on minorities, schools, health, churches, libraries, and museums, and papers on public access, profit and loss, and public affairs programming. Appendixes include a glossary, a selected bibliography, and the Public-Cable policy statement. (SK)

Instructional Variables in Meaningful Learning of Computer Programming.

Pub Date Apr 75

Note—4p.; Paper presented at Annual Meeting of the American Educational Research Association (Washington, D. C., March 30-April 3, 1975)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—Computer Programs, \*Computer Science Education, Educational Research, \*Learning Processes, Models, \*Programming Languages, Research Projects, Teaching Techniques

Identifiers—Ausubel (David), Mathemagenic Activities, Rothkopt (E Z)

Some 120 undergraduate students participated in experiments to learn how novice computer programmers learn to interact with the computer. Two instructional booklets were used: A "rule" booklet consisted of definitions and examples of seven modified FORTRAN statements and appropriate grammar rules; the "model" booklet was identical with the addition of a page describing computers in familiar terms. Two types of questions were used: generative and interpretive. Three experiments were conducted using various combinations of booklets and questions. Findings support the idea that a meaningful set of familiar experiences prior to instruction may result in a learning process of assimilating new material and organizing it in the context of that set. Note—17p.; Paper presented at the Association for the Development of Computer-Based Instructional Systems Summer Meeting (Portland, Maine, August 4, 5, 1975)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*Computer Assisted Instruction, Computer Programs, \*Cost Effectiveness, \*Programming Languages, \*Systems Concepts, \*Teaching Methods

Identifiers—Hypertext, HYPERTUTOR, Northwestern University, PLATO IV, Program Sharing, TUTOR IV

The HYPERTUTOR incorporates the ideas of a "hypertext" and the TUTOR-IV programming language used on the PLATO-IV system. The HYPERTUTOR is a part of Northwestern University's MULTI-TUTOR system and runs on a non-PLATO, non-dedicated CDC 6400 computer. It allows the transfer of courseware from PLATO to non-PLATO systems. It has successfully been transferred to other CDC 6000-series and Cyber-70 computers. This paper outlines the rationale for the creation of such a system, and gives the background of MULTI-TUTOR, its systems structure, and its compatibility problems with PLATO's Tutor. Current MULTI-TUTOR sites are listed along with an outline of the clearinghouses for lessons now being established at Northwestern. An analysis of current cost factors of the MULTI-TUTOR system is included. (Author)

In-Home Early Childhood Project. Final Report.

Alberta Univ., Edmonton. Dept. of Elementary Education.

Spons Agency—Alberta Dept. of Education, Edmonton.

Pub Date Oct 74

Note—213p.

EDRS Price MF-\$0.76 HC-\$10.78 Plus Postage

Descriptors—Early Childhood, \*Early Childhood Education, Early Experience, Educational Assessment, Educational Development, Educational Research, Family Environment, \*Family School Relationship, \*Home Visits; Instructional Materials, Material Development, Nurses, \*Parent Education, Parent Participation, \*Parent Teacher Cooperation, Program Descriptions, Program Evaluation, Teacher Education, Teaching Methods

Identifiers—Alberta

To help students in an early-childhood teacher-training program to work directly with parents and young children, an in-home project was established for four months with 19 families in one area of Edmonton, Alberta. In lieu of the regular kindergarten lab, each student was assigned to a family with one or more children of preprimary age. The student was asked to assess the family's behavior and needs and to devise techniques and materials to meet the needs. A trial kit of learning materials was prepared after the first two visits to the home, followed by a second permanent kit for circulation during the rest of the project. Students also planned a group session which brought together several children and parents. Procedures used in the project are described and outcomes and recommendations summarized, along with information on staffing and costs. Appendixes include evaluation forms, letters of introduction to parents, attendance and visiting schedules, and questions and responses for the parent questionnaire. Detailed lists of the materials used may be obtained separately. (SK)

Descriptors—\*Communication Satellites, \*Demonstration Projects, Educational Assessment, Educational Development, \*Educational Experiments, \*Educational Research, \*Educational Technology, Media Research, Policy Formation, Telecommunication

Identifiers—\*Appalachian Educational Satellite Project

A fourth quarterly report completes one year of the Educational Policy Research Center's (EPRC) analysis and assessment of the Education Satellite Communication demonstration. Activities and accomplishments during the period April 11, 1975-July 10, 1975 are listed and described. The report also includes cost data from the Appalachian Educational Satellite Project (AESP), preliminary results of the EPRC's Survey Panel instrument, and preliminary analytical and historical overview of the AESP. A calendar of future events in satellites, telecommunications, and education is included; a working paper on the context and operation of the AESP is appended. Reders are cautioned that Survey Panel instruments are preliminary, and not yet interpreted or analyzed, and that issues raised in the working paper are open and judgments tentative. (SK)

Identifiers—\*National Center Higher Education Management, NCHEMS, SFM IA, Stochastic Processes, Student Flow Model

The National Center for Higher Education Management Systems (NCHEMS) Student Flow Model (SFM) IA is a tool for analyzing the historical movement of students between the various fields of study and student levels in an institution and for estimating the future enrollments in each student program (or field of study) and student level combination in the institution. Modular in concept, the system can be implemented in phases to permit an institution to begin using its results immediately and to incorporate additional levels of analysis as needed and as the required input data become available. SFM-IA can be used alone in an independent analysis of student progression through the institution. Schools also using the NCHEMS Resource Requirements Prediction Model (RRPM) 1.6 will find SFM-IA useful in projecting future enrollments for RRP cost projection purposes. Included in this document is a description of the SFM-IA computer programs together with the procedures for gathering and organizing the data necessary to use the various modules. (Author/DGC)

Wiley, Mary Dale  
Psychological Problems of Normal Aging: Implications for Public Library Service.

Pub Date May 75

Note—85p.

EDRS Price MF-\$0.76 HC-\$4.43 Plus Postage  
Descriptors—Adult Education, Age, Bibliotherapy, Information Needs, Librarians, \*Library Services, Masters Theses, \*Older Adults, \*Psychological Patterns, \*Public Libraries, Retirement, \*Senior Citizens

Few people are conditioned in the middle years to cope with the prospect of old age and retirement. If public libraries could act as the liaison in this transition, perhaps more people would be prepared to lead productive lives after age 65. Public libraries set aside sections for children and young adults but fail to do the same for the elderly. This age group has very little to occupy their time or mind after retirement, and many regress to the point of turning their energy inward, which can result in psychosomatic disorders, death wishes, or depression. This energy could be channeled into continued education, pursuit of a new interest, or interchange of knowledge. The public library could and would be the most logical coordinator of such a program. A bibliography is inserted at the end of each chapter with a glossary and list of available literature appended. (DS)

Access to Monographic Resources: An Analysis of a Cooperative Interlibrary Loan Regional Network.

Central New York Library Resources Council, Syracuse.

Pub Date 74

Note—282p.

EDRS Price MF-\$0.76 HC-\$14.59 Plus Postage

Descriptors—Costs, Interinstitutional Cooperation, \*Interlibrary Loans, Library Cooperation, \*Library Networks, \*Library Surveys, Models, Program Evaluation, Regional Libraries, Search Strategies, Statistical Data, Tables (Data)

Identifiers—Monographs, New York

An interlibrary loan survey was conducted to identify patterns and characteristics of monograph requests in a four county cooperative region. Almost two-thirds of the requests referred outside the region could have been filled within it. Most could have been supplied by more than one regional library. Monograph characteristics that were analyzed included publisher, imprint date, language, subject, and costs. Library characteristics that were analyzed included library originating requests, libraries able to supply monograph, library subject profile, and library publisher profile. The result of these analyses is the development of a search strategy model to improve utilization of regional resources. In addition, recommendations are offered concerning the need for a union catalog, interlibrary telephone service, and a numerical register of locations by Library of Congress card order

number. Other alternatives to a union catalog are also included. (Author)

Identifiers—Alabama, Appalachian Adult Education Center, Georgia, Kentucky, Multitype Library Networks, Ohio, South Carolina, Tennessee, West Virginia

Volume 1 presents a summary of the methodology, problems, and recommendations of seven projects demonstrating the coordination of public library with public schools services for disadvantaged adults. The summary covers personnel (clients, orientation of undereducated adults to library services, readers' profiles, library cards, and advisory boards); recruitment and promotion; library materials (assessment of collections, selection, acquisition, delivery, reader guidance, housing, resource centers, bookmarks, and fines); delivery (bookmobiles, mail, circulating collections, Adult Basic Education (ABE) classes and home instructors, and class visitations); in-house services (ABE classes in libraries, displays, and miniprograms), information and referral; policies (general, fines, funds, outreach services, and in-house service services); coordination (school libraries, newsletters and other publications, advisory committees, joint workshops, tours, organizational structure, funding, and obstructions to coordination); and spin-off (community awareness and planning, coordinated efforts, coping skills; materials, higher education, and continuation). Volume 1 concludes with a checklist of activities needed for coordinating and delivering usable library services to adult students. (Author/LS)

Identifiers—Alabama, Appalachia Adult Education Center, Kentucky, South Carolina, West Virginia

Volume 2 presents the background and methodology of four state institute projects (Alabama, Kentucky, South Carolina, West Virginia) designed to expand public library services to disadvantaged adults, and also provides a description of the national, state, and local dis-

semination activities of the seven library/Adult Basic Education demonstration projects. The dissemination activities include print, nonprint, and personal contact. Awareness, interest, and trial-level institute-dissemination series are described in detail: the preplanning activities, the conduct of the two-day community planning session, and the postplanning followup or implementation stage. The development and field-testing of the multimedia library orientation kit for disadvantaged adults is described, as well as duties of the trainers and evaluation and followup activities. The nontraditional training design is viewed as a model for change in public services. (Author/LS)

Descriptors—Costs, Guides, Information Needs, Information Sources, Library Facilities, Library Materials, Library Programs, \*Library Services, Library Surveys, Older Adults, Outreach Programs, Publicize, \*Public Libraries, \*Senior Citizens

A guide for providing library services to the elderly begins with a rationale and a statement from the Adult Services Division of the American Library Association regarding services to the elderly. Then planning considerations are described, such as library board and staff, surveying needs and programs, and special problems of the elderly. Interests and kinds of materials are discussed, as are in-house, outreach, and institutional services. Following information on publicity and costs, 11 existing programs in public libraries are briefly described. There are lists of suggested readings and of sources of materials for seniors, as well as a sample survey for senior community residents. (LS)

Descriptors—Course Content, Course Descriptions, Course Objectives, Human Relations Programs, \*Human Resources, Leaders Guides, Librarians, \*Library Education, \*Management Education, Morale, Motivation, Personnel Management, \*Professional Continuing Education, Systems Approach

A leader's handbook is presented for a course designed for the continuing education of professional librarians at the level of middle or upper management who find that they need understanding about human resources in the library system beyond that acquired on the job or in previous library education. The course has four units: (1) Management: A Systems Perspective and Approach; (2) The Worker—Human Being/Personality: A Systems Perspective and Approach; (3) Work, Management, and the Worker: An Integration of the System; and (4) Developing the Library's Human Resources: Managerial Strategies. In addition there is an optional unit on morale. The design for each section of the course incorporates audiovisual media, specially selected readings, a bibliography, a work assignment, and a wide variety of structured experiences concerning library work-related problems in human relations. A study guide is presented for a course designed for the continuing education of professional librarians at the level of middle or upper management who find that they need understanding about human resources in the library system beyond that acquired on the job or in previous

library education. The course has four units: (1) Management: A Systems Perspective and Approach; (2) The Worker—Human Being/Personality: A Systems Perspective and Approach; (3) Work, Management, and the Worker: An Integration of the System; and (4) Developing the Library's Human Resources: Managerial Strategies. Each unit is divided into several sections, for which objectives and course outlines are given. There is an annotated bibliography at the end of each section. An optional fifth unit contains three enrichment modules concerning the history of management concepts, concepts of management revealed through three major social groups, the effects of unions on employees and managers, and evaluation of the influences of perception in the work situation. Professionalism and Unions.

Pub Date 3 Jul 75

Note—7p.; Paper presented at the Annual Meeting of the American Library Association (94th San Francisco, California, June 29-July 5, 1975)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—Collective Bargaining, \*Librarians, Libraries, Professional Personnel, \*Unions

Identifiers—ALA 75, Professionalism

Unionism is not the antithesis of professionalism, but often the companion, or even supporter of professionalism, as in the cases of writers, actors, and musicians. Librarians, too, must earn a living and cope with inflation. Joining a union can not only improve librarians' economic status, but also increase their influence. Collective bargaining provides an orderly procedure for resolving conflict. Of all existing collective bargaining contracts in the United States, fewer than 5 percent involved strikes. (LS)

Descriptors—Communication (Thought Transfer), Computer Programs, \*Computers, Guidelines, Human Engineering, \*Interaction, \*Man Machine Systems, \*Media Research, Programming

Research on man-machine communication was examined to gain insight into techniques for improving interactive programs through the enhancement of communicative style. The human-computer interaction is compared to a conversation, and specific recommendations for improving this interaction are enumerated. The suggestions are general in nature and are arranged into a preliminary "Guide to Style in Interactive Programming." A simple interactive program that tries to incorporate some of the recommendations cited is included as an appendix. (SK)

Identifiers—\*Georgia

For the benefit of the Georgia State Board of Education, the day-to-day impact and actual problems of instructional television (ITV) as encountered in the state's classrooms has been explored and analyzed. Basic considerations were accomplishments to date and methods of improving the services. An overview of the ITV network is provided, and its utilization, cost effectiveness, and analysis described. Problems of inflexibility and curriculum integration of televised materials are discussed, and recommendations made for electronic shuttling, an exploratory school television system, and a regional planning system. Appendixes include a discussion of alternative media, a list of interview locations, and a review of research on learning from television. (SK)

Document Not Available from EDRS

Descriptors—\*Classification, Codification, \*Education, Glossaries, Indexes (Locators), \*Instructional Program Divisions, International Programs, School Statistics, \*Statistics, Taxonomy

Identifiers—\*International Standard Classification of Education, ISCED

The International Standard Classification of Education (ISCED) has been designed as an instrument suitable for assembling, compiling, and presenting statistics of education both within individual countries and internationally. The classification is designed for assembling data on current educational phenomena such as enrollment, teaching staff and finances as well as for statistics on the number of educated people as obtained, for example, by a census of population. ISCED can be applied to data from a wide range of sources covering all aspects of educational phenomena. It is intended to cover education for all types of students and for all age groups. Categories in ISCED have been based on two principal educational criteria, the level and the subject-matter content of study. Levels are from 0 (from age 3) to 8 (postgraduate degrees) and 9 (not definable by level), with two-digit program subdivisions in each level. An additional two-digit code designates specific subject content, thereby creating a five-digit code. An alphabetical index gives complete five-digit codes for level-program content in all subject areas. (Author/LS)

Identifiers—Louisiana

A statement of goals, guidelines, and standards for public libraries in the state was developed by the Standards Study Committee, Public Library Section, of the Louisiana Library Association. The goals include the educational, informational, recreational, cultural, and service roles of the library. The guidelines are a detailed description of methods to be used in achieving the goals; they cover the library's place in the community.

access to information, individual education needs, media selection policy in relation to population diversity, community oriented programs, funding, administration and personnel, library facilities, and public relations. The gauges consist of some basic standards for materials, personnel, facilities, and hours of service with which individual libraries may be compared. (LS)

Descriptors—Curriculum, Educational Planning, Higher Education, \*Information Science, Library Associations, \*Library Education, Library Role, Library Schools, Library Surveys, Objectives, Personnel Needs, Professional Continuing Education, \*Research Needs, State of the Art Reviews, Tables (Data)

Identifiers—Delphi Technique

A study of library and information science education research needs begins with a collection of readings which provide information on current research, along with needs in the areas of goals and curricula; library school administration, faculty, and students; the relationship among professional associations, library schools, and libraries; the library school and library staffing requirements; continuing education; the role of the library community; and the use of the Delphi technique in determining research priorities. Results of a survey (using the Delphi technique) to forecast research needs in library and information education, and to establish priorities, are tabulated. A list of major research needs includes the improvement and updating of the skills of professional librarians, and improvements in library school planning. Other needs are listed in decreasing order of importance. (LS)

Descriptors—\*Editing, Educational Research, Evaluation Criteria, Individual Characteristics,

Information Dissemination, Journalism, Periodicals, Policy, Publications, \*Publishing Industry, Questionnaires, Research Projects, \*Scholarly Journals, Standards, Surveys  
Identifiers—Editors, Gatekeeper Role

To explore the demographic, professional and ideational dimensions of educational-journal editors and to investigate publishing processes in general, questionnaires were sent to a list of journal editors and in-depth interviews were held with eight editors, two each from research, scholarly, professional, and association publications. Journal-author relationships, criteria for manuscript selection, and anticipated futures of education were discussed and data was analyzed. Conclusions were drawn about systematic attention to editorial practices and editorial success within their environments. Suggestions were made for editorial workshops which might provide for better service and greater accountability to the field. (SK)

Development and Research Utilizing the Plato IV System for Company Commander Behavioral Change Training. Final Report for Period 16 July 1973-20 August 1974.

Naval Training Equipment Center, Orlando, Fla.  
Report No.—NAVTRAEQUIPCEN-73-C-0129-1  
Pub Date Aug 75  
Note—113p.

EDRS Price MF-\$0.76 HC-\$5.70 Plus Postage

Descriptors—Attitudes, \*Behavioral Science Research, \*Behavior Change, Changing Attitudes, \*Computer Assisted Instruction, Computer Programs, Computer Science, Material Development, \*Military Training, Officer Personnel, Questionnaires

Identifiers—Company Commanders, PLATO IV, Recruit Training Command

In order to identify appropriate behaviors of company commanders for behavioral change training, an extensive questionnaire was administered to company commanders and recruits. A profile of the average company commander resulted, giving demographic, attitudinal and behavior characteristics. An analysis was made of the relationship of attitudes and normative beliefs to the prediction of behavioral intentions. Company commander characteristics were linked to behavior factors; based on these factors a PLATO computer-assisted instruction program was designed to help all company commanders to reach the behavioral standards of effective commanders. Descriptors—Data Collection, \*Economic Research, Financial Needs, Financial Support, Information Dissemination, \*Information Science, Literature Reviews, Research Needs, Standards, State of the Art Reviews

Identifiers—\*Information Industry

A review of expert opinion and recent literature on the critical issues and open questions relating to the economics of the scientific and technical information industry shows that there is hardly an area that does not call for more and better research—yet the need is not nearly so much for quantity as for a more coherent and meaningful pattern. Development of such a pattern depends to a large extent upon a body of fundamental information about the field itself. This foundation is simply not available at present. A broad effort is needed to collect available data, together with development of standardized collection methodologies which can meet critical scrutiny as well as provide the necessary additional comparative and additive information. Increased research and policy study of the roles and processes of information diffusion into the private sector is also needed. (Author)

Descriptors—Computer Oriented Programs, Demonstration Projects, Educational Research, Futures (of Society), Information Dissemination, Information Needs, \*Information Retrieval, Information Science, Information Sources, Information Storage, Information Systems, \*Information Utilization, Library Services, \*On Line Systems, \*Program Evaluation, Research Reviews (Publications), Search Strategies, Technological Advancement

Identifiers—\*Educational Resources Information Center, ERIC, Information Retrieval Demonstration and Research, WIRE, Wisconsin System Education, WISE ONE

In compiling the final report of Wisconsin's ERIC on-line Information Retrieval Demonstration and Research Project, an extensive review of research on information science, user needs and perceptions, and information use and saturation was seen as a vital first step. Such knowledge might help explain the successes and failures of the Project, which placed display terminals linked to the ERIC data base in four districts and provided training in use of the systems for district personnel. Numerous successful searches were conducted for users, though breakdowns in the new computer program caused some dissatisfaction. Improved service could result from acceptance of the linker/gatekeeper model in information dissemination. Standard data such as costs, description of services, user documentation, forms, and reports have been collected in appendices. (LS)

Kabelvision Kiruna; CATV-Experimental Application of a New Channel in a Neighbourhood Society.

Commission for Radio and Television in Education, Stockholm (Sweden).

Pub Date May 75

Note—43p.; Extract from the report A Programme for Sound and Pictures in Education

EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage

Descriptors—\*Cable Television, Community Programs, \*Community Services, Educational Television, Programming (Broadcast), \*Public Television, \*Television Research, Television Surveys, Television Viewing

Identifiers—CATV, \*Sweden

The first non-commercial cable television (CATV) project in Sweden was conducted in Kiruna since it was the site of an established commercial CATV network. The Kiruna project goal was to emphasize locally produced programs. Objectives tested were production and planning forms, cooperation between groups, and utilization of a program bank. Evaluation of the first trial period indicated that 90 percent of the people interviewed wanted the experiment to continue. The trial period was too brief to provide satisfactory assessment, so funds were allocated for continuation. Evaluation again indicated success, especially in programming. The Committee for Television and Radio in Education (TRU) determined that CATV as used in Kiruna should be regarded as an independent medium which is not to be isolated from other media and methods. Statistical tables show the viewer age, level of education, percentage of viewer opinion, and comparative figures. (Author/DS)

Designed basically to link theory to classroom practice this handbook attempts to point out that an individualized learning classroom is within the ability, energy, and reach of every classroom teacher. The three introductory chapters cover theories of individualized learning, objectives, and a method to evaluate the priorities for reorganizing learning in the classroom. Subject areas are divided into seven groups: (1) the teacher's role, (2) the student's role, (3) materials and curriculum, (4) recordkeeping, (5) timing, (6) physical room arrangement, and (7) implementation. These seven groups are further divided into 22 units with each unit containing specific objectives, introduction, and procedures. Charts, outlines, and sample forms are included in addition to a 73-item bibliography. (DS)

**Descriptors**—Cognitive Processes, \*Decision Making Skills, Educational Games, \*Leadership Training, Literature Reviews, Management Systems, Military Training, Problem Solving, Professional Education, \*Skill Development, Training Objectives, \*Transfer of Training

Theoretical and empirical studies of decision-making were reviewed to identify results applicable to training decision-makers. The review is organized in terms of the following component tasks: information gathering, data evaluation, problem structuring, hypothesis generation, hypothesis evaluation, preference specification, action selection, and decision evaluation. Implications of research findings for each task are described. It is concluded that decision-making is not sufficiently well understood to permit the design of an effective general-purpose training system, but that systems and programs could be developed for training in specific decision-making skills. **Identifiers**—Mister Rogers Neighborhood, Project Head Start, Prosocial Behavior

A study sought to determine (1) whether a television program designed to enhance personal, social, and emotional development can have positive effects on children's behavior and, (2) what elements in a child's environment produce the greatest positive effects. Two components of the environment were studied: (1) training of the adult care-givers to implement materials and, (2) concepts related to the programs and arrangements of the physical environment to increase the likelihood that the child will use material from the program in his everyday behavior. The television program called Mr. Rogers' Neighborhood was dubbed to 16mm film; the subjects were children enrolled in the Head Start program. Twenty films were shown in each classroom during the eight-week experimental period. Play materials relevant to prosocial television were designed to provide cues; books, games, and records devoid of prosocial context were chosen as irrelevant material. Prosocial television produced few behavioral differences from the neutral treatment, but the effects of prosocial television accompanied by relevant play materials varied with classroom structure. The study indicates the usefulness of prosocial television and related curriculum materials in day care and educational programs for young children of the economically disadvantaged. Fifteen statistical tables detail the material used and measurement figures. Suggested neutral materials, film content, and observation of behavior are appended. (Author/DS)

**Identifiers**—California School for the Deaf, \*Lawrence Hall of Science

The California School for the Deaf (CSD) conducted a study to familiarize students and faculty with available programs at Lawrence Hall of Science and to see if the instruction and teaching philosophy used to introduce the programs was adequate for students with impaired hearing. The pilot study was positive, so objectives were formed to adapt current computer programs. Objectives included: (1) improvement of teacher attitude and ability concerning the computer, (2) improvement of student attitude and ability through training, and (3) an evaluation of the results of the year's project. The program was determined a success since there was a significant increase in the use of the computer by students and faculty at CSD. Appendixes include a survey of student and teacher opinion, samples of lessons, graphs indicating usage, and teacher opinion surveys. (Author/DS)

Emphasis is placed on the experimental analysis of behavior in this spelling program of computer-assisted instruction (CAI). The spelling pro-

gram is of special interest because it is based on a good behavioral analysis of the nature of the spelling task, and it offers a chance to review computer instrumentation. Results of the review indicates the dangers in failing to insure the occurrence of the behaviors described in the task analysis. Objectives of spelling instruction and program rationales, and rules for non-readers are appended. (Author/DS)

**Identifiers**—Word Problems

A computer-based curricular package was developed to teach elementary school students to solve arithmetic word problems and to teach problem solving skills applicable to situations not involving word problems. An information processing model for solving word problems was used to sequence the problems. Pilot test results with five students suggested that the sequence derived from the model was hierarchical, that students learned from the program, and that they enjoyed the experience. Statistical data includes test material, tryout data, and a list of 22 references. (Author)

**An Analysis of the Degrees Awarded by 97 Community Colleges in California.**  
 El Camino Coll., Torrance, Calif.  
 Report No.—OIR-75-20  
 Pub Date Sep 75

Note—9p.

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**  
**Descriptors**—\*Associate Degrees, Comparative Analysis, \*Enrollment, \*Junior Colleges  
**Identifiers**—\*California

This report compares the number of associate degrees awarded for the school year 1973-74 to fall enrollments. Average enrollment in California community colleges was 8,772 (median=7,193);

the average number of degrees awarded was 687 (median=591). The number of students enrolled per graduate averaged 12.77 (median=12.17), while an average of 78.32 degrees were awarded for every 1,000 students enrolled. Overall, the degrees awarded equalled 7.8 percent of college enrollment; 57.6 percent of the degrees were awarded to males (4.5 percent of college enrollment), and 42.7 percent of the degrees were awarded to females (3.3 percent of college enrollment). Community colleges in California have a variety of emphases and objectives. Some colleges primarily prepare students for transfer to a four-year college or university, while others dedicate themselves to the vocational needs of students. These data must be interpreted with a recognition of the community college's obligation to fulfill the needs of the adults in the community. Five tables are appended. (Author/NHM)

A Followup Report on the Attitudes and Preferences of Those Students Enrolled in the Televised Course, Child Psychology, at Waubensee Community College, Sugar Grove, Illinois. Waubensee Community Coll., Sugar Grove, Ill. Pub Date May 75

Note—44p.

EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage  
Descriptors—\*Cable Television, Child Psychology, \*Closed Circuit Television, College Curriculum, \*Course Evaluation, Educational Alternatives, Educational Television, Individualized Instruction, \*Junior Colleges, \*Participant Satisfaction, Questionnaires, Student Attitudes, Student Opinion, Tables (Data), Telecourses

Identifiers—\*Waubensee Community College

One manifestation of the concept of individualized instruction has been the rediscovery of television as a useful tool. In order to identify student attitudes toward a televised child psychology course and assess the quality and rigor of the course, a questionnaire was developed and administered to students who watched the course at home on cable television and to those who individually viewed the course at their own pace in the college Learning Resource Center. Students seemed to favor the flexibility of the televised programs in the library to the structured viewing approach over cable television. Over half of those who responded indicated that the amount of work required was about the same as that of other courses, but the degree of pressure was perceived as about the same or less. Almost 75 percent of those using only the library indicated that they learned the same of less than in other courses, while 65 percent of cable users indicated that they learned the same or more; this is perhaps due to a difference between the perception of the full-time student. Failure to complete the course seemed less attributable to course difficulty than to other, outside pressures on the student. Recommendations are made, and the questionnaire is appended, along with 16 tables of the findings. (NHM)

Identifiers—\*Connecticut

The nature of the economy in Connecticut—its changing occupational structure and trends of population growth—and the changing pattern of higher education enrollments, particularly increasing enrollments in technical colleges and in relatively new regional community colleges, indicate the need for increased post-high school educational opportunities. Based on an analysis of employment and enrollment trends and communi-

ty college objectives, this report presents guidelines for the future development of the regional community college system. Six models for providing college facilities and criteria for establishing new community colleges are detailed. Recommendations for new, expanded, or merged facilities are based on application of the criteria to each community college district. On the basis of first-hand acquaintance of the study team with topography, existing and planned road systems, and other accessibility factors, two areas of location for permanent community college facilities are recommended, and two proposed sites for which legislation has already been enacted are discouraged. An amalgamation of technical colleges with regional community colleges is recommended. Statistical studies of the present community college network, three alternative enrollment projection estimates, and maps are included. (Author/NHM)

A Survey of Community Attitudes toward Occupational Education.

Compton Community Coll., Calif.

Spons Agency—California Community Colleges, Sacramento. Office of the Chancellor.

Pub Date 74

Note—33p.

EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage

Descriptors—Career Education, Community Attitudes, High School Students, Junior Colleges, Junior College Students, \*Minority Groups, Negro Attitudes, \*Occupational Aspiration, \*Occupational Choice, Occupational Guidance, Questionnaires, \*Student Attitudes, Tables (Data), Vocational Counseling, \*Vocational Education

Identifiers—\*Minority Attitudes

In order to identify minority attitudes toward occupational education, a survey form was developed and administered to a stratified random sample of 85 high school students, 85 community college students, and 80 community residents in the college's primarily Black service area. In 17 tables, the authors note the composition of the group by sex, age, and ethnic group; expressed occupational goals; preferred methods for entering an occupation; persons influential in determining career choice; training methods and institutions respondents wished to avoid and reasons for avoidance. The authors attribute negative attitudes toward occupational education to the unrealistic job expectations of minority high school and community college students and blame these aspirations on ineffective career guidance in the high schools. Students need a minimal understanding of the requirements for educational programs and careers, and of the severity of the competition for the available positions. The authors recommended a once-a-week multi-hour session and year-long credit course for high school seniors to be given at the college. Considering the low influence of teachers and counselors, the course could be given by carefully chosen professional, business, government, and labor leaders; better community and industry relations along with future job placements might be valuable fringe benefits. An Analysis of Female Enrollment and Persistence in Five Selected Industry and Technology Courses.

El Camino Coll., Torrance, Calif.

Report No—OIR-75-19

Pub Date Aug 75

Note—6p.

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—Courses, \*Dropout Rate, \*Enrollment Rate, \*Females, \*Junior Colleges, \*Trade and Industrial Education

An investigation was made to determine the number of female students who completed or withdrew from five industry and technology courses predominantly enrolled by male students, over an 11 year period from 1964 to 1974. A total of 59 females had enrolled in Auto Mechanics, while 9, 8, and 5 females had enrolled in Welding, Construction Technology, and Air Conditioning and Refrigeration, respectively. No females had enrolled in Auto Body and Fender. The last three years of the study indicate a completion percent of 56, 52, and 50. The percent of those completing courses for all years studied was 53.

The course having the highest percent of female enrollees completing the course was Welding, with a completion rate of 67 percent. This course was followed by Auto Mechanics (54 percent), Air Conditioning and Refrigeration (40 percent), and Construction Technology (38 percent). Three tables are appended. (NHM)

In 1974, the State Board for Community Colleges outlined a series of five projects to be funded with Part B, federal funds for a period of five years. This report provides an overview of each project, outlines the problem, states project objectives, and summarizes preliminary results and future activities. Projects relate to occupational programs at the community college level and include: (1) improving articulation of programs; (2) developing a management information system; (3) implementing an evaluation system; (4) investigating the feasibility of a statewide system of career information for students; (5) improving the quality of orientation, advisement, counseling, career development and placement. Financial data are given and appended. They include: a proposal to study the feasibility of a vocational-technical center in Baltimore County; proceedings of a workshop to formulate a proposal for an integrated curriculum between the colleges and high schools in data processing education; Comprehensive Career Information Systems Committee meetings minutes; data file structures of two program and occupational codes crosswalks; a pilot sample printout of the Program Data Monitoring System; and pilot implementation of the Career Program Evaluation Model. Descriptors—Associate Degrees, \*College Credits, Credit No Credit Grading, \*Degree Requirements, Equivalency Tests, \*Grades (Scholastic), \*Junior Colleges, \*Manuals, Veterans Education

This manual lists regulations and practices governing credit procedures at Los Angeles City College (California). Grading practices and record updating procedures are covered, including credit by examination, credit/no credit grading, credit on early military withdrawal, course repetition, course duplication, incompletes, and credit transfer. The manual prescribes methods of determining accreditation for military service, external examination, and coursework attempted at accredited and nonaccredited institutions. Current Los Angeles City College policy regarding probation, disqualification, and readmission is given, and graduation requirements are outlined, including regulations covering multiple degrees and graduation honors. Finally, certification procedures for completion of State University and College requirements in general education are given, including classification lists for courses in the college's curriculum. Identifiers—Oregon, Washington

Articulation is the relationship between educational programs which provides a smooth transition for a student moving, either horizontally or vertically, between programs. The major objectives of this conference were to: (1) identify problem areas and strategies for improving articulation among secondary and postsecondary vocational education programs; (2) discuss examples of successful articulation efforts; (3) make a personal commitment and recommendations for furthering articulation efforts in local, regional, and state vocational programs. Following major presentations and panel presentations, the participants were given the opportunity to discuss the points presented. During small group activities the participants were given a specific charge and asked to evaluate, discuss, and arrive at a group consensus. Abstracts of the major addresses, panel presentations, and small group consensus are provided. Recommendations are divided into local, state, and WCLA roles and responsibilities toward articulation efforts. Appended are the text of Dr. John Lombardi's keynote address, letters to vocational directors and state administrators, a local "action" plan, and a list of conference participants. (NHM)

Data on Iowa's Area Schools (School Year 1973-74).

Iowa State Dept. of Public Instruction, Des Moines.

Pub Date 74

Note—385p.

EDRS Price MF-\$0.76 HC-\$19.67 Plus Postage

Descriptors—Adult Education, \*College Curriculum, College Faculty, \*Educational Facilities, \*Educational Finance, \*Enrollment, Followup Studies, Graduates, \*Junior Colleges, Libraries, Terminal Students, Transfer Students, Vocational Education

Identifiers—Iowa

This document presents a comprehensive statistical picture of public postsecondary two-year institutions in Iowa. The bulk of the document consists of extensive tables of data obtained from records of the Area Schools Division, Iowa State Department of Public Instruction, but brief narratives and charts are included as well. Many of the 16 area schools offer a college parallel program equivalent to the first two years of a baccalaureate degree program. Course offerings in college parallel programs are listed, as well as courses in adult and vocational education. Courses and students are classified according to their eligibility for State General Aid. Enrollment and graduation data are tabulated and variously classified. Professional staff for each area school are classified according to salary, age, experience, highest degree earned, position, and graduate academic major. Data on library resources and staff are included, and data on physical facilities are tabulated on the basis of financial and architectural criteria. Finally, information on financial resources, expenditures, and tuition and fee income of area schools are presented in accord with the area schools' uniform financial accounting system. Appended are two statewide followup studies: area school graduates of 1973-74 (by program area), and secondary school graduates of 1972-73 after one year (by geographic region). (NHM)

An Examination of the Chicano Advisory Committee's Effect on the Establishment of College Policy [and] An Examination of the Committee's Implementation of a Chicano Recruitment Project.

Pub Date Aug 74

Note—50p.; Ed.D. Practicum, Nova University

EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage

Descriptors—\*Advisory Committees, Affirmative Action, Community Involvement, \*Junior Colleges, \*Mexican Americans, Minority Group Teachers, \*Policy Formation, Program Evaluation, \*Recruitment, Student Participation, Teacher Participation

A questionnaire was developed and administered to 200 present and past Chicano Advisory Committee (CAC) members, including Chicano and non-Chicano faculty, college administrators, and Chicano students, staff, and community members. Information was gathered on the role the CAC plays in policy-making at Pasadena City College (California). Respondents generally felt that CAC is an important and positive contributor to the college's policy-making process, although improvements, especially in the areas of committee authority, speed, and visibility, need to be implemented. Another questionnaire was developed and administered to 400 Chicano students, faculty, administrators, members of the Chicano recruitment staff, and present and past members of the CAC, in order to measure the effectiveness and direction of the Chicano Recruitment Project. While viewing present recruiting efforts as effective and positive, respondents felt that a more intensive effort is needed, with increased funding and staff, and more varied recruiting methods. The author provides a model for a Chicano recruitment project, including steps needed to develop a more effective program. In addition, suggestions for the development of more effective CAC operating procedures are presented. A bibliography is included, and the questionnaire results are appended. (NHM)

A Faculty Morale Study in a Community College.

Pub Date Apr 75

Note—52p.; Ed.D. Practicum, Nova University

EDRS Price MF-\$0.76 HC-\$3.32 Plus Postage

Descriptors—\*College Faculty, \*Job Satisfaction, \*Junior Colleges, Organizational Climate, Teacher Attitudes, \*Teacher Morale

A questionnaire was developed to measure faculty morale and was administered to all full-time faculty members (N=51) at a community college. The form developed consisted of three sections: (1) a list of 36 positive and 36 negative hypothetical experiences which the faculty member checked if he/she had experienced the incident described in the statement; (2) a morale scale and four questions to obtain a validity check on the morale level marked; and (3) 14 questions relating to personal information. The most frequent positive morale items marked dealt with academic freedom, faculty cooperation and friendliness, and student rapport. The most frequent negative item dealt with physical limitations of the classroom. Using a morale scale of one (extremely low) to seven (extremely high) the mean morale level was computed to be 5.77. Significant difference at the .01 level was revealed using morale scores and responses to the question related to accepting a similar position at another institution with the same salary; and at the .05 level using morale scores and responses given to the question regarding income from other endeavors. A review of the literature and the survey instrument are included. (Author/NHM)

An Evaluation of Instructional Radio Courses at Virginia Western Community College.

Virginia Western Community Coll., Roanoke. Office of Institutional Research.

Report No—OIR-31-75

Pub Date Jul 75

Note—36p.

EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage

Descriptors—\*Educational Radio, \*Instructional Technology, \*Junior Colleges, Participant Satisfaction, \*Student Attitudes, Student Characteristics

A questionnaire was developed and administered to 104 students who had enrolled in the college's five instructional radio courses; 51 percent responded. Selected personal and demographic characteristics of enrollees were identified, attitudes toward radio courses were determined, and certain technical aspects of the courses were discerned. Approximately 82 percent of the respondents enrolled in the courses to

earn a certificate, diploma, or associate or higher degree. Approximately 54 percent of the respondents were employed in the fields of law enforcement. The respondents indicated extremely high ratings for the following aspects of the radio courses: academic instruction, instructor's delivery, grading procedures, length of lectures, availability of instructor, technical quality of programs, and radio reception. Seventy percent of the respondents said that the radio course was related to their proposed future employment or study. A significant number (24 percent) of the respondents supplemented the radio broadcast by utilizing the college's learning laboratory to listen to the programs. Results are tabulated and appended, and recommendations include: better coordination of nontraditional course offerings, and a more efficient method of selecting courses and instructors. Compensatory Education in the Community College: An Interactionist Approach. Topical Paper No. 52.

California Univ., Los Angeles. ERIC Clearinghouse for Junior Coll. Information.

Spons Agency—National Inst. of Education (DHEW), Washington, D.C.

Pub Date 75

Note—60p.

EDRS Price MF-\$0.76 HC-\$3.32 Plus Postage

Descriptors—\*Affective Behavior, Cognitive Development, \*Compensatory Education, Compensatory Education Programs, Educationally Disadvantaged, Interaction, \*Junior Colleges, Learning Motivation, Low Achievers, Models, \*Peer Relationship, Remedial Programs, \*Small Group Instruction

The community college has become the institution of higher education which implements the American "open class" ideology, providing an opportunity for students to learn and advance themselves socially and occupationally. Evaluative research concerning compensatory education programs in the community college indicates that such programs have not been highly successful in welcoming and encouraging those who have a history of failure in traditional schools. Most such programs have dealt solely with erasing cognitive deficiencies, but an effective program must address the affective domain as well. By emphasizing the development of small, cohesive learning groups which have norms of communication and support, and which are open to the distribution of authority and the shared responsibility for learning, the interactionist approach addresses both cognitive and affective domains. A general theoretical rationale is presented for establishing an interactionist compensatory educational program, by reviewing current programs, and examining the relationship between various affective components and academic performance. Then, a model program is presented, including a step-by-step group development and skill-building design tested and refined in community colleges. A bibliography is appended. (NHM)

Descriptors—\*College Planning, Curriculum Planning, Delivery Systems, Educational Needs, \*Educational Objectives, Enrollment Projections, Facility Planning, Financial Needs, Governance, \*Junior Colleges, \*Master Plans, \*Multicampus Districts, Resource Allocations, School Community Relationship, Staff Utilization

Identifiers—Missouri (Kansas City), Needs Assessment, Nontraditional Colleges

This master plan was drafted in order to provide guidelines for the continuous development of the Metropolitan Community Colleges over the next 10 years. In order to reach consensus, the various chapters were reviewed by college personnel, trustees, and consultants during the planning process, which culminated in a final two-day planning charrette for review and revision of the entire document by faculty, administrators, staff, and students. Section I of the plan presents a statement of district philosophy, mission, and goals. Subsequent sections include: (II)

Enrollment Planning Parameters (projections and methodologies); (III) Staffing Parameters (10-year goals for workloads and staff/student ratios for instructional, administrative, support, and classified staff); (IV) Needs Assessment Study (studies of educational needs of business and industry, current students, and the general public); (V) Educational Plan Part I, General Goals (curriculum, learning systems, new delivery systems, faculty development, student development); (VI) Educational Plan Part II, Curriculum (curriculum plan, educational services, planning processes, curriculum approval); (VII) Community Renewal College (proposal for a new community-oriented college without walls); (VIII) Facility Study; (IX) Fiscal Plan; (X) Management and Operations (district and college level responsibilities); (XI) Supplementary Studies (paraprofessionals, transportation study). Identifiers—\*Saint Petersburg Junior College

The heterogeneous nature of community college populations has resulted in an academic dichotomy within two-year institutions. Most institutions offer two types of programs: (1) discipline-based, university parallel programs, oriented toward transferring students to four-year institutions; (2) vocational/technical programs, oriented toward terminal degrees. Since two-year colleges are unique institutions with philosophy and goals to justify their separate existence, a more coherent educational approach is needed, identified as "liberal education." Liberal education seeks not only mastery of bodies of information, but coherence among them, enhancing personal development. The curriculum of a discipline-based social science department was studied by developing a "program-priority-value-matrix." Three factors were used: (1) program priority; (2) student demand priority; (3) cost per credit hour. The hypothesis that decision-making curriculum managers perpetuate the dichotomy between discipline-based and vocational/technical education was sustained; social science courses had little or no demand/priority in vocational programs. A policy of 40 percent specialization requirements, 40 percent general education requirements, and 20 percent electives is recommended, so that a student can break out of the rigid "tracking" system. Descriptors—\*Administrative Personnel, Administrator Characteristics, Administrator Qualifications, Administrator Responsibility, \*Administrator Role, \*Annotated Bibliographies, \*Department Directors (School), \*Junior Colleges, Literature Reviews

With the intent of presenting significant items on the subject rather than an exhaustive listing, a thorough examination was made of entries on the role of the community college division/department chairperson catalogued over the last 11 years by Education Index, Resources in Education, Current Index to Journals in Education, and Dissertation Abstracts. Although the bibliography focuses on the role of the community college chairperson, a number of documents include references to selection and appointment procedures, the role of the chairperson in the

secondary school or four-year college, and items developing out of, and indigenous to, the two-year college. The major variables in the role of the chairperson are seen to be the chairperson himself, the scope of his responsibilities, the extent of his authority, his effectiveness, and the perceptions he, his faculty, and his supervisors have of his position. Major problems facing the chairperson are the ambiguity of his role, lack of training and orientation among those who hold the position, confusion about the nature of the position, often created by the advent of collective bargaining, and lack of general support from upper echelon administrators. Present research suggests that the position and nature of the chairperson's role will not change significantly over the next five years. (NHM)

Trends in L. A. C. C. Graduates, 1962-1975.

Los Angeles City Coll., Calif.

Report No—RS-75-14

Pub Date Sep 75

Note—20p.

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*Associate Degrees, \*College Majors, Comparative Analysis, Day Students, \*Educational Trends, Evening Students, Females, Followup Studies, Graduates, \*Junior Colleges, Males, Statistical Data, \*Student Characteristics, Tables (Data)

Trends in graduate characteristics at Los Angeles Community College (LACC) are analyzed for the period from 1962-1975 and are compared to data from other California community colleges. Numbers of graduates are tallied according to sex, day or evening status, January or June completion, and major. The total number of associate degrees (AA) awarded rose steadily through the first decade of the period, but has declined in the last three years. Likewise, the percent of the total college enrollment receiving the associate degree rose from 5.2 percent in 1962 to a high of 9.4 percent in 1972, but dipped to 6.8 percent in 1975. The number of women receiving degrees overtook the number of men graduates in 1972, and has increased since that time. The percent of June degree recipients has hovered around the 60 percent mark throughout the period. The percent of evening student graduates rose to a high of 32.7 percent in 1974, but dropped markedly in 1975. About 40 percent of the 1975 graduates completed a two-year occupational major, a figure slightly below the 1974 percentage. In comparison with other California community colleges in 1974, LACC ranked fourth (of 96) in number of AA degrees awarded, and twenty-ninth in ratio of number of degrees to enrollment. (NHM)

Inequality of Outcomes: Two-Year Educations.

Preliminary Draft, Subject to Revision.

Pub Date 74

Note—19p.; Paper for presentation at the Annual Meeting of the Society for the Study of Social Problems (Montreal, Canada, 1974)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—Academic Aptitude, \*Aspiration, Equal Education, Junior Colleges, \*Junior College Students, Occupational Guidance, \*Socialization, Social Mobility, Socioeconomic Status, \*Student Characteristics, \*Vocational Adjustment, Vocational Education

Identifiers—\*Cooling Out Function

Because of its lower cost, cultural integration into the community, non-selective admission requirements, and vocational/technical programs, the two-year college has been seen as a way of enrolling students historically underrepresented in higher education. In comparison to his four-year college counterpart, the two-year college student is from a lower-income family, has parents with less schooling, and ranks lower on scales of academic aptitude. One function of two-year colleges is the rechanneling of student aspirations in line with student abilities and labor market demands. This is accomplished through a persuasive guidance approach which reorients students, most often resulting in the redefinition (cooling-out) of transfer students as terminal, vocational education students. Even if education as a certifying agent were abandoned in favor of skill training in business and industry, the author contends that the same inequalities which currently prevent

equal access to colleges would prevent equality of access to training programs in the private sector. Thus, despite the unsavory implications of "people processing," the idea of a better fit between educational and occupational spheres is attractive and desirable. (NHM)

Descriptors—Females, General Education, Graduates, \*Junior Colleges, \*Participant Satisfaction, \*Student Attitudes, Student Characteristics, \*Vocational Education

Former occupational-technical students were questioned as to their attitudes toward their community college programs. The large majority of respondents rated their overall experience very high, and said they would recommend their college to someone seeking the same program. Social activities, however, were rated quite low. Women and graduates were much more positive about their community college experience than were their male or nongraduate counterparts. Diploma graduates expressed far more positive attitudes than AAS degree or certificate graduates. Of curricular groups, public service students were the most positive, followed closely by health students. Minorities were somewhat more positive than whites. Students rated the quality and value of their preparation in seven different areas: technical knowledge and understanding, job or learning skills, getting along with people, self-understanding, knowledge about career opportunities, communication skills, and general education. General education received the highest rating, both for quality and current value. Yet, when asked to give their opinion on the balance of general education and technical courses, more than half of the respondents wanted to increase the proportion of technical courses. Tabulated responses are appended. (NHM)

Descriptors—Consultants, Faculty, Faculty Evaluation, Instructional Staff, \*Junior Colleges, \*Organizational Development, \*Staff Improvement

The papers and other materials contained in this monograph resulted from the events of the "Planning for Community College Staff Development" conference. Keynote addresses include: (1) a survey of the literature which reflects the present state of the art and points out areas in need of research; (2) critical questions and issues faced by any college attempting to design a staff development program; (3) description of successful staff development programs in large, medium, and small institutions; Discussions of (4) evaluation methods, and (5) the use of consultants; (6) recommendations. One major aspect of the conference was a simulation exercise on staff development designed to provide an experience which would enable the participants to synthesize all they had been hearing from keynote speakers. Participants were divided into groups, and group reports were prepared and presented. Criteria used in judging programs were based on the assumption that staff development programs should be: developmental, democratic, inclusive, supportive, self-evaluative, self-prescriptive, and wide spectrum. Appended are an annotated bibliography, sample community college staff development programs, a conference registration list, and results of an evaluation questionnaire which was administered to participants. **Descriptors**—\*Beliefs, \*College Teachers, Ethics, Junior Colleges, Learning Motivation, Literature Reviews, \*Personal Values, Practicums, Questionnaires, \*Religious Education, \*Self Expression, Student Opinion, Student Teacher Relationship, Teacher Influence

A teacher must confront the issue of whether or not he should disclose his beliefs, and if so, to what extent. Disclosure can easily become advocacy. A review of the literature reveals that self-disclosure quickens learning, but the literature is divided on whether a religion teacher in tax-supported schools should advocate personal teacher self-disclosure and advocacy on their learning, a questionnaire was developed and administered to four Interpersonal Communication classes and one English class. The survey of 87 Fresno City College (California) students showed overwhelmingly that they saw their most effective teachers as being self-disclosing; that they preferred teachers to self-disclosure and, to a lesser extent, advocate a position. An analysis of the responses by age groups revealed that while both students under 25 and students 25 and over favored teacher self-disclosure and advocacy, the older group did so more strongly. The evidence of this study supports teacher self-disclosure in the classroom, even in religious studies, for both philosophical and educational reasons. The questionnaire and extensive bibliography are appended. (Author/NHM)

**Identifiers**—\*California

The employment of community college instructors on a part-time basis provides the opportunity for students to study under outstanding instructors whose primary employment may be in industry or in other postsecondary institutions and permits colleges to respond better to community needs with the financial resources available to them. Along with these benefits, however, have come a corresponding number of problems. Although legislation in 1972 attempted to delineate provisions of law concerning the employment of certificated personnel in community colleges, it left questions with respect to the employment of temporary and part-time personnel. Inappropriate or inconsistent language in existing law must be clarified. In addition, opinions differ concerning the proportional benefits which part-time instructors should receive, especially in areas of tenure, salary and fringe benefits, and participation in campus affairs. Appended is an analysis of data collected by surveying 69 California community colleges as to their employment of part-time faculty. Of the 52 districts responding, 43 employ more than half of their faculty on a part-time only basis. The average district estimate of the cost of providing pro-rata pay to part-time faculty is a 5.5 percent increase in budget expenditures for faculty salaries. (Author/NHM)

Colleges, Learning Processes, Multimedia Instruction, Objective Tests, Reports, Rote Learning, Sciences, Student Attitudes, \*Student Evaluation, Tables (Data)

Exclusive reliance on objective testing focuses students' attention too narrowly on memorization and rote answers to complex problems. Grades become supreme ends; learning, merely a by-product. Since students learn best when asked to verbalize, analyze, and synthesize their ideas, a grading system was implemented in a social science course at Miami-Dade Community College (Florida) which would encourage analysis and learning from different sources. Students could earn up to five points a week on objective tests, and up to four points a week on written reports. In addition to textbook assignments, students received lists of audio tapes, movies, television documentaries, and articles which could be reviewed. Grading of review was based on the extent the student wrote in his own words, the care he took in writing, and the way he related material to academic ideas and personal experience. Results of a questionnaire found student attitudes positive toward the course, the grading system, and especially toward the variety of ways points could be earned. Although care must be taken to insure the quality of the outside sources and the reports themselves, the new system adds flexibility to course curriculum, encourages optimism toward success in the course, and focuses attention on understanding rather than memorization of ideas. Extensive tables of data are appended. (Author/NHM)

**Resource Allocation: A Participatory Process.**  
 Pub Date 5 Aug 75  
 Note—125p.; Paper presented at the Community Junior College Presidents Conference, Estes Park, Colorado, August 3-6, 1975  
**EDRS Price MF-\$0.76 HC-\$5.70 Plus Postage**

**Descriptors**—Administrative Organization, Administrative Personnel, \*Budgeting, Chief Administrators, \*Junior Colleges, \*Organizational Climate, \*Participation, \*Resource Allocations, Teacher Participation

Whether a participatory process for resource allocation in a public community college setting occurs depends upon several key factors: (1) the leadership style of the institutional chief executive officer; (2) the administrative organizational structure of the institution; (3) the relationship which exists between and among members of the various segments of the institutional community—students, faculty, support staff, administration, and governing board. A review of the literature indicates that no institution or program has achieved the ideal of participatory resource allocation. A process by which internal participation in resource allocation can be fostered is described for a modified bureaucratic organizational structure, augmented by an extensive joint committee system. Case studies are presented, and sample instructions and forms for budget development are appended, along with a sample statement of developmental institutional objectives, an overview of budget planning and development, background data required for resource allocation and budget development, and comparative statistical data for all community colleges in the Illinois state system. **Identifiers**—\*Economic Impact Studies

The total economic impact of a college on its community includes the benefits the community receives and the costs it incurs. The benefits can

be classified into the tangible dollar expenditures of people associated with the college and the intangible benefits of human resources development. Costs often include alteration of neighborhoods and added municipal services. The Institute of Higher Education Research and Services at the University of Alabama recently completed two economic impact studies of two very different colleges in Alabama. One study, completed in May 1974, reported the impact of a private, predominately black, four-year accredited liberal arts college on the economy of an urban area. The other study, completed in August 1974, reported the economic impact of a public, predominately white, two-year accredited junior college on a rural area (see ED 099 069). This report summarizes and points out some unique aspects of the two studies. In addition, reasons for conducting an economic impact survey, and the procedure for undertaking such a task are briefly discussed. Summary background data about the two institutions are discussed. Data collected for the studies are summarized in 11 areas of impact and are presented in chart form. (Author/NHM)

**Identifiers**—Biobibliographies, \*Johnson (B Lamar)

This is an annotated bibliography of the publications of B. Lamar Johnson, a prominent leader in the field of education, particularly in promoting innovative and experimental library and instructional programs and in the development of the community junior college. It reflects the various areas of Dr. Johnson's career, his interests, and his accomplishments. The bibliography is comprehensive rather than selective, recording all of his published works from 1932 to 1974, arranged chronologically from earliest publication to the most recent. The publications are grouped by "Books, Monographs, and Major Reports," "Journal Articles and Chapters in Books or Monographs," "UCLA Junior College Leadership Program," "Book Reviews by B. Lamar Johnson," "Reviews of Works by B. Lamar Johnson," "Miscellaneous Writings About B. L. Johnson," and "Letters to Editors." Sections listing reviews of his works, articles written about him, reviews written by him, and his letters to editors are selective in that they are limited to materials available to the compiler. A concluding subject index arranges publications by broad fields, listing them by title and entry number. (NHM)

This monograph reviews the faculty teaching the humanities in two-year colleges: their backgrounds and preparation, involvement with inservice training, job satisfaction, attitudes and values, and approaches to curriculum and instruction. Information was derived by an extensive search of the literature. Materials were identified

by scanning 34 sets of bibliographic indexes for publications of the past 10 years, along with the catalogues of the UCLA University Library, and by asking association and institutional heads for unreported studies. The preparation sequence leading to a specialized competence is frequently seen as inappropriate for the tasks of teaching in an open-door institution. Holders of doctorate degrees have difficulty in obtaining positions because they are priced too high. Part-time faculty paid at a relatively low hourly rate are being employed in increasing numbers. But opportunities are opening for constructive inservice training. The major foundations and federal funding agencies are becoming increasingly aware of faculty in these institutions. And, most important, a professional consciousness is developing within the faculty as they form their own subgroups within the major disciplinary organizations and seek to take control of the conditions of their work. A bibliography is appended. (NHM)

**Identifiers—**\*Washington

A survey of almost 6,500 community college faculty, trustees, students, presidents, and administrators was conducted to study the question of faculty relations in the Washington State community college system, with special emphasis on collective bargaining. Respondents (38 percent of the questionnaire distribution) favored including part-time faculty in the bargaining unit by a 70.6 percent margin, and department/division chairmen by a 70.2 percent margin, but were against including students by a 77 percent margin. Other results indicated: 52.2 percent of the respondents were against administrators, other than the president, being empowered to bargain independently; 64.3 percent were in favor of negotiations at the local rather than the state level; 75.3 percent were against the idea of limiting collective bargaining to the traditional economic issues of wages and hours; 54.3 percent favored both collective bargaining and internal governance. Responses were evenly divided on the advisability of a statewide salary schedule for community college faculty. Based on the survey results, a replacement of the Community College Professional Negotiations Law with a collective bargaining law designed specifically for community colleges is recommended. Bargaining should be conducted at the local level. (NHM)

**Descriptors—**Cost Effectiveness, Data Analysis, Data Collection, Educational Assessment, \*Evaluation Methods, \*Junior Colleges, Models, \*Program Evaluation, \*Technical Education, \*Vocational Education  
**Identifiers—**\*Reality Based Evaluation

This handbook presents a pilot evaluation model developed with the cooperation of occupational education staff members from the two-year colleges of New York State. The project staff, the steering committee, and principal consultants began with the assumption that evaluation can be

a valuable and continuous part of program effort, providing critical feedback that will identify and support essential program modifications. Reality-based evaluation (RBE) is described as a three-phase process: (1) clarifying a program's real intent; (2) collecting information on what that program actually does; and (3) interpreting how well it was done and recommending what should be done. Phase I, "Clarification," results in a management outline, subject to change and based upon the realities of the program as they are seen. Phase II, "Data Collection," results in a working plan which implements Phase I objectives. Phase III, "Interpretation," results in the compilation of evaluation conclusions. Forms paralleling the RBE process phases are provided to facilitate consistent recording of data as it is derived at each procedural step. Techniques of data collection and approaches to cost analysis are listed and described. The annotated bibliography is indexed according to problems which may occur in the course of the evaluation. Vocational and technical education can provide economic mobility for individuals as well as economic development for communities. However, the literature and the results of this study indicate that the persons who could profit most from vocational education programs, those in lower status groups, know very little about such programs. A five percent sample of persons in the service area of Central Florida Community College was drawn from the telephone directory; 120 listings were chosen from each of five residential areas: high-income white, middle-income white, low-income white, middle-income black, and low-income black. A telephone survey was then conducted to determine two factors: (1) the number of persons in income/racial groups at each information level, in regard to vocational education programs; (2) patterns of media use within the income/racial groups. These media use patterns were used to design and implement an information dissemination campaign. A follow-up telephone survey showed a significant positive change in numbers of persons at the various information levels for low-income white and black groups. The sum of the percentage of increase for each information level was 23.6. Thus, 12,500 low-income whites and blacks had increased levels of information. Survey questionnaires are appended, along with sample media materials and comparative costs of media time or space. (NHM)

**Project Renewal. Final Report.**

Illinois Community Coll. Board, Springfield.

Pub Date Jun 73

Note—134p.

**EDRS Price MF-\$0.76 HC-\$6.97 Plus Postage**

**Descriptors—**Clearinghouses, \*College Cooperation, Community Services, Consortia, \*Cooperative Planning, \*Educational Needs, Junior Colleges, \*Older Adults, Recreational Programs, \*Senior Citizens, Transportation, Volunteers  
**Identifiers—**Needs Assessment

Project Renewal assessed the needs of persons aged 60 and over in the districts served by Highland Community College, Kishwaukee College, and Rock Valley College (Illinois), with special focus on the role of educational institutions

in meeting those needs. Through interinstitutional cooperation by the three community colleges and Northern Illinois University, a study was conducted using the Delphi technique, interviews, questionnaires for older adults, and surveys of present services available to older adults and the in-service training needs of those delivering such services. Transportation emerged as the greatest need. Because information clearinghouses would maximize coordination of services, their development was also given high priority. Other priorities established were provision of informal learning experiences relevant to daily living for older adults, including pre-retirement planning, leisure time activities, and the involvement of older adults in volunteer roles. The need for in-service training of persons serving older adults in these areas was also recognized. A model of interinstitutional cooperation developed by the project is recommended as a basis for cooperative delivery of services. Maps, Delphi materials, forms, and data are appended. (NHM)

**Public Service Occupation Workshops for Core Curriculum: Instructional Associate, Governmental Management. EPDA Workshops, June 1975. Final Report.**

California Community Colleges, Sacramento. Office of the Chancellor.

Spons Agency—Office of Education (DHEW), Washington, D.C.

Pub Date Jun 75

Note—129p.

**EDRS Price MF-\$0.76 HC-\$6.97 Plus Postage**

**Descriptors—**\*Curriculum Development, Curriculum Planning, Government (Administrative Body), \*Government Employees, \*Junior Colleges, Program Content, \*Public Service Occupations, \*Teacher Aides, Vocational Education, Workshops

The diversity and multitude of new public service occupations has encouraged the development of new occupational curricula in community colleges. One such effort involved the development and distribution of two comprehensive curriculum guides for governmental management and instructional associate programs by the California Community Colleges Chancellor's Office. In order to communicate this curriculum information to community colleges, delineate the scope of the public service occupations designation, and encourage the implementation of such programs, seven workshops were held in northern and southern California in 1974 and 1975. This document describes workshop outcomes by theme: (1) Instructional Aide/Associate Workshops; (2) Governmental Management Workshops; (3) Public Service Occupations Workshops. Each of the workshops followed a similar procedure: first, programmatic need was established; then, after identifying necessary program content, guidelines were given for program implementation. Analysis of evaluation questionnaires administered to participants reveals that although the workshops were successful in defining the scope of and need for public service occupations programs, workshops did not result in the conception of a need for the evolution of a distinct department or section to house all public service occupations courses or curricula. **Descriptors—**Administrator Attitudes, \*Counseling Services, Counselor Attitudes, \*Counselor Functions, Counselor Role, \*Counselors, \*Job Analysis, \*Junior Colleges, Student Attitudes, Teacher Attitudes

In order to measure the effectiveness of an urban community college counseling service, a questionnaire was developed and administered to a random sample of students, faculty, administrators, and the professional staff of counselors from the three campuses of Florida Junior College at Jacksonville. Of 321 subjects, 219 responded (68 percent). Twenty-two counseling functions were

rated in terms of the extent to which they were actually being performed, should ideally be performed, or were useful. Data are recorded in tabular form. As evidenced by a strong increase in the response tendency between the real and ideal categories, a need for improvement was perceived for every function except providing marriage counseling, which all groups perceived as unnecessary. Where significant differences occurred between group responses, administrators and counselors collectively tended to disagree with the other groups. Although faculty and students saw the usefulness of all counseling functions except marriage counseling, counselors did not consider registration assistance, student screening, and providing information on students to the college useful. A review of the literature is included, and a bibliography is appended. (NHM)

Identifiers—Delgado Junior College

In 1970-71, Delgado Junior College (DJC) held a nine month institute designed to: (1) increase participant understanding of the problems specific to low-income and minority students, including physical and psychological problems and cultural background; (2) improve the methods used to teach these students; and (3) develop innovative and special programs for them. Twenty faculty members, five low-income and minority students, and five representatives of local low-income and minority communities participated in the 18 sessions (two per month) of this institute. The first half of each session was devoted to a presentation by a guest lecturer; the second half involved participants in discussions of how the content of the presentation could be applied to DJC. This report of the institute is intended to assist other community and junior colleges in planning and carrying out similar institutes. It details the participant selection an institute planning processes and the physical setting, as well as the outline for each session. A summary of the findings on problems and background, alternative teaching methods, and special programs are presented, as are summaries of each presentation and discussion section. A bibliography on low-income and minority students and the institute evaluation forms are appended. (DC)

The proceedings of this institute cover sources for grant proposal ideas, grant proposal writing procedures, the content of a grant request, procedures of granting agencies, and problems in carrying out granted projects, including report writing. The relationship of the granting agency to the grant recipient is viewed throughout as a partnership, rather than an adversary connection. Types of grants include: planning, research, training, demonstration, equipment, facilities, and program development and/or expansion. Federal funding agencies are listed in material published by the Government Printing Office; private agencies, in the Taft Information System. For a grant proposal to be funded, it must be feasible, specific, have a competent and experienced research director or principal investigator, and fit the funding agency's policies. These proceedings discuss budgeting, the handling of grant money,

and the hiring of personnel, focusing on probable problem areas. Examples are cited from the experience of the institutional research team at Delgado Junior College (Louisiana). References to printed matter and studies which might help in writing grant proposals or in carrying out granted projects are given throughout. (NHM)

Groves, Cecil L. Carroll, Frank T., Jr.

Compensatory Education: Relationship of Curriculum and Faculty to Student Retention. Seminar Proceedings.

Gulf Regional Interstate Collegiate Consortium.  
Pub Date May 73

Note—66p.; Seminar held at Southern University in New Orleans, May 2, 1973

**EDRS Price MF-\$0.76 HC-\$3.32 Plus Postage**

Descriptors—Academic Standards, College Curriculum, College Faculty, \*Compensatory Education, \*Educationally Disadvantaged, \*Junior Colleges, Open Enrollment, Relevance (Education), \*School Holding Power, \*Student Needs, Student Participation, Teacher Attitudes

The "open-door" policy of community colleges has resulted in the three interrelated problems of student recruitment, student retention, and student placement. In order to identify and analyze factors which cause the separation of "new" students from the community college, a one-day seminar was conducted at Southern University in May of 1973. Keynote addresses dealt with the impact of faculty on student retention and the importance of curriculum. A summary is made of positive and negative impacts of compensatory instruction in 18 community colleges with such programs. The meeting of "new" students' non-academic needs greatly determines their academic performance. Retention will not be achieved within the rigidities of the traditional academic system, but change need not mean a lowering of standards. Rather, what is needed is a change in attitudes toward persons who, regardless of backgrounds, wish to find their places in a contemporary society which is polycultural and heterogeneous rather than class-oriented and somewhat homogeneous. Colleges must keep curriculum requirements flexible and responsive to the needs of those concerned. Not only should revisions be continual, but everyone concerned, including students, should be involved. Appended are the observations of discussion groups and a list of participants. (NHM)

Graduate Education and Community Colleges: Cooperative Approaches to Community College Staff Development. Technical Report No. 5.

National Board on Graduate Education, Washington, D. C.

Pub Date Aug 75

Note—149p.; Proceedings of a conference, Airlie, Virginia, November 11-12, 1974

**EDRS Price MF-\$0.76 HC-\$6.97 Plus Postage**

Descriptors—\*College Faculty, \*Graduate Study, \*Inservice Teacher Education, Internship Programs, \*Junior Colleges, Professional Education, Schools of Education, Staff Improvement, \*Teacher Education

In order to assess the need to improve graduate programs for prospective and present community college teachers, the National Board on Graduate Education sponsored an invitational conference in November, 1974. Conference participants were drawn from each of three sectors: community colleges, graduate schools of arts and sciences, and university schools of education. The conference was organized around 11 commissioned papers which make up the bulk of this volume. Participants addressed the issues raised in these papers during conference sessions, which grouped the papers according to: (1) current trends within community colleges that have created the concern for staff development; (2) responses to staff development needs, including responses in "non-traditional" settings; and (3) perspectives of graduate faculty, deans, and schools of education. Although conference participants agreed that improved university programs for community college staff development are needed, the practical questions of how to develop, administer, and finance such programs were left open. It is clear, however, that problems of staff development will require cooperative approaches involving both the university and the community college. The necessary resources for successful programs are

present in the two institutions, not in either one alone. (NHM)

Enrollment Profile Report, Fall Semester 1974. New York City Community Coll., Brooklyn, N.Y.

Pub Date Aug 75

Note—46p.

**EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage**

Descriptors—Academic Aptitude, College Majors, Dropout Rate, \*Educational Planning, \*Enrollment Projections, \*Enrollment Trends, Financial Support, Grades (Scholastic), \*Junior Colleges, Multicampus Districts, Organizational Development, Recruitment, \*Student Characteristics, Urban Education

Identifiers—Arrition, New York City Community Colleges, Nontraditional Students

In this study, the enrollment distribution of students attending New York City Community Colleges is examined and evaluated. The introductory section presents briefly the national enrollment picture for two-year and four-year colleges, enumerates the various projections that have been developed by federal and state agencies, and evaluates the prospects for continued enrollment growth in the years ahead. This section serves as an overview of the community college movement and as a summary of the changing profile of college students and the various factors which may lead to shifts in enrollment distribution. Section two examines the distribution of enrollment in New York City Community Colleges, the curriculum preferences of students, the geographic origin of students, the grade distribution of students, and credit hour attrition within the academic semester. The final section projects the Colleges into the immediate years ahead. The findings in this report support the general recommendation that expanded institutional efforts be directed to the development of non-traditional educational programs in all units of the Colleges and to the recruitment of non-traditional students. Major problems associated with institutional growth are discussed, and recommendations are drawn pertaining to college organization and financial support. (Author/NHM)

Lucas, John A.

Market Analysis of Proposed New Programs in a Growing Community College. Vol. V, No. 4. William Rainey Harper Coll., Palatine, Ill.

Pub Date 16 Apr 74

Note—12p.

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

Descriptors—Aspiration, \*Curriculum Planning, Followup Studies, Institutional Research, Job Placement, \*Junior Colleges, \*Labor Market, \*Manpower Needs, Occupational Choice, Occupational Surveys, Program Planning, Student Enrollment, \*Vocational Education

Market analysis for new program development in the community college occurs in four phases. (1) An overall manpower needs survey involving a canvas of all the employers and community organizations in the district. This phase is difficult because of the magnitude of the task, and the difficulty of forecasting changes in the market, especially in regard to new and emerging fields. (2) Determination of the demand by students for specific programs. Possible methods include surveys of high school seniors with regard to career preference, surveys of employees in a specific field with regard to their training needs, and surveys of the adult community in general. (3) Determination of the market demand for graduates in a specific field. This phase involves sampling the population of employers and organizations in the district and then conducting follow-up studies. (4) Validation of market analysis surveys. This must be done primarily by actual student enrollment and follow-up studies of the graduates. Each of the four phases is described in detail and problem areas are discussed. Examples are drawn from sample studies conducted by William Rainey Harper College (Illinois). Survey results are organized into five tables. (NHM)

The Recruitment Process: The Program and Its Participants. Research Report No. 1.

La Guardia Community Coll., Long Island City, N.Y. Middle Coll.

Pub Date Aug 74

Note—63p.

**EDRS Price MF-\$0.76 HC-\$3.32 Plus Postage**  
**Descriptors**—Articulation (Program), Compensatory Education, Counselors, Experimental Colleges, \*High School Students, \*Junior Colleges, Junior High School Students, \*Low Ability Students, Peer Relationship, \*Recruitment, \*Remedial Programs

In contrast to middle colleges throughout the country which, by initiating early admissions programs, make it possible for high achieving students who have not completed high school to enter college, the Middle College at LaGuardia Community College (New York) includes students who are not academically superior and offers comprehensive remedial programs. This report focuses on the preliminary phase of the program, the recruitment process. Through structured, open-ended interviews, information was gathered from three groups of program participants: the planning staff, junior high school guidance counselors, and students. Interview data were supplemented by systematic observation of the recruiting and planning processes. It was found that most guidance counselors received their information about the program from a personal representative of the program, usually the director or a staff member. Students learned about the program primarily from their guidance counselors. Counselors and planners alike viewed the program as a means to "redeem" marginal students, and motivate them to remain in formal education. Initial perceptions of the benefits of the program included: (1) better articulation between high school and college; (2) an atmosphere conducive to learning; (3) small classes/remediation; (4) positive peer influences; (5) vocational education. LaGuardia Community College (New York) provides secondary education through its Middle College program, which includes comprehensive remedial programs for low ability students. During the 1974-75 academic year, two participant observers made over 400 observations of the Middle College's activities, focusing on: (1) instructional methods, materials, and content; (2) incentives and rewards; (3) failure management; (4) counseling patterns; (5) discipline in the classroom; and (6) LaGuardia-Middle College interface. Findings of the study revealed that students expected primarily academic advantages from the program. After a half year in the program, however, social advantages were seen as most important. Faculty expectations of professional growth were fulfilled due to greater academic freedom and the opportunity for personalized relationships. Although the majority of those questioned agreed on the general success of the program, it was felt that the small size of the program, rather than the college setting, was responsible for increased learning. The emphasis and effectiveness of basic skill instruction, as implemented, appeared to rank behind the size, setting, and counseling remedial components. There was some feeling that students were abusing the school's lenient attendance policy; however, any proposed policy change was rejected as potentially damaging to the atmosphere of the school. **Descriptors**—\*Cooperative Planning, Financial Support, Instructional Improvement, \*Instructional Materials Centers, Instructional Media,

\*Instructional Technology, \*Interinstitutional Cooperation, \*Junior Colleges, Metropolitan Areas, Regional Planning, Shared Services

An instrument was designed to elicit a direct reaction from colleagues as to the issues involved in the development of a metropolitan learning resource service. Sets of questions and items lay out the broadest range of functions, services, organization, governance, and funding which are feasible for such a service. It is assumed that any metropolitan learning resources service should: (1) complement and supplement the services performed by campus learning resource centers; (2) provide services not normally found on most community college campuses; (3) be a vehicle for cooperation between institutions, including the non-formal institutions of education such as museums and libraries; (4) require the active participation and financial cooperation of the institutions involved; (5) offer ways of reducing the costs of relevant goods and services to participants by increasing the scale of purchases; (6) serve as a clearinghouse for various kinds of information related to learning resources and the improvement of instruction; (7) be affiliated formally or informally with other similar services throughout the country in order to maintain a leadership role in evaluating new instructional strategies. It is expected that the 12 stimulus questions will lead to a clearer formulation of crucial and significant issues. (Author/NHM)

 Identifiers—City Colleges of Chicago

Ideally, educational technology in higher education should seek nontraditional solutions to the problems of learning. An examination of the needs of the adult learner indicates that as the years past age 18 increase, the appropriateness of the classic college classroom model decreases, and educational technology becomes increasingly relevant. This report summarizes 22 major recommendations which have arisen from a one year exploration of the issues involved in the development of a metropolitan learning resources service for the Chicago region, along with a parallel improvement of media services for the multi-campus City Colleges of Chicago. It is urged that a council of professional educational technologists from the Chicago metropolitan region be assembled which would analyze the needs of adult learners expressed in recent surveys in Illinois and elsewhere, and develop strategies for meeting individualized instruction needs on and off-campus from the standpoint of educational technology. In order to initiate a prototype of a metropolitan learning resources service, it is recommended that one or more existing institutions offer their services to others with the understanding that the nucleus service group would be compensated directly or in kind for services rendered, and that a users advisory board would be formed. **A New Role for Community Education in the Community College Through Cooperation with Community Schools.**

Pub Date Apr 74

Note—20p.; Speech presented to the Adult Education Association Commission on Adult Basic Education, Louisville, Kentucky, April 1974; Best copy available

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**  
**Descriptors**—\*College School Cooperation, \*Community Education, Community Involvement,

\*Community Schools, Cooperative Planning, \*Educational Needs, \*Junior Colleges, Program Planning

The role of community education is to provide educational, recreational, cultural, and other related community services in accordance with the needs, interests, and concerns of the public. Cooperation between community schools and community colleges in community education efforts should result in less duplication of effort, expanded use of facilities, better use of tax dollars, improved instruction, expanded programs, and better services. The community college's role in this cooperative effort is: (1) to support and encourage the community school; (2) to work closely with the coordinators in the various communities and offer assistance to them; (3) to offer college classes in the local school districts where there are no community schools; (4) to help coordinate a needs assessment in a community where there is no community school program; (5) to set up a curriculum for training community school coordinators or directors; and (6) to offer counseling facilities to high schools and the community at large. During the 1974-75 academic year, Clackamas Community College (Oregon) found such a cooperative program economically and educationally sound. The 1973 program proposal is appended, along with a statement of policies and procedures which should be of use as a prototype for the implementation of similar programs. (Author/NHM)

Day care services, educational programs and other supportive services for school-age parents of infants are surveyed in this publication. Mainstreaming pregnant students and improving care for the infants of students are discussed and two day care programs operating within high schools for student parents are presented in detail. A program designed to enhance the childrearing ability of young parents by emphasizing their feelings of competence (University of Pittsburgh's Project Right Start) is also discussed. Recent state and local efforts to provide better services for school-age parents and their children are documented. Annotations of many audiovisual materials dealing with pregnancy, sex, child development, birth control, and family life are provided as well as information of their quality, cost, and availability. A supplement is included which discusses the needs of infants, the strengths and deficits of adolescent parenting, and supportive services for school-age parents and their children. (BRT)

**Report on a Comparison of the Reading Achievement and Pupil Attitude Toward School of Third Grade Children Enrolled in Modified Open and Traditional Classrooms in a Public Elementary School.**

Queensborough Community Coll., Bayside, N.Y. Pub Date 74

Note—21p.

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**  
**Descriptors**—Achievement Gains, Classroom Environment, Comparative Analysis, \*Early Childhood Education, Experimental Groups, Grade 3, \*Open Education, Questionnaires, Reading Ability, \*Reading Achievement, Read-

ing Tests, Statistical Analysis, Statistical Bias, \*Student Attitudes, \*Traditional Schools, Validity

An attempt was made to determine differences in reading achievement gains and student attitudes towards school between groups of third grade children enrolled in either modified open or traditional classrooms in the same school. The Metropolitan Achievement Test in Reading was used for pre- and posttest comparisons of achievement, and a questionnaire on student attitudes was administered at the end of the school year. Radical differences in the kinds of children assigned to either modified open or traditional classrooms presented serious problems in data analysis. Children had been previously selected for inclusion in a particular classroom setting on the basis of scholarship and ability to adjust (slow learners and non-English speaking children were assigned to traditional classrooms). Therefore, a wide discrepancy was found in pretest reading ability. Also, the total number of children in the modified open classrooms greatly exceeded that of the traditional classrooms. Statistical modifications (described in detail) were made in an effort to cope with these population problems. Results indicated: (1) there were no significant differences in expected reading achievement gains for any group, and (2) there were no significant differences in pupil attitudes. Descriptions of classroom operations observed for both types of teaching approaches provide interesting comparisons. (ED)

This illustrated booklet describes the physical, social, cognitive, sensory, and motor development of the typical infant during the first 12 months of life. Each of 12 chapters is concerned with successive months in a child's first year and is divided into three sections. Specific stimulating activities (i.e., handing toys to the infant's alternate hands) which parents can do with their infants are suggested and illustrated with photographs. Detailed instructions and diagrams are included for the construction of toys made from household materials. A brief discussion of an infant's expected developmental progress in each month is found in each chapter. A sample form for recording an infant's initial motor, sensory, social, and language achievements is provided. Throughout the booklet, parents of infants are encouraged to promote confidence and exploration by providing successful and pleasant experiences. (BRT)

vironment, Infancy, \*Infants, Intelligence Quotient, Longitudinal Studies, \*Mental Development, Mental Tests, Mothers, Parent Child Relationship, \*Prediction

Identifiers—\*Inventory of Home Stimulation

This study attempted to determine whether the mental test performance of 77 children tested at 6, 12, and 36 months of age could be predicted from scores on an Inventory of Home Stimulation used to assess the children's home environment during their infancy. The Inventory of Home Stimulation had six subscales: (1) emotional and verbal responsiveness of the mother, (2) avoidance of restriction and punishment, (3) organization of the physical and temporal environment, (4) provision of appropriate play materials, (5) maternal involvement with the child, and (6) opportunities for variety in daily stimulation. This inventory was used to assess home environments when children were 6, 12 and 24 months of age. The Bayley Scales of Infant Development were used to measure mental performance when children were 6 and 12 months old; the Stanford-Binet scale was used when they were 36 months old. Correlations of the home inventory scores with Stanford-Binet scores were generally higher than those reported in an earlier study by McCall et al, which related infant tests and parental educational level to childhood IQ. It was concluded that the Inventory has the potential for use in the differential diagnosis of strengths and weaknesses in an infant's environment. (Author)

This compilation of short reports distributed to preschool teachers in the Pittsburgh area covers four main topics: (1) Adoption (2) Expressive Art Therapy, (3) The Infant, and (4) Learning Disorders in Young Children. The adoption section includes reports pertaining to the adoption process in Pennsylvania, adoptive parents' legal rights, medical and psychological issues in adoption, and the importance of parent/child interaction in cognitive development. The expressive art therapy section includes suggestions for some specific therapeutic uses of drama, art, music and dance activities with normal, disturbed, and handicapped children. The infant section contains discussions of topics dealing with early language acquisition, a psychoanalytical approach to infancy, sensorimotor development, high-risk infant survivals, and developing stimulating home environments for infants. The last section, which pertains to learning disorders in young children, includes information on minimal brain dysfunction, sensorimotor disabilities in preschool children and infants (including remediation activities), speech and language disability identification, hyperactive children and stimulant drugs, the value of play as treatment, and dealing with learning disorders in the classroom. Descriptors—\*Cognitive Development, \*Evaluation Methods, \*Intervention, \*Preschool Education, \*Preschool Evaluation, Readiness (Mental), Reading Readiness, Reading Readiness Tests, School Readiness Tests, Test Results

Identifiers—PEM, \*Piaget (Jean), Program Evaluation Measure

This paper describes a Piagetian-based evaluation measure and results obtained from the use of this measure with 1260 pre-kindergarten inner-city children. The children were enrolled in a program designed to develop their readiness skills. Family income, limited educational opportunities of adult members of the family, and dependency on public assistance were determinants of qualification for the program. The Pupil Evaluation Measure (PEM) was based on program objectives expressed in Piagetian terms. Each of nine tasks was designed to measure progress towards a more abstract level of cognitive development. Teacher assistants administered PEM to each child 5 times during the school year. Comparisons between October and June test results showed an increase in the proportion of students performing above the semiconcrete/semiabstract level on all nine PEM tasks. Appendices include graphs of PEM scores from the entire year, average pre- and post-test scores on the Stanford-Binet Intelligence Tests given the children, and procedures for administering and scoring the PEM. Child Development and Public Policy: Juvenile Justice.

Pub Date 12 Apr 75

Note—16p.; Paper presented at the biennial meeting of the Society for Research in Child Development (Denver, Colorado, April 12, 1975)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—Adopted Children, Child Abuse, \*Child Advocacy, \*Child Welfare, Delinquency, \*Developmental Psychology, Family Relationship, Foster Children, Justice, \*Juvenile Courts, \*Legal Problems, Parent Child Relationship

This paper presents arguments for a closer relationship between the American legal system and developmental research in such areas as attachment, the effects of early home environment, cognitive development, and the consequences of giving children decision-making power. It is suggested that greater knowledge in these areas would allow policy makers to better consider the consequences of laws concerning adoption, disposition of minors in divorce cases, child abuse or neglect, foster care, and parental rights. It is argued that too often judges and agency workers are forced to make decisions affecting the lives of children on the basis of intuition alone. Developmental psychologists are called upon to aid in making the juvenile justice system more sophisticated and more likely to serve the best interests of children. It is suggested that many courts and child welfare agencies would be willing to work with behavioral scientists in carrying out the needed research. (BRT)

Identifiers—\*Europe

This study assessed recreational facilities for European children 5 to 15 years of age, and discussed the best means of meeting needs. The first chapter reviews the educational aspects of children's play—including physical, social, and creative development—as they pertain to various age groups. The second chapter considers the types of facilities that can be used for play and recreation. These include play areas in houses and flats, outdoor playgrounds, recreational areas and buildings within and near towns and villages, and camps and family vacation facilities. In Chapter 3, examples of existing European facilities, similar to those suggested in Chapter 2 are

described; excellent diagrams, maps and photographs accompany the text. Chapter 4 concludes the study with an outline of methods of selecting, training and managing recreation center staff members, including directors, auxiliary leaders, and part-time or voluntary leaders and helpers. Examples of training programs from several countries are presented in detail. (ED)

Sex differences in children's reactions to failure feedback in school situations were investigated by assessing the ways in which teachers use negative evaluation in the classroom. Three aspects of teachers' evaluative feedback were studied: (1) ratio of negative to positive feedback; (2) contingency vs. noncontingency of feedback; and (3) (the major aspect) the particular aspects of performance upon which negative evaluation was contingent. In 5 fourth and fifth grade classrooms, every contingent evaluative statement made by the teacher was classified according to the class of behaviors upon which it was contingent (conduct, intellectual quality of academic performance, or intellectually irrelevant aspects of academic performance). Feedback was also classified according to the reason for failure (lack of motivation, lack of ability, or other external factors). Boys and girls received virtually the same proportions of positive and negative evaluation for the intellectual quality of their work. However, there were striking sex differences in the contexts in which negative evaluations were given. Implications of these results were discussed in terms of teachers' evaluations of their students, differences in teachers' attitudes towards boys and girls, and sex differences in children's own achievement expectations and ability assessments. Some suggestions for consistent uses of negative evaluation in the classroom are included. (Author/ED)

**Descriptors—Changing Attitudes, \*Childhood Attitudes, Comprehension, Negative Attitudes, Perception, \*Perceptual Development, \*Physically Handicapped, \*Preschool Children, \*Social Development**

This research study was designed to examine the attitudes of preschool children toward the disabled, evaluate the children's awareness and understanding of physical impairment, and examine the possibility of modifying preschool children's attitudes towards disabled children. Subjects were 102 children, 3-5 years of age, enrolled in preschools or day care centers. Children were asked to select their favorite toy from a set of six photographs. They were then shown one of four photographs of another, same-sex child (boy or girl in regular chair or boy or girl in wheelchair). Children were told that toy preferences of the pictured child were either similar or dissimilar to their own, or they were told nothing concerning toy preferences. While viewing the photographs, subjects were asked questions designed to deter-

mine their (1) affinity for the photographed child; (2) assessment of the child's ability; and (3) perception of the attitudes of their parents, teachers, or friends towards the subject's playing with the photographed child. Subjects shown disabled children were also questioned to determine their comprehension of disability. Results indicated that a shift from lack of understanding of disability to understanding occurs between 3 and 4 years of age; but that understanding of a disability does not produce the negative attitudes towards the disabled that are found in older children. **Identifiers—\*Home Learning Center Project**

The overall purpose of this study was to investigate the effectiveness and practicability of a home-centered preschool intervention program for cognitive, language, and personality development of mother and child, based upon the use of paraprofessional educators who are themselves members of the population served. One question considered was whether early child stimulation could have continuing effects as children reached school age. Subjects were healthy babies from indigent families whose mothers agreed to be visited once a week and to work with the parent educator. She also had to allow her child to go to the home learning center twice a week. The first two years of experimental treatment consisted of weekly home visits, some educational and some just "friendly." In the third year, intervention consisted of weekly home visits and experience in a group setting twice a week. Results of intensive testing of the subjects at age six showed that the intervention had long-term positive effects on the children. The most effective results were achieved with those children who were in the program continuously from age three months through three years. It was suggested that sustained gains resulted from changes in maternal attitudes and feelings about education, about the child, and about themselves. (Author/BRT)

**Overt Verbalization and Delay Maintenance Behavior in Preschool Children.**

Pub Date Apr 75

Note—9p.; Paper presented at the Biennial Meeting of the Society for Research in Child Development (Denver, Colorado, April 10-13, 1975)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

**Descriptors—\*Goal Orientation, \*Mediation Theory, Overt Response, \*Preschool Children, Psychological Studies, \*Self Control, Self Reward, Verbal Communication**

**Identifiers—\*Delay of Gratification**

The present study was conducted to determine if overt self-verbalization by the child during the waiting period would influence his delay maintenance behavior when the delayed reward was present. Subjects were 60 preschool girls in the age range of 33-72 months. Fifteen subjects were randomly assigned to each of four experimental conditions: (1) rule verbalization, (2) neutral verbalization, (3) reward verbalization, (4) no verbalization. In each condition a supply of M&M candy rewards was placed one by one on the table at 5-second intervals until the child took them or told the experimenter to stop. Possession of the accumulating candy rewards was made contingent on the child's stopping any further ac-

cumulation. (The child had previously been told that all the candy put on the table would belong to him or her.) The child was told to overtly verbalize a specific utterance whenever the light was on. A red signal light operated by the experimenter was used as a cue for the overt verbalizations. Findings indicated that overt self-verbalizations by preschool girls during the waiting period significantly influenced their delay maintenance behavior. Results are discussed in terms of attending behavior, and it is noted that verbal mediation is facilitative only for younger children. It is suggested that subject-governed self-control mechanisms could result in increased stability of self-control in children. (GO)

**Identifiers—Decentering (Psychological), \*Piaget (Jean), Spatial Relationship (Psychological)**

This paper reports two related experiments, the first investigating whether children 3-7 years old demonstrate Flavell's Level-2 perspective-taking in a cognitively simple task, and the second re-examining children's performance on a task comparable to the Piagetian 3-mountain perspective-taking task. The first experiment involved a task which eliminated the usual spatial and representational components of the classic 3-mountain task, but provided conflicting visual experiences for subject and experimenter. The second experiment was designed to examine the child's ability to choose a representation of his own view and views of the experimenter when the experimenter was seated opposite and to the side of the child. Task variables and types of errors were investigated. Also, response latencies were measured to check whether responses on task were meaningful or indiscriminate. Results indicate that the young child's difficulty on traditional perspective-taking tasks is related to his lack of an integrated Euclidean spatial system and not to a lack of awareness that others have different visual perspectives. **Descriptors—\*Attachment Behavior, \*Infancy, \*Interaction Process Analysis, \*Parent Child Relationship, Toys, \*Vision**  
**Identifiers—\*Eye Contact**

This study investigated the effects of mother's distance and visual field on some attachment behaviors of children 21-36 months old. Subjects were 20 male and 20 female children, half of each sex being reared primarily at home and half primarily in day care. Each child was observed with his mother in an experimental setting for a total of 16 minutes in 4 conditions, with mother sitting far from (3-4 meters) or near to (1 meter) tethered toys and facing so that she could or could not see the toys. The child's physical position and behavior along several modalities were recorded at 2-second intervals. Findings suggest that 2-year-olds are aware of the mother's activities and that if contact with the mother is reduced children will initiate behaviors to reestablish that contact. Reduction in visual accessibility of the mother appears to be as important as reduction in proximity. These findings are related to others which stress the centrality of eye-contact in the attachment relationship. (Author/GO)

**Infant Attachment to Mothers and Fathers.**

Pub Date Apr 75

PS 008 017

Note—11p.; Paper presented at the Biennial Meeting of the Society for Research in Child Development (Denver, Colorado, April 10-13, 1975)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**  
**Descriptors—**\*Attachment Behavior, Behavioral Science Research, \*Fathers, \*Infant Behavior, \*Parent Child Relationship, Psychological Needs, Social Development, \*Socialization

This study examined father-infant and mother-infant relationships by observing infants and parents in their homes. The subjects were 20 infants, 10 boys and 10 girls, 7 and 8 months of age. Each infant was visited twice when both parents were at home. All visits were made by the same two persons: a male observer, who maintained a narrative account of infant and adult behaviors and a female visitor, who provided an alternative interactive partner for the child. Comparisons were made between the frequencies of affiliative- and attachment behaviors (including smiling, looking, vocalizing, reaching, approaching, and seeking to be held) which were directed by the infant toward each adult. Results of multivariate analyses showed a significant preference by infants for their fathers over their mothers and the visitor, and for their mothers over the visitor. When data were compared on the individual measures, neither parent emerged as a preferred attachment object but there was far more affiliative type interaction with father than mother. It was noted that fathers also engaged in more physically stimulating and unpredictable games. The author suggests that the prominence of play in the father-infant relationship helps to make the father a person with whom interaction is pleasurable, varied, and unpredictable. (Author/BRT)

**Descriptors—**\*Behavior Patterns, Classroom Observation Techniques, Cultural Factors, \*Interpersonal Relationship, Play, \*Preschool Children, Sex Differences, \*Sex Stereotypes, \*Social Behavior

**Identifiers—**Object Orientation, \*People Orientation

This study was undertaken to explore the cultural stereotype that boys are more object-oriented and girls are more people-oriented. A total of 38 white, middle class, preschool children were observed during their free play hour at nursery school when a variety of people and objects were freely available to them. Each child was observed with a time sampling method for approximately 50 minutes over three nonconsecutive days. The observer, who was not aware that sex was a relevant variable, rated the children's play behavior with regard to its focus and context. The focus was categorized as being directed toward people, objects, or other and the context as being solitary, parallel, associative, or cooperative play. The mean scores on focus and context were summed to form a single index of People versus Object Orientation. The results showed no differences between boys and girls on People versus Object Orientation or on either of the component measures of focus or context. One minor difference between the sexes was that the most object-oriented and the most people-oriented children tended to be boys, while most girls tended to divide their attention fairly evenly between people and objects. **Visual Habituation and Preference for Novelty in Five-Week-Old Infants.**

Pub Date Apr 75

Note—12p.; Paper presented at the biennial meeting of the Society for Research in Child Development (Denver, Colorado, April 10-13, 1975)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**  
**Descriptors—**\*Adaptation Level Theory, Behavior Development, Classical Conditioning, \*Dimensional Preference, \*Infant Behavior, Psychological Testing, Response Mode, Social

Science Research, \*Stimulus Behavior, Stimulus Devices, \*Visual Stimuli  
**Identifiers—**\*Habituation

This study was designed to determine if the failure of previous investigations to find habituation and response to novelty in infants younger than 2 months of age was because the stimuli used were too complex or because a constant number of trials rather than an individual criterion of habituation was used. A total of 24 infants between 5 and 6 weeks of age were divided into three groups and given pretest to show that they had no initial preference for either of two stimuli, which differed in complexity. Next, all infants were given some familiarization with one of the stimuli, followed by a posttest on both stimuli. During the familiarization period, the three groups were treated differently: each of two groups was familiarized with either the complex or simple stimulus, and the third group was familiarized with the complex stimulus, but allowed only half as many familiarization trials. Results indicate that: (1) 5-week-old infants do habituate to visual stimuli, (2) previous failures to demonstrate habituation were due to stimulus and procedural limitations, and (3) preference for novelty is found following attainment of individual habituation criterion, while preference for familiarity is found following a period of familiarization too short to permit attainment of such a criterion. **Descriptors—**\*Cognitive Processes, Deep Structure, \*Early Childhood, Elementary School Students, \*Information Processing, Kindergarten Children, Linguistic Competence, \*Listening Comprehension, Semantics, \*Sentence Structure, Verbal Learning  
**Identifiers—**Passive Voice, \*Sentence Comprehension

This study investigated children's performance with the passive-transformation when both the mode of presentation and the mode of response were verbal. The study was also designed to provide a framework for the examination of theoretical issues regarding strategies in speech perception. Kindergarten and first-grade children individually heard 6 sentences all in the same voice and all either harmonious with or contrary to children's previously expressed expectations regarding the likely actor in the sentences. After each sentence the child heard a question about the content of the sentence. The score for each child was the number of questions answered correctly. Results of this study support the hypothesis that children do not rely exclusively on any single sentence processing strategy. Instead, they combine their knowledge of the world, of words, and of language in the perception of speech. The results also indicate that an exclusively verbal mode of presentation and response is quite difficult for children. (Author/GO)

**Research, Television and the Child: The Need for Risk-Takers.**

Pub Date 11 Apr 75

Note—10p.; Paper presented at the Biennial Meeting of the Society for Research in Child Development, (Denver, Colorado, April 11, 1975)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**  
**Descriptors—**Elementary School Students, Individual Development, \*Programming (Broadcast), Psychological Studies, Research Design, \*Research Methodology, Research Problems, Self Concept, \*Social Development, \*Socialization, \*Television Research  
**Identifiers—**Fat Albert and the Cosby Kids

This paper discusses the need for innovative research paradigms in assessing the impact of television on children. Past research has shown that television, as part of a child's environment, can influence the social behavior of young children in positive and negative ways. It is suggested that researchers now study ways in which children's programming can become a medium which

interacts with the child, performing a type of "surrogate" function. It is also suggested that effective programming would allow the child to learn about himself in relation to what he sees on television, leading to growth in self concept and self esteem. One such television program for children, "Fat Albert and The Cosby Kids" is presented as an example of an attempt to look at issues, problems and concerns faced by children as they grow and develop. A study which investigated the Fat Albert series to determine to what extent the prosocial messages of the program were communicated to children found that almost nine out of ten children (89.3 percent) received one or more specific prosocial messages from viewing an episode of Fat Albert. The findings do not indicate whether the messages were accepted or if they modified subsequent behavior. Research models and methodologies aimed at improving the theory and evaluation of television as it relates to the child are called for. (BRT)

**The Development of Strategies of Attention.**

Pub Date Apr 75

Note—14p.; Paper presented at the Biennial Meeting of the Society for Research in Child Development (Denver, Colorado, April 10-13, 1975)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**  
**Descriptors—**\*Attention, \*Cognitive Development, \*Elementary School Students, \*Preschool Children

**Identifiers—**Information Processing (Psychological), \*Selectivity

This paper describes an on-going research program focused on the development of attention in children with specific reference to the strategies and patterns of activities which children use in seeking information and in directing and controlling their own attention. Findings from three earlier studies suggest that older children are better able than younger children to select only relevant information, to remember only potentially relevant information, and to shift quickly from selecting one type of relevant information to another. These findings provided evidence of a developmental trend towards more flexible, efficient strategies of attention. This evidence, together with the conceptualization of attention as the selectivity which characterizes a variety of cognitive activities, suggests general questions regarding the formulation of attention development. More is known of environmental factors which are related to children's attention than is known about the way children control and direct their own attention. Little is known about the ways in which one's own behavior controls what one attends to. At present, attempts are being made to identify developmental trends in search strategies. Instances in which young children are more accurate than adults (as in the Stoop effect) show that adults are not universally more accurate, flexible, and efficient attenders than children. The development of search strategies is being studied by asking children to engage in search activities which simulate search as it occurs ordinarily, by asking about children's discovery and use of redundant information in this search task, and by employing tasks which dictate two distinct search strategies. **Identifiers—**\*Piaget (Jean), Role Taking, Sharing Behavior

This study investigated the interrelationships among the development of role-taking skills, moral judgments, and sharing behavior of boys and girls in K-3. A total of 160 lower middle class white children (20 boys and 20 girls from

each grade) participated in the study. Data were collected on four measures: (1) sharing candy with a friend, (2) role-taking on emotional responses to pictured situations, (3) moral judgments on Piagetian dilemmas with positive or negative consequences, and (4) sharing candy with a stranger. The results indicated that (1) role-taking ability was positively correlated with the use of intentionality in making moral judgments; (2) role-taking ability was positively correlated with sharing with a friend, sharing with a stranger (only for boys), and total sharing; and (3) the use of intentionality in moral judgments was positively correlated with sharing with friends. Both age and sex differences were found. (JMB)

**Descriptors**—\*Achievement Rating, Affective Behavior, \*Age Differences, \*Elementary School Students, \*Self Evaluation, Student Reaction

**Identifiers**—\*Attribution Studies, Social Comparison

This paper presents a series of studies related to the question of how children learn to evaluate themselves in achievement situations. The approach to the research is based on the Weiner et al attributional model of achievement. The paper describes three studies designed to determine the extent to which first, second and third grade children use outcome and norm cues to make judgments about ability, effort, and task difficulty attributions. The results of the 3 studies indicate clear developmental differences in the use of achievement-related information in making evaluative judgments. In addition, it appears that social norm information was not used predictably even by second and third graders, though outcome information was. Possible reasons for these developmental changes and their implications are discussed. (Author/JMB)

**Personality Factors Related to Intellectual Achievement in Migrant Preschool Children.**

Pub Date Apr 75

Note—20p.; Paper presented at the biennial meeting of the Society for Research in Child Development (Denver, Colorado, April 10-13, 1975)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

**Descriptors**—\*Achievement, Caucasians, Compensatory Education Programs, \*Migrant Child Education, Migrant Children, Migrant Schools, Motor Development, Negro Youth, \*Personality Development, \*Preschool Education, Rewards, Risk, School Readiness Tests, Self Concept, Self Control, Sex Differences, \*Student Characteristics, Student Teacher Relationship

**Identifiers**—\*Delay Of Gratification

To determine the personality characteristics that may be related to school readiness, particularly with reference to migrant preschool children, the following characteristics were examined: (1) delay of gratification, (2) relationship with achievement model, (3) dependency, (4) motor inhibition, (5) self control, (6) self concept, and (7) risk taking. The 195 children (187 black, 8 white) who participated in the study ranged in age from approximately 3 1/2 to 4 1/2 years, and were randomly selected from compensatory education programs for preschool children of migrant workers in Florida. In order to insure that the characteristics examined were of an affective nature, a cognitive ability measure was used as a covariate to remove achievement variance due to the child's cognitive ability. Tests used to determine the characteristics in question are explained in detail. Results indicated: (1) self concept accounted for a significant percentage of achievement variance for both boys and girls; (2) self concept, delay of gratification, and motor inhibition accounted for a significant percentage of variance for boys but not for girls; and (3) risk taking was related to school readiness for girls but not boys. It is suggested that future program

planning take these sex differences into account. (Author/ED)

**Identifiers**—\*Piaget (Jean)

This paper reviews studies in which scores on Piagetian tests of logical thought were correlated with IQ, mental age (MA) and chronological age (CA), and examines the possible effects of the size of the age range and mean age of subjects on these correlations. The data included 44 groups of subjects obtained from 36 studies in which Piagetian and intelligence tests were administered to intellectually normal children (mean IQ=109) from the preoperational through formal operational periods (40 to 216 months of age). Results revealed that averaged correlations between Piagetian tests and MA were consistently higher than the corresponding correlations for IQ and CA. The mean age of the subjects and no effect on the size of correlations between Piagetian tests and IQ, MA and CA, but the size of the age range was found to significantly affect the IQ and CA correlations (Piagetian tests/IQ correlations were higher within a narrow age range; Piagetian tests/CA correlations were higher within a wide age range; Piagetian tests/MA correlations showed no effect for size of age range). It was concluded that MA scores yield higher and more consistent correlations with Piagetian tests than either IQ or CA scores, and are not affected by the age range or mean age of the subjects sampled. **Identifiers**—\*Experimenter Characteristics

The influence of the socioeconomic background and sex of the child and the race of the clinician on the frequency of implementation of nonstandard phonological and grammatical structures was examined in 72 black 4- and 5-year-olds. In order to generalize findings to typical clinical settings, language samples were elicited by 3 black and 3 white clinicians using spontaneous, paragraph completion, and repetition procedures. Results indicated that socioeconomic status and sex had a strong effect on black children's usage of nonstandard phonological and grammatical forms. The data also suggested that the beginnings of a bi-dialectal capability were identifiable in certain speech forms in the clinical setting for black preschoolers. Discriminant analysis detailed those nonstandard phonological and grammatical forms which contributed to dialect differences between lower and middle socioeconomic black children. (Authors/ED)

**Descriptors**—Behavior Patterns, \*Infant Behavior, \*Interaction Process Analysis, Longitudinal Studies, Mothers, \*Parent Child Relationship, \*Research Methodology, \*Statistical Analysis

This paper presents arguments for greater use of sophisticated research strategies and statistical analyses of data in dealing with the real-life complexity of social interaction. Three possible procedures are proposed and illustrated in a study of interactions between mothers and their 8- to 18-month-old children. The first strategy is to operationalize complex concepts and define loose constructs behaviorally and quantitatively (e.g. maternal responsiveness). The second general research strategy is to analyze static complexity. It is suggested that a wide range of variables be measured in the same investigation and that rather than computing individual correlations between variables, multivariate statistical analyses should be performed. This method of analysis would serve to uncover broad patterns of behavior which would more likely reflect the complexity of human nature. The third general research strategy suggested involves examining behavior patterns and mother-child relations as they change over time. This strategy calls for a longitudinal design and the use of cross-lagged panel correlation. (BRT)

**Children's Free Associations to Single Words and to Meaningfully and Meaninglessly Related Pairs.**

Pub Date Apr 75

Note—15p.; Paper presented at the biennial meeting of the Society for Research in Child Development (Denver, Colorado, April 10-13, 1975)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

**Descriptors**—\*Elementary Education, \*Language Development, \*Semantics, \*Syntax, Verbal Stimuli, Word Lists

**Identifiers**—\*Free Associations

This study examined the feasibility of one method of investigating the development of children's implicit awareness of syntactic patterns. An enriched version of the free association format was used to test 32 subjects. The principal variables of interest were the subject's grade level, and the syntactic pattern and meaningfulness of the semantic relationship between words in each stimulus pair. Kindergarten, second, fourth and sixth grade boys and girls were individually tested on single words and on meaningfully and meaninglessly related pairs. Results indicated a strong developmental trend in children's tendency to match the syntactic pattern of the 2-word stimulus. This tendency appeared to be sensitive to variations in syntactic and semantic relationships within the stimulus pairs. (GO)

**Identifiers**—Reflectivity Impulsivity

This study looked at the relationship between mother-infant interaction and children's performance on cognitive measures at age 6. The data on mother-infant interaction were collected for 30 middle class and 30 working class, first born Caucasian girls, 10 months of age. The data collection consisted of observations made in the home and measures taken in a laboratory setting. In the followup study 5 years later, 25 of the original middle class children and 21 of the working class children were tested with the Illinois Test of Psycholinguistic Ability, the Peabody Picture Vocabulary Test, and the Matching Familiar Figures Test. The results indicated that, for the middle class group, many of the variables measured at home were significantly correlated with later scores on cognitive tests. Although fewer correlations were significant for the working class group, most were in the same direction as for the middle class group. Analysis of the laboratory data and the scores on the cognitive tests revealed a highly consistent set of correlations between early attachment measures and later test scores, especially for the middle class group. It was concluded that mothers' interactions with infants at the age of 10 months were clearly related to the children's cognitive test performance at age 6. (JMB)

This bibliography, made up of approximately 350 entries concerned with many aspects of problem solving and concept formation in young children, has been designed for use by people primarily involved in experimental research in these areas of child development. Entries include experimental journal articles, conference papers, unpublished research papers, books (and specific book chapters), dissertations and literature reviews, which date from 1955 through 1968, and several earlier articles by Piaget. The wide variety of specific topics include: conservation studies and experimental research dealing with Piaget's theories; intelligence, achievement, memory and learning processes; socialization; learning theories; disadvantaged children and minority group differences; handicapped children; conceptual styles; verbal learning; cognitive development; discrimination learning; personality; research methodology; etc. (ED)

This report records the progress, current status and future plans of the Office of Child Development (OCD) in making Head Start services available to handicapped children in an integrated setting, as mandated in 1972 by Federal legislation. The requirements and history of this legislation are reviewed and the goals and objectives for improving Head Start are outlined. Information on the pattern of services provided to handicapped children through Head Start programs was gathered from a variety of sources, including preliminary survey data from 712 programs, on-site observations, and other Federal agencies. The data collected reflect the status of handicapped children in Head Start programs in the latter part of 1972, and report on: (1) the number of children served in full-year and summer programs; (2) the principal handicapping conditions reported (speech impairment, emotional disturbance and mental retardation); (3) the comprehensive and special services provided, including benefits, to the children; and (4) future program needs. General information concerning the policies, procedures and plans proposed by OCD to meet Federal mandate requirements are outlined. (ED)

**Head Start Services to Handicapped Children.**

Second Annual Report of the U.S. Department of Health, Education, and Welfare to the Congress of the United States on Services Provided to Handicapped Children in Project Head Start.

Office of Child Development (DHEW), Washington, D.C.

Pub Date Apr 74

Note—24p.; For the First Annual Report, see PS 008 076

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage****Descriptors—**\*Early Childhood Education, \*Handicap Detection, \*Handicapped Children, Language Handicapped, Mentally Handicapped, Multiply Handicapped, Normalization (Handicapped), Parent Counseling, Physically Handicapped, Preschool Curriculum, \*Preschool Programs, Program Development, \*Regular Class Placement, Special Services**Identifiers—**\*Project Head Start

This report documents the status of handicapped children in Head Start programs, the number of children being served, their handicapping conditions, and the services being provided. Children professionally diagnosed as handicapped account for at least 10.1 percent of children enrolled in full year Head Start Programs. Nearly 50 percent of the children require a "fair amount" or "practically constant" special assistance. One of the most important services Head Start programs offer a handicapped child is the chance to be in a developmental environment with nonhandicapped children. Local communities are being helped to develop a diagnostic team capability to insure appropriate assessments of young children to serve as a basis for program planning. All Head Start programs enrolling handicapped children require additional training of staff. Staff training focuses on attitudes toward handicapped children, growth and development, teaching methods, curriculum development, and speech and language development. Counseling for families of handicapped children, modifying physical facilities, and providing special equipment are among the services Head Start provides for its handicapped children. (BRT)

This booklet provides basic information for those involved in creating new day care programs or revising existing ones in their own communities. Chapters 1 and 2 offer discussions on basic approaches to day care as well as general aspects of programming. In Chapter 3 three types of staff training are investigated. A black studies inservice training program is described in detail. Chapters 4 and 5 concentrate on health and food. In Chapter 6 the complex role of the social worker within a day care center is discussed, especially in relation to activities which coordinate and provide services to and for families. Chapter 7 considers the topic of parents, the role the center plays in enhancing the parent/child relationship and the role the parents play through various forms of involvement (suggested activities are included). The importance, sources, training and scheduling of volunteers is covered in detail in Chapter 8, including a paper on one center's experience. Chapter 9, 10, and 11 cover more specialized concerns and problems of child care, specifically infants, school-age children's programs, and family day care (here considered as adjunct to community day care programs). *Bell, T. H.***School Leadership and the Community.**

Pub Date 13 Apr 75

Note—11p.; Paper presented at the Annual Meeting of the National Association of Elementary School Principals (Minneapolis, Minnesota, April 13, 1975)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage****Descriptors—**\*Child Development Centers, Community Planning, \*Early Childhood Education, Health Services, \*Home Programs, Neighborhood Centers, Neighborhood School Policy, Nutrition, Outreach Programs, Parent Education, Preschool Children, \*School Community Programs, School Community Relationship, \*School Services

The importance of using existing local elementary school facilities to benefit preschool children and their neighborhoods forms the basis for suggestions offered in this address. Comprehensive child and community development centers can be created in the schools that would benefit the community by increasing general concern for a higher quality living environment, and benefit the children by preparing them for formal schooling. Elementary schools can become sponsors of home-based preschool education programs through: (1) conducting parenting and outreach classes; (2) coordinating health and welfare programs by providing diagnostic public health services for preschoolers that would be concerned with child welfare, nutrition, and the early identification of handicapping situations; and (3) using existing school library facilities for lending books and toys and conducting clinics and learning seminars. Reasons for using a home-based approach (as opposed to a center-based approach) in promoting preschoolers' development are outlined. Potential gains for the children and the community are stated in both human and economic terms. (ED)

**Program of Studies. Early Childhood Education: Kindergarten Section.**

Fairfax County Schools, Va.

Pub Date Sep 74

Note—152p.; Some pages are colored and may not reproduce clearly

**EDRS Price MF-\$0.76 HC-\$8.24 Plus Postage****Descriptors—**\*Behavioral Objectives, Classroom Arrangement, Classroom Materials, \*Curriculum Guides, \*Early Childhood Education, Educational Diagnosis, \*Kindergarten, Learning Activities, Parent Teacher Conferences, Reading, Records (Forms), Resources, Self Concept, \*Student Centered Curriculum, Student Evaluation, Teaching Techniques**Identifiers—**\*Virginia (Fairfax)

This manual uses charts and outlines to present a kindergarten program based on the theory that learning is developmental and continuous. The program's integrated subject approach is aimed at enabling children to develop communication skills, intellectual abilities, a positive self-image, and academically appropriate psychomotor skills. These four general goals are outlined in terms of specific behavioral objectives. A working draft of suggested approaches to achieving the stated objectives forms the largest portion of the manual. It includes descriptions of teaching/learning strategies for each objective, organizational alternatives (learning centers, teacher-aide teams, or a combination of the two) and evaluation processes (initial and follow-up assessment tasks for each objective, and guidelines for communicating with parents and maintaining progress records). Appendices to this section of the manual provide further information on planning; reading instruction; use of learning materials and activities such as beads, blocks, tools, and field trips; use and interpretation of the draw-a-man test; and a sample progress report form. A final section offers suggestions for selecting and ordering appropriate classroom equipment and consumable and non-consumable materials sufficient for a class of 25 students. (ED)

*Liebert, Robert M. And Others***Television and Social Behavior: A Prototype for Experimental Programming.**

Pub Date Apr 75

Note—19p.; Paper presented at the Annual Convention of the American Educational Research Association (Washington, D.C., March 30-April 3, 1975)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage****Descriptors—**\*Early Childhood Education, Evaluation, \*Observational Learning, Planning, \*Programming (Broadcast), Socialization, \*Television Research, \*Television Viewing**Identifiers—**\*Prosocial Behavior

This paper describes the production of three 30-second prosocial television spots and the evaluation of the effects of these spots on chil-

dren's behavior. The psychological process of observational learning was used to conceptualize the way television viewing influences children's behavior; the three stages of observational learning (exposure, acquisition, and acceptance) served as guides for the production and evaluation phases of this project. Five major principles were followed in planning the content for these spots: (1) the same theme was presented in all three spots, (2) situations were chosen to optimize immediate recognition and understanding by child viewers, (3) physical action was emphasized, (4) verbal statements were used to complement action and explicate both the conflict and solution, and (5) the positive consequences of the behavior to be modeled was accentuated. The rationale and research evidence to support the use of each of these principles was given. The spots were evaluated for the attraction they held for youngsters (exposure), the clarity with which they conveyed the intended message (acquisition), and the overt changes they produced in attitudes and behavior (acceptance). It was concluded that the approach described in this paper was a viable model for the production and evaluation of the whole range of television programming for children. (JMB)

McGhee, Paul E.  
Television as a Source of Learning Sex Role Stereotypes.

Pub Date Apr 75

Note—16p.; Paper presented at the Biennial Meeting of the Society for Research in Child Development (Denver, Colorado, April 10-13, 1975)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**  
Descriptors—Age Differences, \*Content Analysis, \*Elementary School Students, Sex Differences, Sex Role, \*Sex Stereotypes, \*Television Research, \*Television Viewing

This study examined the effects of heavy versus light television viewing on the degree to which children possess sex role stereotypes. Reference was made to content analyses of children's television programs, prime time dramatic programs, and commercials, to show that traditional sex role stereotypes are present in most aspects of television programming. It was thus assumed that children who watched more television would acquire greater knowledge of sex role stereotypes. A TV program checklist was used with children in grades K, 2, 4 and 6 and their parents, to determine the amount of time the children spent watching television. Those who watched 10 hours or less per week were categorized as low TV watchers and those who watched 25 hours or more were categorized as high TV watchers. A total of 80 children (5 boys and 5 girls in each category from each grade level) participated in the study. Each child was given Brown's It test to measure his or her sex-typed toy or activity preference. High TV watchers made significantly higher scores in the It test than low TV watchers, suggesting that TV viewing plays an important role in children's acquisition of sex typing. An attempt to measure longitudinal changes in followup testing one year later did not produce the expected results due to ceiling effects on the It test. Another sex stereotype measure was described and suggested for use in future research. (JMB)

Descriptors—Age Differences, \*Cognitive Ability, \*Cognitive Tests, Comparative Analysis, Home Programs, \*Intervention, Norm Referenced Tests, \*Preschool Education, Preschool Programs, Program Evaluation, Sex Differences, \*Test Results, Validity

Identifiers—DDST, Denver Developmental Screening Test, Parent Child Centers, Preschool Inventory, \*Project Head Start, PSI

This report presents results of cognitive ability tests administered to 3 to 5-year olds who were

graduating from Parent-Child Center (PCC) programs in 14 cities. PCC programs are designed to maximize the potentialities of low income preschoolers through in-center, home-based, or in-center/home-based combination programs. The findings reflected outcomes expected from the educational component. Test scores for the experimental children were compared to national norms on the Preschool Inventory (PSI) and Denver Developmental Screening Test (DDST) and to scores for groups of Home Start children tested prior to their enrollment in Home Start programs in other communities. Descriptions of procedures used included information on tester training, instrument adaptations, testing problems, and validity. Data were subanalyzed by group, rural/urban setting, sex, and age. Scores of PCC children were somewhat better on a majority of items than either national norms or scores of the Home Start comparison group, especially on questions dealing with labelling, concept formation, shapes, and colors. Groups showed minimal differences on the DDST. Overall conclusions indicated that PCC seemed to have an impact on the children enrolled, though the evidence is not statistically strong. (ED)

Identifiers—Infant Schools, \*Massachusetts

This study provides a historical setting for the current interest in preschool education by examining the assumptions and efforts of educators and politicians involved in establishing preschool programs in Boston during the 1830's. Parallels are drawn between the early education experiments detailed here and those undertaken recently, in order to provide a basis for evaluating current problems and establishing future directions. The main concern of the study is the dynamics of the interaction of Boston social elites, educational theorists, public school officials, and a larger body of civic-minded supporters of the schools as revealed in diaries, public and infant school records, and the social data of Boston and Concord from the period. The history of the development, impact, and demise of these early experiments is examined by describing the influence of English social reform precedents on the founding of American infant schools in the mid 1820's, the character and objectives of the early infant schools in Boston, and the conflict over educational assumptions which eventually led to the decline and collapse of support for preschool education by the 1840's. These early efforts apparently were forgotten by the time the kindergarten movement began in the 1860's. Some conclusions are drawn concerning the shifts in attitudes toward early childhood education in the nineteenth century. (ED)

Bell, T. H.

Parenting and the Public Schools.

Pub Date 2 Jun 75

Note—12p.; Paper presented at the Annual Convention of the National Congress of Parents and Teachers (Atlantic City, New Jersey, June 2, 1975)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

Descriptors—\*Adolescents, Child Development, Community Health Services, \*Educational Policy, High School Curriculum, High School Students, Parent Education, \*Parenthood Education, \*Public Schools, \*Secondary Education

The United States educational system has a responsibility to provide adults with the necessary

education to raise healthy, productive children. Learning how to be a parent does not appear to be a routine part of the growing-up process today. Therefore, in order to maximize the essential early development of children, parenthood training becomes increasingly important. People can be taught to become effective parents by teaching them about child growth and development. It is suggested that this training should take place in the secondary school since this is often the last formal education many young citizens will receive. Several existing programs which train people to become informed parents are described. Additional programs are needed through which parent education and child development services could be delivered to communities through neighborhood schools. (BRT)

Identifiers—\*National Institute of Mental Health

Children's own stories and drawings as well as data on children's choices for reading material were analyzed by race, sex, and age for preferences in settings, actors, and need representation. Books for children chosen by literary critics and by persons who buy books for children were also analyzed for what children and adults look for in these books in terms of settings, actors, and needs. Children's creative writing and children's and adults' book choices were compared to ascertain similarities and differences in depiction of social behavior. The children in the study were 540 first, third, and fifth graders in six racially integrated schools in New Orleans. Many of their stories and drawings are included. Appendices contain lists of book choices of children and for children, adult reviewer book choices for children in 1971-1972, best-selling children's books for 1971-1972, and a comparison of early American, modern Russian, and Chinese books for children. This document represents the first phase of Maryland's comprehensive child development plan. It includes: (1) statistical information on Maryland's children and their families, including population and demographic trends, income, health and social services and out-of-home care programs, (2) a definition of comprehensive child care and child development and the identification of services required to meet that definition, (3) a description of the legal base through which public programs and services are provided for young children and their families, (4) a review of

licensing statutes and regulations for out-of-home child care, with recommendations for an improved system, (5) information and recommendations major child development programs and services including group and family day care, health and social services, educational programs, nutrition and child abuse, (6) priorities expressed by the county 4-C Councils and the Baltimore City 4-C Council, (7) the amount and source of Federal grants-in-aid for children's services and their allocation by program and political subdivision, (8) a discussion of the status of training for child care, child development and early childhood education personnel, (9) the volume, nature and scope of the child development services provided by voluntary agencies and hospitals, (10) an annotated list of major studies pertaining to Maryland's children, (11) major recommendations for an interagency structure with parent and citizen participation, and a statewide network for coordinating comprehensive child development services. Descriptors—\*Agricultural Laborers, \*Employment, Employment Statistics, \*Farm Labor, Income, Labor Force, Manpower Utilization, \*Migrant Workers, Residential Patterns, Seasonal Laborers, \*Statistical Data, Wages

Information is given on the size and composition of the 1971 hired farm working force (HFWF) and on the employment and cash earnings from farm and nonfarm wage work obtained during the year. Data were obtained from a survey conducted by the Bureau of the Census as a supplementary part of the regular Current Population Survey made in December 1971. There were about 2.6 million persons 14 years of age and over who did some farmwork for cash wages during 1971. This slight increase (4 percent) from the 2.5 million in 1970 reversed the declining trend in process since 1967. Members of the 1971 HFWF were mostly young (median age 22), white (78 percent), male (76 percent), persons living in nonfarm places (73 percent). They earned an average of \$882 in cash wages, or \$11.60 a day for 76 days of farm wage work. Only 19 percent were engaged chiefly in farm wage work. Of these, 285,000 were year-round workers, who were the most fully employed and highest paid, averaging 317 days of farm wage work and earning \$3,799. About 58 percent (primarily housewives and students) were not in the labor force most of the year. About 172,000 (7 percent) of the total were domestic migratory workers. This was a drop of 12 percent from 196,000 in 1970 and a continuation of the 4-year declining trend in migrant numbers, while the remainder of the hired farmworkers reverse the downward trend and increased by 4 percent. Descriptors—\*Agricultural Laborers, \*Employment, Employment Statistics, \*Farm Labor, Income, Labor Force, Manpower Utilization, \*Migrant Workers, Seasonal Laborers, \*Statistical Data, Wages

Information on the size and composition of the 1972 hired farm working force (HFWF) and on

the employment and cash earnings from farm and nonfarm wage work obtained during the year is presented. Data were obtained from a survey conducted by the Bureau of the Census as a supplementary part of the regular Current Population Survey made in December 1972. In 1972, there were 2.8 million persons 14 years of age and over who did some farmwork for cash wages during the year. This was a 7 percent increase from the 2.6 million in 1971. Members of the 1972 HFWF were mostly young (median age 23), white (85 percent), male (77 percent), persons living in nonfarm places (72 percent). They earned an average of \$1,160 in cash wages, or \$13.20 a day for 88 days of farm wage work. Only 24 percent were engaged chiefly in farm wage work. Of these, 367,000 were year-round workers, who were the most fully employed and highest paid, averaging 306 days of farm wage work and earning \$4,358. About 52 percent (primarily housewives and students) were not in the labor force most of the year. About 184,000 (7 percent) of the total were domestic migratory workers. This was an increase of 7 percent from 172,000 in 1971 and reversed the declining trend in the number of migrants which began in 1965. The remainder of the hired farmworkers, the nonmigratory, increased by 9 percent over 1971. (Author/NQ)

Report No.—TAES-NC-128

Pub Date Aug 75

Note—38p.; Paper presented at the Annual Meeting of the Rural Sociological Society (San Francisco, California, August 1975)

EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage

Descriptors—Dating (Social), \*Family Life, \*Family Relationship, Family Role, Inter-marriage, \*Literature Reviews, \*Mexican Americans, \*Research, Review (Reexamination), Sociocultural Patterns, Sociology

A review of the published empirical literature on families in the several areas of concentrated Mexican American settlement (primarily California, Arizona, Colorado, New Mexico, Texas, and various cities in the Midwest) is presented in this paper. Objective is to provide a frame of reference on the sociology of Mexican American families. Variations in family behavior appear to be linked to such factors as socioeconomic status, nativity, age and generation, specific place of residence, and language use patterns. Therefore, this synthesis is concerned with family variance "per se" by considering a number of relevant factors (i.e., age, occupational status, educational attainment, and community of residence). Studies dealing with the following topics are cited: 1) the extended family; 2) family roles; 3) dating and courtship; 4) ritual kinship relations; and 5) intermarriage. The paper is concluded with some general comments on family disorganization and family persistence. (NQ)

**Socioeconomic Characteristics of Growing and Declining Nonmetropolitan Counties, 1970. Agricultural Economic Report No. 306.**

Economic Research Service (DOA), Washington, D.C. Economic Development Div.

Report No.—AER-306

Pub Date Aug 75

Note—51p.

EDRS Price MF-\$0.76 HC-\$3.32 Plus Postage

Descriptors—Age, Census Figures, Economically Disadvantaged, Education, Family Income, Labor Force, Minority Groups, Occupations, \*Population Growth, \*Population Trends, Sex Differences, \*Socioeconomic Status, Southern States, \*Statistical Analysis, Tables (Data) Identifiers—Counties, \*Population Decline

Utilizing data compiled from the 1970 U.S. Census of Population, this statistical analysis presents a comparison of the socioeconomic characteristics of growing and declining nonmetropolitan U.S. counties. In addition, separate analyses are presented for whites and racial minorities and for South and nonsouth regions

(since analysis is limited to those counties having at least 250 racial minority residents and since 2/3 of these are located in the South, the analysis of national level nonmetropolitan data is heavily weighted by southern counties). This analysis indicates that when compared with growing nonmetropolitan counties, the declining nonmetropolitan counties have: (1) a deficit of working age population; (2) a higher proportion of dependent age groups; (3) a lower median educational attainment among the minority population; (4) a lower rate of female participation in the labor force (33.7% vs 37.9%); (5) a lower median family income (\$6,546 vs \$8,027); (6) less employment in manufacturing (23.1% vs 26.9%); (7) a higher than average amount of employment in low-wage/low-skill extractive industries (20.1% vs 6.5%); and (8) a higher percentage of families whose income falls below the poverty line. This analysis indicates a declining population affects an area's socioeconomic composition, age and labor force structures, and its ability to generate income. (JC)

**Residence and the Dynamics of Status Attainment as Related to Aspiration Formation.**

Texas A and M Univ., College Station. Texas Agricultural Experiment Station.

Spons Agency—Cooperative State Research Service (DOA), Washington, D.C.

Report No.—TAES-H-2811; USDA(CSRS)-S-61; USDA(CSRS)-S-81

Pub Date Aug 74

Note—36p.; Paper presented at the Annual Meeting of the Rural Sociological Society, (Montreal, Canada, August 1974)

EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage

Descriptors—\*Academic Aspiration, Caucasians, Comparative Analysis, Grade Point Average, \*High School Students, Males, \*Occupational Aspiration, Parent Influence, Peer Groups, \*Rural Urban Differences, Seniors, \*Social Influences, Status, Teacher Influence Identifiers—\*Louisiana

In an effort to understand the dynamics of the status attainment process, the effects of significant-other influence on aspirations were considered. Data were derived from group administered questionnaires of a proportionate, stratified, random cluster sample of Louisiana high school seniors. Utilizing data on 1,241 white males, residence controls were employed and the dynamics of significant-other influence were analyzed across 5 community of origin categories (rural non-farm; rural-farm; villages of less than 2,500; small cities of 1,500 to 100,000; and large cities of 100,000 or more). The variables employed were: occupational and educational aspiration (dependent); father's and mother's education and father's occupation (exogenous); and high school grade point average, educational encouragement (parental, teacher, and peer), and peer modeling behavior (intervening). Results indicated that peer modeling influence had the strongest effects on aspirations when contrasted to other forms of significant-other influence. The impact of peer modeling behavior on aspirations was found to be significantly greater in rural than urban communities, while an opposite residential trend was observed for parental influence. Results were interpreted in terms of the structural character of peer-group influence and suggestions were made for further research. (JC)

Descriptors—\*Academic Aspiration, Caucasians, Comparative Analysis, Females, Grade Point

Average, High School Students, Males, Negroes, \*Occupational Aspiration, Parental Background, Parent Influence, Peer Groups, \*Racial Differences, Rural Urban Differences, Seniors, \*Sex Differences, \*Social Influences, Teacher Influence

Identifiers—\*Louisiana

In an effort to understand the dynamics of the status attainment process, the effects of significant-other influences were analyzed in terms of sexual and racial differences. Data were derived from a proportionate, stratified, random cluster sample of Louisiana high school seniors. High schools were stratified on the basis of residence (urban/rural), school type (public/parochial), race (black/white), and size of senior class (less than 100, 100-500, and over 500). Group administered questionnaires provided responses for: 1,175 white males; 287 black males; 1,168 white females; and 390 black females. The variables employed were: father's and mother's education and father's occupation (exogenous); high school grade point average, educational encouragement (parental, teacher, and peer), and peer modeling behavior (intervening); and educational and occupational aspiration (dependent). Results indicated that: (1) school performance and peer modeling were the most important variables in the formation of career aspirations of all respondents, regardless of race/sex criteria; (2) peer influence was a modeling influence for black and white youth of both sexes; and (3) mother's education influenced black and white female aspirations, while school performance and peer modeling significantly influenced male aspirations. Written by Stanford University students, the 9 articles in this publication reflect student ideas on Chicano education. Their aim is to stimulate new ideas and discussion on Raza Education. The majority of the articles were written by students in the Department of Education and by students working toward a Ph.D. degree. Divided into 3 parts, the articles discuss educational reform, current approaches to school governance, and educational review. Articles in Part I are: (1) "An In-Service Rationale for Educators Working With Mexican American Students," (2) "No One Single Solution," and (3) "A Cross-National Analysis of Chinese and American Educational Reforms: Applicability and Inapplicability to the Education of the Chicano in the United States." Part II consists of 2 articles: (1) "An Economic Analysis of Bilingual Bicultural Education Legislation at the Federal Level," and (2) "Cultural Pluralism, School Governance, and the Chicano Community." The 4 articles in Part III are: (1) "A Study of the Nature of Chicano Studies Derived From Twelve Proposals for Chicano Studies," (2) "Early Bilingualism and Cognition: A Survey of the Literature," (3) "Problem Solving: A Review," and (4) "Toward the Development of Raza Cinema." Identifiers—\*Chicanos

Recently a great deal of attention has been given to Chicano education. Much of the agitation for Chicano recognition within the educational system has been spearheaded by the youth in the public schools and by a small number of older and respectable Chicano activists and educators. This paper analyzes various educational reforms suggested by some influential educational leaders. The educational ideas of 8 Chicano and 1 Anglo leaders who appeared before the Select Committee on Equal Educational Opportunity of the U.S. Senate in Washington, D.C., on August 18-21, 1970 are examined. The ideals of these educators and some of the underlying assumptions that they make about the nature of changes schools can make and the nature of social change are discussed, pointing out the direction Chicano educators are going. These leaders' ideas display a shift away from the cultural determinist perspective, which has dominated sociological and anthropological literature since the late 50's. Only one of the 9 educators used a variation of the cultural determinist theory as an analytical framework. The others favored the structural-environmental determinist theory or a variation of it. The Bilingual Act first became law as a part of the Elementary and Secondary Education Amendments of 1967. At that time Congress appropriated \$7 1/2 million for Bilingual Education programs. In 1974 according to "Education Daily" nearly \$60 million will be spent. This paper makes an economic and political analysis of current Bilingual legislation and funding at the Federal level. Recommendations on policy and budget for the 1975-76 school year are also made. Divided into 5 major areas, the paper discusses: (1) the key issues behind Bilingual Education, (2) the merits and drawbacks of current legislation, (3) relevant studies that are significant for Bilingual programs, (4) positions of various powerful voting groups, and (5) recommendations for future policy and funding. Identifiers—\*Chicanos

By examining 12 proposals for Chicano Studies written between 1968 and 1974, this paper attempts to answer the following questions: (1) "What are the ends of Chicano Studies?", and (2) "What is meant by the term 'Chicano Studies'?" Material for reflection regarding what the proposals have collectively described as the essence of Chicano Studies is presented. The paper takes an in-depth view as to the extrinsic (Chicano community) and intrinsic (institutions of formal education) rationale of Chicano Studies. The paper also identifies the role of community, students, and staff; describes the nature of Chicano Studies; describes the conflict between Chicano Studies and the educational system; and proposes alternatives for Chicano Studies. Identifiers—\*La Raza

Chicano teatro, poetry, and art appear to be more developed forms of Chicano cultural expression. Chicano literature and film are just getting off the ground. Film is the least developed of the two, primarily because it is an expensive medium. However, this medium can be a tool for social change. "Raza Cinema" could conceivably include in addition to Chicanos, Puerto Ricans, Native Americans, and Latinos, Cuban filmmakers residing in the United States who are in agreement with the struggle for liberation of Raza politically, philosophically, and aesthetically. Raza Cinema could also reach out internationally and form linkages with other Mexicanos and Latin Americans and other Third World oppressed peoples struggling for liberation. Therefore, this paper discusses some of the background, ideas, and ingredients necessary for the development of Raza Cinema. Brief comments on 3 Chicano films are given: (1) "Yo Soy Chicano", (2) an untitled short color film on the theme of drugs, and (3) "I Am Joaquin". (Author/NQ)

One Approach to Rural Outreach: Community Development Centers in Clinton County, New York, and Their Implications for Cooperative Extension.

Pub Date Aug 75

Note—16p.; Paper presented at the Annual Meeting of the Rural Sociological Society, (San Francisco, California, August 1975)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*Community Development, Community Relations, Cooperative Programs, Delivery Systems, Evaluation, \*Extension Education, \*Interagency Coordination, \*Policy Formation, \*Rural Areas

Identifiers—\*New York (Clinton County)

The Clinton County (New York) Community Development Center (CDC) system was examined to determine its appropriateness for Cooperative Extension Services. Nine active CDC's were investigated via personal interviews and report review to assess CDC scope, activities, audiences, successes, failures, local government support, and potentials. Emphasizing the necessity for a systematic flow of information, findings indicated that successful CDC's should make provisions for: (1) definitive goals and objectives; (2) evaluation of objectives; (3) the director's role, employment guidelines, and pre-job and on-job training; (4) decisions about CDC policy making and implementation; (5) CDC location and facility availability; and (6) CDC relationship and coordination with other centers, community organizations, and extra-community agencies. It was concluded that Cooperative Extension could provide CDC with support and leadership via: (1) record keeping, reporting to town officials, and publicity; (2) educational provisions for middle class families in addition to established low income educational provisions; (3) educational provisions for CDC directors (a 16 week course on decision making, supervision, etc.); (4) provision for systematic performance evaluation; and (5) assistance in extended involvement of community volunteers to facilitate CDC communications. Natural Decrease in Texas Counties.

Pub Date Aug 75

Note—19p.; Paper presented at the Annual Meetings of the Rural Sociological Society, (San Francisco, California, August 1975)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—Age, \*Birth Rate, Census Figures, \*Comparative Analysis, Demography, \*Migra-

tion Patterns, \*Population Trends, Rural Urban Differences, \*Spanish Speaking, Tables (Data) Identifiers—Counties, \*Population Decline, Texas

In replication of other studies, the natural decrease of Texas population was examined in terms of the effect of migration and fertility. Utilizing Texas and U.S. vital statistics and the 1970 U.S. Census of Population, Texas population trends were analyzed for the 1968-72 period by dividing the 254 Texas counties into: (1) 65 natural decrease counties (those registering more deaths than births); (2) 132 low natural increase counties (those below the state average); (3) 57 high natural increase counties (those above the state average). Findings indicated natural decrease counties: (1) were smaller; (2) constituted less than 6% of the population; (3) were primarily rural; (4) experienced net-immigration gains in 18 of the 65 counties; (5) had a population with an average median age of 41.1 years; (6) had a low proportion of Spanish-speaking population; (7) had a lower fertility level than the increase counties, but had a level above replacement levels. It was concluded that: (1) the presence of Spanish-speaking populations influenced fertility differentials, since counties with large Spanish populations experienced high levels of natural increase in spite of high levels of out-migration because of high fertility; and (2) migration trends for longer time intervals and by age should be examined to determine the effect of migration on age structure and natural decrease. Socioeconomic Characteristics of the Spanish Origin Hired Farm Working Force, 1973.

Pub Date 22 Aug 75

Note—31p.; Paper presented at the Annual Meetings of the Rural Sociological Society, (San Francisco, California, August 22, 1975); Some pages may reproduce poorly

EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage

Descriptors—Academic Achievement, Age, \*Agricultural Laborers, Anglo Americans, \*Comparative Analysis, Employment, \*Ethnic Groups, \*Migrant Workers, Migration Patterns, Negroes, Sex (Characteristics), \*Socioeconomic Influences, Spanish Speaking

The differentials between Spanish origin and other ethnic groups of farm wage-workers were investigated by comparative analyses of age, sex, education, migratory status, employment, and earnings. Farmworkers were defined as persons 14 years and over in the civilian noninstitutional population who performed farm wage-work at some time during 1973, even if only for one day. Data were obtained in December 1973 from the annual Hired Farm Working Force survey conducted as a supplementary part of the Current Population Survey. Approximately 45,000 households were interviewed during this month. This sample was drawn from 461 areas including 923 counties and independent cities, with coverage in each of the 50 States and the District of Columbia. Among the findings were: (1) only 4.4% of the employed Spanish origin population were engaged in agricultural work as farmers, farm managers, laborers, and foremen; (2) approximately 13% of the total 2.7 million persons in the farm working force were of Spanish origin, 14% were Blacks and others; (3) Spanish origin farmworkers were an older group of workers; and (4) within the Spanish origin farm labor force, a larger proportion was migratory compared with other ethnic groups. Changing Perspectives on Rural Development.

Pub Date 21 Jul 75

Note—31p.; Paper presented at the MUCIA Wingspread Colloquy (Racine, Wisconsin, July 21-23, 1975)

EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage

Descriptors—Cost Effectiveness, Definitions, Developing Nations, \*Interaction Process Analysis, \*Models, \*Rural Development, Social Change, \*Social Systems, \*Theories

Identifiers—\*Reciprocal Interdependence, Rural Renaissance

The purpose of this presentation is to examine changing perspectives of rural development in an effort to better understand change in rural social systems and to analyze interactions between systems in general. The 1st section of this report

is devoted to an analytic framework for intersystem interaction which entails a donor/recipient construct designed to achieve intersystem diplomacy by taking account of all professional, human, administrative, and political components in each system. The concepts of an international elite and a superiority syndrome are also presented in this section. Section 2 presents an analytic framework for rural development (defined in terms of underdevelopment, overdevelopment, and balanced development cycles as measured by utilization of resources), and presentation is made of a rural development model which describes 8 major components and their linkage systems, providing for: (1) analysis of the effect of a component change; (2) evaluation of the equity and cost-benefit ratio of individual components; and (3) measurement of the direction of component transactions. In light of the models presented, the 3rd section proposes a doctrine of interactive reciprocity between the rural social systems and the governments of each country and between nation/states to facilitate a rural renaissance. Identifiers—\*Asia

Bringing together the thinking and practical experiences of Asian Member State representatives in the United Nations, this report on Asian rural youth and out-of-school education is derived from a 1974 seminar held in the Philippines. The seminar conclusions and recommendations presented emphasize the following: (1) Potential of Out-of-school Rural Youth; (2) Learning Needs (sensitivity to local environments, youth/community participation in needs identification, and program recognition of the importance of achieving attitudinal changes); (3) Planning Strategies (educational policy conceived as an integral part of total rural development which complements both in- and out-of-school populations); (4) Organization (program coordination to include a national policy making agency, coordination mechanisms at the provincial/district levels, and maximum use of existing local resources); (5) Training (local people to act as program "animators", developing locally

productive skills and exploiting employment generation and economic returns); (6) Research (systematic exploration of attitudinal change, effective educational techniques, and cost-benefits); (7) Recognition of and Program Development for the Special Needs of Girls and Women; and (8) International Cooperation (information collection/dissemination and inter-country transfer of experiences, training opportunities, and methodology development). Residential Shifts and Ethnicity: A Study of Adjustment of Household Heads Recently Moved from Farms to Small Towns in Central Arizona.

Pub Date 21 Aug 75

Note—16p.; Paper presented at the Annual Meeting of the Rural Sociological Society (San Francisco, California, August 21-24, 1975)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—Academic Achievement, \*Adjustment (to Environment), \*American Indians, Anglo Americans, Attitudes, Career Change, \*Farmers, \*Mexican Americans, Migrants, Negroes, \*Relocation, Socioeconomic Influences

Identifiers—\*Arizona

The study surveyed the magnitude of the adjustment process for a sample of Anglo, Mexican American, Black, and American Indian families that had recently shifted their residences from farms to small towns in the western, irrigated sections of Pinal County, Arizona. Data were obtained from 374 (78 Anglo, 102 Black, 98 Mexican American, and 96 Indian) male heads of unbroken households, under 60 years of age, able to work, who had lived in the county for 12 months or longer, and were employed as farm workers or had been so employed within the past 10 years. Analysis involved cross classification of data into numerous contingency tables as well as scales and indexes. Scales utilized involved (1) material possessions, (2) the awareness of informants of certain local organizations and activities, and (3) statements concerning satisfaction with the urban environment and its correlates as they had experienced them. Among the findings were: (1) attitudes of Blacks and Anglos were more closely related to each other than to the other groups; (2) relatively more Mexican Americans and Indians remained in farmwork after moving into the towns; and (3) Mexican Americans demonstrated a higher level of satisfaction with their new residence even though they were still concentrated in farm occupations. Descriptors—Beliefs, \*Community Attitudes, Consolidated Schools, \*Cultural Background, \*Decision Making, Doctoral Theses, \*Educational Attitudes, High Schools, Life Style, Local History, \*Rural Areas, Small Schools, Values

Identifiers—\*North Carolina (Cherryville)

The small rural community of Cherryville, North Carolina was examined to determine the relationship between its cultural background and its decision making processes. Specific objectives were to: (1) identify and record insights into the culture of the community; (2) include and preserve an accurate record of the cultural practices and beliefs; (3) interrelate the culture and tradition with the preservation of the local high school; (4) document some of the unique traditional community practices and colloquialisms; (5) present the community's position relative to the school system and its unified effort to support and preserve the local high school; (6) formally research the culture of a small community; (7) identify and infer strengths to be found in opposition to school consolidation; and (8) provide useful information for other small communities. Personal interviews, observations, historical research, tape recordings, and photographs were employed

to describe and define the community's cultural beliefs and practices. It was concluded that the fundamental and basic life style of a given community is of great significance to those involved in the decision making process and that only through consideration and understanding of the peculiarities of individual communities can worthwhile decisions be made in the best interest of all mankind. Analyzing the Indian Education Act of 1972, this report presents both historical background and future projections relative to the Act. The history of the Act is presented in terms of discussion on: (1) Legislative Preparation; (2) Hearings; (3) Drafting and Passing the Bill; (4) Appropriating Funds; (5) Rescinded Funds; and (6) Funding for 1973. Analysis of the Act is presented as follows: (1) Discussion of Parts A-E; (2) Purpose and Policy of the Advisory Council (Forming the Office of Indian Education and Funding Initial Grants); (3) The Long-Run Promise of the Act (Entitlement); and (4) The Outlook for Fiscal 1974 (Funding, Program Direction and Priorities, and Issues to be Resolved). Presentation of future projections relative to the Act include sections on the following: (1) Characteristics of the Native American Population (Languages, Participation in the Economy, Health and Longevity, Birth Rate, Infant Mortality, Adult Causes of Death, Communicable Diseases, Age Composition and Life Expectancy); (2) Historical Background of Indian Education; (3) Indian Participation in the Educational System (Retention and Dropout Rates, The Quality of Education, Achievement Measures, Special Problems, and Ability vs Achievement); (4) Planning Priorities (A Planning Point Checklist); and (5) Role of the Indian Community (United Action). Written by a 1975 high school graduate and a curriculum specialist, this monograph briefly describes the history of Ramah, New Mexico. Presenting the Navajo point of view, emphasis is on the socioeconomic influence of the Mormons and the Texas (Anglo) ranchers who settled in the Ramah area. Particular attention is given to: (1) land acquisition; (2) trading posts and the concept of "credit"; (3) Federal Government land allotments; (4) the Bureau of Indian Affairs and boarding schools; (5) the development of the Ramah Navajo (all Indian) School Board; and (6) the value of education and law to the Ramah Navajo. The program is primarily designed to provide bilingual education for pupils, in grades K-6, with limited English-speaking ability. Due to parental requests, approximately 16 percent monolingual English-speakers have been accepted into the program. Of the 529 children enrolled in the program, 89 percent have Spanish surnames. Objectives for the Mexican American pupils are to: (1) prevent their educational retardation by instructing them in Spanish while developing their command of English; (2) enhance their understanding and cognitive development in both languages; and (3) instill a knowledge of and pride in their bicultural heritage. Objectives for Anglo pupils are to: (1) give them the opportunity to become bilingual and literate in 2 languages and (2) broaden their outlook and enhance their understanding of other peoples. Program components are: development of and revision of curriculum materials for bilingual classes, bilingual instruction in grades K-6, staff development, and parental and community involvement. This 1974-75 evaluation report deals only with the instructional component. Discussed are the results from the: Peabody Picture Vocabulary Test, Boehm Test of Basic Concepts, Comprehensive Test of Basic Skills, Prueba de Lectura (Spanish reading test), Bilingual Education Program Test in Social Studies and Science (given in the appendix), and Projected Self-Concept Inventory. **Identifiers--**Elementary Secondary Education Act Title VII, ESEA Title VII, \*Texas (Harlandale)

Comprised of pre-K-6 and LLD (Language Learning Disability) classrooms, the program is designed to provide bilingual education for pupils who have limited English speaking ability. There are 1,612 pupils from 7 elementary schools and 1 junior high school. Program objectives are to: (1) prevent their educational retardation by instructing them in Spanish while developing their command of English; (2) enhance their understanding and cognitive development in both languages; (3) give them the advantage of becoming literate in both languages; and (4) instill a knowledge of and pride in their bicultural heritage. Project components are: development of and revision of curriculum materials for bilingual classes, bilingual instruction in grades pre-K-6 and LLD, staff development, and parental and community involvement. However, this report deals with the instructional component. This 1974-75 evaluation report discusses the test results from the: Peabody Picture Vocabulary Test, Boehm Test of Basic Concepts, School Readiness Survey, Comprehensive Test of Basic Skills, Prueba de Lectura (Spanish reading test), Bilingual Education Program Test in Social Studies and Science (a copy included in the appendix), Projected Self-Concept Inventory, and Wide Range Achievement Test. These tests were administered on a pre- and posttest basis; both English and Spanish versions were administered. (NQ)

**Identifiers--**Navajos, \*Trading Posts

Conducted in 1969 by 8 Navajo students, this study investigates the Anglo trader in terms of his socioeconomic influence on the American Indians of the Navajo Reservation. Limited to 30 randomly selected trading posts located in the central and eastern portions of the Navajo Reservation, this study reflects findings derived from personal observations, personal interviews, and historical research. Emphasizing the trader's economic control over the Navajo people, this report deals with the following areas of concern: (1) History (cites treaties, laws, and sanctions governing the trader-Indian relationship); (2) Role of the Trader in Navajo Society (banker, creditor, pawnbroker, special claims agent for the Railroad Retirement Board, and interpreter of both mail and phone communications); (3) Attitude of the Trader Toward Navajo Clientele (mental and physical abuse, paternalism, economic exploitation); (4) Effect of the Multiple Roles of the Traders (control over Navajo money, employment, and communication); (5) Sanitation and Safety (cites poor conditions in the older trading posts); and (6) Price Survey (compares trader's prices with wholesale prices). The report concludes that control of the trader is the responsibility of the Secretary of the Interior, the Commissioner of Indian Affairs, and the Bureau of Indian Affairs. (JC)

**The Assessment of Role Identity: Problems of Administering the Instrumental Activities Inventory to Inuit Children.**  
 Pub Date 74

Note—29p.; Paper presented at the Annual Meeting of the American Anthropological Association (73rd, Mexico City, 1974); Best Copy Available

**EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage**

**Descriptors**—Acculturation, Adolescents, Children, Cultural Factors, \*Eskimos, Projective Tests, \*Role Models, \*Sex Differences, \*Socialization, \*Youth

**Identifiers**—Canada, \*Instrumental Activities Inventory, Inuits

A modified version of the Instrumental Activities Inventory (IAI) was administered to a sample of Canadian Inuit children (41 girls and 37 boys aged 9 to 17 from Frobisher Bay and 40 boys and 35 girls aged 8 to 16 from Pangnirtung) for purposes of assessing role model preferences relative to the socialization process. Consisting of 12 female and 12 male drawings, the modified IAI represented the following role categories: (1) Modern—occupations and activities presently monopolized by Eurocanadians but open to Inuits with specialized training or advanced education (male doctors, teachers, etc., and female nurses, teachers, etc.); (2) Transitional—occupations currently represented by town Inuit of moderate or high levels of acculturation (male airplane mechanics, construction workers, etc., and female cooks, post office clerks, etc.); and (3) Contact-traditional—roles characteristic of either town or land based Inuit which do not require formal education, bilingualism, or wages (male hunters, carvers, etc., and female hunters, skin workers etc.). Responses indicated that Inuit girls were more strongly influenced by Eurocanadian role models than Inuit boys. Since statistical significance depended upon the role categories, it was suggested that further testing include Native role classifications/evaluations and expanded numbers of role types. (JC)

**Changing Power Actors in a Midwestern Community.**

Iowa Agricultural and Home Economics Experiment Station, Ames.

Report No—CES-P-1996; IA-J-8278

Pub Date 21 Aug 75

Note—22p.; Paper presented at the Annual Meeting of Rural Sociological Society (San Francisco, California, August 21-24, 1975)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

**Descriptors**—Age, \*Community Leaders, Community Role, Education, Income, \*Longitudinal Studies, Organizations (Groups), Participation, Political Attitudes, \*Power Structure, Residential Patterns, Rural Areas, \*Social Change, \*Social Characteristics, Social Status

**Identifiers**—Iowa (Prairie City), \*Power Actors

A longitudinal study was made of Prairie City, Iowa wherein the personal and social characteristics of the 1962 power actor pool were compared with characteristics of the 1973 power actor pool to test the hypothesis that: the personal and social characteristics of power actors will not change significantly over time. Procedures for identifying Prairie City power actors in both 1962 and 1973 involved interviews with: (1) external identifiers; (2) internal identifiers; and (3) the power actors themselves. Power actors (25 in 1962 and 33 in 1973) were queried as to: (1) the amount of social power other power actors and themselves possessed in specific issue areas; (2) their social participation in organizations; (3) role expectations of power actors; (4) bases of social power of power actors; and (5) their personal and social characteristics. Variables tested were: age; education; occupational prestige; income; length of residence in community and State; political orientation; number of memberships in local community organizations; and number of memberships in non-community organizations. Findings supported the general hypothesis but indicated that the power actors themselves were likely to change over time, as only 8 of the original power actors were among those identified in 1973. **Identifiers**—BIA, Bureau of Indian Affairs, \*Navajos

The major portion of this report is devoted to the Anglo and American Indian testimony from the 1973 Commission on Civil Rights Hearings on Navajo economic development, employment, education, and health care. Among the major recommendations cited are those calling for: (1) legal recognition of the Navajo Tribal Council to provide for favorable tax classification and Federal Agency grant and loan qualification; (2) a system by which the Tribal Council could make decisions with greater independence from the Bureau of Indian Affairs (BIA); (3) legislation to support program development until tribal revenues are adequate to maintain both infrastructure and development investments; (4) a program to provide superior technical expertise in planning and decision making; (5) a Department of the Interior policy providing for joint enterprises on a 50/50 (tribal and contractor) basis; (6) Federal augmentation of the Navajo Revolving Credit Fund; (7) BIA enforcement of the Navajo preference policy in Federal employment; (8) creation of a tribal agency with jurisdiction over employment discrimination complaints; (9) full Navajo representation in the educational decision making process; (10) curriculum development to include Navajo cultural awareness; (11) elimination of the Navajo teacher shortage; and (12) appropriation of funds for the Indian Health Service to make Navajo health care comparable to that of the U.S. in general. **Identifiers**—\*New Mexico (Clovis)

An intervention program for 3, 4, and 5-year-old "high risk" (of low birth weight and with various handicaps) Spanish American children, REPSAC aims at providing successful experiences using the concept of responsive environment in English and Spanish language development and in improving cognitive and affective development. During 1974-75, 32 low birth weight children handicapped by physical difficulties, learning aptitude (IQ), perceptual and motor problems, language handicaps, and economic, cultural, and education deprivation participated at Clovis, New Mexico. The program was divided into comprehensive components: instructional, staff development, community-parental involvement, and media. The evaluation design focused on the instructional component and a follow-up study of former REPSAC students. Language development in English and Spanish, IQ, sensory and perceptual development, and school readiness were measured using pre and posttests. Periodic subjective evaluation of the students' self concept and personality development were conducted. Using a time-series analysis, personal interviews, and questionnaires, 27 former REPSAC students were studied. Some major findings were: students made significant gains in language ability, sensory and perceptual discrimination, and school readiness; showed positive and continuous self concept and personality growth; however, significant gain was not evident in learning aptitude. **Mexican-American and Mexican National Farm Workers: A Literature Review.**

Pub Date Aug 75

Note—25p.; Paper presented at the Annual Meeting of the Rural Sociological Society (San Francisco, California, August 1975)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

**Descriptors**—\*Agricultural Laborers, Attitudes, Braceros, Foreign Workers, Income, Labor Unions, Legislation, \*Literature Reviews, \*Mexican Americans, \*Mexicans, Migrant Workers, \*Socioeconomic Influences

This paper is concerned with the scholarly treatment accorded to Mexican American and Mexican National farm workers by historical, legal, social work, and social science journals. Only those articles published after the arbitrary date of 1960 are reviewed due to space and time limitations. Works published since then are briefly summarized and evaluated in light of the contributions made toward the explication and understanding of the topic. The 29 articles are classified under 4 categories: (1) migrant farm workers, (2) the Bracero Program, (3) alien workers -- "wetbacks" and commuters, and (4) labor unionization. These articles are reviewed according to category, chronological relevance, and level of inclusiveness or abstraction. The paper concludes with some comments and suggestions pertaining to problems which appear to warrant future research consideration. (NQ)

**Wilderness: A Way of Thinking; A State of Mind.**

Pub Date 24 Aug 75

Note—16p.; Paper presented at the Annual Meeting of the Rural Sociological Society. (San Francisco, California, August 24, 1975)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

**Descriptors**—Attitudes, \*Behavior Change, \*Concept Formation, \*Environmental Criteria, Environmental Education, Individual Differences, \*Outdoor Education, \*Recreation, Social Relations

**Identifiers**—\*Wilderness

Wilderness, as a state of mind, has persisted among men since the beginning of time. Written history has documented man's struggle with and against it. It has only been during the last century that man, in a societal context, has designated vast tracts of land as wilderness. The extent to which wilderness attributes are perceived and the meaning attached to them varies with the observer. Over the years, it has been regarded both as an enemy to be conquered in the name of civilization, Christianity, and progress, and as something of value to be cherished and preserved. Thus, the dichotomy emerges between wilderness as a physical entity and wilderness as perceived by an individual encountering a previously unencountered, operational environment for the first time. For many people, particularly those who are born and raised in an urban environment, the wilderness begins at the edge of the concrete. For others, it exists at the bounds of their limitations. Therefore, each individual perceives wilderness in the context of his history, maturation, and exposure to different types of operational environments. As exposure increases and the individual matures, so does his concept of what a wilderness might be. (Author/NQ)

**The Use of Paraprofessionals as an Approach to Community Development.**

Pub Date 21 Aug 75

Note—13p.; Paper presented at the Annual Meeting of the Rural Sociological Society (San Francisco, California, August 21-24, 1975)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

**Descriptors**—Change Agents, \*Community Development, Cost Effectiveness, \*Evaluation, Extension Education, \*Nonprofessional Personnel, \*Problems, Program Descriptions, Researchers, \*Rural Development, Status, Supervision

**Identifiers**—\*Appalachia, Kentucky

By virtue of the Title V Rural Development Program, 10 paraprofessional workers were assigned, via Extension Services, to 10 counties in Appalachian Kentucky to engage in both action and research phases of community development. Extension specialists were provided to train and

support the paraprofessionals in surveying local leadership, identifying problems, establishing objectives, organizing group action, and serving as linkage to outside resources. Evaluation of the strengths and weaknesses in the use of these paraprofessionals revealed that: (1) the dual role of extension worker and researcher may give the paraprofessional insights into the community, otherwise not apparent, but may also present problems via conflicting objectives; (2) supervision can be a problem relative to the level of the organizational structure from which it is administered and the amount administered, but it can also be an asset, providing the paraprofessional with a close tie to the action oriented agency; (3) while maintaining an indigenous status, the paraprofessional may not have certain insights afforded the professional, and his familiarity with the people may erode the necessary aura of confidentiality; and (4) use of the paraprofessional allows a higher degree of economic efficiency, but a high rate of turnover among paraprofessionals presents additional problems. Identifiers—BIA, Bureau of Indian Affairs, Department of Housing and Urban Development, HUD

Providing a comprehensive collection of data and materials essential to understanding the American Indian housing problem, this report was prepared to acquaint Members of Congress and others with the fact that Indian housing is "deplorable" due to such factors as the prevalence of low incomes, the predominance of trust land, unique cultural patterns, and the multiplicity of Federal agencies involved in the Indian housing effort. Report divisions include: (1) Housing and Urban Development (HUD) Indian Housing Programs; (2) Bureau of Indian Affairs (BIA) Housing Improvement Program; (3) Related Services and Program Administration (roads, water, sanitation, etc.); (4) Problems with the Present Program (the tri-agency agreement, the 1974 Housing and Community Development Act, building on Indian lands, relative priority accorded Indian projects, special legal relationship, and regional characteristics); and (5) Possible Options and/or Policy Alternatives (maintain the status quo with certain legislative and administrative changes and develop a comprehensive Indian housing and community development act). Extensive appendices (some 600 pages) document the slow progress of Indian housing, presenting dates, acts, various agreements, HUD circulars and legal memorandums, correspondence, agency responses, General Accounting Office reports, papers, etc. (JC)

**The Community, The Teacher and The Migrant Child.**

State Univ. of New York, Geneseo. Coll. at Geneseo. Migrant Center.

Pub Date 69

Note—18p.

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*Agency Role, \*Community Attitudes, Cultural Factors, Data Collection, Educational Facilities, Educational Objectives, \*Migrant Child Education, Migration Patterns, \*Teacher Role, \*Teaching Methods

Social, political, moral, and economic conditions of the community have an impact on the material taught and on how it is taught. Con-

sequently, the teacher regulates his actions to conform to community norms. Since the migrant is a transient, marginally related to the community in which he works, it is often difficult for the community members to understand the necessity of providing education, health care, and other services for him. Therefore, this responsibility should rest within an agency authorized to deal with Federal and out-of-state agencies and to establish minimum standards of education for all migrant children. This center should provide the information and coordination necessary to develop specific migrant education programs and to train teachers to implement them. It should obtain data from private and governmental agencies concerning crew composition, migration, kinship, cultural factors, and point of origin facilities. This information should then be transmitted to local programs providing summer education in the form of suggestions for methodology and subject matter. Special classroom material specially designed for the type of crews in the program should also be included. Thus, the center would relieve community pressures by accepting responsibility for programs which the local areas may not be able to obtain or justify to its residents. (NQ)

Descriptors—Agricultural Laborers, \*Computer Oriented Programs, Costs, \*Feasibility Studies, Information Retrieval, Information Systems, \*Migrant Adult Education, Migrant Children, \*On Line Systems, \*Student Records, Transient Children

Identifiers—\*Migrant Student Record Transfer System, MSRTS

The hypothesis that the existing Migrant Student Record Transfer System (MSRTS) can be used to promote continuity of learning for adult migratory farmworkers was tested. After an initial and careful study of the existing MSRTS combined with an analysis of the new system to be implemented, it was determined that the MSRTS can be used. The hypothesis was documented through the presentation of historical data, present operations, program statistics, and computer specifications. Next a prototype data form (actual data to be transferred) was developed. This report discusses the: (1) development of a prototype form, and (2) technical and administrative aspects for implementation. Part I presents an analysis of information needed by teachers to plan occupational programs for individual adult migrants and an investigation of other retrieval systems that could supplement the MSRTS. In Part II, 4 areas are discussed: (1) technical aspects of utilizing the system; (2) the current MSRTS administration's policies in regard to expanding the system, maintenance of confidential information, etc.; (3) specific implementation guidelines and a time-line for implementation of the system; and (4) recommendations and follow-up procedures. A listing of agencies providing services to migrant adults is included. (NQ)

**Listening-Phonics Program for Disadvantaged Youngsters.**

State Univ. of New York, Geneseo. Coll. at Geneseo. Migrant Center.

Pub Date 70

Note—67p.

Available from—Geneseo Migrant Center, State University College of Arts and Sciences, Geneseo, New York 14454 (\$1.00)

EDRS Price MF-\$0.76 HC-\$3.32 Plus Postage

Descriptors—Auditory Discrimination, Auditory Training, \*Educationally Disadvantaged, Educational Objectives, Language Arts, Learning Activities, Listening Comprehension, \*Listening Skills, \*Migrant Child Education, \*Phonics, Self Concept, \*Teaching Methods

Recently those in the teaching profession have begun to realize the importance of listening skills. Of the 4 areas of language arts, listening is the primary skill. Phonics and listening are related in that there is a significant relationship between the child's ability to discriminate between letter sounds and his ability to listen. The child must master sound-to-letter associations in order to learn to spell. Listening skills must be improved if teachers are to reach the disadvantaged child—the youngster with limited vocabulary and short attention span, the child who seems to be in his own little world, and the child who is not ready to read in first grade and seems to fall further and further behind his classmates. This book presents a general discussion of the listening skill and raises some questions pertinent to the development of this facet of the language arts program. Ideas which the teacher can use "as is" or as a springboard for developing her own program are provided. Effort has been made to select, modify, and develop materials to meet the unique needs of the disadvantaged child; however, many of the procedures would work equally well with primary children in various situations. Topics covered are: importance of listening; factors influencing listening ability; listening and the language arts program; listening levels and goals for instruction; and evaluation. (NQ)

King, Paul R.

**Algonquin Portrait: A Study of the Rapid Lake Seasonal Agricultural Worker.**

State Univ. of New York, Geneseo. Coll. at Geneseo. Migrant Center.

Pub Date 71

Note—10p.; Best copy available

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—Agricultural Laborers, \*American Indians, Audiovisual Aids, \*Cultural Awareness, \*Cultural Background, Educational Programs, Health Conditions, Housing, \*Life Style, \*Migrant Workers, Program Descriptions, Seasonal Laborers, Slides

Identifiers—\*Algonquins, Quebec (Rapid Lake)

The study's purpose was to compile descriptive information about a small band of Algonquin Indian seasonal agricultural workers from Quebec, Canada who migrate annually into Ontario County, New York to work on the fur and poultry farms. Although these Indians have worked in the State since 1945, no "serious" study had been made which included their home life in Quebec, reasons for migrancy, types of work done, and conditions of employment while on the farms. Therefore, a 35-minute slide/tape presentation illustrating the home life was prepared. The Reserve was visited 9 times since 1970, for approximately 3 days each time. Cassette recordings were made of: (1) several conversations with the band's Chief, band counselors, and teachers; and (2) traditional Algonquin songs sung by some of the older people and young children. The presentation illustrates and describes housing, educational programs, medical and dental problems, production of native crafts, and traditional pursuits of these Indians. This report discusses how this presentation has been used and the initiator's continued involvement with the Algonquins. Also included is a narrative which was included with a proposal for a full-time outreach worker to work with the white, Indian, and Puerto Rican families on the fur farms in East Bloomfield, Ontario County, New York. **Income of Farm Wageworker Households in 1971. Agricultural Economic Report No. 251.**

Economic Research Service (DOA), Washington, D.C.

Report No—AER-251

Pub Date Mar 74

Note—59p.

EDRS Price MF-\$0.76 HC-\$3.32 Plus Postage

Descriptors—Agricultural Laborers, Comparative Analysis, Economics, Employment Patterns, Family (Sociological Unit), \*Family Income, \*Migrant Workers, \*Rural Farm Residents, \*Seasonal Laborers, Spanish Speaking, \*Statistical Data

Information on the size, composition, and family income of farm wageworker households (any household with at least 1 person 14 years of age or over who performed farm wage work at any time during the year, even if for only 1 day) in

1971 is presented. Households were classified as: (1) regulars—households with at least 1 member who performed 150 days or more of farm wagework during the year; (2) seasonal—households with at least 1 member who performed less than 150 days of farm wagework during the year; and (3) migratory—households with at least 1 member who traveled across county lines and stayed away from home at least overnight to perform farmwork for cash wages. Data were obtained by the Bureau of the Census as a supplementary part of the regular Current Population Survey conducted in December 1971. The relative well-being among the 3 classes of farm wageworker households is based on a comparison of family income and number of household members. The proportion of households with dependent children was also considered. The household's relative dependence on agriculture for members' employment and income is shown by indicating the household relationship of the person (head, wife, dependent, or other person over 18) employed in farmwork and the duration of his or her employment at farmwork and the income earned. Descriptors—Bilingual Education, Change Strategies, \*Conference Reports, Court Litigation, Data Bases, \*Equal Education, \*Lawyers, Legal Aid, Mexican Americans, \*Minority Groups, Puerto Ricans, Summative Evaluation, \*Teachers

Identifiers—New Mexico (Albuquerque)

Sponsored by the National Task Force de la Raza, the conference was attended by prominent lawyers and educators from throughout the United States. The conference was an "exploratory" or "brainstorming" session, designed to identify key issues and to lay the groundwork for techniques and strategy of dealing with various problems. Purpose of the conference was to: (1) review various legal, administrative, and legislative actions having serious implications on the concept of quality and equal education for the culturally and linguistically distinct child; (2) assess the implications and impact of activities and trends against Equal Educational Opportunity for minority groups, particularly the Mexican American and the Puerto Rican; and (3) identify lines of legal and education action and strategy needed to combat such alleged discriminatory practices. This report summarizes the key concerns, issues, actions, and recommendations of the participants. Topics summarized are: general myths to be combatted; educator-lawyer interface needs; data base system; bilingual bicultural dichotomy; equal access vs equal benefits; compensatory assumption; the Lau Case and its implications; and the tangential suggestions. Descriptors—Attitudes, Biculturalism, \*Bilingual Education, Data Analysis, \*Formative Evaluation, \*Institutes (Training Programs), \*Mexican Americans, Participant Characteristics, Participant Satisfaction, \*Summative Evaluation

Identifiers—\*New Mexico (Albuquerque)

A Formative Evaluation Questionnaire and a Summative Evaluation Questionnaire, developed specifically to assess the Institute's goals and objectives, were administered to the participants. Administered midway through the Institute, the 13-item Formative Evaluation Questionnaire was composed of 2 parts designed to secure information about their: (1) sex, employment status, participation in bilingual bicultural programs, and description of the program; and (2) reactions to

the Institute. There were 220 responses. The Summative Evaluation Questionnaire, which was given at 2 different times, consisted of 15 items designed to secure information about their ethnic identification, employment status, and reaction to the Institute. There were 190 responses. Items in each questionnaire were analyzed individually. In analyzing the 2 surveys findings, it was found that the respondents were indicating the significant expectations for Bilingual Bicultural Education. This paper gives: (1) the item as it appeared on the questionnaire, (2) an item frequency selection from a computer print out showing how the respondents answered, (3) a narrative of the item's purpose, and (4) an analysis of the results. Descriptors—Economic Development, Employment Opportunities, \*Federal Aid, \*Industrialization, Labor Force, Labor Market, Leadership, Negroes, Planning, \*Policy Formation, Program Coordination, Rural Areas, \*Rural Development, Social Services, \*Southern States

Identifiers—\*Economic Development Administration, EDA

Incorporating field studies and literature reviews, 2 cities and 2 towns in Mississippi and South Carolina were investigated to determine the socioeconomic impact of Southern rural industrialization and to aid the Economic Development Administration (EDA) in developing policy relative to allocation of funds. Visiting each town/city 3 times and employing open-ended interview techniques, interviewing included officials; plant and personnel managers; formal institution representatives; knowledgeable not representing institutions; employed and unemployed industrial workers and unemployed adults lacking industrial experience; and State and Federal agency representatives. Based on the findings, major policy recommendations were: (1) selected small towns found to act as large labor market centers should be included in EDA's growth center development scheme with top priority given to identifying and developing labor force potential and developing employment; (2) if Negroes are to be affected, current industry subsidization schemes should be replaced by labor (wage) subsidies administered at higher than local level; (3) better comprehensive programs and more program coordination is needed in towns receiving EDA assistance; and (4) leadership and planning capability must be improved within centers and funds should be devoted to this within Development District programs. Descriptors—Asian Americans, Attitudes, \*Cross Cultural Studies, Demography, \*Economically Disadvantaged, Economic Factors, \*Ethnic Groups, Females, Metropolitan Areas, Mexican Americans, Mexicans, Migrant Workers, Negroes, Poverty Research, \*Residential Patterns, Rural Farm Residents, Social Structure, \*Spanish Speaking, Values

Data which taps aspects of traits said by Oscar Lewis to comprise a "culture of poverty" were examined for poor and non-poor families varying in ethnic background and residence. Before comparing the incidence of poverty culture across ethnic and residence lines, the question "Do alleged poverty culture traits become more pronounced as level of economic deprivation increases?" was studied. Derived from the sample obtained by 7 states participating in the NC-90 project, the following populations were represented: metropolitan whites; non-metropolitan small town whites; rural farm and nonfarm whites; metropolitan blacks; village and small urban place blacks; metropolitan Spanish-speaking (primarily Mexican American and Puerto Rican); migrant labor camp Spanish-speaking (Mexican Americans); migrant labor camp Spanish-speaking (Mexican nationals); metropolitan Hawaiian Orientals; metropolitan Hawaiian "mixed ethnics"; and metropolitan Polynesians. Data, obtained through interviews with the main female homemaker, pertained to demography; family resource procurement and expenditure; social structure and activities of the family, both internally and within the community; and the homemaker's value-orientations regarding education and employment. Findings indicated that, on some indicators of some traits, sizeable differences existed among ethnic and/or residence categories. (NQ)

**When Is the Grass Greener? Divergent Perceptions of Community in Three Small Colorado Towns.**

Louisiana State Univ., Baton Rouge. Agricultural Experiment Station.

Spons Agency—Cooperative State Research Service (DOA), Washington, D.C.

Report No.—LAES-W-118

Pub Date Aug 75

Note—34p.; Paper presented at the Rural Sociological Society Annual Meetings (San Francisco, California, August 1975)

**EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage**

Descriptors—\*Adolescents, \*Adults, Age, \*Community Attitudes, Community Characteristics, High School Students, Leisure Time, \*Perception, Population Growth, \*Rural Population, Social Attitudes

Identifiers—\*Colorado

Adolescent and adult evaluative reactions to their community situation were examined in 3 small Colorado towns. Empirical focus was upon delineating specific community aspects which evoke differential perceptions between subgroups within and across community settings. Del Norte, Aspen, and Craig, Colorado were selected as the research sites because each: (1) was relatively small (under 5,000 population) and isolated from larger urban areas, (2) was not economically dependent upon a single source of revenue, (3) was the governmental seat of their respective counties, and (4) had experienced divergent rates of growth in the past decade. Data were obtained in 1971 from surveys of 265 adults and 179 high school students. The junior class from each of the community high schools comprised the adolescent sub-sample, while random sampling procedures provided the adult sub-sample. Some findings were: (1) data indicated strong support for the suggestion that adolescents and adults

diverge in their evaluative responses to their community situation; (2) adolescents reacted, overall, substantially less positively toward their present communities than their adult neighbors; (3) students in Del Norte and Craig responded markedly lower in evaluations than did Aspen students. (NQ)

Descriptors—\*Consolidated Schools, Costs, Curriculum, Demography, Educational Equality, Evaluation, \*History, Literature Reviews, Migration, Negroes, Policy Formation, \*Rural Schools, \*Rural Urban Differences, \*Social Change, Southern States, Tables (Data)

Identifiers—\*Rural Urban Migration

Utilizing statistical documentation from a variety of sources, this report traces the history of rural schools and the consolidation movement via a review of the literature. Attention is devoted to: (1) the early rural school (beginning in 1647 with Massachusetts); (2) schools in the South (emphasis on private instruction); (3) the effect of changes in rural life on rural schools (contact with urban centers and most particularly the influence of rural to urban migration); (4) the contrast between urban and rural schools (inequities in facilities, teacher preparation, per pupil expenditures, curriculum, school term length, and the education of Negroes); (5) genesis of the consolidation movement and its advantages (better equipped teachers and schools, better curriculum, improved roads for transportation, extracurricular activities, competition, etc.); (6) types of consolidation plans (township, multiple-district county, and county organization); (7) effects of school consolidation (advantages vs disadvantages); (8) policy implications (how school/community organizations can respond to community interests, education for rural/urban living can be responsive to social change, how rural education programs can be designed to meet needs of all students, and how inequities can be resolved between educational opportunities in rural and urban areas). Descriptors—\*Annual Reports, Community Coordination, Comprehensive Programs, Decision Making, \*Educational Change, Educational Objectives, Evaluation, \*Experimental Programs, Experimental Schools, Planning, Research Methodology, \*Rural Schools, \*Small Schools

The first in a series of annual interim reports on the federally funded Experimental Schools (ES) program, this report describes the first 2 years of a 6-year research program designed to promote locally-initiated comprehensive educational change dependent upon community participation, with provision for systematic documentation and evaluation. Focusing on the 1972-73 planning stages and the 1973-74 implementation procedures of 10 small rural school districts, chosen via nationwide competition, this report: (1) traces the beginnings of the ES program and presents research procedures for program documentation and evaluation; (2) presents background material on the 10 sites; (3) defines the individual goals of the 10 school districts, summarizes and compares the most significant proposals for change, and delineates common plans for educational progress and problem solving; (4) describes and analyzes the amount of im-

plementation achieved by the 10 school districts (initial findings and suggestions of tentative patterns); and (5) examines community and school characteristics associated with tentative findings (the planning process, the desire and impetus for change, the amount of experience with educational change in the district's organization, the commitment of district leaders, and the centralization/coordination of the decision making process). Descriptors—Case Studies, Census Figures, \*Correlation, Decision Making, Employment, \*Industrialization, Literature Reviews, \*Migration, Policy Formation, \*Population Trends, \*Rural Areas

Identifiers—\*Arkansas, Urban Rural Migration

Utilizing available 1966 statistical data and U.S. Census figures, the State of Arkansas was examined for purposes of analyzing: (1) the extent to which recent population gains in states such as Arkansas and Oklahoma is occurring in rural areas rather than as an extension of urbanization; (2) the extent to which U.S. manufacturing is beginning to deconcentrate by moving to rural areas outside the main manufacturing areas; and (3) the relationship between population gains in ostensibly rural areas and industrial location trends. Examination of migration patterns, employment variables, and industrial patterns revealed a net immigration into 17 rural counties which had previously experienced population losses (1950-60) and a predominance of low wage/low skill industry in these counties. It was concluded that subsequent research might focus on: (1) barriers to industrialization (decreasing supplies of easily trainable labor, shortages of skilled labor, poor schools, unsophisticated community leadership, poor transportation facilities, underdeveloped amenities, and poor images) and (2) the "filtering down" process, wherein manufacturers rely on the existence of pools of low wage, surplus labor and have to move out of areas as the surplus disappears via competition with other, higher wage employers. Report No—USDA(CSRS)-S-81

Pub Date 23 Aug 75

Note—21p.; Paper presented at the Annual Meeting of the Rural Sociological Society (San Francisco, California, August 23, 1975)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*Academic Achievement, \*Academic Aspiration, Caucasians, \*Correlation, High School Students, Longitudinal Studies, Negroes, Racial Differences, \*Rural Youth, Sex Differences, Socioeconomic Status, \*Southern States, Young Adults

The correlation between educational aspiration and educational achievement was investigated in 6 Southern states via a longitudinal study (1965-1972). Approximately 1,200 rural youth, stratified by race, sex, and socioeconomic status, were contacted when sophomores, when seniors, and when 4 years beyond high school graduation. Findings revealed that: (1) the majority of the sample had completed no post-high school training; (2) white youths were more likely than nonwhite youths to have completed academic programs, while nonwhite youths were somewhat less likely to have completed any post-high school training and if they had, it was most often of a technical nature; (3) about 21 percent of the youth from the upper socioeconomic strata had completed college as compared to 10 percent and

8 percent of those from the middle and lower strata; (4) men were somewhat more likely than women to have completed some type of post-high school education, but women were slightly more likely to have attained higher education levels; (5) of the young adults who had not completed post-high school education, only 25 percent were enrolled in an educational program at the time of the interview; (6) high school aspirations far exceeded post-high school achievement (only 23 percent of the respondents had achieved or equaled their goals); and (7) aspirations remained high despite achievement level. Descriptors—Age, Census Figures, \*Comparative Analysis, Females, Immigrants, Males, \*Migration, \*Population Distribution, Residential Patterns, \*Rural Areas, Rural Urban Differences, \*Senior Citizens

Identifiers—\*North Carolina, United States

Analyzing selected data on North Carolina's aged population (65 and over), this report utilizes U.S. Census figures, providing tabular data on the migration of the aged and the distribution of the aged population by residence in North Carolina and the U.S. and by North Carolina counties (rural and urban places). Major findings reveal that North Carolina: (1) contains smaller proportions of the aged than the nation as a whole; (2) belongs in a group of 31 states in which the rural population contains a higher proportion of those aged 65 and over than does the urban; (3) has an aging population that lags behind that of the U.S.; (4) has 34 counties with centers of less than 2,500; (5) has a higher proportion of the aged in urban sectors of less than 25,000; (6) has a variance in the proportions of the aged in urban sectors of more than 25,000; (7) has, like the U.S., a strong tendency for places of 1,000 to 2,500 to contain the largest proportions of aged people; (8) has a proportional distribution of aged lowest in the rural-nonfarm areas, intermediate in the urban areas, and highest on farms; (9) has more females than males in small places; (10) has a larger proportion of females in the rural population; and (11) has experienced a net gain of 12,000 elderly as a result of migration and has had more elderly female immigrants than male during the 1960-70 decade. **The Social Worker in the Rural Community Mental Health Center.**

Spons Agency—National Inst. of Mental Health (DHEW), Bethesda, Md.

Report No—MH18958

Pub Date 75

Note—37p.; Paper presented at the Rural Sociological Society Annual Meetings (San Francisco, California, 1975)

EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage

Descriptors—Attitudes, \*Behavior Patterns, Comparative Analysis, Identification (Psychological), Medical Services, \*Mental Health Clinics, Philosophy, \*Role Perception, \*Rural Areas, Rural Urban Differences, Social Services, \*Social Workers, Standards, Surveys

Investigating the role of the social worker in rural Community Mental Health Centers (CMHC), 20 CMHC and 595 community mental health workers were surveyed, including 140 social workers distributed in inner city (47), urban (9), urban-mixed (38), rural-mixed (29), and all-rural (17) catchment areas. Analyzed by center type and worker discipline, responses were compared in terms of the following variables: (1) Community Mental Health Ideology (endorsement); (2) Organizational Perception of CMHC (medical facility mode vs social service mode); (3) Professionalism; (4) CMHC Role Activism (role behavior response to 18 vignettes); (5) Personal-Professional Role Activism; (6) Role Dis-

crepancy (CMHC's expectations vs social workers'); (7) Two Role Exclusion (perceived scope vs limitations). Findings indicated: (1) inner city and rural social workers most highly endorse CMHC ideology; (2) rural social workers, more than any others, view their CMHC as a social agency organization; (3) rural social workers, in contrast to others, perceive their organizations as expecting greater activism in their roles; (4) inner city social workers are most activist in role definition, while rural workers occupy a more modal position; (5) rural social workers perceive their CMHC's as expecting the fewest areas of community life to be excluded. The Functional Community and Rural Parish Organization.

Christian Rural Research and Resource Service, Debert (Nova Scotia).

Pub Date 21 Aug 75

Note—23p.; Not available in hard copy due to marginal legibility of original document. Paper presented at the Annual Meeting of the Rural Sociological Society (San Francisco, California, August 21-24, 1975)

Available from—Christian Rural Research and Resource Service, R.R.1, Debert, Nova Scotia (\$0.75)

EDRS Price MF-\$0.76 Plus Postage. HC Not Available from EDRS.

Descriptors—\*Churches, Church Programs, \*Community Coordination, \*Models, \*Organizational Change, \*Rural Areas, Sociology Identifiers—\*Functional Community, Nova Scotia A United Church of Canada research project attempted to determine whether the "functional community" concept was a viable basis for restructuring congregations for rural ministry in Colchester County, Nova Scotia. Research documented the functional community concept via socioeconomic variables such as social and political history, economic structures and labor patterns, community contacts, etc. Findings revealed that the villages were functioning as one community, but the churches were competitive and in many respects "dysfunctional." Based on the research, suggested alternative forms of parish organization included: (1) the Group Ministry Model (two or more denominations working together in a loose structure under guidance of a lay council); (2) the Cluster Model (the entire functional community under one overall planning committee via a steering committee made up of each professional leader and congregational representatives); (3) the Area Ministry Model (similar to Cluster Model with a specified geographical functional area, ministers and laymen working together as a team, a discovery process for area needs and remediation, and continuing education for clergy and laity); (4) the Pastoral Zone Model (a central staff, a pastoral zone planning council and council, congregational units, and neighborhood groups). Report of the Michigan Interim Action Committee on Indian Problems.

Michigan State Interim Action Committee on Indian Problems, Lansing.

Pub Date Mar 71

Note—40p.

EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage

Descriptors—\*American Indians, \*Economic Development, \*Education, \*Employment, \*Health, Needs, Policy Formation, Programs, Statistical Data

Identifiers—\*Michigan

Stressing the importance of American Indian involvement in affairs affecting Michigan's Indian population, this report by the Interim Action Committee on Indian Problems presents recommendations relative to education, employment, health, and the Commission on Indian Affairs. Recommendations for the commission emphasize: leadership at the local, State, and Federal levels; educational program development; welfare eligibility information; legal education; budgetary responsibilities; priority programming, on-going evaluations, etc. Health recommendations focus on remedial actions pertinent to: infant mortality rates, adult death rates, malnutrition, alcoholism, the training of professional Indian health workers, etc. Employment recommendations call for: inservice training of Michigan Concentrated Employ-

ment Programs" (MCEP) staff, revision of the Bureau of Indian Affairs' relocation procedures, coordination between program development and the Intertribal Councils of Michigan, etc. Economic development recommendations focus on land use and industrial development and skill training in specific nonreservation areas. Educational recommendations call for a needs assessment, an Indian Education Staff in the Department of Education and an Indian Education Committee to advise the State Board of Education, a 5-year reading literacy goal, etc. (JC)

Descriptors—Academic Achievement, \*Anglo Americans, Comparative Analysis, Income, Latin American Culture, \*Metropolitan Areas, \*Minority Groups, Models, Negroes, Occupations, Puerto Ricans, Racial Differences, Social Stratification, \*Socioeconomic Influences, \*Spanish Culture

Utilizing data for blacks, Mexican Americans, Puerto Ricans, and other Spanish heritage Americans, a model of urban differentiation was evaluated. Building on recent research of black-white patterns, the model related some structural characteristics of metropolitan areas (manufacturing employment, the presence of two important minorities, recent increases in the size of a minority, population size, and region) to educational, occupational, and income differentiation. The overall results suggested the model's utility. Differentiation in 1970, measured by the index of dissimilarity between two percentage distributions, was highest between Puerto Ricans and Anglos in the Middle Atlantic states and between blacks and Anglos in the South. Four separate analyses indicated the importance of occupational differentiation and particularly educational differentiation in influencing income differentiation. The regional analyses showed manufacturing employment to be particularly important in lowering black-Anglo differentiation; percent black in lowering Puerto Rican differentiation (in contrast to expectations about the impact of interminority competition); percent Spanish heritage minority in raising Latino-Anglo differentiation in the Southwest (an index of Anglo gains from Latino subordination); and area population size in lowering Latino-Anglo differentiation elsewhere. The Condition of Farmworkers and Small Farmer in 1974. Report to the National Board of the National Sharecroppers Fund/Rural Advancement Fund.

National Sharecroppers Fund / Rural Advancement Fund, Washington, D.C.

Pub Date [75]

Note—15p.; For related document, see ED 092 281

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*Agriculture, \*Agricultural Laborers, \*Economic Disadvantage, \*Farm Labor, Farm Labor Legislation, Health, Housing Needs, Migrant Workers, \*Rural Population, Sharecroppers, Welfare Problems

The number of farms in rural America continued to decline. In 1974, 23,420 farms went out of business. Farm subsidy payments, originally designed to assist small farmers, contributed little to the survival of the small farmer. The 1974 increased costs in fuel and fertilizer alone reduced net farm income by \$5 billion—approximately a \$2,500 reduction in net income per farm. Although farm prices declined during 1974, prices paid by consumers at the supermarket continued to climb. Yet, the farmer received less than 41 cents of every food dollar spent by consumers. Evidence showed that market concentra-

tion (the lack of competition) led to higher food costs. Agribusiness not only contributed to increased food costs but threatened the existence of the independent farmer as well. Nearly 25 percent of all food production was "vertically integrated" through outright corporate ownership or through contracts. Farmworkers also suffered from low wages, seasonal work, limited coverage under protective labor legislation, increased mechanization, poor education, and critical health and housing needs. However, organizations such as the National Sharecroppers Fund, farmer and craft co-ops, and land-reform groups are working on these problems, showing that reform and revitalization in rural America are possible. Descriptors—\*Agricultural Laborers, \*Employment, Employment Statistics, \*Farm Labor, Income, Labor Force, Manpower Utilization, \*Migrant Workers, Seasonal Laborers, \*Statistical Data, Wages

Information is given on the number, characteristics, employment, and earnings of persons 14 years of age and over who performed hired farm wage work at any time during 1974. The brief analysis highlights some of the most pertinent changes and trends in the size and composition of the hired farm working force. Data were obtained through a survey conducted by the Bureau of the Census as a supplementary part of its monthly Current Population Survey made in December 1974. In 1974, there were approximately 2.7 million persons in the hired farm working force. The annual employment of farmworkers appeared to have become stable after the long-term downward trend of prior years. Generally, hired farm wage workers were young (median age 23 years), white (83 percent), male (79 percent), and resided in nonfarm places (76 percent). They earned an average of \$1,447 in annual cash wages, or \$16.60 per day for 87 days of farm wage work. Approximately 1.6 million workers were employed solely in farm work during the year; the remaining 1.1 million performed both farm and nonfarm work. About 209,000 (8 percent) of the total were migratory farmworkers in 1974, the third consecutive year of increase. Annual earnings for these workers averaged \$1,688, or \$21.60 per day for 78 days of farmwork. Forty-nine percent of all migrants were employed only in farmwork during the year. (Author/NO)

The American Indian population is in a period of transition. It is young, growing, and becoming more urban. There were some improvements in income, housing, education, and health in the 1960-70 decade, but Indians remain the most disadvantaged of the minority ethnic groups in the United States. By most of the above measures, Indians, especially rural Indians, are not as well off as the U.S. population as a whole. But the Indian people are moving toward self-determination, or self-government, in programs to enhance their lives. Both excessive paternalism and termination of the trust relationships have become discredited as national policy regarding Indians. As the Pre-

sident's Message of 1970 states, "Federal termination errs in one direction, Federal paternalism errs in the other." It is also widely accepted that the integrity of the Indian culture should be preserved, not only as a contribution to cultural pluralism which enriches society as a whole, but also as a reflection of the desires of the Indian people themselves. The Indian culture is in a transition period, but the roots of Indian customs and values are deep and will not yield quickly or easily to alien customs and values. The process of moving toward self-determination is underway, and some measure of change is in the Indian picture today. (Author/NQ)

**Differences in Housing Credit Terms and Usage Between Metro and Nonmetro Areas in the United States, 1971. Agricultural Economic Report No. 305.**

Economic Research Service (DOA), Washington, D.C. Economic Development Div.

Report No.—AER-305

Pub Date Aug 75

Note—26p.

EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage

Descriptors—\*Agency Role, \*Consumer Economics, \*Credit (Finance), Federal Aid, \*Financial Services, \*Housing, Interest, Metropolitan Areas, Rural Areas, \*Rural Urban Differences, Statistical Data, Urban Areas

In 1971, a U.S. Census of Housing surveyed the financing of homeowners and rental properties, including characteristics of mortgages, properties, and homeowners. Data were obtained on places located outside Standard Metropolitan Statistical Areas (SMSA) and in places of less than 10,000 population, and on rural areas located outside SMSA's. These area classifications were considered as being close approximations to the "rural area" defined in the 1949 Housing Act. Areas classified as SMSA's were considered proxies for urban areas. To determine rural-urban differences, a comparative analysis was made of data contained in the survey on credit terms and usage in SMSA's, in non-SMSA's, and in places of less than 10,000 population and rural areas located within the non-SMSA counties. Analysis showed home buyers in rural areas paid higher interest rates on conventional mortgages, had shorter repayment periods, and had fewer choices of lenders. Yet, credit conditions did improve during the 1960's in rural areas. Savings and loan associations, the major home mortgage lenders, became more active in rural areas. They held 35 percent of the first mortgages in 1971 as compared with 23 percent in 1960. Expansion of activities by Federal agencies in rural areas tended to narrow the gap between the percentage of loans guaranteed and insured in rural areas as compared to metro areas. (Author/NQ)

Brady, Guy, Jr.

**The Economic Impact of Industrialization on a Rural Town Economy; Wynne, Arkansas.**

Pub Date 74

Note—104p.; Master of Science Thesis, University of Arkansas

Available from—Inter-Library Loan, University of Arkansas, Fayetteville, Arkansas

Document Not Available from EDRS

Descriptors—Change Strategies, City Government, \*Community Development, \*Economic Factors, Employment Opportunities, \*Industrialization, Labor Force, Migration, Rural Areas, \*Rural Development, School Systems, \*Socioeconomic Influences, Utilities

Identifiers—\*Arkansas (Wynne)

The study investigated the economic impact of industrialization on the public and private sector of the community of Wynne, Arkansas. In the private sector, income, job opportunities and employment shifts, migration, commuting, and employee characteristics (age, sex, and education) were studied. In the public sector, the city government's individual departments and the public school system were examined. Changes in total income, per capita income, and expenditures were considered. Public municipal utilities and services were also studied to determine changes in the quality of services received by residents. The time period from 1960 to 1970 was chosen because of difficulty in obtaining data

prior to 1960. When possible, 1971 and 1972 figures were used instead of 1970 or to complement the 1970 figures. Primary data were obtained through personal interviews with city officials, local community leaders, and plant managers; from city, county, and state records; and through personal questionnaires distributed to employees of the local factories either by mail or through the plant's payroll system. Secondary data were obtained from state agencies and the University of Arkansas Library. Some findings were: the factories did contribute to reducing the area's unemployment; the total and per capita municipal real revenue received by Wynne increased substantially from 1960 to 1970; and the school system's revenue increased greatly during the study period. Descriptors—\*College Science, Doctoral Theses, Educational Research, Higher Education, \*Instruction, Lecture, \*Physics, \*Science Education, Teaching Styles, \*Verbal Communication

Identifiers—Research Reports

This study was proposed to determine the occurrence, stability, and character of kinetic structure patterns within college physics lessons. Six lectures were randomly chosen from the schedules of each of six cooperating physics professors and a transcription of audio-tape recordings of each lecture was prepared. The flow of discourse was broken into discrete "thought-segments" known as discourse units. Within each discourse unit substantive terms or phrases known as verbal elements were determined. Three parameters of structure were identified in the lectures: (1) commonality, the degree to which contiguous statements of discourse contained common verbal elements; (2) progression, the degree to which the substantive content of a discourse statement diverges from that in the immediately preceding statement; and (3) theme activity, the degree to which discourse centers about central "theme" elements. A range of distinct modes of verbal organization was revealed among the cooperating professors. Statistically significant differences in structure were found between lectures on similar substantive material presented by different professors, whereas no significant differences were observed

between lectures on different topics presented by the same professor. (Author/MLH)

Descriptors—\*Biology, \*Curriculum, Doctoral Theses, Educational Research, \*Instruction, Public Schools, Science Education, Secondary Education, \*Secondary School Science, \*Surveys, Teacher Characteristics

Identifiers—\*Mississippi, Research Reports

This study was primarily concerned with the status of biology education in a select sample of public high schools in the state of Mississippi and how that status related to selected aspects of the status of biology education in the nation as a whole and to certain recommendations of authorities in the field for an optimal biology program. The major areas surveyed were: (1) personal characteristics of biology teachers, (2) equipment and facilities, (3) offerings and enrollment, and (4) curriculum and instruction. The results of this study indicated that Mississippi biology teachers, as represented by the total study population, were similar to science teachers in the nation as a whole as far as age, sex, teaching experience, and teaching loads were concerned. All schools in the total study population offered first-year biology courses of the more traditional type, as did most schools in the nation. Only a few schools offered a second-year biology course. Only a few schools indicated any type of curriculum change within the past 10 years. Less than 10 percent taught BSCS courses; the majority of courses offered were traditional. On the average, biology facilities and equipment were inadequately provided by the schools represented in this study. (Author/MLH)

Descriptors—\*Computer Assisted Instruction, Doctoral Theses, \*Educational Games, Educational Research, Game Theory, \*Instruction, Learning Activities, Science Education, Secondary Education, \*Secondary School Science, \*Simulation

Identifiers—Research Reports

This study investigated the development and evaluation of a computer-augmented science learning game model, through the implementation of a specific game derived from the game model. Formative evaluation strategies were synthesized from two existing evaluation procedures and were tested and applied to the learning resource under development. As a result of the evaluation, a valid game model was developed, which incorporates the four functions the investigator has indicated are essential to create a nontrivial learning resource. The functions of the learning resource include: (1) promote a responsive environment; (2) enhance direct interaction through computer-augmentation; (3) create an autotelic resource; and (4) allow the student to explore the processes of scientific inquiry and reinforce the student's scientific knowledge. Through the implementation of the game model, it was found that the specific game created a learning environment. On several occasions, students went back to their classroom and performed an experiment under the same conditions as given in the simulation, thereby initiating inquiries on their own. This was an unexpected outcome. The second outcome, which was anticipated, was a significant difference between

control and experimental groups' posttest means on the questions related to the inquiry objectives in favor of the students who played the game. (Author/MLH)

Descriptors—\*Chemistry, \*Computer Assisted Instruction, Doctoral Theses, Educational Research, Laboratory Experiments, \*Physics, Science Education, Secondary Education, \*Secondary School Science, \*Simulation  
Identifiers—Research Reports

This study investigated the feasibility of using computer-simulated experiments in high school physics and chemistry. Fifteen sections of students enrolled in high school physics and chemistry were randomly divided into experimental and control groups. A series of 10 experiments was done by use of computer simulation in the experimental group; whereas the control group carried out the investigation with traditional laboratory equipment. Achievement tests were given over each of the experiments. Pretests and posttests were used to determine attitudes toward the subject, laboratory work, and computer as a laboratory aid, and toward using a computer terminal. Findings of the study included: (1) the attitudes of the two groups toward the subject and toward laboratory work were not significantly different before the experiment or after the experiment; (2) at the start of the experiment, the experimental group's attitude toward the computer as a laboratory aid was not significantly different from the attitude of the control group; (3) at the close of the experiment, the experimental group's attitude toward the computer as a laboratory aid was significantly more positive than the attitude of the control group; and (4) the achievement test mean scores for the two groups were not significantly different. The Development and Assessment of an Experimental Teacher Training Program for Beginning Graduate Assistants in Chemistry.

Pub Date 72

Note—135p.; Ph.D. Dissertation, The Ohio State University

Available from—University Microfilms, 300 North Zeeb Road, Ann Arbor, Michigan 48106 (Order No. 73-2083, MF-\$5.00, Xerography-\$11.00)

Document Not Available from EDRS

Descriptors—\*Chemistry, \*College Science, Doctoral Theses, Educational Research, Higher Education, \*Inservice Programs, Interaction Process Analysis, Science Education, \*Teacher Education, \*Teaching Assistants  
Identifiers—Research Reports

In this study a training program for new teaching assistants in freshman chemistry was developed and assessed. All new assistants in the Freshman Division were assigned by a stratified random technique to either the control or treatment group, with the latter receiving inservice training in the skills of teaching recitation classes. This training consisted of seminars, videotaped microteaching sessions, and inclass observations by and individual conferences with the author. The participants in both groups were observed before significant instruction of the treatment group and twice after the training program was concluded. An audio recording was made of each classroom observation and the verbal behaviors of teacher and students were encoded by the Flanders Interaction Analysis Category System and the Question Category System for Science. The data thus obtained were submitted to a two-way analysis of variance and a 90 X 90 Pearson product moment correlation matrix. A conservative interpretation allowed the following statements: (1) the training program appeared to provide assistants who were more successful in drawing students into the verbal activity of the classroom; (2) the program provided assistants who

lectured less and used more techniques of praise or encouragement; and (3) the program provided assistants who asked a greater number of questions. (Author/MLH)

Identifiers—Physical Science Study Committee, PSSC, Research Reports

The purpose of this study was to develop and evaluate an instructional model which utilized the computer to produce individually prescribed instructional guides in physics at the secondary school level. The sample consisted of three classes. Of these, two were randomly selected to serve as the treatment groups, e.g., individualized instruction and traditional instruction. The third classroom served as the control group. An orientation phase of 12 weeks duration was utilized to enable the students in the experimental group to become accustomed to techniques unique to the individualized instruction. At the conclusion of the orientation phase, an achievement test was administered which served as a pretest. During the treatment phase, two chapters from PSSC were selected for the instructional content. Attitude and post-achievement tests were administered at the end of the treatment. The data were analyzed by using analysis of covariance, chi-square, and multiple correlation. The results indicated no significant differences in achievement levels of students receiving different treatments. The number of objectives mastered was significantly increased by utilizing individualized instruction. The attitude toward the course of physics did not change significantly after receiving individualized instruction. (Author/PS)

Identifiers—Research Reports

This study was designed to compare the effectiveness of inductive and deductive programmed instruction for high school students. The sample was formed from high school chemistry students in three schools. In two of the schools, the students worked on the programmed materials on four consecutive days and were tested on the fifth day. At the third school, the students were given two hours a week on the programmed material, and thus the instruction was spread over three weeks. The content of the two types of treatment materials was selected to be chemical equilibrium. The same task analysis, behavioral objectives and number of learning frames were included in the two types of materials. Two criterion tests were administered to assess success on and retention of the programmed materials. Several other tests relating to reading and algebraic ability, creativity, personality factors, and cognitive style were administered to students. Analysis of variance indicated no significant difference in the

students' success or retention on either program. Sex, cognitive style, and creativity were not significantly related to students' success. Reading ability, algebraic skills, and most of the personality factors had a significant effect on the students' success on the programs. (Author/PS)

Identifiers—\*Ausubel, Research Reports

This study is an empirical investigation of Ausubel's paradigm of meaningful learning, applied specifically to the learning of high school physics students. In the first phase of the study path analysis and multiple regression techniques were used to describe the Ausubelian learning variables: available relevant ideas in learner's cognitive structure, the meaningful learning set of predisposition of a learner to relate concepts meaningfully, and the extent of meaningful learning that has taken place. Several background variables were also studied for their effect on learning. In the second phase, the effects of two instructional treatments on meaningful learning and their respective interaction with two corresponding Ausubelian cognitive variables were studied. In the third phase, three retention tests were administered at intervals. The analysis of data revealed evidence for a major role of relevant cognitive content in meaningful learning. An additional factor found to be significant in the learning process was the ability to relate ideas meaningfully. Two different instructional treatments did not significantly increase scores on a measure of meaningful learning. High scorers in measures of meaningful learning set and relevant cognitive content displayed greater initial learning and more stable retention, but not faster retroactive facilitation of the material learned. The findings of the study lend qualified support to Ausubel's model of meaningful learning. (Author/PS)

Descriptors—\*Concept Formation, Doctoral Theses, \*Educational Research, Elementary Education, \*Elementary School Science, Learning, \*Learning Theories, Matter, Science Education, \*Scientific Concepts  
Identifiers—\*Piaget (Jean), Research Reports

The study was designed to determine if chronological age is the main factor in a child's ability to develop a particulate concept of matter. Four demonstrations were organized which consisted of a graded series of particle mixing, gas diffusion, dissolving and smoke investigations. The individualized interviews with children were tape recorded. On the basis of interpretation of the children's responses, it was discovered that children under ten years seemed unable to develop such an abstract conceptualization. An interstage transitional "readiness" was found in ten-, eleven-, and some twelve-year-olds indicating that the full concept requires the Piagetian formal operational stage before behavioral recognition can be made. Factors such as ethnic background, type of school community, sex or basic interest seem not to be significant in the concept development. (Author/PS)

Identifiers—\*Introductory Physical Science, IPS, Research Reports

This study was designed to assess the teacher verbal role behavior of Guided Discovery/Inquiry before and after an in-service workshop. The sample consisted of 24 junior school teachers, who were teaching Introductory Physical Science (IPS) materials and traditional materials (non-IPS). Three IPS and five traditional teachers were randomly assigned to a one-day in-service workshop treatment group (TRT) and the other 16 teachers served as control group (non-TRT). Three pre-observations of one hour each, using the Ribble and Schultz Social-Substantive Schedule II, were systematically recorded for each teacher in both TRT and non-TRT groups. Following the workshop, all the teachers (TRT and non-TRT) were post-observed to assess any measurable changes in the verbal role behavior of the TRT teachers. The findings showed that no IPS teacher exhibited in the pre-observations the verbal role behavior of Guided Discovery/Inquiry. The in-service workshop was not totally effective in changing the verbal role behavior for TRT and non-TRT teachers. The TRT group showed significant changes toward eliciting more questions from the total class and developing an atmosphere with fewer teacher reproving/defensive behaviors for freer volunteer responses from the students. Teaching experience (more than nine years) was related to reduction in teachers' reproving/defensive behaviors in classrooms. (Author/PS)

Identifiers—Research Reports

This study was designed to assess the effects of the problem-oriented method compared to those of the traditional approach in general chemistry at the college level. The problem-oriented course included topics such as air and water pollution, drug addiction and analysis, tetraethyl-lead additives, insecticides in the environment, and recycling of wastes. The traditional course included topics such as chemical composition, gas laws, solutions, and acids and bases. A total of 67 students formed the control group, with 71 students in the experimental group. A battery of instruments was administered at the beginning of the courses and toward the end of the semester. No significant differences were found on the criteria of achievement and the critical thinking scores. A significant positive difference was found on the criterion of attitude change toward the

course for the experimental group. Further analysis involved partitioning scores based on high school chemistry background. No significant differences were found regardless of the type of courses on any of the three criteria among students with a high school chemistry background and among students with no high school chemistry background. A Study of Science Instructors in the Junior and Community Colleges.

Pub Date 72

Note—165p.; Ed.D. Dissertation, Indiana University

Available from—University Microfilms, 300 North Zeeb Road, Ann Arbor, Michigan 48106 (Order No. 73-10,816, MF-\$5.00, Xerography-\$11.00)

**Document Not Available from EDRS**

Descriptors—\*College Science, College Teachers, Doctoral Theses, Educational Research, \*Junior Colleges, \*National Surveys, School Surveys, \*Science Education, Sciences, Science Teachers, \*Teacher Background, Teaching Load

Identifiers—Research Reports

The purpose of this study was to investigate the duties and work load, formal education, experiential background, and job mobility of instructors of physical and biological sciences in publicly-supported junior and community colleges. The survey instruments were returned by 366 instructors in 70 institutions in 31 states. Among the findings were: Teaching loads usually consisted of more than ten credit hours per term and required two to three preparations; certification was seldom required; the master's degree was most frequently reported as the highest earned degree; and most respondents expected to remain in their present teaching positions indefinitely. On the basis of the data, the following main conclusions were drawn: (1) science faculties may be philosophically more closely tied to high school than to higher education; (2) absence of in-service education seemed to be the rule, and the effectiveness of those programs which existed was questionable; and (3) there is little likelihood of obsolescent scientific knowledge among science instructors. (Author/PS)

University Teaching: The Impact of an In-Service Program for Teaching Fellows in Chemistry.

Pub Date 72

Note—229p.; Ph.D. Dissertation, The University of Michigan

Available from—University Microfilms, 300 North Zeeb Road, Ann Arbor, Michigan 48106 (Order No. 73-11,302, MF-\$5.00, Xerography-\$11.00)

**Document Not Available from EDRS**

Descriptors—\*Chemistry, \*College Science, Doctoral Theses, Educational Research, Higher Education, \*Inservice Teacher Education, Interpersonal Competence, Program Evaluation, \*Science Education, Teacher Attitudes, \*Teaching Assistants

Identifiers—Research Reports

This study was concerned with the development, implementation and assessment of an in-service program for teaching fellows in the chemistry department at The University of Michigan. The in-service program focused on the interpersonal aspect of teaching. A total of fifteen teaching fellows were involved in different aspects of the program, with eight of them participating in all its phases. Also included in the sample were 498 students enrolled in chemistry classes taught by the teaching fellows. Variables considered in assessment of the program were attitude toward teaching as a career, job satisfaction, interpersonal style of teaching fellows, and satisfaction of students with teachers. The findings indicated that students taught by participating teaching fellows were more satisfied than were students of non-participants. Change in attitude toward teaching seemed to be related to a consideration on the part of teaching fellows of the relative advantages and disadvantages in teaching. Change in job satisfaction seemed to be related to the level of ambivalence toward teaching. (Author/PS)

Identifiers—JCI, \*Judging Criteria Instrument, Research Reports

The purpose of this study was to develop and validate an instrument to assess the creativity of a student through the products he creates. The instrument was called the Judging Criteria Instrument (JCI). This instrument was administered to 33 general physics students. Multiple criteria of teacher judgment scores and Torrance Tests of Creative Thinking were used to test the concurrent validity of the JCI. The JCI was shown to be a reliable and valid instrument. An Experimental Study Involving the Use of Contract Evaluation in a CHEM Study and in a Traditional High School Chemistry Course.

Pub Date 72

Note—251p.; Ph.D. Dissertation, The Ohio State University

Available from—University Microfilms, 300 North Zeeb Road, Ann Arbor, Michigan 48106 (Order No. 73-11,555, MF-\$5.00, Xerography-\$11.00)

**Document Not Available from EDRS**

Descriptors—\*Academic Achievement, \*Chemistry, Comparative Analysis, Doctoral Theses, Educational Research, Evaluation, \*Evaluation Methods, High School Curriculum, Performance Contracts, Science Education, Secondary Education, \*Secondary School Science, \*Student Attitudes, Student Evaluation

Identifiers—CHEM Study, Research Reports

This study was concerned with a comparison of the effects of utilizing contract and traditional student evaluation methods in a CHEM Study and in a traditional high school chemistry course. The sample consisted of 49 students enrolled in a CHEM Study course and 63 in a traditional chemistry course. Student evaluations were conducted using the contract evaluation technique and the traditional evaluation technique. The instruments administered were ACS-NSTA Cooperative Examination: High School Chemistry, CHEM Study Final Examination, Cornell Critical Thinking Inventory, Test on Understanding Science, A Scale to Measure Attitude Toward this Chemistry Course, and Otis-Lennon Mental Ability Test. The analysis of data revealed that contract and traditionally evaluated students performed equally well on tests of achievement. Contract and traditional evaluation final grades were equally valid for indicating student performance on tests of critical thinking and chemistry subject matter. The use of contract evaluation did not result in any significant change of students' attitudes toward their chemistry course. Contract students agreed, initially, that they learned more under contract evaluation than they would under traditional evaluation. Contract students exhibited wise grade management in working toward their aspired yearly grade. (Author/PS)

A Study of the Science Curriculum Improvement Study Resource Personnel Workshop Participants to Determine the Relationship between Selected Factors and Subsequent Participant Activity.

Pub Date 72

Note—277p.; Ph.D. Dissertation, Michigan State University

Available from—University Microfilms, 300 North Zeeb Road, Ann Arbor, Michigan 48106

(Order No. 73-12,695, MF-\$5.00, Xerography-\$11.00)

**Document Not Available from EDRS**

**Descriptors**—Doctoral Theses, \*Educational Research, Elementary School Science, \*Followup Studies, Higher Education, \*Inservice Teacher Education, Science Education, \*Science Institutes, \*Teacher Education, Workshops

**Identifiers**—National Science Foundation, NSF, Research Reports, \*Science Curriculum Improvement Study, SCIS

The study was designed to compare the workshop activity of participants attending the 1971 Resource Personnel Workshop on the Science Curriculum Improvement Study (SCIS) in teams (2-3 persons/team) and as individuals. Twenty-two participants attended the workshop in teams and another nine as individuals. Data were collected before, during, and after the workshop. The instruments used included a standardized test of general science knowledge, a questionnaire of the participants' perception of SCIS, a workshop evaluation form, a final inventory of the participants' reactions, and a survey form for the reactions to the workshops presented during the follow-up period. Participant activity was monitored by feedback forms which were returned monthly to the investigator. The analysis of data revealed no significant difference between the level of workshop activity of teams and of individuals. Most of the participants reported an increase in their resource personnel activity, but the relative rank of participants in regard to the number of workshops they conducted remained the same. No significant correlation was found between the dependent variable, the level of activity during the follow-up period, and the independent variables: knowledge of general science, perception of the SCIS program, years of teaching experience, age, and academic degree. The participants' perception of the SCIS program became significantly more positive during the workshop. (Author/PS)

This book is one in the series on Aerospace Education I. It briefly reviews current knowledge of the universe, the earth and its life-supporting atmosphere, and the arrangement of celestial bodies in outer space and their physical characteristics. Chapter 1 includes a brief survey of the aerospace environment. Chapters 2 and 3 examine the composition of the earth's atmosphere, global weather patterns, and the role played by various forces in producing weather. Chapter 4 includes recent findings on the surface characteristics and features of the Moon. The final chapter contains a brief description of the instruments used by astronomers and examines the worlds of interplanetary, interstellar, and intergalactic space. The book is designed for use in the Air Force Junior ROTC program. (PS)

This book, one in the series on Aerospace Education I, emphasizes the two sides of aerospace—military aerospace and civilian aerospace. Chapter 1 includes a brief discussion on the organization of Air Force bases and missile sites in relation to their missions. Chapter 2 examines the community services provided by Air Force bases. The topics discussed in Chapter 3 are Air Force

community relations and various educational opportunities available to personnel. Chapter 4 deals with the functioning aspects of the aerospace industry. The last chapter lists a large number of careers with a brief description for each of them. A section in this chapter explains the required education standards for most of the Air Force jobs. The book is designed for use in the Air Force Junior ROTC program. (PS)

This is a revised textbook for use in the Air Force ROTC training program. The main theme of the book is concerned with the kinds of civil aviation facilities and many intricacies involved in their use. The first chapter traces the development of civil aviation and the formation of organizations to control aviation systems. The second chapter describes varieties of aviation for which the term "general aviation" is used. This includes brief descriptions of agricultural, business, instructional, recreational, air taxi service,

and civil air patrol aviation systems. The third chapter delves into the problems related to the management of aviation facilities. The fourth chapter presents a discussion of the construction and operation of airports. Finally, the last chapter deals with the development and role of air traffic control. (PS)

This book is a revised publication in the series on Aerospace Education II. It describes the employment of aerospace forces, their methods of operation, and some of the weapons and equipment used in combat and combat support activities. The first chapter describes some of the national objectives and policies served by the Air Force in peace and war. The second and third chapters examine the mission and structure of major Air Force operating commands. The fourth chapter describes the various support commands and operating agencies maintained by the Air Force to back up its combat forces. The last chapter reviews the aerospace role of the Army, Navy, and Marine Corps. (PS)

This book, one in the series on Aerospace Education III, deals with the general nature of human physiology during space flights. Chapter 1 begins with a brief discussion of the nature of the atmosphere. Other topics examined in this chapter include respiration and circulation, principles and problems of vision, noise and vibration, and self-imposed stresses. Chapter 2 provides an account of aerospace medicine. The next two chapters are devoted to a general description of protective equipment used by fliers, pilot training, and surviving and living in space. Chapters 5 and 6 provide information on skylab and future space flights. The book is designed to be used in the Air Force ROTC program. (PB)

This document is a list of approximately 450 mathematical concepts which are taught in grades K-8. The list is organized into eight major topics: (1) number systems, (2) numeration and notation, (3) sets, (4) geometry, (5) measurement, (6) number patterns and relationships, (7) other topics, and (8) summaries. The Content Authority List is used in conjunction with the Behavioral Objectives Authority List and the Vocabulary Authority List in the Pennsylvania Retrieval of Information for Mathematics Education System (PRIMES). This system of information storage and retrieval is used by local school districts in decision making with respect to curriculum, instruction, and evaluation. (SD)

This issue of the newsletter of the American Association for the Advancement of Science (AAAS) is devoted to reports by seven members of the AAAS Consortium of Regional Environmental Education Councils, as well as other miscellaneous environmental news. Each report includes information on the progress of environmental education in that region and a listing of program directors and their addresses. The second part of this newsletter is a collection of short articles concerning the metric system. Based on the prevailing interest in the International System of Units in the United States, the

articles favor including metric education in the school curriculum. (MA)

Descriptors—\*Abstracts, \*Educational Research, Research, Researchers, \*Research Methodology, \*Research Skills, \*Science Education

This second issue of "Investigations in Science Education" (ISE), designed to provide a new perspective for viewing research articles and to aid in the improvement of writing research reports, includes abstracts prepared by science educators, bibliographical data, purpose, rationale, research design and procedure, findings and interpretations as well as detailed notes offered by the abstractor. The analyses are intended to provide useful comments and suggestions to serve as a device which might be useful for training in the writing of research articles. Articles included in ISE are selected primarily from such sources as professional journals and reports of government-funded projects. Abstracts included in this issue relate to topic areas such as evaluation of children's performance on the cognitive, affective and motivational domains, student perceptions of teachers, evaluation of student laboratory reports, effect of behavioral objectives, and comparison of instructional strategies. Identifiers—\*Air Force Junior ROTC

This revised textbook, one in the Aerospace Education II series, provides answers to many questions related to airplanes and properties of air flight. The first chapter provides a description of aerodynamic forces and deals with concepts such as acceleration, velocity, and forces of flight. The second chapter is devoted to the discussion of properties of the atmosphere. How different characteristics of the atmosphere help make flight possible, how man can harness the air for flight, and several other questions related to balancing of forces in the air are discussed in chapter two and three. The discussion in the fourth and fifth chapters centers on how aircraft move through the air. The next two chapters discuss the aircraft structure and various kinds of instruments used to control flight. A brief description of navigation instruments is also included. The book is designed for use in the Air Force ROTC program. (PS)

Identifiers—National Science Foundation, NSF

This report presents data in tabulated form. The survey covered all such institutions in the country known or believed to have allocated at least \$100,000 to intramural R&D performance, and contains data on scientists, engineers, and technicians employed, and on current and capital expenditures associated with the conduct of research and development. Summary data, classified by type and size of organization and by state, are presented. Highlights in the report show: (1) independent nonprofit institutions employed over 26,000 scientists and engineers in October 1973, and 88 percent of these were primarily engaged in research and development;

(2) R&D expenditures of independent nonprofit institutions during 1973 totaled \$1,006 million, with the Federal Government being the source of 69 percent of the funds; (3) of the total R&D expenditure, the largest amount was allocated to the life sciences—37 percent, engineering for 28 percent, and the social sciences for 14 percent. Technical notes, statistical tables, a reproduction of the covering letter, summary questionnaire, and instructions are presented in the appendices. (Author/EB)

This manual was designed for use by teachers using the School Mathematics Study Group's (SMSG) special text series for low achievers in grades 7 and 8; it covers chapters 10 through 18 of that series. The manual begins with introductory material describing characteristics of low-achieving students and suggested instructional approaches. Testing policies, classroom routine, and necessary materials and supplies are also discussed. For each chapter of the text this volume lists and describes objectives, suggests special approaches where desirable, and provides solutions to all problems posed in the student text. (SD)

Identifiers—\*School Mathematics Study Group, SMSG

This text is one of the sequence of textbooks produced for low achievers in the seventh and eighth grades by the School Mathematics Study Group (SMSG). There are eight texts in the sequence, of which this is the fifth. This set of volumes differs from the regular editions of SMSG junior high school texts in that very little reading is required. Concepts and processes are illustrated pictorially, and many exercises are included. This volume deals with decimals (chapter 10) and parallelism (chapter 11). After a brief review of the fundamental operations on whole numbers, the place value system and use of decimal notation are discussed. The decimal point is introduced in the context of the monetary system, and exercises involving conversion from decimal to common fractions, and conversely, are presented. The chapter on parallelism begins with a review of congruence, and relies on constructions in developing the notions of perpendicularity and parallelism. This volume includes tables for addition and multiplication, and flow charts for operations on rationals to be used by students as needed. (SD)

This text is one of the sequence of textbooks produced for low achievers in the seventh and eighth grades by the School Mathematics Study Group (SMSG). There are eight texts in the sequence, of which this is the sixth. This set of volumes differs from the regular editions of SMSG junior high school texts in that very little reading is required. Concepts and processes are illustrated pictorially, and many exercises are included. Similarity of triangles is the focus of the first chapter (12) in this volume. The use of ratios and scale factors is introduced, and the computation of percentages by construction of parallel lines on a grid is developed. In chapter 13 the emphasis is on computation with rational numbers in both common fraction and decimal forms. In this context exponents are introduced. Chapter 14 deals with motion geometry and perpendicularity. (SD)

There are eight texts in the sequence, of which this is the seventh. This set of volumes differs from the regular editions of SMSG junior high school texts in that very little reading is required. Concepts and processes are illustrated pictorially, and many exercises are included. Chapter 15, the first of two chapters in this volume, concerns measurement. The need for standard units is discussed and, after some work on computation with mixed numbers, both English and metric units are introduced. Measurement of angles using the protractor and computation of area are also discussed. In chapter 16 perfect squares are presented, and the idea of finding the sides of squares with given area is used to motivate an introduction to the real numbers. Computations with radicals, the Pythagorean theorem, and circumference and area of circles are also developed. (SD)

This text is one of the sequence of textbooks produced for low achievers in the seventh and eighth grades by the School Mathematics Study Group (SMSG). There are eight texts in the sequence, of which this is the last. This set of volumes differs from the regular editions of SMSG junior high school texts in that very little reading is required. Concepts and processes are illustrated pictorially, and many exercises are included. This volume continues the study of equations begun in chapter 8, and develops methods for solving linear inequalities and quadratic equations. In the last chapter the slope-intercept form of a linear equation is discussed, and the method of solution of simultaneous linear equations is detailed. Equations of parallel and perpendicular pairs of lines are examined. The concepts of absolute value and distance are introduced, and the method of computing the distance between two points in a plane is described. (SD)

This report has two major features. First it describes the Pennsylvania Retrieval of Information for Mathematics Education System (PRIMES). PRIMES is an information system in which curriculum materials are computer-stored and are retrieved to meet the specifications of local school districts. As of 1971 there are six regional centers which provide consultative services to the school districts. The report describes briefly the use of PRIMES with regard to test and textbook selection, curriculum analysis, research capabilities, and continuing education. The second feature of the report is survey information relating to personnel, committees, instructional materials, curriculum guides, standardized tests, selection of basal text series, and plans for curriculum changes in Pennsylvania schools during 1970-71. The primary purpose of the study reported was to provide information related to high school students choosing or not choosing to pursue science careers. The survey included high school students in public and private secondary schools throughout the nation. Information was obtained relating to educational levels, school subjects, self-concepts, attitudes toward sex roles and science issues, career inclinations and choices, work preferences and others. The report of results is based on a national sample of 2,000, stratified on the basis of census data for sex, grade in school, region of the country, and rural-urban residence. The reports give the results of the opinion survey. Information is given including prices for subscription and individual copies of reports of the Purdue Opinion Panel, which are conducted three times each year. Report num-

This directory reviews 13 diagnostic-prescriptive mathematics programs. Ten of the programs are complete mathematics programs; the remaining three are supplementary programs. These programs are designed for use in one or a combination of grade levels from grades K-9. Each program is outlined according to: nature of program, rationale of program, general goals and objectives, organization of program, materials provided for both student and teacher, classroom activities, assessment of student progress, use of materials; implementation requirements and provisions, cost of implementing the program, how the program was developed, the present status of the program, how the program has been evaluated, indicated strengths and weaknesses of the program, and where the program can be obtained. Description of implementation of these programs for eight New Jersey school districts during the 1973-74 academic year is also included. (JBW)

**Descriptors**—\*Content Analysis, Curriculum, Elementary Education, \*Elementary School Mathematics, Evaluation, Instruction, Learning Activities, \*Mathematics Education, \*Objectives, \*Textbooks

**Identifiers**—\*Houghton Mifflin Elementary Mathematics Series, Learning Mastery System, Southwest Regional Laboratory

The purpose of the analysis was to provide a profile of instructional activities related to content and referenced to specified instructional outcome areas. Emphasis was placed on determination of four major factors: (1) major outcomes in the program and their relative emphasis in both regular and supplementary instructional materials, (2) the distribution of content within and across instructional units (chapters), (3) points in the instructional sequence where mastery of outcomes is assessed, and (4) the amount of independent practice in regular and supplementary instructional materials related directly to each major outcome developed in the program. The analysis was based on 12 content strands and 5 substrands. Results of the analysis are presented in a series of tables which show the page locations of topics. Locations of diagnostic tests are also indicated. The completed analysis forms the basis for preliminary specification of an application of Learning Mastery System procedures to the series. **Descriptors**—Biological Sciences, \*Content Analysis, \*Curriculum Evaluation, Elementary Education, \*Elementary School Science, \*Instructional Materials, \*Science Course Improvement Project, Science Education

**Identifiers**—\*Science Curriculum Improvement Study, SCIS

To evaluate a method of content analysis, and as a step toward the specification of a conceptual domain for primary level science, extant instructional programs were analyzed. This paper reports an analysis of the introductory unit and three biological science units of the Science Curriculum Improvement Study (SCIS). The background of the program and the procedures for the analysis are described. The conceptual content is summarized. Problems encountered in the analysis and their implications for subsequent analyses are discussed. (Author/EB)

**Content Analysis of Selected Units of the First-Grade "Concepts in Science" Program.**

Southwest Regional Laboratory for Educational Research and Development, Los Alamitos, Calif.

Report No.—SWRL-TN-2-72-59

Pub Date 19 Dec 72

Note—85p.

**EDRS Price MF-\$0.76 HC-\$4.43 Plus Postage**

**Descriptors**—\*Concept Teaching, \*Content Analysis, \*Curriculum Evaluation, \*Elementary School Science, \*Instructional Materials, Primary Education, Science Course Improvement Project, Science Education, Scientific Concepts, Textbook Content

**Identifiers**—\*Concepts in Science

To further evaluate a method of content analysis and aid in identifying scientific concepts appropriate at the elementary level, science material in a standard textbook series was examined. This paper reports and summarizes the analysis of sections of the California state-adopted textbook series, "Concepts in Science." The conceptual structure of the program is described and compared with the structure of the science program, Science Curriculum Improvement Study (SCIS). Problems encountered in the method of analysis are reported. Only about two-thirds of the chapters in the first-grade "Concepts in Science" program were analyzed, but it was shown that substantially more content was found in this program. (Author/EB)

**Identifiers**—\*National Science Foundation, NSF

The purpose of this study by the National Science Foundation was to redefine the scientist/engineer population along demographic, educational and professional criteria, in terms of changes since the 1970 national census. The study uses as a base the 1972 Professional, Technical, and Scientific Manpower Survey with a sample of 100,000 persons. Respondents are classified into one of 28 separate science and engineering fields. From these classifications, subjects are grouped according to demographic, social, educational, and professional characteristics. Included in the appendices are criteria for redefined populations of scientists and engineers, the sample of weighing and estimating procedures, and a reproduction of the questionnaire used in the survey. **Earth Science Unit for Second Grade: A Seed Crystal Approach.**

Pub Date Aug 75

Note—65p.

EDRS Price MF-\$0.76 HC-\$3.32 Plus Postage

**Descriptors**—Curriculum, \*Earth Science, Elementary Education, \*Elementary School Science, Grade 2, \*Instructional Materials, \*Science Activities, Science Education, Science Units, \*Teaching Guides

This teacher's guide to a second-grade earth science unit provides a range of activities, suggestions for classroom discussion, and open-ended questions suitable for each of the concepts developed. One of the central purposes of the unit is to develop independence and self confidence by encouraging the student to think through a problem clearly. The questions and activities give the student practice examining facts at hand and drawing logical conclusions in a nonthreatening atmosphere. For this reason, there are no tests at the end of each section. This is a seed crystal approach; its purpose is to begin building an accurate picture of the planet. Awareness, not mastery of concepts and terms, is the major objective. The first section of the unit, "Physical Nature of the Planet Earth," is conceptually oriented; the student learns facts about the planet and uses that information to solve a problem. The second section, "Physical Nature of Rocks, Minerals, and Fossils," is more concerned with application; the student learns a skill which is used to solve a problem. Also included is a section about careers in geology and paleontology. (Author/MLH)

This source book, one part of a three-part NSTA series on energy-environment, is written for teachers who wish to incorporate material on the complex subject of energy into their teaching. This work is divided into two volumes, each with numerous tables and figures, along with appendices containing a glossary, mathematics primer, heat engine descriptions, and nuclear energy discussion. Volume 1 (Energy, Society, and the Environment) deals with energy and its relationship with conservation, the environment, the economy, and strategies for energy conservation. In Volume 2 (Energy, Its Extraction, Conversion, and Use), topics discussed include the rate of energy consumption, future sources of energy, and the increased cost of energy. (Author/CP)

This unit is one part of a three-part National Science Teachers Association (NSTA) series on energy-environment. The goal of this NSTA project is to create a collection of mini-units that provide materials for science and social studies teachers in grades K-12. These materials are intended to make teaching more interdisciplinary and to stimulate decision making in young children. Activities are sought that will enable students to: understand and use existing fundamental concepts in the energy-environment area; identify and evaluate personal and community practices, attitudes, and values related to energy-environment issues; and make effective decisions and/or define their views of appropriate actions on energy-environment issues. This report describes the activities of the Radio Mathematics Project of the Institute for Mathematical Studies in the Social Sciences (IMSSS) during the 1974-75 fiscal year. This project is funded by AID for the purposes of (1) developing and testing a cost-effective system of radio instruction in elementary mathematics for developing countries, (2) developing a methodology for producing radio materials based on rapid feedback concerning student performance, (3) beginning a program of research on learning by radio, and (4) helping a host institution develop the capability to continue or expand the program. The second year of the project, beginning July 1974, was devoted primarily to testing the system and training teachers in Masaya, Nicaragua. These activities and their results are described in this document. (SD)

**Identifiers**—Research Reports

This paper reports an experiment designed to test theoretical relations among fast problem solving, more complex and slower problem solving, and research concerning fundamental memory processes. Using a cathode ray tube, subjects were presented with propositions of the form "Y is in list X" which they memorized. In later testing they were asked to decide whether simple and compound statements involving the memorized facts were true or false. Solution times for the test problems were measured. Contrary to hypothesis it was found that the compound problems of the form "Y is in list X and Z is in list X" were solved as rapidly as simple statements. A modeling technique is suggested and rationalized. Suggestions for further research are offered. (SD)

**Identifiers**—American National Metric Council, \*Management of Metric Implementation

The progress toward United States conversion to the metric system is the major focus of this publication. The status of Federal legislation and the influence of anti-trust laws on this legislation are discussed. Metric implementation by industry is surveyed with respect to several industries: automobile, aerospace, tooling, building and construction, metal products, and consumer products. Federal and state activity supporting education and training in the metric system is discussed. Results of a survey of institutions preparing teachers of home economics, industrial arts, and vocational education are presented, together with recommendations based on the survey results. Metric implementation in five other countries is briefly reviewed. A list of other publications available from the American National Metric Council is included. (SD)

This paper reports an attempt to teach high school algebra quickly to students in grades 4-7. Twelve boys and 12 girls were taught by professors of the same sex for a total of 37 hours. Instruction took place in the students' regular schools. Twenty-one of the students finished the course, and 18 of these placed between the 49 and 99.4 percentile on a standardized algebra test. Five of the experimental students scored higher on this test than any eight-grade students in their school. Plans for a second-year algebra course are discussed. (Author/SD)

The National Sample of Scientists and Engineers, sponsored by the National Science Foundation, was intended to provide current data on the educational, employment, and career characteristics of persons in scientific and engineering fields. The panel for this survey was a subpopulation of participants in the 1972 Professional, Technical and Scientific Manpower Survey. From characteristics determined in the 1972 survey, participants were classified as: computer specialists, engineers, mathematical specialists, life scientists, physical scientists, environmental scientists, psychologists, or social scientists. For each group, data were gathered on sex, age, race, highest degree held, unemployment and job mobility, along with several other criteria. (CP)

**Identifiers**—National Science Foundation, NSF, Suchman

In this study, a set of behavioral objectives was developed and validated for an undergraduate

science program for elementary teachers. The behavioral objectives contain both inquiry and content items which were based on analyses of the COPES, SAPA, IDP, SCIS, ESS, and MIN-NEAST elementary school science programs. Some measure of validity of the entire set of behavioral objectives was established by submitting them to a selected group of scientists and educators who participated in the writings of the programs. This pamphlet was designed to describe occupations in the area of statistics to high school students. A variety of applications of statistical techniques in the solution to ecological, political, and biological problems are described briefly. General opportunities for statisticians in ten professional areas are listed, and many others are mentioned. The educational and training requirements necessary for entering the field are discussed, and addresses for sources of further information are listed. Names and addresses of universities in the United States and Canada which offer degrees in statistics are provided. (SD)

The 108 tables printed in this volume provide data on the support of graduate students and postdoctoral fellows in all areas of science and engineering for the year 1973. The data were collected from 339 institutions offering 5,683 doctoral programs in science and 876 masters-only programs. Data are organized to show the sources of support for students in the various scientific areas. Analyses based on all graduate departments and analyses based on doctorate departments are presented separately. Variables used in the study include department, level, citizenship, sex of student, and whether the institution publicly or privately controlled. Trends from 1971 through 1973 are also analyzed. This research was undertaken to determine whether the mathematics course offered to students taking courses in chemical technology was

adequate. Students in a regular class and an experimental class were given mathematics and chemistry pretests and posttests. The experimental class was taught using a syllabus designed to maximize the coherence between the mathematics and chemistry courses. No significant differences were found. (SD)

**Factor Label Method of Units Analysis: A Learning Package for Secondary Mathematics Students.**

Pub Date 1 May 74

Note—77p.

**EDRS Price MF-\$0.76 HC-\$4.43 Plus Postage**

**Descriptors—**Curriculum, Geometry, \*Individualized Instruction, Interdisciplinary Approach, \*Mathematical Applications, Measurement, Metric System, Numbers, \*Problem Solving, \*Research, Secondary Education, \*Secondary School Mathematics

**Identifiers—**Factor Label Method, Research Reports, \*Units Analysis

In an attempt to prepare students for units analysis in the solution of problems in high school chemistry and physics, the author developed learning packets on the factor label method. Thirty-three students used these packets individually during a regular tenth-grade geometry class. There were two packets, each to be used for two days. Prior to the experiment and after instruction, students were tested using parallel forms of an experimenter-developed instrument. Results showed that more than 80 percent of the students achieved at least three of the four learning objectives. Further research is suggested. (SD)

**Attitudes and Achievement: A Complex Relationship.**

Pub Date [75]

Note—13p.; Not available in hard copy due to marginal legibility of original document

**EDRS Price MF-\$0.76 Plus Postage. HC Not Available from EDRS.**

**Descriptors—**\*Achievement, \*Attitudes, Correlation, Educational Attitudes, Educational Research, Elementary Secondary Education, Learning Motivation, \*Mathematics Education, \*Program Attitudes, \*Research Reviews (Publications), School Attitudes

This paper investigates the popular belief that children's attitudes toward school and particular subjects have a positive relationship with their school and subject achievement. Definitions of attitude by L. L. Thurstone, L. W. Doob, and M. Fishbein are presented as a basis for the investigation. The difficulties involved in assessing attitudes are revealed through examples which illustrate the interrelationship among expressed opinions, beliefs and intentions, behavior (responses), and actual attitudes. Empirical studies which examine the correlations between attitude and achievement are discussed. The paper proposes that it is probable that an observed relationship between attitude and achievement does not necessarily exist. The paper concludes with the implications of the last statement for educators. These implications include the need to study more carefully the reasons why attitude is not a strong correlate of achievement. A second implication is that educators should not be too hasty nor too sure in making assessments of attitudes from students' expressed opinions or overt behavior. (JBW)

This report gives details of an inservice program designed to help teachers learn and understand the Mathematics Continuous Progress-Skill Mastery Program and Management System in Chicago schools. The program consists of locally-developed curriculum guides and behavioral objectives, criterion-reference tests, and mastery record key-sort cards. Fourteen inservice staff meetings are discussed, and the program evaluated on a set of 20 goals for teachers. Questionnaires completed by teachers and outside evaluators are tabulated. Behavioral objectives and criterion-referenced tests were judged to be useful components of the management system. Possible changes in the mastery record cards are discussed. No reference is made to actual classroom teaching materials. (JBW)

This booklet describes activities and materials which can be planned and constructed from inexpensive and easily obtainable materials. The activities are used for the earliest primary grades (K-3), remedial, and special education classes. For each activity the objective, materials, and procedure are described. Topics include introduction to number concepts, visual discrimination, geometric figures, 1-10 number concepts, order of numerals, addition, subtraction, number words, measurements, regrouping by tens, fractions, multiplication, and time. At the end of the booklet is a suggested self-evaluation chart for the student as well as a record-keeping chart for the teacher. (JBW)

**Identifiers—**\*Piaget (Jean), Research Reports

This volume includes reports of six studies of the thought processes of children aged four through eight. In the first paper Steffe and Smock outline a model for learning and teaching mathematics. Six reports on empirical studies are then presented in five areas of mathematics learning: (1) equivalence and order relations; (2) classification and seriation; (3) interdependence of classification, seriation, and number concepts; (4) Boolean Algebra; and (5) conservation and measurement. In a final chapter, the main findings of these papers are summarized and implications are discussed, with suggestions for further research. (SD)

**Identifiers—**National Science Foundation, NSF

This publication presents data on the supply, utilization, and characteristics of U.S. doctoral scientists and engineers. The population surveyed consisted of individuals in the United States who held science or engineering doctorates, or who had received doctorates in nonscience and nonengineering areas but were employed in science or engineering positions. Included in the population were individuals who received their doctorates between January 1, 1930 and June 30, 1972, inclusive. Subsequent surveys in this biennial series will take account of new entrants into this segment of the nation's scientific and engineering manpower resources. The data on doctoral scientists and engineers in this report are presented in three parts: charts providing a broad perspective; tables presenting more specific, although selective, information; and appendices containing the questionnaire and specialties list used in the survey, plus notes on the survey methodology, coverage, concepts, and definitions used in the survey. This manual is intended for use in training persons whose vocations involve technical drawing to use the metric system of measurement. It could be used in a short course designed for that purpose or for individual study. The manual begins with a brief discussion of the rationale for conversion to the metric system. It then provides a straightforward discussion of the metric units for length, area, volume, mass, and temperature. The remainder of the text is devoted to drafting in the metric system. Topics include conversion from inch drawings to metric drawings, tolerance conversions, and dual dimensioning. Sample specifications and drawings are provided for many objects (screw threads, sprockets, adaptors, steel casing, etc.). Many questions appear throughout the manual; answers are provided in an appendix. (SD)

**College Algebra and the Math Laboratory.**  
 Lansing Community Coll., Mich. Mathematics Lab.

Pub Date 3 Jul 75

Note—28p.

**EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage**

**Descriptors—**\*Algebra, \*College Mathematics, Community Colleges, Course Evaluation, Higher Education, Instruction, \*Laboratories, Mathematics Education, Remedial Mathematics, \*Research, Research Reviews (Publications), \*Trigonometry

This study reviews literature related to innovative approaches to the teaching of college algebra, and describes the approach to such a course at Lansing (Michigan) Community College. Recommendations concerning that course are presented, based on the experiences of other schools as described in the literature, and analysis of the Lansing situation. Findings indicate a need for a Math Learning Center to augment regular class instruction. Such a center should serve the wide variety of students enrolling for college algebra with different levels of competence, learning speeds, and goals. The report identifies three areas in which decisions must be made concern-

ing instructional mode to be employed in the center: human, printed material, and mechanical. No advice is offered in these areas due to the lack of evidence supporting one method over another. Other recommendations include the need to consider carefully the role of college algebra in various programs, and to examine critically the current course content. (SD)

This bulletin is devoted to a synopsis of the Ninth Session of the Standing Conference of European Ministers of Education. The Conference passed resolutions dealing with recurrent education, education of migrants, and international educational cooperation. Copies of these resolutions are included in the Bulletin, together with two reports addressing the topic of permanent education. The brief speech by the Secretary General of the Council of Europe concerns the interaction of political, economic, and educational issues. A lengthy report entitled "Permanent Education, a Frame-Work for Recurrent Education: Theory and Practice" was presented to the conference by the Secretariat of the Council. This report reviews the history of the concept of permanent education, and discusses experimental projects related to permanent education. Basic options, costs, needs, and teaching methods are also discussed. (SD)

**Identifiers—**\*Council of Europe, Europe

This newsletter consists of two parts, the first dealing with issues common to many European countries, and the second with reports from twelve individual countries. Ten of the fourteen articles are written in English and the remainder in French. The first section consists of reports on two conferences of European educational administrators. Among the reports from countries belonging to the Council of Europe are brief articles on the passage or implementation of educational legislation in Austria, Denmark, France, Norway, and Sweden. Debate concerning the future of education is reported from Cyprus, West Germany, and Switzerland. Issues related to post-secondary education form the subjects of reports from Belgium, France, Netherlands, Sweden, and the United Kingdom. Other issues discussed include the comprehensive school (Finland), a surplus of teachers (West Germany), changes in educational administration (Sweden and United Kingdom), and the changing role of public libraries (United Kingdom). **Identifiers—**National Science Foundation, NSF

This report presents tabular and graphical data on the characteristics of U.S. employed doctoral scientists and engineers, and includes data of the 1973 cohort; it augments data in a previous report, "Characteristics of Doctoral Scientists and Engineers in the United States, 1973," which reported on scientists and engineers who had received their doctorates through June 30, 1972. This publication evolved out of the National Science Foundation's Manpower Characteristics System, which was established to provide manpower data needed by many individuals and groups, particularly those engaged in science and engineering policy activities. A characteristic feature of the system is that information is collected from individual scientists and engineers rather than from other sources, e.g., employers and professional societies. The basis of this report is the first survey, in a biennial series, of the Doctoral Roster of Scientists and Engineers, conducted for the National Science Foundation by the Commission on Human Resources of the National Academy of Sciences. **Descriptors—**\*Abstract Reasoning, Cognitive Development, Learning, Mathematical Experience, Number Concepts, \*Ratios (Mathematics), \*Research, Secondary Education, \*Secondary School Mathematics

**Identifiers—**\*Proportionality, Research Reports

This study examines the effects of using different classes of ratios on adolescent performance on proportionality problems. Problems of the form  $a/b = c/x$  varied on four dimensions: size of  $a/b$ , equality or inequality of  $b$  and  $c$ , complex or simple fractions, and form of the test. Tests consisted of six proportionality problems involving sizes of stick figures. Thirty-two seventh-grade students served as subjects. Responses were scored on the 10-point scale developed by Karplus, and the resulting data were submitted to several analyses of variance. Results indicated that only one-fourth of the problems were solved by strategies based on understanding of proportionality. Subjects were able to solve some of the easier problems, suggesting that they had (or were developing) some intuitive understanding of proportionality. The author suggests that content of a proportionality task may strongly affect students' performance on it. (SD)

**Identifiers—**\*Proportionality

On the basis of studies reported elsewhere (SE 019 717 and 719) the author discusses the implications of research on cognitive development for teachers whose subjects involve an understanding of proportionality. Several common methods of teaching chemistry students to use proportionality in chemical problems are described. Research on the development of proportionality concepts is discussed, and basic results of Inhelder and Piaget, Karplus, the author, and others are briefly

outlined. Laboratory tasks which can help students understand proportionality are described, and cooperation between teachers and psychologists is advocated. (SD)

**Identifiers**—\*Proportionality, Research Reports

This paper reports further on the study described in SE 019 717. Correlational data relating success on proportionality tasks to understanding of related concepts and processes are presented. The five correlative tests involve (1) reducing fractions, (2) multiplying fractions, (3) facility with fractions, (4) inverse relations, and (5) more than/times as much. The results of the study suggest that a child's understanding of proportionality is dependent on the task being performed. It is suggested that in teaching proportionality concepts teachers use the simplest possible arithmetic. (SD)

**Identifiers**—Mathematics Teaching Inventory, Research Reports

Over a period of five semesters, the attitudes of preservice secondary mathematics teachers participating in seven varieties of educational experiences were measured using the Mathematics Teaching Inventory (MTI). Items on the MTI were scored for modern versus traditional attitudes. Seven subscales were generated by classifying items on the basis of whether they involved perception of mathematics teaching or teaching in general and whether there was a teacher or non-teacher focus. Data collected for the seven groups on these seven scales were submitted to an analysis of variance. Results indicated that, in general, students with only observation experiences held more modern and open attitudes than students with teaching experience. This result was most significant for the subscale concerning mathematics teaching behavior. On the basis of this study and related research it is recommended that early school-based experiences should be offered to preservice teachers, but that these experiences should be carefully selected to avoid negative effects on attitudes. (SD)

**The Certainty of Information in Instructional Decision Making.** Report No. 76-4.

Washington Univ., Seattle. Educational Assessment Center.

Pub Date Aug 75

Note—25p.; Educational Assessment Center Project 503

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**  
**Descriptors**—College Mathematics, \*Computer Science Education, Evaluation, Higher Education, Item Analysis, \*Mathematics Education, \*Research, \*Testing, Test Reliability, \*Test Results

This study measures the stability of performance exhibited where different computer programming classes study the same material. By focusing standard measurement techniques on the item difficulty (the proportion of students an-

swering an item correctly), it was determined that up to two-thirds of the reliable variance of a classroom test is held in common with identical tests given in similar classes. The particular wording of the test item measuring a concept was shown to be a critical factor in knowledge assessment. Classes were given identical terms measuring common concepts and changed items measuring a different set of common concepts. The correlations between classes of item difficulties for identical items is approximately .70, whereas the correlation for changed items is approximately .35. Suggestions are made for utilizing the high correlation between identical items in instructional decision making. (Author/SD)

The National Assessment of Educational Progress (NAEP) is an information-gathering project that surveys the educational attainments of 9-year-olds, 13-year-olds, 17-year-olds, and adults (ages 26-35) in various learning areas. All areas are assessed by a group of educators who design objectives for each area and create measurement tools appropriate to the objectives. When the exercises prepared by the test developers have passed extensive reviews by subject-matter specialists and measurement experts, they are administered to probability samples of various populations. Approximately 100,000 persons participate annually in these exercises. This report includes information on the ability of American youth to utilize the inquiry skills stressed in the new science curricula. The students participated in eight individualized activities which included the use of scientific apparatus to conduct testing procedures and simple experiments, the application of knowledge to the observation of materials in order to make generalizations, and the demonstration of principles by using models. Descriptions are given of the eight activities which were designed for students of ages 9, 13, and 17, and specifications are included for the sample populations which took part in the study. The results of the assessment are reported for each activity and include a breakdown according to geographical region, sex, color, parental education, and size and type of community. (MLH)

The purpose of this study was to further the development and implementation of a curriculum continuum and a student assessment program in mathematics in the 11 elementary schools of the Half Hollow Hills School District, Fort Lauderdale, Florida. A mathematics continuum writ-

ten in terms of behavioral objectives and sequenced in a nongraded format was developed and implemented in the 11 schools. A computerized student assessment program was developed and implemented in selected classes in grades 3-6 of each school. The success of this program led to the decision to expand it to all classes and to other disciplines. The list of objectives, and testing instruments, are included as appendices to this document. This project was an outgrowth of an earlier minipracticum which analyzed and evaluated the implementation of the Science Curriculum Improvement Study (SCIS) in the elementary classrooms of the Jericho (New York) School District. Coinciding with the project, the author received a grant from the National Science Foundation (NSF) for the purpose of training the district's elementary teachers in the methodology intrinsic to SCIS. This midpracticum was designed to reexamine the science curriculum one year after the implementation of SCIS. Among other objectives, the study was to ascertain whether the new science programs were meeting the classroom teacher's needs, to develop supplemental units of study at each grade level that were consistent with the philosophy and methodology of the SCIS and Elementary Science Study (ESS) programs, and to reexamine teacher and pupil attitudes after using the SCIS and ESS science programs over a time span of 6-18 months. Training was provided through the employment of trained science consultants. Results were obtained by the use of pretreatment and posttreatment questionnaires. Strengths and weaknesses of the program are discussed in the concluding section of the report. (CP)

This report focused upon mathematical skills needed by the American consumer to function effectively in the marketplace. The nationwide assessment was conducted during the 1972-73 school year by the National Assessment of Educational Progress (NAEP). Respondents at four age levels were included: 9-year-olds, 13-year-olds, 17-year-olds, and young adults ages 26-35.

The items on consumer mathematics skills were administered to individuals (probability samples) chosen in such a way that results could be generalized to an entire national population. The first chapter of the report describes results for problems involving money, using such skills as averaging and calculating percent and proportion. Chapter 2 discusses results of household problems involving estimating unit prices and converting units of measure. Chapter 3 examines the ability to read and interpret graphs. Chapter 4 deals with skill in computation of averages and percents. Chapter 5 summarizes the results. Data are reported for various groups within the national population. (JBW)

This directory describes the educational services of over 100 British and international organizations. Many of these groups provide resource materials which could be of use to elementary, secondary, and college teachers. Others offer services to help young people who are interested in working or traveling overseas, or in making contact with their peer group in foreign countries. Information provided for each organization includes any or all of the following: (1) date founded; (2) purpose; (3) membership information; (4) activities and services; (5) publications; and (6) address. A classified list of the organizations is included in the index. (RM)

Learning resources for Portuguese-American bilingual education in reading development and social studies comprise this series. The two-fold purpose of the series is to improve reading skills of bilingual students and to increase appreciation of the Portuguese culture. The materials are designed for intermediate and secondary Portuguese-American students who have not had the benefits of bilingual training in the lower grades. This unit examines the Portuguese in early California and California today, games for review, the trip to America, reasons for emigrating, and learning activities. The materials are also published in Portuguese. (Author/JR)

Science vs. Philosophy in Education: The Kelley-Kilpatrick Debate of 1929-31 as a Moment in the Development of Educational Analysis. Draft.

Pub Date 75

Note—28p.; Paper presented at the Annual Meeting of the American Educational Research Association (Washington, D. C., April 1975); Not available in hard copy due to marginal legibility of original document

**EDRS Price MF-\$0.76 Plus Postage. HC Not Available from EDRS.**

Descriptors—Debate, \*Educational History, \*Educational Philosophy, Problem Solving, Researchers, Research Methodology, \*Sciences, Scientific Attitudes, Scientific Methodology, Scientific Research, \*Social Science Research, Social Sciences, Technological Advancement, Theoretical Criticism

The long-forgotten debate of 1929-31 between T. L. Kelley and W. H. Kilpatrick is reviewed with the aim of reviving the crucial, but dormant, issue of the competence of quantitative empirical research to answer educational questions. They debated the need to supplement scientific method with a philosophical approach sensitive to needs, impulses, and interests. First, the causes and objectives of the debate are placed in historical and intellectual perspective by describing the wave of technological optimism that occurred about 1890-1920. Then, the principal points made by the debaters are reviewed and examined. It is concluded that Kilpatrick won the debate by making a strong case for the complementarity of scientific and philosophical methods in education. But, it can be granted to Kelley that educational analysis and theorizing has often seemed undisciplined and concerned more with displaying cleverness or doctrinal purity than with getting things right. Today, the situation of the late 1920s still exists: a narrow positivist orthodoxy among influential methodologists coupled with dissatisfaction on the part of others about triviality, irrelevance, and inconclusiveness of research using the scientific method. It is suggested that it is possible for research to be both rigorous and relevant; thus, the issue should be reopened. (Author/ND)

Descriptors—Concept Formation, \*Concept Teaching, Conceptual Schemes, \*Instructional Improvement, Problem Solving, \*Social Sciences, \*Social Studies, Teaching Models, \*Teaching Techniques

Identifiers—\*Gagne (Robert)

The purpose of this paper is to report how Gagne's model in "The Conditions of Learning" was adapted in order to develop activities, preobjectives, and test items for social studies concept instruction. One of the major problems in the field of social studies education is the looseness or nonspecificity of many of the definitions and terms which play such an important role in the planning, organization, and assessment of instruction. This looseness of definitions may contribute to a discrepancy between what teachers would like to teach and what they, in fact, teach. One way to improve instruction and increase student learning in the social studies is to develop precise definitions for the concepts used while simultaneously assisting teachers in the use of logical modes of instructional behavior. Philosophy of Education: Retrospect and Prospect.

Pub Date Mar 75

Note—26p.; Presidential address at the Annual Meeting of the Philosophy of Education Society (31st, Kansas City, Missouri, March 22-25, 1975)

**EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage**  
Descriptors—\*Educational Change, \*Educational History, \*Educational Philosophy, \*Educational Research, \*Foundations of Education, Higher Education, Relevance (Education), Speeches, Teacher Role

The major thesis of this paper is that the world of education has grown very complex, and it must be treated as such if one is to be an effective philosopher and educator in this century. A general reflection on the genesis of the field of education and the evolution of philosophy of education is offered. Two main parts of the educational complex are examined: the field of education as a general branch of research, study, and professional training; and the field of philosophy of education within it as a subject matter for teaching and scholarship. After a brief clarification of concerns, the paper offers an impressionistic sketch of developing and changing conceptions of the field of education and philosophy of education over the past 75 years. Then, an interpretation is presented of the complexity of both the field of education and philosophy of education and what this complexity may mean to the efforts of philosophers of education as they close out the last quarter of the 20th century. Descriptors—\*African Culture, \*African History, \*Area Studies, Bias, European History, Higher Education, \*Historical Criticism, Historical Reviews, \*Historiography, History Instruction, Negro History, Non Western Civilization, Resource Materials

Identifiers—\*Africa

This pamphlet surveys western historiography of precolonial Africa. Prior to World War II, African history emphasized the European role in Africa, relegating African history before European colonization to minor importance. Only after the increase in university enrollments and funding in the 1960's did opportunities for innovative research and new teaching specialties open up to include more in-depth and unbiased study of Africa. Dealing with specific aspects of African historiography, the sections (1) explore the emergence of African history and its turning point after World War II; (2) examine new historical techniques and sources, ways in which African history is taught in American and European colleges, the comparison of African and European civilization development, the Bantu migration, the development of the Bantu civilization, myths on African history and the political and cultural organization of peoples; and (3) inquire into the slave trade, new interpretations of the precolonial century, 1780-1890, and colonization. Theoretical concepts of spatial organization appropriate to bringing about humanizing social change are identified. This resource paper is part of a series designed to supplement existing texts and to fill a gap between research and accessible materials in geography. Part 1, societies and cities, introduces three basic forms of society: egalitarian, with an economy characterized by reciprocity; rank societies, characterized by redistribution; and stratified societies, characterized by market exchange. Two basic points are that the form of a mode of economic integration may vary substantially and that the balance of influence between reciprocity, redistribution, and market exchange prevails. The reliance of urbanism on the production and appropriation of a social surplus product is the topic which concludes Part 1 in an analysis of urban space economy. Part 2, concerned with the contemporary city as a system within which the surplus is generated and appropriated, examines how the general concepts formulated in Part 1 can be used to dissect the workings of the contemporary American city. Part 2 also looks at the place of residence in relation to the location of job opportunities within a transportation network, to the location of services and facilities, and to territorial distribution of wealth, as well as at the use and exchange value of the place of residence. A concluding summary is followed by notes and bibliography. (KSM)

**Descriptors**—\*American Indian Culture, \*Anthropology, \*Clothing, Clothing Design, Cultural Background, Cultural Differences, Cultural Images, Cultural Traits, Ethnology, Group Structure, \*Role Perception, Social Differences, Social Status, \*Tzeltal

**Identifiers**—Mexico, Tenejapa Indians

A model for interpreting the role of clothing in society and culture is presented. From the point of view of the wearer in any culture, the decision as to what to wear is based on two kinds of information: the nature of the occasion and the wearer's image of his social identity. People, therefore, use clothing to project information about themselves. An analysis of the clothing behavior of Tzeltal speaking Tenejapa Indians of Chiapas, Mexico, initially shows clothing as a symbol of ethnic differentiation from Spanish-speaking Ladino families. Within the Tenejapa society, there are accepted combinations and types of clothes for specific occasions which express the wearers' social identity and his degree of self-esteem. Any other form of clothing is marked by the addition of descriptive features termed "cues." Consequently, special outfits are worn by such little seen figures as civil-religious officials to identify them to the community. Variations from the accepted form of attire by the elements of the general population indicate the amount of freedom within the society. (Author/DE)

**Political Learning During a Campaign: Micro- and Macro-Analytic Research Techniques.**

Pub Date Apr 75

Note—27p.; Paper presented at Annual Meeting of the International Communication Association, Political Communication Division (Chicago, Illinois, April 23-26, 1975)

EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage

**Descriptors**—Changing Attitudes, Data Collection, Elections, Measurement Instruments, \*Measurement Techniques, Political Attitudes, \*Political Influences, \*Political Science, Political Socialization, \*Public Opinion, Research Design, \*Research Methodology, Social Science Research, Speeches, Voting

Research techniques for measuring political learning during a campaign are examined. Micro-analytic techniques involve intensive analysis of individuals. Large amounts of data on the psychological and sociological settings of subjects are gathered, along with information on opinions toward past and emerging political situations. Macro-analytic techniques sample large sections

of the general population and usually take the form of national or subnational opinion polls. Prior to the measurement of any changing attitudes, it is necessary to first establish a knowledge base of currently held opinions and attitudes. The advantage of macro-techniques is that they produce a wide range of standardizable data about voting behavior, political opinions, and attitudes towards the system. The disadvantage is that they record stages in the change process, but are incapable of analyzing the process. The major deterrent to micro-analytic work is that such studies cannot be readily generalized to a national population. However, samples drawn for micro-analytic research are representative of behavioral types and, therefore, offer superior techniques for studying complex learning processes. (Author/DE)

**Descriptors**—Community Size, \*Geographic Concepts, Geographic Location, Geographic Regions, \*Geography, Geography Instruction, Higher Education, \*Human Geography, Resource Materials, Site Analysis, Urban Areas, \*Urbanization, Urban Population, Urban Studies

This resource paper on geographical theories of urban location is part of a series designed to supplement undergraduate geography courses. The basic reasons for a city are to be found in the activities it performs in a specialized society and the clustering of residences of workers employed in these activities. The city, therefore, remains a cluster of activities, an agglomeration of residences, and a set of local services for the residents. There are three stages of the development of cities and, thus, of the types of activities that support cities including (1) extractive—agriculture, mining, forestry, and fishing; (2) processing—largely manufacturing; and (3) distributive—transportation of goods, wholesaling, retailing, and services. For each stage there is a distinctive type of urban settlement. Part 1 of this essay explains why cities specializing in extractive and processing activities locate where they do. Part 2 explains geography's best developed body of urban location theory, central-place theory, which focuses on the role of market towns in the distributive sector. Also included in part 3 is a list of suggested related readings. (Author/DE)

**Visual Blight in America, Resource Paper No. 23.**

Association of American Geographers, Washington, D.C. Commission on College Geography.

Spons Agency—National Science Foundation, Washington, D.C.

Pub Date 73

Note—48p.

Available from—Association of American Geographers, 1710 16th Street, N.W., Washington, D.C. 20009 (1-9 copies \$1.50, 10-99 copies \$1.35, 100 or more copies \$1.20)

**Document Not Available from EDRS**

**Descriptors**—College Instruction, \*Ecology, Environment, \*Environmental Education, Geography, \*Geography Instruction, Higher Education, Human Geography, \*Physical Environment, \*Physical Geography, Resource Materials, Visual Environment

Five articles comprise this resource paper that considers "visual blight" in the United States and the role that geographers can play in preserving the physical environment. The first article contends that visual blight is a proper subject for debate for geographers. The second article interprets causes and effects of visual blight and suggests that blight is a disease or symptom of organic malfunctioning. By studying visual blight, health of society can be judged on the ground of visual evidence in the landscape. In addition, the

importance of artistic integrity in environment needs to be considered. The third article describes the problem that not everything is offensive and that blight may be in the eye of the beholder. Five specifications of blight are listed. The fourth article suggests that visual blight must be attacked, but people must also become aware and open their eyes to appreciate their surroundings with greater sensitivity, thereby raising the level of concern and generating greater possibilities of change. A social and moral factor is introduced into the definition of landscape in the last article, which allows the geographer to make a significant contribution to the reordering of the environment with his knowledge and feeling of place. Geography of health care entails the application of location and transportation theories and of systems methods to the demand for and supply of health care. An analysis is presented of the new geography approach and the current research involved. Chapter one provides a review and summary of the Chicago Regional Hospital Study (CRHS), a major effort promoting this expanded concept of medical geography. More than one hundred working papers produced by the CRHS are reviewed. Three themes are developed in the second chapter: the foundation in geographic theory of the medical geographic research, the contemporary social relevance of the research, and policy implications of the findings of social sciences. In Chapter three the sixty-year campaign for national health insurance is traced. In the fourth chapter, a contrast is made of the Congressional legislation and the rhetoric in the area of health care delivery. An analysis of the Health Maintenance Organizations (HMO) is included, which indicates that most community-based HMO grants in large urban areas are doomed to failure. The final chapter analyzes the widening gap between doctor-rich and doctor-poor areas in which large urban areas such as Chicago are fast losing ground in the competition to retain and attract doctors. Several appendices conclude the document. This resource paper is part of a series designed to supplement undergraduate geography materials. (Author/JR)

This review of research on perception of the environment is part of a series designed to sup-

plement undergraduate geography courses. In the past decade there has been a remarkable increase in research related to man-environment interaction. Much of this research has centered on how the individual perceives the environment and is characterized by a trend toward psychological geography infused with behavioral science techniques. The report reviews current research and is organized according to a scale. Starting at the smallest scale, that of an individual in relation to another individual, it examines man and his relation to progressively larger sections of his environment. Areas of review include perception of personal space, room geography, larger architectural space, roads and pathways, neighborhoods and districts, the city, larger conceptual regions, countries, and the world. Also included is a list of readings related to each area of review. (Author/DE)

Document Not Available from EDRS

Descriptors—\*Geographic Concepts, Geographic Regions, \*Geography, Geography Instruction, Higher Education, \*Human Geography, \*Political Divisions (Geographic), Political Science, Psychological Patterns, Resource Materials, \*Space, Space Orientation

This resource paper on political geography is part of a series designed to supplement undergraduate geography courses. Starting with a broad outline of the relationship between human spatial and societal organization, it examines cross-cultural perspectives on the political organization of space and the emergence of the nation-state as a distinctive spatial expression. Spatial organization is viewed as a product of human societies and their institutions to control and direct the key political processes of competition, conflict, and cooperation. Part two examines the concept of territoriality, its historical evolution in man, and its contemporary implications for human society. Through its influence on feelings of spatial identity, on the development of a sense of geographical exclusiveness and segregation, and on a real patterning of human interaction, territoriality adds meaning and interpretability to the complex layers of the earth's formal and function regions. Included in the appendices are suggestions for further study and a list of related readings. (Author/DE)

Ethnographic Approaches to Research in Education: A Bibliography on Method.

Georgia Univ., Athens. Anthropology Curriculum Project.

Report No—Pub-75-1

Pub Date Jun 75

Note—33p.

Available from—Anthropology Curriculum Project, 107 Dudley Hall, University of Georgia, Athens, Georgia 30602 (\$1.00 paperback)

EDRS Price MF-\$0.76 Plus Postage. HC Not Available from EDRS.

Descriptors—\*Annotated Bibliographies, Anthropology, Bibliographies, Educational Anthropology, \*Educational Research, \*Field Studies, Methods, Research Criteria, Research Design, \*Research Methodology

Identifiers—\*Ethnography

Over 100 entries are compiled in this bibliography which identify sources helpful in contemplating or carrying out a fieldwork approach to research in formal educational settings. The bibliography emphasizes, but is not restricted to, contributions by anthropologists. Thus, there is a preference for using the terminology of that discipline, such as ethnography vs. field study. The bibliography deals with problems of educational research and how to overcome those problems. One problem is the effectiveness of the participant-observer technique in the schools.

The bibliography presents a diversity of alternative research techniques that could be applied. Books and journal articles dating from the late 1960s through the 1970s comprise the bulk of citations. Entries are listed alphabetically by the author, and include the date of publication and name of the publisher. (Author/JR)

Identifiers—Nixon (Richard M), Watergate Hearings

A short-term cohort design is utilized to examine college students at three different time periods—shortly before the Watergate Committee hearings began, after the hearings ended, and after Nixon's resignation. The purpose of the study is to test the stability of political attitudes under the impact of critical national events. Data for this seven-year study were collected by a questionnaire given on a random sample basis to about 500 college students. It is hypothesized that primary principle attitudes will be more stable than middle range attitudes which in turn will be more stable than topical issue orientations. Secondly, it is hypothesized that the cognitive maps (Showing cognitive dissonance and/or cognitive balance theory) which explain these attitudes will respond to both maturation process and events in the political environment. The results of analysis of variance indicate that, despite maturation, all of the attitudes measured display a very high degree of stability. A Multiple Classification Analysis (MCA) of the data supports the second hypothesis, even though attitudes remain stable. It is suggested that a more complete understanding of attitude formation, change, and their relation to political behavior will depend on the development and use of more complex models than those provided by cognitive maps. A simulation of a Congressional hearing on national population policy is provided. University students and community members decide on a resolution introduced in the United States Senate in 1971 which proposed the stabilization of population growth. Students organize themselves into four interest groups—Black Americans, business-industrial, conservation-environment, and women's rights—and present testimony before the hearing. The teacher is required to recruit outside persons as Congresspersons who will eventually decide whether to recommend the resolution to the Senate. Background information on United States population growth and projected future population increases are provided in the unit. Three evaluation methods, a list of possible associated activities, and a bibliography for each of the four lobbying groups are also included. (DE)

The proceedings of the 1974 Educational Testing Service Invitational Conference on Moral Development are included in this document. Six presentations cover a wide range of topics concerning the nature of moral development, the predominant educational philosophies in the schools, the distinctions between cognitive understanding of moral dilemmas and actual conduct, the issues of measurement in the study of moral development, and the choice of criteria for validating theories and techniques. The presentation by Irving Kristol calls for restoration of authority within major social institutions, especially the schools. Martin Trow stresses the moral issue of understanding negative evidence in the search for truth and discovery within universities. Murray Schwartz discusses moral dilemmas confronting lawyers and their professional education. Gunnar Myrdal reviews shortcomings of educational systems in underdeveloped countries. Jane Loevinger presents a critical analysis of three competing models of moral development and their implications for measuring moral maturity. The last presentation by Wilson Riles reviews the role of the schools in moral development during the past 50 years. (Author/JR)

The legitimate use of authority in political and moral education is examined from a cognitive-developmental perspective. However, legitimate authoritative communications by a teacher must have the potential for reasoned elaboration. These communications then mark off the boundaries of rational and authoritative communication from non- and irrational communications. The backing by reasons of these authoritative statements must be made apparent at some level meaningful to the child if genuine authority is to be established, even if the child is not capable of fully comprehending the concepts and relations involved. In Kohlberg's three stages of moral development, authority can be used to mark out and develop the sphere of reason up until the child reaches the postconventional, autonomous, or principled level. In the political education of young children, authority can be used to make clear to children that political party allegiances and strong positive feelings about the Presidency are not genetically inherited from parents but are choices made from rational political thought. Descriptors—Cognitive Development, Current Events, Elementary Secondary Education, Political Attitudes, Political Influences, \*Political Issues, \*Political Science, \*Political Socialization, Social Science Research, Speeches, \*Student Alienation, \*Student Attitudes

The impact of social and political events on the development of political attitudes in children is examined. Political learning is seen as an invariant sequence of developmental stages dependent upon physical and intellectual growth, and current events. The data consist of interviews with children at the third through the ninth grade levels. The data are further stratified along an urban/rural dimension for purposes of sociocultural comparisons. Results indicate that there is a relationship between stages of cognitive development and the evolution of political orientations in children. There is an association between age level of the children and the degree to which they support or have confidence in the government. Opinion samples taken before and after the Nixon resignation and pardon indicate a decrease in the degree of government support and confidence. The author concludes that the present distrust in government is therefore due to situational factors. (Author/DE)

Identifiers—\*Scotland

Curriculum development in the social sciences at both the national and local levels in Scotland is discussed in this bulletin. The first article presents guidelines for preparing materials for slow learners, primarily elementary students. The second article discusses the work of a primary and secondary liaison in geography instruction. Examination of a history project which aims to stimulate student interests is presented in the third article. Some aspects of the nature of curriculum evaluation comprise the fourth article. Reflections on European studies and physical geography in Scottish secondary schools conclude the document. The Scottish Centre's interest and activities focus on collecting and disseminating information on curricular developments in the social sciences; helping the Scottish Central Committee to coordinate the activities of local groups and working parties of teachers; and issuing teaching and learning materials for testing in schools and collecting and processing the results. The bulletin is published irregularly. (Author/JR)

Identifiers—\*Sweden

Recent findings are reported on the ongoing research related to the socioeconomic career attainment process utilizing the Malmö data set

from Sweden as reported in ED 097 268. The general proposition tested is that the association between selected personality resource assets and the desired outcomes of resource conversion settings will be different for different levels or types of resource settings. It is found that (1) the interaction of children's early abilities and their family socioeconomic environments has strong effects on future educational attainments; (2) the interaction of early ability and educational attainment has a low but significant impact on the development of ability at maturity; (3) the two interactions between educational attainment and job status, and between ability at maturity and job status account for variance in earnings over and above the direct effects of ability at maturity and job status; and (4) the impact of schooling on net earnings of job status and ability at maturity is negligible. Attention is given to the relevance of these findings for the development of status attainment theory, and some suggestions are made for extending the analysis by fitting more accurate statistical models. Tables and graphs illustrate the findings throughout the document. (Author/JR)

Identifiers—\*American Institute of Instruction

This research into American social history examines educational institutions and educators of the 19th century. The central organization of the study is the American Institute of Instruction, founded in 1830 and surviving until 1908. This organization provided a medium for discussion and examination of significant educational experiments in the 19th century. The author explores the educational institutions which sent members to the Institute, discusses the many teachers and professors associated with it, and examines its roles and functions. Other topics discussed include the emergence of the teacher as professional, teacher education, national and local school associations, and the school superintendent role. These increasingly specialized areas of education made the Institute largely ineffective in the early 20th century. (Author/RM)

Identifiers—\*Iroquois

Presented in this curriculum guide are teaching techniques to help the seventh grade teacher introduce pupils to a unit study on the Iroquois Indians. The pamphlet describes classroom procedures by which students learn the techniques for studying any culture through an intensive study of one local culture. The culture unit uses all the social science disciplines, including archaeology, but is organized in terms of the categories of anthropology. Part I gives some introductory exercises which will help student development, understanding, and analysis of cul-

ture. The section is useful as an introduction to any unit on culture. Part II deals with the pre-Columbian culture of the Iroquois before the arrival of the Europeans. It also briefly discusses subsequent Iroquois history. Part III contains annotated lists of useful instructional and reference materials. (Author/JR)

Identifiers—Samoa

The conflict between Samoan culture and the development of creativity among Samoan students is examined. Creativity is defined as the process of sensing gaps, finding a means of effecting closure, and formulating hypotheses to eventually produce a novel product. The greater the pressure to conform, however, no matter what the source, the fewer the individuals who can preserve their creative functioning. The extent to which a culture encourages diversity and tolerates individual deviation affects this creative development. Samoan culture has relatively few discontinuities. Roles are assumed at birth and rarely change throughout life. Obedience to those higher in authority and power over those slightly smaller or younger is consistently upheld. There is a great lack of stimulation which might produce changes. Pressures are brought to bear when any tendency to change appears. However, the one major source of discontinuity is the impact of United States culture. The conflict between the two cultures creates extreme frustration among young Samoan students and leads to a high dropout rate in Samoan schools. Samoan educators are encouraged to be highly sensitive to creative students' needs in order to decrease the role conflict of Samoan students. (Author/DE)

An introduction to the study of the future for secondary social studies and English classes is presented in this teaching guide. The primary purpose is to help students understand the nature of change in modern society, identify impending changes, order their priorities, and clarify their values. Built around key concepts, problems, and issues posed by the future, the course emphasizes three areas of the future. Phase 1, an introduction to the future, aims to stimulate curiosity through a science fiction novel. In phase 2, students examine what others have said about the future. The objective is to acquaint students with a number of different viewpoints and a spectrum of alternative futures as postulated by different writers. Phase 3 investigates specific problem areas which focus around small group and individual projects. The guide includes a rationale and course description, a list of materials and resources, behavioral objectives, additional resources, study guides, and handouts. (Author/JR)

Identifiers—Canada (Toronto), Ontario

This report investigates the educational philosophy programs related to the multicultural population of Toronto. Two fundamental goals for the Toronto Board of Education are to provide equal educational opportunities to all children, and to do so without loss of the child's personal identity and cultural integrity. The work force provides recommendations on eight issues related to multicultural, multiracial education including (1) English as a second language, (2) educational opportunity differences, (3) maintenance of original cultures and languages; (4) instruction in a third language, (5) multiculturalism and the general curriculum, (6) system sensitivity, (7) community-school relations and the multicultural society, and (8) the responsibilities and role of national government in funding multicultural programs. Included in the appendices are reports and research by the work force that led to the specific recommendations. (Author/DE)

This paper argues that a major aspect of intelligence is the ability to solve problems and that careful analysis of problem-solving behavior is a means of specifying many of the psychological processes that make up intelligence. The focus is on the mechanisms involved when, in the absence of complete instruction, a person must "invent" a new solution to a problem by assembling previously learned skills. To describe this type of problem-solving behavior the authors set forth an information processing model characterized by three classes of processes: problem detection, feature scanning, and goal analysis. A series of studies on invention, in which children are taught component skills and their behavior is examined in situations where these skills must be combined in a novel fashion, elucidates this model. The purpose of this study is to consider methods for providing adequate library and information services for U. S. international education programs. The state of U.S. library resources for the following eight world-area programs was reviewed to determine common library needs and problems: Africa, East Asia, Latin America, Middle East, South Asia, Southeast Asia, Soviet Union and Eastern Europe, and Western Europe. Findings include the need for bibliographic control of materials and better coordination in their acquisition and dissemination; development of more highly specialized bibliographers; and elimination of unnecessary duplication of effort. Two of the many recommendations made are the creation of an organization to plan and coordinate library services for area study programs throughout the country and the development of large multipurpose regional resource centers. Descriptors—Decision Making, Federal Government, \*Information Utilization, Management Information Systems, \*Policy Formation, Political Influences, \*Research Utilization, Social Influences, \*Social Science Research, \*Use Studies

Identifiers—Social Indicators

A preliminary review of findings and implications of social science research utilization among government officials is provided. The data come from face-to-face interviews of 204 persons at the upper levels of decision making in the executive branch of the federal government. Section one presents descriptive data on the diversity of the self-reported use of social science knowledge by the respondents, on the particular characteristics of that knowledge, on the extent of its use, and on its impact on the policy decisions involved. Section two identifies and conceptualizes factors that facilitate or inhibit the use of social science knowledge in policy-related decisions. Section three presents an analysis of responses to questionnaire items focusing on the desirability and value of a set of quantitative measures to indicate social well-being. This section adds new insights that underscore the importance of such efforts to apply social research to policy activities. Section four summarizes the overall findings of the study and presents general remarks about their implications for policy makers and social scientists. (Author/DE)

Identifiers—Civil Servants

Suggestions for an alternative approach to public administration education are provided. One recent movement in public administration strongly attacks the notion of neutral scientific training and emphasizes that public administrators should administer policy according to social equity. However, this standard does not provide any objective criteria for distinguishing among the various claims of disadvantaged minorities and cannot differentiate between equality and justice. The function of administration in a democratic regime is to be more than a mere reflection of the people's wants and more than a

mirror of the bureaucrat's particular view of "social equity." To develop values and judgment capabilities, administrators should be educated in relating current issues with American political thought and tradition. The study of constitutional law, an apprenticeship with a public administration organization, case studies of decision making, and a research project which requires the student to develop a policy on a particular controversial question are suggested as a possible program for public administration education. **Identifiers**—Illinois (Chicago)

The purpose of this research is to determine if it is possible to build an inner-city community with socioeconomic and racial mix and have it work. The findings from a study carried out in the Near Southside Chicago community of South Commons, built in the late 50's are presented. Methodology included informal conversations, interviews with adult residents of all income levels and ethnicities, and observation of children. Findings show that inner group conflict is a function of class difference rather than race, and physical design and landscaping reflect such differences and exacerbate them; and that the school is fundamentally pivotal to interaction and community organization because as a sociophysical institution it has the quality of bringing together rich and poor. Four hypotheses for further work emerge from the study. Among these are that persons moving into a community out of desire to live in a mixed setting would be more committed to the specifically attracting features, and that institutions directly affecting children are fundamental to community stability and cohesion. **Identifiers**—\*Bicentennial, New York

The role of New York women in the American Revolution is discussed in a survey of four cultural traditions in 17th and 18th century New York—Iroquois, African, Dutch, and English. The purpose is to provide a historical record on the subject of women's history. Women from the four cultural traditions were bound by different conventions which influenced their reactions to the Revolutionary crisis and affected the ways in which that crisis would change their lives. American women were as deeply influenced by the Revolution as were American men, though not always to their benefit. The successful war for independence marked a significant turning point in the status of women. Documented stories are recounted of individual women's activities during the Revolution in each of the chapters titled: Four Traditions; Choosing Sides; Soldiers, Refugees, and Camp Followers; Treason and Espionage; and Aftermath. Some of the stories depict heroic acts, but some show wrongdoings as

well. They all indicate the importance and necessity of the roles women played and the tasks they undertook during the Revolution. (Author/ND)

**Teaching Canadian Politics at American Universities: Some Recommendations.**

Pub Date May 75

Note—36p.; Paper presented at the Western Social Science Association meeting (Denver, Colorado, May 1975)

**EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage**

**Descriptors**—College Instruction, \*Comparative Analysis, Foreign Relations, Higher Education, Policy Formation, \*Political Science, \*Politics, Relevance (Education), \*Social Sciences, \*Teaching Techniques

**Identifiers**—\*Canada, Comparative Political Systems

The introduction and study of Canadian political systems are recommended as a model for use in political science courses at American universities. In the past, recognition of the worth of Canadian studies has been minimal. New and interesting topical areas such as Canadian nationalism, missionary activities, energy resource problems, and pollution have redirected the emphasis on Canadian studies. Four major areas of Canadian studies are examined which bear directly on important topics of interest to American political scientists: nation building, policies, institutions, and international relations. A brief historical narrative of each area is included, along with techniques for incorporating Canadian studies. (Author/JR)

**Descriptors**—\*College Curriculum, Core Curriculum, Curriculum Development, Educational Demand, Educational Supply, \*Educational Trends, Higher Education, Intellectual Disciplines, \*Political Science, \*Professional Education, Professional Training, Public Service Occupations, Social Sciences, \*State of the Art Reviews

Some possible new directions for the political science discipline are presented. Within the context of current, formal undergraduate education, political science has two major functions: (1) to provide part of the required general, social science education, and (2) to attract and prepare future recruits for the profession. These functions are referred to as "old uses." The discipline's most common career is teaching; therefore, political scientists as professionals are best at reproducing themselves. The premise for "new uses" is that, in addition to contributing to the general education of college graduates and preparation of more teachers of political science, the discipline could make a major contribution toward the preparation of professionals in the public service. Generally defined, the public service comprises that component of the world of work that is supported by public funds. The potential for "new uses" of political science lies in a conscious and determined effort within the discipline to create programs relevant to the preservice and inservice education and training of competent professionals for the public service. **Descriptors**—\*Activism, \*Adult Development, Change Agents, Changing Attitudes, Comparative Analysis, Cultural Factors, Political Affiliation, Political Attitudes, \*Political Science,

\*Political Socialization, Social Science Research, Socioeconomic Influences, \*Student Attitudes

**Identifiers**—Japan

The relative influence of stages of political socialization on the adult political orientation and activities of former American and Japanese student activists is examined. A causal model of the stages of political socialization, including family and school, student activism, and adult roles, is compared with the political fate of student activists who participated in the 1960 antisecurity treaty movement in Japan and the civil rights movement in the American South. The results indicate that student activism in college is the best predictor of adult politics in both countries. Family and early school political socialization are only weak predictors of future adult politics. Adult political socialization can be either a facilitator or a constraint for maintaining political commitments. In the United States, career choice has no direct effect because student activism strongly affects career choice. In Japan, career choice has a strong effect on adult politics. Former Japanese students in the knowledge and human services industries have greater left-wing commitments. For American student activists, remaining free of family affiliations is a facilitator for left-wing politics; while in Japan, family obligations are a facilitator of left-wing politics. (Author/DE)

**Life Span Development of the Theory of Oneself.**

Pub Date Jul 75

Note—17p.; Invitational Address to the Biennial Conference of the International Society for the Study of Behavioural Development (Guildford, Surrey, England, July 1975)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

**Descriptors**—\*Goal Orientation, Human Development, Individual Development, \*Individual Power, Psychological Characteristics, Self Actualization, \*Self Concept, Self Esteem, Self Evaluation, \*Social Psychology, Social Science Research

Suggestions for research on the components of self-theory development over a lifetime are examined. Self-theory, like other knowledge, is dependent on the theories in one's culture about human nature and the biological, social, and physical world. Language expands or limits the concepts available for thinking about one's self-image or sense of self. Yet there is little in behavioral sciences literature which traces these changes. Three possible models are provided for further research. The theory of personal control interprets self-image as the growth and decline in the feeling of power, control, and mastery of the key tasks of life. The progression from early age on into the career can be characterized by an increase in realism about what is possible, and by a steady lowering of aspirations to correspond to the gradual foreclosing of reality. The theory of change in oneself stresses that every person must have as a component of the self-theory some hypothesis about the kind of person he can become in future time and, hence, the possibility of personal change. **Descriptors**—\*Academic Achievement, \*Birth Rate, \*Demography, Population Education, \*Population Growth, Population Trends, Race Influences, Social Influences, \*Social Science Research

Using data from the 1960 and 1970 United States Censuses, annual estimates of age-specific fertility rates by educational attainment of women

for the period 1945 through 1969 are analyzed. These estimates allow annual examination of the extent to which various educational subgroups have participated in recent fertility trends. The sample population was divided into five age groups from 15 to 44 years and five educational levels from junior high through college. The single pervasive finding is that fertility increased during the 1950's and decreased in the 1960's for virtually every group examined. The increase in fertility during the 1950's was greater among younger women and among better educated women; and the decline in fertility during the 1960's was largest among women who attended but did not complete high school or college. With few exceptions, the pattern of fertility rise and decline over the two decades was similar for black and white women of comparable educational attainment. (Author/DE)

**Descriptors**—American Government (Course), Change Agents, Citizen Role, Citizenship, \*Course Objectives, Democratic Values, \*Educational Objectives, General Education, Higher Education, Policy Formation, Political Power, \*Political Science, Political Socialization, \*Politics, \*Skill Development

Competencies or general life skills and understandings that a political sciences course attempts to promote in the student in a general education curriculum are examined. General education is described as a set of skills which help individuals exercise control over their own lives. These competencies consist of the understandings that (1) politics involve power relationships which have both causes and consequences; (2) politics involve making decisions from among competing claims and enforcing those decisions through appropriate means; (3) political decision making implies the existence of structures and processes which are both formal and informal; (4) political decision making means people making decisions affecting both themselves and other people; (5) political decision making can be used to lead the attack both for and against change; (6) politics is purposive and the purposes may or may not be arrived at rationally; and (7) the political process and ability to reach conclusions about one's own desired role in the process involves pros and cons. Citizen competence and social learning competencies are viewed as essential not only for the individual but for the society as a whole. (Author/DE)

**Identifiers**—Geography Curriculum Project, Mastery Learning  
This study is an assessment of the effect of three criterion mastery levels and aptitude on the achievement, retention, and attitude of seventh grade students using a population geography text. The three criterion levels used were 90 percent, 80 percent, and 70 percent of the correct responses on each of 41 lessons in "Population Growth in the United States and Mexico." Aptitude was

measured by a word meaning text. Aptitude was a major independent variable because of the premise that mastery procedures may overcome achievement difficulties of low aptitude students. Contrary to most of the literature on mastery learning, the results indicate that mastery on formative exercises did not contribute to higher levels of achievement on the summative test. The study also failed to show that achievement, retention, or attitude toward the unit differed among the three criterion groups. The study confirmed that previous knowledge, as measured by a word meaning test, was a more potent factor in achievement than were differential criterion levels. (Author/DE)

Potentially effective and trainable learning strategies were identified by analysis of a specially developed learning strategy inventory and a survey of educational and psychological review literature. Four aspects of the learning process suggested the usefulness of special training: identification of important or unfamiliar material, applications of techniques for the comprehension and retention of this information, efficient retrieval of information, and skill in coping with distractions during the foregoing processes. A training program was developed for teaching selected specific strategies, including comparison of the three alternative comprehension/retention strategies (referred to as connection techniques) of paraphrasing, question answering, and the use of visual imagery. The results indicated that minimal strategy training showed significant results in long-term retention, although no reliable differences were found in immediate testing. Further refining of the techniques was recommended. An effective strategy training program suitable for implementation in technical training was created, modified, and assessed. (Author)

**Identifiers**—\*Learning Strategy Inventory  
A learning strategy inventory composed of 201 multiple-choice items was developed based upon similar work and suggestions stemming from a literature review. Correlational and factor analyses, based on data for approximately 200 students, were identified and incorporated into a learning strategy training program. (See SO 008 593 for a report on the program.) The learning strategy inventory provided an effective basis for strategy training development. In addition, the learning strategy inventory provided a significant first step in the development of a more general instrument for diagnosing learning strategy in-

adequacies in specific individuals. The learning strategies inventory and its correlations and the factor scores correlations are located in the appendices. (Author/ND)

**Identifiers**—\*Paraphrasing

This report presents an effective, integrated learning strategy program emphasizing a connection technique that uses paraphrasing. Components were derived from a review of the educational and psychological literature and from an analysis of responses to the learning strategy inventory, which were conducted during this same research effort. (See SO 008 594 for a report on the inventory.) Also, two other training packages (visual imagery and question-answer connection) were evaluated along with this package in a controlled experiment. (See SO 008 593 for discussion of the controlled experiment.) The results of this experiment showed a 55 percent improvement in long-term retention when using paraphrasing for the trained group, compared with an untrained control group. With appropriate insertion of blank pages for answers, this report can be used to provide learning strategy training. (Author/ND)

**Identifiers**—\*Africa  
This book is the first in a series of UNESCO guide books for teaching geography on a continental scale, dealing with either land masses or vast regional groups which have common characteristics. Written by African geographers, it is intended for primary and secondary school teachers, teacher-training institutions in Africa, and also for geography teachers in other countries to help them understand African people, their ways of life, and their problems. The first of three main divisions of the book consists of a study of various factors in development, showing how economic data may be brought up-to-date. In the second and largest part, the case study method is used, based on direct observation and explanation of facts. Various types of agricultural, forest, mining, or industrial exploitation are described to show actual conditions and thus encourage students to observe and study their own environment. The third part consists of practical advice for teachers, designed in a nontraditional form, with examples taken from the authors' experiences of teaching in Africa. (Author/ND)

**Identifiers**—\*Presidency

An historical analysis of the use and abuse of power in the Presidency is provided in this supplementary student material. The content includes an analysis of the historical roots of presidential power, popular support, cooperation and conflict with Congress, the international role of the presidency, presidential decision making, the relationship with the courts and the news media, presidential personalities, mechanisms for presidential constraint, the future of the Presidency, and a conversation with the authors about the role of the Presidency and individual presidents. The unit can stand alone or be used in conjunction with lectures, discussions, supplementary sources, or textbooks at the secondary and college levels. Use in conjunction with a standard text or in any nontraditional approach is recommended due to the highly provocative questions raised in the materials. A four-page instructor insert provides a list of essay and multiple-choice test questions and suggestions for use of the material. (Author/DE)

**Descriptors**—Educational Diagnosis, \*Educational Improvement, \*Educational Quality, Elementary Secondary Education, \*Geographic Location, Geographic Regions, Geography, \*Geography Instruction, Global Approach, Higher Education, Map Skills, Speeches, Student Evaluation, World Affairs, \*World Geography

Today's students in the Western world show a widespread lack of basic world knowledge. Geography graduates in a Canadian and an Australian university were asked to locate 75 major cities in the world. The results indicated a wide knowledge of cities in the Western world but little knowledge of cities in Africa, the Middle East, and Asia. Only three out of 75 Canadian graduates could correctly locate the countries of Mali, Mozambique, and Guinea-Bissau. Eight suggestions to improve geography education call for increases in (1) selectivity of entrants into university programs, (2) numbers and variety of geography courses, (3) infusion of Third World examples into university geography courses, (4) exchange of geography scholars between the Third World and the Western countries, (5) qualified geography teachers to serve in preservice and inservice programs for teachers, (6) mandatory world geography courses at the university level, (7) emphasis in teaching map skills for all educational levels, and (8) recognition that elementary and secondary geography need not emulate university geography courses. Part of the "Becoming a Citizen Series," this book is the first of three Federal Textbooks on Citizenship which are published by the Immigration and Naturalization Service. The series, first published in 1964, is regularly revised to reflect any changes that may occur in the government. The book teaches immigrants to speak, read, and write English and prepares students for the citizenship examination, while teaching basic tenets of American life. The early history of the United States and a description of the government and how it works are presented. The book also teaches the rights and responsibilities of citizenship and how to become an American citizen. (Author/JR)

**A Brief Guide to Preparing an Undergraduate Research Paper in African History. Occasional Paper 75-2.**

State Univ. of New York, Stony Brook. American Historical Association Education Project.

Pub Date 75

Note—23p.

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

**Descriptors**—\*African History, Area Studies, Bibliographic Citations, Higher Education, Historical Criticism, \*Historiography, \*History Instruction, History Textbooks, Library Skills, Research Skills, \*Research Tools, Resource Materials, Student Projects, \*Student Research, Writing Skills

A practical guide to preparing an undergraduate research paper in African history is provided. Since the common problems of choosing a topic and locating needed resources often require more time than is necessary, suggestions which increase efficiency in these stages are emphasized. A short annotated list of African history textbooks with clear opinions and controversial generalizations are suggested as suitable materials for leading a student to a topic for research. The fundamental controversy in African historical writing today is over the degree of continuity or change from precolonial times, through colonial rule, to the present. This controversy can lead to specific questions which are suitable for research papers. In the process of defining a topic, the student should move from an assumed generalization to the testing of a hypothesis about the generalization. Nine assumptions and possible hypotheses are suggested for further study. Relevant bibliographical aids include instructions on how to use the card catalog, indexes, handbooks and encyclopedias, bibliographies, the human relations area file, scholarly journals, maps, and atlases. **Identifiers**—\*New Zealand, Recurrent Education

One of a series on the state of recurrent education in OECD member countries, this report examines the educational programs of New Zealand in the context of both the educational objectives of the New Zealand government and the Centre for Educational Research and Innovation. Three major headings comprise the focus of the document: the New Zealand experience in attempting to achieve equality of educational opportunity, current policies for recurrent education, and emerging issues. The document begins with an introduction to the New Zealand background. Understanding the educational objectives and programs in New Zealand revolves around their contribution to equality of educational opportunity. Following the introduction, the current policies for recurrent education are examined, including consultative planning, educational planning, educational development, review of secondary and continuing education, community colleges, community education programs, labor market policies, and financial assistance for study and training. The third section of the document examines emerging issues in New Zealand education, including teacher education, the profession of continuing educators, learning materials for adults, the extension function, educational entitlement, and target groups. The American Issues Forum (AIF) is a national Bicentennial program sponsored by the National Endowment for the Humanities and cosponsored by the American Revolution Bicentennial Administration. AIF seeks to engage Americans in serious consideration of the nation's institutions,

values, and traditions through a calendar which sets forth and elaborates on the fundamental American issues contained in nine monthly topics and weekly subtopics. The units, designed for secondary social studies and history classes, provide students with a special, activity-oriented one-day discussion unit for each of the 36 weekly subtopics of the calendar. The first volume (the second to be published in October) contains the 16 units for the first four months of the calendar beginning August 31, 1975. Each of the one-day units is a self-contained package which includes suggestions to the teacher for procedures, readings, instructions, and questions. Although a variety of instructional procedures are suggested, all of the units are intended to engage students in structured activities leading them to active inquiry and participation in class discussions. Several appendixes conclude the document, including bibliographies, a description of an in-school television debate, and the full text of the AIF Calendar. (Author/JR)

The American Issues Forum (AIF) is the national program for the Bicentennial developed by the National Endowment for the Humanities and cosponsored by the American Revolution Bicentennial Administration. The purpose of the Leadership Packet is to provide those who are interested in developing AIF Programs with suggestions about how to plan and with information about supporting materials, services, and activities. The key to the American Issues Forum is a Calendar of nine monthly topics—issues that have been fundamental to American society throughout history. The Calendar—part 2, following an introduction—is designed to stimulate serious and coordinated exploration of American's abiding accomplishments and problems during the Bicentennial celebration, providing a framework for a variety of programs. Part 3 suggests kinds of programs which could be planned for communities and organizations. General how-to-do-it suggestions for programs development, resources, promotion, and coordination are contained in part 4. Extensive bibliographies for adults and students are contained in part 5. A directory of AIF-related materials, media efforts, and supporting organizations comprise part 6. Part 7 lists various Bicentennial exhibits and displays. (Author/JR)

 Prepared in recognition of the Bicentennial, this historic guide of Iowa is intended to supple-

ment materials prepared by the Iowa Curriculum Division. It provides, in one convenient reference, information for use by teachers, students, tourists, and others interested in Iowa's history. Up-to-date information is given on historical societies, museums, archaeological sites, geological areas, botanical preserves, wildlife exhibits, outdoor classrooms, zoos, art centers, scientific facilities, and places of historical or cultural interest. The resource unit is arranged in alphabetical and numerical order by name and number of county. Names of all known societies, museums, landmarks, sites, natural areas, and facilities used for educational purposes are listed alphabetically under each county. Also included are a location map; an index; a calendar of celebrations, festivals, and historical events; an Iowa map; and an alphabetical index. This resource may be of interest as a model to other states that wish to develop a guide for the Bicentennial. (Author/JR)

**Descriptors**—\*Annotated Bibliographies, Bibliographies, \*Communications, \*Educational Research, \*Elections, Higher Education, Political Attitudes, Political Influences, \*Political Science, Politics, Public Opinion, Voting  
**Identifiers**—Political Campaigns, \*Political Communications

This 63-page annotated bibliography contains available materials in the area of political communication, a relatively new field of political science. Political communication includes facets of the election process and interaction between political parties and the voter. A variety of materials dating from 1960 to 1972 include books, pamphlets, journal and magazine articles, unpublished papers and dissertations, Congressional Quarterly articles, and government publications. The following seven areas of the field are examined: (1) general campaign techniques; (2) media and advertising techniques; (3) polling, surveying, and the use of computers for data collection; (4) theories and techniques of political attitude change and persuasion; (5) specific elections; (6) the techniques of political parties; and (7) financing of campaigns. The collection is partially annotated. (JR)

**Identifiers**—\*China

Over 80 films are listed in this annotated film guide on China. Designed to help educators select films about China, each entry contains a short annotation which gives a capsule and sometimes evaluative summary of film content. The booklet is divided into four sections on China before and after 1949, Taiwan, and Chinese culture. Each listing contains the full title, length, date, audience, and availability of the film. A selected listing of audiotapes concludes the document. (JR)

Document Not Available from EDRS

Descriptors—Educational Administration, Educational Legislation, \*Game Theory, \*Management Games, \*Models, \*Role Playing, \*Simulation, Sociodrama

This simulation game begins with an introduction which lists the areas of study involved and presents some basic instructions. Rules and criteria for the simulation game are then presented, which state that each participant in the game is assigned a personality role, a position role, and a situation to which he will react. Descriptions of the roles and situations complete this part of the game. Background material is included for the game which briefly presents material on the following topics: (1) common law precedents, (2) contractual agreements, (3) state/district regulations, (4) certification, (5) school finance, and (6) authority and responsibility. Statistical Considerations for Establishing CBTE Cut-Off Scores.

Pub Date 75

Note—14p.

Available from—Joseph A. Trzasko, Ph.D., Department of Psychology, Mercy College, Dobbs Ferry, New York 10522 (No price quoted)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*Cutting Scores, \*Decision Making, \*Performance Based Teacher Education, Performance Criteria, Reliability, Statistical Analysis, \*Test Construction

This report gives the basic definition and purpose of competency-based teacher education (CBTE) cut-off scores. It describes the basic characteristics of CBTE as a yes-no dichotomous decision regarding the presence of a specific ability or knowledge, which necessitates the establishment of a cut-off point to designate competency vs. incompetency on stated objectives. Statistical considerations for establishing CBTE cut-off scores are reviewed, and, based on test scores, two types of classification errors are identified. These are false acceptance, i.e., nonmasters erroneously classified as masters; and false rejection, i.e., masters erroneously classified as nonmasters. The report recommends that cut-off scores should not be arbitrarily established, but should be based on decision theory, the goal of which is to increase correct rate and decrease error rate. It was found that increasing the cut-off score will decrease false acceptance error and increase false rejection error, while decreasing the cut-off score will decrease false rejection error and increase false acceptance error. It was concluded that since shifting cut-off points reduces one error at the expense of the other, the direction of shift should be in the direction of the less serious error (false rejection). Numerous figures and tables are included. (BD)

Descriptors—Admission Criteria, \*Course Content, \*Course Evaluation, Course Objectives, \*Education Courses, Education Majors, Higher Education, \*Teacher Education, \*Teacher Education Curriculum

Identifiers—\*University of Arkansas

The College of Education at the University of Arkansas conducted a study in order to update and upgrade its first education course. It was determined that this course was of vital importance since it was an introduction to the field of professional education for students and the first systematic contact the faculty had with prospective educators. The first step in the study was a survey of the current literature, which revealed tentative directions for the new program. These new directions included preprofessional experiences, concentration on first undergraduate courses, self-concept, and more student involvement in course decisions. The second

step was to send a questionnaire to 78 universities, seeking information on the role and function of the first course concerning admissions, course content, department where housed, and innovative techniques utilized to introduce students to the field of education. Responses showed a common concern for examination of teacher education programs and a specific concern for using preprofessional experiences in the first course in selection procedures. Using this informational input, a design model was drawn up to provide overall first course aims and objectives. The first course was taught on an experimental basis for one semester to gain feedback as to process of class work and field experiences. A teaching team made up of professional staff met periodically prior to, during, and after the course to determine how to operate more effectively. (RC)

Changing Roles and Patterns in Teacher Certification.

Pub Date 75

Note—4p.; Paper presented at the Summer Workshop of the Association of Teacher Educators (1975)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*Accreditation (Institutions), Governance, \*Professional Associations, State Legislation, State Licensing Boards, \*State Standards, \*Teacher Certification, \*Teacher Education, \*Teacher Qualifications

This paper is a list of 11 changing roles and patterns in teacher certification. The list includes the following: (1) there is a trend toward establishing legal councils on teacher certification; (2) professional mechanisms for formulating policy recommendations for teacher certification are as important as actual voting membership on legal agencies for teacher certification; (3) teacher certification continues to focus on requirements for initial entry into a professional position, and may thus be inadequate in encouraging career-long professional improvement; (4) standards for teacher preparation and certification reflect recommendations of professional organizations; (5) the "approved program approach" is followed for certification instead of transcript analysis; (6) state officials are taking the initiative for cooperative efforts with regional and national accrediting agencies; (7) more specific preparation programs are being established; (8) professional organizations tend to restrict latitude at the local school level through state legislation, and later complain about the rigidity of state regulations; (9) teacher education institutions face the challenge of helping teacher education graduates find jobs; (10) there is a built-in deterrent in teacher preparation and certification programs to bringing into schools personnel who have had rich experiences in other fields; and (11) a possible result of anticipated court tests of the teacher preparation/certification process is certification based on a state administered test. New Teacher Organization Initiatives and Teacher Education.

Pub Date 14 Aug 75

Note—14p.; Paper presented to the Leadership Institute of the American Association of Colleges for Teacher Education (Annapolis, Maryland, August 14, 1975)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—Educational Responsibility, Governance, Inservice Teacher Education, Performance Based Teacher Education, \*Professional Associations, Professional Education, \*Responsibility, \*Standards, Student Teaching, \*Teacher Associations, \*Teacher Education

Teacher organizations believe that the teaching profession must govern itself. They are therefore requesting professional commissions in every state to set standards for teacher education. They desire involvement in the planning and implementation of teacher education programs. Teacher organizations feel strongly about competency based teacher education, and although they have always stood for having only competent teachers in the classroom, they will fight governmental intrusions into all professional prerogatives. The organized teaching professions will provide inservice programs for its members. Higher education members of the profession will be invited to be a

part of these programs as equal members, but the organized profession will seek expertise at whatever level it is available. The teacher organizations are planning to take new initiatives to enforce their own code of ethics, but will resist outside interference by those who would wish to use the code for their own benefit. Finally, teacher organizations plan to have a greater say in student teaching/intern programs. They desire more input in the field experiences of future teachers. Teachers are now demanding their professional rights, and the new initiatives of organized teachers will overlap on what has formerly belonged solely to institutions of higher education. (RC)

This monograph is the result of a conference held on the subject of governance by consortium. The purpose of the conference was to listen, discuss, and react to four position papers prepared by individuals with differing points of view relative to the shared management of teacher education. This monograph begins with a general discussion of governance, consortiums, and decision making. The remainder of the monograph is divided into two sections. The first section presents position papers by individuals who occupy positions in four of the role groups most commonly included in consorsial governance arrangements. These are university professors, public school teachers, school district administrators, and state department of education personnel. In the second section, three teacher education centers that are managed through consorsial arrangements are described by the directors of those centers. These three centers were selected to represent consortiums between (1) an institution and several participating public agencies; (2) several institutions, several school districts, and an intermediate agency in a nonurban setting; and (3) a large urban school district and several institutions of higher education. HETFIRE: Reactions to a Grand Scheme.

Pub Date 75

Note—9p.

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—Change Agents, \*Change Strategies, \*Consortia, \*Educational Change, Educational Coordination, Educational Innovation, Educational Objectives, Governance, \*Organizational Change, Teacher Centers, Teacher Education Identifiers—\*HETFIRE

The purpose of this paper is to define HETFIRE (the title of a report by the Higher Education Task Force on Improvement and Reform in American Education), and to identify and discuss the key elements contained in HETFIRE. The task force was established in 1972 to determine and conceptualize the best thinking of the higher education teacher education community concerning the reform of American education. The report presented the following three recommendations: (1) accelerated educational reform; (2) creation of personnel development centers; and (3) partnership or shared responsibility in teacher education. The report suggested a number of significant issues, three of which are examined and challenged in this paper. This paper states that the questions of the purposes which formal schooling should serve is completely ignored in HETFIRE; hence we continue to retain and support a conservative, subject-matter centered,

alienating form of education. The paper also disagrees with HETFIRE's suggestion that university professors move into the realm of pragmatic problem solving in the schools. Instead of its confusing the roles of theoreticians and practitioners, the paper suggests that the HETFIRE report should have urged the continued need and support for educational theoreticians at all institutions preparing teachers. The paper also disagrees with HETFIRE's advocacy of giving equal power to teachers, school administrators, community groups, representatives of industry, and interested lay people. (BD)

As chapter one states, this resource book tries to explore some new ways of thinking about health education, its needs, and its opportunities. Chapter two attempts to define health and discusses how education affects one's behavior and attitudes towards health. Chapter three deals with various health problems in the United States today and possible solutions. Chapter four discusses how young learners vary in mental, emotional, social, and physical growth. Chapters five and six deal with scientific and non-scientific approaches to, and varying attitudes toward, medicine, education, and health, and how an individual's motives and attitudes can affect health-related behavior. Chapter seven describes the mental, social, and physical risks which people take, involving activities such as sports, drinking, taking drugs, and sex. Chapter eight discusses "getting high" both naturally and with the help of outside stimuli, and how these activities affect one's health. Health and health education in an ecological perspective are discussed in chapter nine. Chapter ten discusses variations from dominant values and how they affect an individual's or group's learning patterns and activities. Chapters eleven, twelve, and thirteen discuss curriculum development, learning and teaching strategies, and various teaching materials and resources. Chapter fourteen deals with the value and various methods of evaluation. Health education outside the school is discussed in chapter fifteen. Chapter sixteen concerns the future of health education. An Information Processing Approach to Skill Acquisition: Perception and Timing.

Pub Date 17 Mar 75

Note—43p.; Paper presented at the Annual Meeting of the American Alliance for Health, Physical Education, and Recreation, (Atlantic City, New Jersey, March 17, 1975)

EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage

Descriptors—Athletics, Eye Hand Coordination, Object Manipulation, \*Perceptual Motor Coordination, Physical Activities, \*Physical Education, \*Psychomotor Skills, \*Skill Analysis, \*Skill Development

In order to understand learners and players in relation to environments typically found in sport, it is necessary to first understand the individual as an information processor who must sample information from the environment, interpret it, organize or select an appropriate motor response, and execute that response. One of the most difficult processing tasks in sport is motion prediction. To examine motion prediction it is necessary to consider factors about the individual, the environment, and characteristics of the object which affect the successful completion of the

goal. The factors about the individual which necessitate prediction are processing, delays, movement organization, reaction time, and movement time. It is also necessary to consider other variables such as depth perception, just noticeable difference, age, and experience. Aspects of the environment which affect performance are the number of potentially relevant stimuli in the environment, the placement of stimuli in the environment, the size of the display, the complexity of the background, the signal-to-noise ratio, and the degree of prominence of the regulatory stimuli. It is also possible to make some tentative statements on the effect of object characteristics on performance. Variables which may be considered are speed, direction, angle, viewing time, prediction distance, and object flight characteristics. Knowledge of the characteristics and effects of these three factors should aid teachers in facilitating learning and performance in skills. (BD)

How to Work with Advisories. Report No. 73.

New England Program in Teacher Education, Durham, N.H.

Pub Date 74

Note—11p.

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*Advisory Committees, \*Citizen Participation, \*Community Action, Community Cooperation, \*Community Involvement, \*Community Role, Policy Formation, School Community Cooperation

The first rule for setting up and working with an advisory is to know that their advice is needed and should be valued. An advisory ensures that advice is received from segments of the community that usually have no voice in policy making. The purpose of the advisory should be established immediately. Familiarization with holidays, vacations, budgeting periods, and other events that will affect the advisory should then take place. Once the basic purpose of and the context in which the advisory must operate has been agreed on, membership becomes an issue. It is essential that care be given to the kinds of people that should be on an advisory. The process of developing membership is continuous; as people agree to serve, a sense of what other kinds of people are needed is developed. After membership selection is completed, the first meeting should be planned. The agenda for the first and subsequent meetings should be worked out in advance with several members and then checked for acceptance with the whole group at the beginning of the meeting. Hopefully, by the end of the first meeting the group will have (1) shared a common understanding of their mission; (2) selected a temporary chairman; (3) reached agreement on how often, when, and where to meet; and (4) settled on an agenda or process for creating an agenda for the following meeting. Planning and Costing Implications in American Teacher Education Programs.

New England Program in Teacher Education, Durham, N.H.

Pub Date Aug 74

Note—14p.

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*Cost Effectiveness, Costs, Educational Finance, \*Educational Innovation, Educational Planning, \*Models, \*Program Costs, \*Teacher Education

This report presents a costing model for teacher education programs. It explains that this is necessary since most teacher education innovations in the United States extensively use technological support, and involve high cost personnel, materials, and systems. The report also notes that the present state in planning and cost projections requires not only establishing present and projected realities as to type of school, instructional program, personnel, organization, and management system; but that it also requires organizing the pieces of the training support system in order to support this proposed reality. The report then presents a model for personnel development which specifies activities that surround and support the training event, so that cost factors can be analyzed. The report also describes some of the situational factors which surround the event, and which may or may not affect cost. All

of the factors involved in the training event have an actual social and financial or personnel cost, and each has its own outcomes as well. According to the report, the model makes it possible to sort out these outcomes as well as to identify and project cost for the training event outcome itself. The report also states that the model enables evaluation of training programs, identifies gaps to be filled, and points out where redundant effort has been placed. (BD)

Document Not Available from EDRS

Descriptors—Discussion Experience, \*Emotional Response, \*Group Discussion, Inservice Teacher Education, \*Psychological Patterns, \*Role Playing, \*Simulation, Sociodrama, \*Teachers

This series on stress training for teachers includes three film modules. They are meant to be shown in sequence, but with at least two hours of discussion between each. The purpose of these modules is not to communicate or entertain, but to stimulate discussion and role playing. The series attempts to encourage each teacher to find his/her own way to deal with feelings of anger, fear, pain, and compassion. Each film portrays possible situations and shows how an individual teacher reacts to them. Other reactions by teachers and students are interspersed. No judgment is made in the film as to whether these reactions are right or wrong. The first module deals with feelings of humiliation and anger, the second with fear, and the third with compassion. Included with the films is a leader's guide which makes suggestions for preparing for the session and aids in leading the discussion following each film. (PB)

Descriptors—Discussion Experience, \*Drug Abuse, \*Drug Education, Emotional Response, \*Group Discussion, Inservice Teacher Education, Psychological Patterns, Reactive Behavior, \*Self Concept, \*Teachers

These two film modules dealing with self awareness on drug abuse for teachers comprise an inservice program of affective education. Each film portrays possible situations and shows how an individual teacher reacts to them. Other reactions by teachers and students are interspersed. No judgment is made in the film as to whether these reactions are right or wrong, since the purpose of these modules is not to communicate or entertain, but to stimulate discussion and role playing. The first film deals with humiliation and anger, and the second with fear and compassion. Included with the films is a leader's guide which makes suggestions for preparing for the session and aids in leading the discussion following each film. Teachers' worksheets for each film module are also included. (PB)

**Descriptors**—Behavioral Objectives, Educational Accountability, Evaluation, Governance, \*In-service Teacher Education, \*Performance Based Teacher Education, Performance Criteria, \*Teacher Associations, \*Teacher Education

This monograph presents the viewpoints of the American Federation of Teachers (AFT) and the National Education Association (NEA) on the subject of Performance Based Teacher Education (PBTE). These manuscripts, solicited from members of the staffs of these two major teacher organizations, describe the concerns that members of the profession have concerning PBTE. The first paper, by a representative from AFT, begins by focusing on the political origins of the competency movement. It then discusses abstract definitions and program realities of PBTE, as well as the kinds of considerations that must go into deciding whether or not the competency based movement will have an impact on improving the quality of teacher education. The second paper, by a representative from NEA, begins by considering the negotiable interests of teachers in teacher education, and why teachers want and require a major role in the activities in teacher education. The paper goes on to stress the need for alternative models in teacher education. A discussion of specific issues in PBTE which are of concern to teachers, and the importance of the continuing education of teachers and other educators concludes this paper. (RC)

**Descriptors**—\*Ancillary Services, Behavioral Objectives, Information Centers, \*Instructional Materials Centers, \*Performance Based Education, Performance Criteria, \*Resource Centers

Competency based education changes the teacher's role from that of a deliverer of information to that of a manager of learning. In order for the teacher to be able to fulfill this function, it is essential that support mechanisms be established and maintained. Whatever support mechanisms are to be created should evolve from the objectives learners will be asked to accomplish. One simple hierarchy to use for this task includes knowledge level objectives, performance level objectives, consequence level objectives, and affective objectives. Since knowledge level objectives are normally the foundation on which the others are built, the creation of a resource center will play an important part in the development of all four levels of the hierarchy. The purpose of the center should be to provide a gathering point for students, to provide all materials necessary to achieve specified objectives, and to have help available when necessary. Learning packets or modules should be stored and distributed, and pre- and postassessments administered when appropriate. Materials such as filmstrips, videotapes, and simulations should be provided to support module objectives, and the center should have study tables, small group rooms, and learning carrels. (The major portion of this report describes the resource center in detail, including personnel, physical facilities, reference systems, furnishings, and equipment considerations.) (MK)

**Descriptors**—Athletic Coaches, \*Athletic Programs, \*Athletics, Extramural Athletic Programs, \*Historical Reviews, Intercollegiate Programs, Intramural Athletic Programs, \*Physical Education, \*Recreational Activities

College sports were started by students in the post Civil War period of the 1860's and 1870's. By the 1880's football, baseball, crew, and track and field were popular intercollegiate sports. The desire of the nation as a whole for diversion after World War I provided an impetus for sports in general and intercollegiate athletics in particular. During the 1920's intercollegiate athletics reached unprecedented popularity. New sports such as basketball, golf, tennis, soccer, lacrosse, swimming, gymnastics, and fencing were added to the program. Colleges were forced to provide new facilities, including large stadiums and new and bigger gymnasiums for popular indoor sports. This increased emphasis on college athletics led to some serious problems, such as commercialism, proselytizing and subsidization of athletics, and coaches who believed in winning at any cost. The formation of the National Collegiate Athletic Association in 1906 resulted in colleges and universities assuming some control over their athletic programs. This in turn created a number of administrative problems. Fortunately, during this period physical education was undergoing some changes too, and its new emphasis on games and sports moved it closer to the athletic programs. By the end of the decade the merger was complete, and the physical education teacher and athletic coach were one and the same. (Author/RC)

This report briefly describes the recent search for personal and interpersonal growth which has been termed the "Human Potential Movement," and the institutions or "growth centers" which have evolved as a result of this movement. It presents a list of body, nonverbal, and movement experiences derived from descriptive literature of the growth centers identified in the 1974 annual list of such centers published by the Association for Humanistic Psychology (AHP), as well as others not included on the AHP list. The report contains an alphabetical listing of 21 of the more common approaches to body, nonverbal, and movement experiences with many of their meanings presented. The report also includes a bibliography and a reference list for further information about the approaches listed. (BD)

**Survey of Teachers' Salaries in U.S. Public School Systems with Statistical Appendix.**

American Federation of Teachers, Washington, D.C.

Pub Date Mar 75

Note—66p.

Available from—Order Department, American Federation of Teachers, AFL-CIO, 1012 14th Street, N.W., Washington, D.C. 20005 (Item No. 84; \$2.50 for Nonmembers, \$1.00 for members)

**EDRS Price MF-\$0.76 HC-\$3.32 Plus Postage**

**Descriptors**—\*Elementary School Teachers, Elementary Secondary Education, Salary Differentials, \*Secondary School Teachers, \*Statistical Surveys, \*Tables (Data), Teacher Employment, \*Teacher Salaries

This survey of salary schedules for classroom teachers (elementary and secondary), is primarily a listing of the 1974-75 salary schedules of more than 880 school systems. It also provides a statistical appendix which includes tables showing salaries for college graduates, comparative average annual salaries of professional occupations, cost-of-living and family budget information, and AFT vs NEA salaries. The data presented reveal that this year's average salary increase again failed to keep pace with inflation. The survey also shows that beginning salaries for teachers with bachelor's and master's degrees increased by about 6 per cent over the previous year. In addition, a marked reversal of the narrowing differential between starting salaries in public school teaching and private industry is indicated. (BD)

**Women Teachers in Newfoundland and Labrador 1972: A Statistical Description.**

Memorial Univ., St. John's (Newfoundland). Faculty of Education.

Pub Date Jan 73

Note—158p.

**EDRS Price MF-\$0.76 HC-\$8.24 Plus Postage**

**Descriptors**—Foreign Countries, Job Satisfaction, \*Questionnaires, \*Statistical Analysis, Surveys, \*Teacher Attitudes, \*Teacher Characteristics, Teacher Salaries, \*Women Teachers

**Identifiers**—Canada, \*Newfoundland (Labrador)

This statistical survey of women teachers in Newfoundland and Labrador was financed by the Faculty of Education at Memorial University and was carried out under the auspices of the Department of Education. A 17 page questionnaire was mailed to a provincial sample of women teachers who were teaching during the 1971-72 school year. It was designed to elicit a wide range of information on biographic and demographic characteristics, career development and satisfaction, professional interests and attitudes, and economic consideration. This report is the first in Canada to present descriptive information of women teachers both comprehensive in scope and generalizable to a provincial population. It is intended that the data on which this normative report is based will be used for a series of analytical studies on such questions as (1) determinants of professional and community involvements of women teachers, (2) factors affecting women teachers' support of militant professionalism, (3) determinants of the probability of women teachers making permanent careers in teaching, (4) analysis of the work satisfaction of women teachers, and (5) women teachers' attitudes

toward their professional training. The body of the report presents the data collected in 31 statistical tables. Appendixes are attached which include the questionnaire, a guide for assistance in completing the questionnaire, and followup letters. (BD)

**An Introductory Handbook for Developing Community and School Partnership.**

New England Program in Teacher Education, Durham, N.H.

Pub Date Jul 75

Note—106p.

**EDRS Price MF-\$0.76 HC-\$5.70 Plus Postage**

**Descriptors**—Change Agents, Group Behavior, \*Group Experience, Models, \*Program Development, \*School Community Cooperation, \*School Community Programs, \*School Community Relationship

This handbook is intended to provide local school personnel, teachers, and parents with guidelines for developing a partnership for improved programs. It is divided into seven sections. Section 1 discusses the range of concepts in school-community partnerships. This section, as well as the next two sections, includes rating scales, worksheets, and items for discussion. Section 2 presents models for group involvement, and models for program development are discussed in section 3. The next section contains examples of forms to be used in monitoring and evaluation of the program. Selected references are listed in section 5, and section 6 is an example of a test to measure behavior of persons in groups. The final section describes the processes a change agent must complete to effect innovation. (RC)

**An Introduction to Simplified Performance Management Approaches. Report No. 98.**

New England Program in Teacher Education, Durham, N.H.

Pub Date Jul 75

Note—91p.

**EDRS Price MF-\$0.76 HC-\$4.43 Plus Postage**

**Descriptors**—Adoption (Ideas), Educational Innovation, \*Management by Objectives, \*Management Systems, \*Objectives, Principals, \*Supervision, \*Systems Approach

**Identifiers**—\*Teacher Corps

This guide to simplified performance management approaches contains five sections. The first section, entitled "Simple Techniques for Managing an Innovation," is written from the viewpoint of a principal as manager. It describes how to manage an innovation, develop an objective, allocate resources for the innovation, keep organized records, and assess the program. There are many worksheets and charts included in this section. The second section is a discussion of the origins and the current state of management by objectives. The next section tells project directors how to implement a management and supervision by results approach, and how to evaluate the outcomes. This section also includes charts and worksheets. Innovation adoption is the subject of the next section. It is entirely composed of charts and forms to be completed. The final section is an introductory workbook to management by objectives for Department of Education personnel. It is divided into an introduction, an overview of management by objectives, a description of how to develop an objective, and a description of how to use objectives to manage activity. There are also several worksheets and charts in this section. (RC)

**Organization Patterns and Decision Making Patterns in Teacher Corps Projects.**

New England Program in Teacher Education, Durham, N.H.

Pub Date Jul 75

Note—24p.

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

**Descriptors**—Community Coordinators, \*Decision Making, \*Decision Making Skills, \*Educational Programs, \*Organization, Workbooks

**Identifiers**—\*Teacher Corps

This guide to organization and decision making patterns in a Teacher Corps project is in the form of a workbook. It contains several forms and

worksheets to be completed. There is a discussion of decision making patterns and a review of decision making skills. It is stated that to make good decisions, one needs skills to (1) identify the persons involved; (2) identify how those persons make decisions; and (3) identify if, when, and how a decision is made. There is an appendix containing the Teacher Corps definition of the community coordinator role. (RC)

**A Guide to Improving Skills of Teachers in: (a) Team Building, (b) Team Operations, (c) Team Planning, (d) Team Evaluation.**

New England Program in Teacher Education, Durham, N.H.

Pub Date Aug 75

Note—25p.

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

**Descriptors**—Evaluation Needs, Inservice Teacher Education, Open Plan Schools, Program Development, Teacher Developed Materials, \*Teaching Methods, Teaching Skills, \*Team Teaching, \*Team Training, \*Teamwork, \*Training Techniques

This guide is a product of two teams of teachers who worked together to develop teaming techniques for open space schools. The purpose of the guide is to outline suggested steps to follow as various team teaching possibilities are implemented. The guide is organized in the following sections: (1) team building, (2) team operations, (3) team planning, and (4) team evaluation. The first section states that after the individuals have been grouped for teaming there exists a series of steps necessary for the continuing process of building the team and maintaining its effectiveness. The steps are then listed along with decisions the team must make. The second section lists the policies and rules to be considered when a group is establishing its operational framework. The section on planning discusses the process involved in assessment of students needs, and presents steps and procedures to meet these needs. The final section states that evaluation is the key to the successful operation of any team. Several evaluation forms are included as examples of the different ways of evaluating teams. (RC)

**Implications of Learning Theory in a Systems Approach to Supervision.**

Note—22p.

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

**Descriptors**—Autoinstructional Aids, Individualized Instruction, \*Instructional Design, Performance Criteria, Practicums, \*Practicum Supervision, \*Student Teachers, \*Student Teaching, \*Systems Approach, Teaching Skills

This report presents the results of a curriculum project which produced an instructional design for field supervision. The primary objective was to operationalize the "systems approach" to field supervision by showing how the theory/practice synthesis, learning theory, and variation of newer instructional designs could be used in the student teaching practicum at the University of Illinois, Chicago Circle Campus. The instructional design, placed in the context of learning theory, consists of nine components and a flow chart model depicting the components and their relationships in achieving objectives applicable to a specific skill(s) or concept needed by the student teacher. Included in the report are guidelines for developing a self-instructional package (SIP) focusing on a specific skill or concept needing mastering by the student teacher. The concomitant use of the SIP based on this instructional design in a learning/teaching classroom setting is intended to (1) provide self-paced, individualized learning for the student teacher; and (2) provide systematic feedback and evaluation of the student teacher's performance by both the classroom cooperating teacher and the college supervisor. A self-instructional package, with self-contained units, developed within the framework of a nine-component instructional system is currently being used to help students acquire specific skills associated with the open classroom concept.  Identifiers—Elementary Secondary Education Act Title III, ESEA Title III

The major goal of the "Learning Tutors Offer Instructional Assistance" project was to effect positive academic, social, and attitudinal changes in the participant. The participants included high school tutors and elementary school tutees who met and worked together on a daily basis. The activities for the tutorial sessions were decided upon cooperatively by the tutor and the tutee's teacher. The sessions took place at "Tutor Stations" which were located in the hallways of the elementary school, in quiet corners of some classrooms, or in unused rooms. To implement the program a preschool training program was conducted to permit the involved staff to develop the tutoring program. Tutoring kits were completed that contained instructional materials and progress charts. Tutors were then trained by the elementary teachers. The tutors were evaluated on the basis of interviews with their parents, their teachers, the tutee's teacher, and the tutors themselves. The experience may have helped to maintain the tutor's academic growth and did enhance their desirable personal qualities. Evaluation of the tutees was conducted by interviews with their parents, their teachers, their peers, and the tutees themselves. The tutees made very satisfactory progress with regard to their personal development and academic performance. (RC)

Descriptors—\*Developmental Programs, \*Directories, Educational Resources, Guidelines, \*Manuals, \*Resource Guides, \*Staff Improvement, Staff Orientation

Identifiers—\*New Hampshire

This handbook/catalogue is divided into three parts, the first of which is entitled "Handbook for Staff Development," and was written for those new to New Hampshire, the education profession, or the concept of staff development. It contains background information, philosophy, and procedures on staff development; it seeks to encapsulate the conceptual origin of staff development and explain its philosophy as it affects the individual staff member and local supervisory union/district. It explains how staff development is organized within the district and how it can be implemented and evaluated, and offers sources of information available to local districts. Part 2 is a list of the names, titles, addresses, and telephone numbers of educational resource people. These are listed alphabetically by subject area and include 75 subjects such as activity-centered classrooms, administration, adult education, arts and crafts, behavior, career counseling, communication skills, curriculum, day care, ERIC, health, library services, news media, physical education, and vocational counseling. Part 3 of this handbook/catalogue is a directory of external resources, and includes listings on (1) arts resources; (2) boat cruises; (3) educational resources; (4) historic resources; (5) organizational and state agency resources; (6) places of interest; and (7) science centers. The entries consist of the name, address, and telephone numbers of the place or organization, and sometimes an annotation. (BD)

Identifiers—\*Connecticut

This report describes 11 pilot projects which were initiated by the Connecticut Joint Teacher Education Committee (JTEC). The JTEC, which was created to administer two Public Acts established in 1968, consists of members of the Commission for Higher Education and members of the State Board of Education. The two Public Acts provide funds to establish pilot projects in teacher education. The JTEC set up an advisory committee representing a variety of interests to stimulate project ideas. The major part of this report is the description of the 11 pilot projects which were accepted for funding. Each project description includes theory, actual experiences, and, in some cases, a survey of the project's effectiveness. The projects concern merging theory and practice, the inner city, language and cultural differences, the handicapped, day care centers, junior high school students, individually guided education programs, the audio-tutorial technique of instruction, open classrooms, affective education in teacher training, and performance objectives. The report recommends that ideas which emerge from these projects be incorporated into the mainstream of teacher education in the state. It then lists those suggestions it feels would result in better teacher education in Connecticut. (MK)

**Personal Inquiry in the Classroom: An Alternative Approach to Educational Research.**

Washington Univ., Seattle. Educational Assessment Center.

Pub Date Aug 75

Note—12p.

Available from—Educational Assessment Center, University of Washington, 1400 Campus Parkway, PB-30, Seattle, Washington 98195 (No price quoted)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—Behavioral Objectives, \*Classroom Research, Educational Research, \*Student Motivation, \*Student Teacher Relationship, \*Teacher Influence, \*Teacher Role, Teaching Methods

A method of individual classroom research is proposed and demonstrated in this paper. Its purpose was to show that by capitalizing on baseline data collected from a similar prior class and focusing treatment on difficult test items, the instructor can develop sensitive within-class designs for the detection of treatment effects. An experiment using written objectives given to students to aid their learning and using the single classroom design shows that objectives significantly improve learning. The experiment was conducted with 54 students in an introductory psychology class at the University of Washington. Students were given lecture objectives but no objectives for the reading assignments for the first four week period. During the second four week period a reversal was made and objectives were given with the reading assignments but not with the lectures. Student performance was measured with multiple choice test questions. In addition to improving learning, the experiment showed that written objectives interact with item difficulty. These results lead to the recommendation that instructors engage in personal inquiry into their efforts to influence student learning and that such inquiry be added to the educational research literature. **Handbook for Supervision of Personnel in Performance Based Management Organizations.**

New England Program in Teacher Education, Durham, N.H.

Pub Date Sep 75

Note—21p.

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*Employer Employee Relationship, Guides, \*Management by Objectives, \*Manuals, \*Organizational Development, Personnel Evaluation, \*Personnel Management, \*Supervision, Supervisors

The purpose of this handbook is to provide some tools for supervision which can help the employer and the employee work out expectations, evaluation, and on-going operations. It is divided into four sections entitled (1) Describing Performance Characteristics, (2) Negotiating Outcomes, (3) Negotiating Procedures, and (4) Recording Performance. The handbook presents materials which make it possible for an employee and a supervisor to negotiate simple written agreements. These materials include examples of a rating scale describing performance characteristics, a performance needs analysis document, pre- and post-negotiations sessions checklists, and quarterly reports. These tools make it possible for human dimension to be identified and supported while providing structures for clarifying and specifying organization objectives, the individual employee's role in supporting these objectives, and the supervisor's task of reporting performance in terms of organization requirements.
